The Extended Health Benefits program provides a range of health benefits to individuals and families who experience high health costs. Eligibility for the program is determined based on need and is open to members of Aroland First Nation aged 16 to 65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies, and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Aroland First Nation, 2023e).

3.3.4.6 Immunization Clinic

The Immunization Clinic offers inoculations or other preventive measures to help individuals avoid specific controllable diseases. This clinic is designed to serve members of Aroland First Nation, ensuring that they receive the necessary vaccinations to protect against common illnesses (211 Ontario North, Aroland First Nation, 2023f).

3.3.4.7 Medical Transportation Program

The Medical Transportation Program provides transportation services from/ to Aroland First Nation Settlement to any medical appointments (doctor, dentist, optometrist) in the towns of Nakina and Geraldton. Exceptions for travel to Thunder Bay are made on a case-by-case basis. This program also provides assistance with completing prior approval applications for long distance medical appointments and it is also designed to process Non-Insured Health Benefits Service claims. Eligibility for this program is limited to members of Aroland First Nation who require assistance with transportation to medical appointments or Non-Insured health benefits applications (211 Ontario North, Aroland First Nation, 2023g).

3.3.4.8 Traditional Healing Services

Traditional healing services are offered by Matawa First Nations Management. Mental Wellness Team & Crisis Support Services provide a rapid response to Matawa First Nations communities, families, or individuals when they experience crisis. The services include grief/ trauma counselling, cultural support, and care coordination. The program's approach is to provide service with a balance of clinical and traditional cultural practices (Matawa First Nation, 2023b).

DRAFT

3.3.4.9 Non-Insured Health Benefits (NIHB) program

The NIHB program is a national program which is designed to support First Nations people in reaching an overall health status that is comparable with Canadians. The program designed to help individuals maintain their health, prevent disease, assist in detecting and managing illnesses, injuries, and disabilities. It may cover the costs of some, or all of the following: dental, medical supplies & equipment, medical transportation, eye & vision care, short-term crisis intervention mental health counselling, and health benefits outside of Canada.

The NIHB program may provide medically necessary goods and services when they are not covered by provincial or other third-party health plans. Third party health plans are ones usually provided by private insurance companies through a paid premium by the purchasing individual. The benefits and services of the NIHB Program are often coordinated with other insured health care programs offered in Ontario (Matawa First Nation, 2023c).

3.3.4.10 Matawa Non-Insured Health Benefits (NIHB) Client Navigator

The Matawa NIHB Client Navigator assists the nine Matawa First Nations and its' members who are clients of NIHB services to provide support, advocacy and coordination of care and services. The program works in collaboration with First Nations health staff, other health care providers, organizations, and institutions to facilitate improved care. The program also assists members to access Jordan's Principle resources (Matawa First Nation, 2023c).

3.3.4.11 Matawa Health Cooperative (MHC)

Incorporated in 2017, the Matawa Health Co-operative (MHC) is a Matawa First Nation owned and controlled health co-operative that provides health care services to enhance existing health services to achieve long-term health and well-being for all members within the 9 Matawa First Nations. It is overseen by a Board of Directors and is a member of the Health Care Co-operatives Federation of Canada. The MHC is community-driven with available services being tailored to individual community's needs. It is the first of its kind in Canada. The MHC works to incorporate traditional healing and medicines in addressing the holistic health needs of the Matawa First Nations focusing on the priorities of mental health and addictions, diabetes, and chronic diseases. It oversees an Inter-Professional Primary Care Health Team providing direct services in the Matawa First Nations or through telemedicine (Matawa First Nation, 2023d).

3.3.5 Recreational Services

Aroland First Nation offers recreational facilities including an outdoor hockey rink, school playground, community hall with playground, pow wow grounds and a sports field (Northwest Health Line, Aroland First Nation 2023).

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation rates were higher among non-Indigenous youth in Canada compared to Indigenous youth (Statistics Canada, 2021b). However, when comparing First Nation youth living on-reserve to First Nation youth living off-reserve, those that live off- reserve are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities for the Aroland First Nation using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on education and training services and facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

DRAFT

Aroland First Nation has one school on-reserve, the Johnny Therriault Memorial School, which offers schooling from junior kindergarten to Grade 8 (211 Ontario North, Aroland First Nation, 2023h). The school serves approximately 100 students (Aroland First Nation Education Authority, 2019). For high school, students are provided bus transportation to Geraldton High School (211 Ontario North, Aroland First Nation, 2023h). Matawa Post Secondary provides financial, academic and tutoring support for students to assist in meeting their educational goals (Matawa Education, 2019c). Aroland First Nation members can also take part in training and certification courses offered by KKETS (Kiikenomaga Kikenjigewen Employment & Training Services, 2023).

Aroland First Nation students have the opportunity to take part in Matawa's Education and Care Centre's Outdoor Education Program and Matawa's Education and Care Centre's Elders Program (Matawa Education, 2019a). The outdoor education program is made up of 6 land-based and outdoor learning credits and allows students to connect with the land and water. Activities include (but not limited to) trapping, outdoor skills, camping, canoeing, and fishing (Matawa Education, 2019a). Students travel from one Matawa First Nation to another during this program. The Elder's program supports Elder's going into the community to provide support to students with traditional activities such as: smudging, big drum making, hand drum making, drumming, feasts beading, traditional teachings, storytelling, workshops, traditional medicines, hide tanning, hunting and trapping (Matawa Education, 2019b).

3.5 Emergency and Protective Services

The Socio-Economic Baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

Police services in most Indigenous communities in the Nishnawbe Aski territory are provided by Nishnawbe Aski Police Services (NAPS), the Anishinabek Police Service (APS), municipal police services, or the Ontario Provincial Police (OPP). Fire services typically include both volunteer, and community and municipal fire services and departments.

NAPS is the largest First Nations police service in Canada, serving 34 communities in the Nishnawbe Aski Nation territory which covers two-thirds of Ontario (NAPS, 2023). NAPS is headquartered in Thunder Bay and divided into three regions – Northeast, Northwest and Central Region (NAPS Detachments, 2023). They currently employ 230 uniformed officers and 40 civilians (NAPS, 2023).

Police services in Aroland are provided by two NAPS constables (NAPS, 2023). OPP are also available by emergency dispatch.

Ambulance is provided by Superior North EMS, which is co-located at the Nakina Medical Clinic in Nakina.

A volunteer fire department is located in Aroland and made up of members of the Aroland community.

3.6 Community Infrastructure

Socio-Economic Baseline includes a description of the following Community Infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

DRAFT

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in Aroland First Nation is described in Table 3-14.

Table 3-14: Description of Community Infrastructure in Aroland First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 1 Water treatment plant built in 1993. ▪ Water Quality: No current drinking water advisories	▪ Level 1 wastewater system Constructed in 1995. ▪ Facultative Lagoon. ▪ Effluent Quality: meets federal guidelines.	Hydro One Zone 7 – Nakina Distribution Station (DS)	MNR landfill site.

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2021; Hydro One, 2021; Hydro One 2018; Five Nations Energy Inc., 2021; Wataynikaneyap Power, 2021; Government of Ontario, 2021

3.7 Transportation

The Socio-Economic Baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the Socio-Economic Baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, including Aroland First Nation, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure available in the region, including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd, 2016).

The remote First Nations communities are accessible only by remote airports or by winter roads, while some other communities including Aroland First Nation, have access to the provincial highway network.

DRAFT

3.7.1 Winter Road Traffic Volumes

Information is not currently available/section not complete.

3.7.2 Air Transportation Network in Aroland First Nation

Information is not currently available/section not complete.

3.7.3 Waterways in Aroland First Nation Traditional Territory

Waterways are an integral part of community life. Waterways have been and continue to be an important socio-cultural and economic part of daily life of Indigenous communities. They connect families and friends and provide an important part of the transportation network.

Aroland First Nation territories fall within the secondary watershed of Kenogami River (Government of Ontario, 2023.

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The Socio-Economic Baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key Socio-Economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four Socio-Economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that “well-being” means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people’s overall “well-being.”

The four socio economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

DRAFT

Table 3-15: CWB Index Scores for Aroland First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	58	40	69	54	71
First Nations in Ontario	59	38	72	53	70
Aroland First Nation	56	34	69	48	75

Source: Indigenous Services Canada, 2019b.

Aroland First Nation has a low CWB score for education (34), in comparison to First Nations in Canada (40) and First Nations in Ontario (38).

Aroland First Nation’s income score is 48, which is comparable to, but below those of First Nations in Canada (54) and First Nations in Ontario (53).

With a score of 69, the Aroland First Nation score for labour is on par with First Nations in Canada (69) and comparable to, but below, First Nations in Ontario (72).

Aroland First Nation has a housing score of 75, which is higher than First Nations in Ontario (70) and First Nations in Canada (71).

Aroland First Nation with a score of 56 for overall community well-being and safety, is comparable to, but slightly below that of First Nations in Ontario (59) and First Nations in Canada (58).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments responsible for serving Indigenous communities in Canada (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-16 provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the OPP. The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (Ontario Provincial Police (OPP), 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-16: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total crime, rate, 2021*	Total violent crime, rate, 2021*	Total sexual assault, rate, Level 1, 2021*	Total drug violations, rate, 2021*
Nishnawbe-Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224
James Bay, OPP, rural	10,911	3,948	202	348

Note: *Data are reported as rates of 100,000 people.

DRAFT

ECONOMIC ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

4. Economic Environment

4.1 Labour Force and Employment

Indigenous people are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live. The traditional economy is an important cultural and economic aspect of community life.

Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for Aroland First Nation.

The following section provides an overview of population and demographics at a district level.

4.1.1 Labour Force Characteristics

Table 4-1 presents the forecasted working age population in the Thunder Bay District over the projection period, 2021 to 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada 2017, 2022a). The values for 2028, 2023, and 2043 were forecast based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64:

- The working age population is decreasing over the projection period; and
- Based on current growth trends, the working age population is forecasted to decrease by 14,346 between 2016 and 2043, a decline of approximately 15%.

Table 4-1: Projected Working Age Population in Thunder Bay District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	95,930	100%	47,935	50.0%	47,990	50.0%
2021	93,095	100%	46,665	50.1%	46,430	49.9%
2028	89,266	100%	44,943	50.3%	44,331	49.7%
2033	86,628	100%	43,753	50.5%	42,890	49.5%
2043	81,584	100%	41,465	50.8%	40,147	49.2%

Source: Statistics Canada, 2017; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-2 presents the breakdown of the population in the labour force and those not in the labour force for Thunder Bay District in 2021.

DRAFT

Table 4-2: Labour Force Participation in in Thunder Bay District (2021)

Labour Force Participation	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
In the labour force	70,930	100%	36,660	51.7%	34,270	48.3%
Not in the labour force	51,825	100%	24,080	46.5%	27,740	53.5%

Table 4-4 presents the number of jobs by 1-digit NOC[1] code for 2018 and 2022 in Thunder Bay District.

- Sales and service occupations is the leading job category in the Thunder Bay District with 17,113 jobs in 2022 which accounts for 25.6% of the total jobs;
- The Thunder Bay District has seen an increase in 6 occupational categories between 2018 and 2022 with an overall increase in jobs of 2% over the 4 years; and
- The occupational category with the largest percentage increase over the period was health occupations with a 21% increase.

DRAFT

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

Table 4-4: Thunder Bay District – Occupations by Category (2018 – 2022)

Occupation Categories	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Business, finance and administration occupations	8,931	9,215	284	3%
Natural and applied sciences and related occupations	3,808	4,121	313	8%
Health occupations	6,066	7,320	1,254	21%

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the Land. The knowledge passed on from the ancestors sustains Aroland identity and way of life.

Table 4-5 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Thunder Bay District for 2021.

- The majority of the population has a certificate, diploma, or degree at 54.2%; and
- 18% of the Thunder Bay District does not have a certificate, diploma, or degree, males make up 51.2% and females account for 48.8%.

Table 4-5: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
No certificate, diploma or degree	22,050	18.0%	11,360	18.7%	10,685	17.2%
High (secondary) school diploma or equivalency certificate	34,135	27.8%	17,035	28.0%	17,100	27.6%
Postsecondary certificate, diploma or degree	66,565	54.2%	32,340	53.2%	34,220	55.2%

DRAFT

Table 4-6 presents the major fields of study for the Thunder Bay District population aged 15 and over who had obtained a postsecondary education as of 2021.

- The major fields of study most commonly studied were architecture, engineering, and related trades which includes but is not limited to construction trades, precision production, mechanic and repair technology, engineering, and historic preservation and conservation;
- The most commonly pursued fields of study for males were architecture, engineering, and related trades; and
- The most commonly pursued fields of study for females were health and related fields.

Table 4-6: Major Field of Study for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2021)

Highest Level of Education	Total		Male		Female

DRAFT

4.1.3 Labour Income

Table 4-7 presents the total individual income by group for the population aged 15 and over for 2020 in the Thunder Bay District by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999 with 12.7% and 16.6%, respectively;
- The smallest individual income group for both male and female is $150,000 and over with 3.9% and 1.2%, respectively;
- In 2020, there were 1,615 more females than males with individual incomes; and
- In 2020, 74.8% of females were making under $60,000 while only 61.4% of males were within this group.

Table 4-7: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2020)

Income Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Under $10,000 (including loss)	8,235	6.9%	3,645	6.2%	4,590	7.6%
$10,000 to $19,999	13,570	11.4%	5,610	9.6%	7,960	13.2%
$20,000 to $29,999	17,420	14.7%	7,410	12.7%	10,005	16.6%
$30,000 to $39,999	15,650	13.2%	6,900	11.8%	8,750	14.5%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-8 presents the total household income for private households in 2020 in the Thunder Bay District.

- The majority of households have an income level between $100,000 to $124,999 at 11.7%;
- The smallest household income group is $5,000 to $9,999 at 0.5%; and
- Approximately 50% of households bring in under $80,000 while the other half bring in over $80,000.

Table 4-8: Total Household Income Groups for Private Households in Thunder Bay District (2020)

Income Group	Count	Distribution

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in the Thunder Bay District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from MNRF, Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product (GDP)

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Thunder Bay District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 4-10 presents the GDP for the Thunder Bay District between 2016 and 2021 (Statistics Canada, 2022a).

- Between 2016 and 2021 there was an approximate growth in GDP of 4% in the Thunder Bay District; and
- GDP is growing at a constant rate over the period between 2016 and 2021.

Table 4-9: Total Household Income Groups for Private Households in Thunder Bay District (2020)

Year	2016	2017	2018	2019	2020	2021	2016 – 2021 Change	2016 – 2021 % Change	Income Group
GDP	4,564	4,575	4,616	4,658	4,700	4,744	180	3.9%	Under $5,000

Source: Statistics Canada, 2022a.

4.2.2 Cost of Living

The cost of living in the Thunder Bay District is considerably lower than other major Canadian cities. The District of Thunder Bay was ranked number 1 out of 227 major urban international cities for affordable housing. According to the 2018 Rental Market Report, renting a two-bedroom in the District costs an average of $1,037 per month, approximately $600 less than Vancouver. A one-bedroom apartment averages $883, 58% less than Toronto (Webster, N.A.).

While Thunder Bay ranks well in comparison to other major Canadian cities, that does not make it affordable. The Market Basket Measure (MBM) threshold for Thunder Bay is $44,300 per year (Krysowaty, 2021). The MBM refers to Canada's official measure of poverty based on the cost of a specific basket of goods and services representing a modest, basic standard of living developed by ESDC. The MBM thresholds represent the costs of specified qualities and quantities of food, clothing, shelter, transportation, and other necessities for a reference family of two adults and two children (Krysowaty, 2021).

Table 4-10 presents the number of households spending 30% or more of income on shelter costs for Thunder Bay District in 2021. According to the CMHC housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

- Of the nearly 63,000 owner or tenant occupied dwellings in the Thunder Bay District, 14% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

DRAFT

Table 4-10: Distribution of Households Spending 30% or More of Income on Shelter Costs for Thunder Bay District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	53,940	86%
Spending 30% or more of income on shelter costs	9,045	14%
Total Owner and Tenant Households	**62,985**	**100%**

4.2.3 Economic Development

The Thunder Bay District is a census division in Northwestern Ontario. It is comprised of 34 census subdivisions which includes 18 Indigenous communities. The City of Thunder Bay represents nearly 75% of the Thunder Bay District population. Due to its size, the City of Thunder Bay drives a lot of the economic activity and growth within the District.

The City of Thunder Bay Community Economic Development Commission 2023-2025 Strategic Action Plan states the following action items and economic development activities as well as steps to be taken to achieve them (Thunder Bay Community Economic Development Commission, 2022):

- Grow, expand, and promote the City of Thunder Bay as the regional centre and world leader for mining and forest products services, supply, and manufacturing:
  - Position and market the City of Thunder Bay as the regional hub for services and supplies for northwestern Ontario exploration and mining projects.
  - Attract investment ready projects in manufacturing, mining, commodity processing, agriculture, and energy, promoting the added values of Indigenous partnerships.
  - Support research, innovation and the commercialization of natural resource-based commodities, products, and energy.
- Attract, integrate, and retain a highly skilled workforce focusing on our youth, national and global immigrants, and regional Indigenous communities:
  - Develop a labour attraction and growth plan to meet the current and future needs of employers.
  - Expand immigration attraction and integration services.
  - Work with partners to support Indigenous employment agencies and training organizations.
  - Through City of Thunder Bay's education system attract and retain local and Indigenous youth to enhance our future's workforce.
- Becoming Canada's premier outdoor city, weaving our connectivity to our natural environment to our signature urban culinary and cultural attractions to create memorable leisure, corporate and sport event experiences for visitors:
  - Expand and improve year-round visitor experiences through an increased focus on destination development.
  - Increase the economic impact of tourism through enhanced visitor attraction and retention strategies.
  - Support Indigenous tourism development and promotion.
  - Improve visitor movement through improved wayfinding.
  - Support tourism industry with the tools they needed to start-up, diversify, and expand.
- Drive the growth and progression of the City of Thunder Bay into a safe, welcoming community where people work, live, and play while having access to comprehensive health care, education, and employment opportunities with an affordable, high-quality lifestyle:
  - Make the City of Thunder Bay a place all people want to live and do business.
  - Promote the quality of City of Thunder Bay's lifestyle to outside markets to attract new residents, workers, and business.

DRAFT

- Support infrastructure needs of the community through building partnerships and seeking funding assistance for critical projects.
- Using community and Indigenous partnerships, identify initiatives to create welcoming neighbourhoods and public places for business.
- Maximize the City of Thunder Bay's position as the regional centre for health services in northwestern Ontario.

- Be a cornerstone and catalyst for local and regional entrepreneur support to help drive the creation of new business, and higher quality employment opportunities that offer new services and products to markets everywhere:
  - Strengthen succession planning services to address challenges and needs for small business owners.
  - Provide supports to generate new business start-ups and encourage entrepreneurship.
  - Through Indigenous partnerships, expand program development to address Indigenous small business challenges and needs.
  - Build a welcoming community for new and expanding businesses.
  - Enhance newcomer to Canada support systems.

4.3 Business Environment

4.3.1 Local Economy

Table 4-11 presents a breakdown of all 21 industries based on 2-digit NAICS[2] codes and their presence within the geographical boarders of the Thunder Bay District in 2018 and 2020. Trends of industry presence in Thunder Bay District between 2018 and 2022 are summarized as follows:

- Thunder Bay District is heavily reliant on imports to meet supply chain needs with 40% of purchases being imported.
- For Thunder Bay District, the industry providing the largest number of jobs is public administration;
- As of 2022, there are nearly 4,000 jobs in the construction industry in the Thunder Bay District;
- The Thunder Bay District had the highest total supply chain purchases (approximately $4.9 billion in 2020), while the Kenora District had the lowest (approximately $2.7 billion in 2020);
- The Thunder Bay District had the highest total demand in 2020 (approximately $13.85 billion), while the Kenora District had the lowest (approximately $7.26 billion);
- The industries with the highest growth between 2018 and 2022 include management of companies and enterprises (93%) and professional, scientific, and technical services (24%); and
- 11 of the 21 reported industries saw a decline in jobs between 2018 and 2022.

[2] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

Table 4-11: All Industry Presence in Thunder Bay District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change

Table 4-12 presents the industry supply chain, the purchases an industry makes from all other industries, in the Thunder Bay District in 2020. This table displays the value and percentage of in-region purchases and imported purchases for 2020 that are summarized as follows:

- 40% of supply chain purchases are made within the Thunder Bay District;
- The industry with the highest percentage of in-region purchases is health care and social assistance at 65%;
- The industry with the lowest percentage of in-region purchases is management of companies and enterprises at 10%; and
- Total supply chain purchases amounted to approximately $4.9 billion in 2020.

DRAFT

DRAFT

Table 4-13 presents the regional requirements, the value of goods and services demanded of the Thunder Bay District by industry in 2020. Regional Requirements show the value of goods/services purchased from an industry (either in or outside the area) in order to meet the needs of the area. The table presents the level of demand for each industry met in-region and the demand met by imports that are summarized as follows:

- Approximately one third of demand for goods and services is met in-region (30.5%);
- There are 4 industries meeting over 60% of demand within region: Other services (except public administration) (64.6%), accommodation and food services (63.7%), utilities (62.3%), and retail trade (62%);
- Only one industry (management of companies and enterprises) meet less than 10% of demand within region; and
- The total demand in 2020 was approximately $13.85 billion.

Table 4-13: Regional Requirements to Meet Demand by Industry in Thunder Bay District (2020)

Industry	In-region Purchases	% In-region Purchases	Imported Purchases	% Imported Purchases	Total Purchases
Agriculture, forestry, fishing and hunting	$93,114,000	50%	$94,071,633	50%	$187,185,633

DRAFT

4.3.2 Mining, Aggregate and Forestry Activities

Table 4-14 presents industry data for the following 2-digit NAICS[3] industries in Thunder Bay District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction; and
- Agriculture, forestry, fishing, and hunting.

[3] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data.

Each industry includes a variety of occupations which include but are not limited to:

- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above 1 indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry declined by 108 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry is above the national average;
- The agriculture, forestry, fishing, and hunting industry declined by 40 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is below the nation average with 0.96 in 2018 and 0.93 in 2022.

Table 4-14: Mining, Quarrying, and Oil and Gas Extraction Industry in Thunder Bay District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	1,262	1,154	-108	(9%)	1.6	1.5
Agriculture, forestry, fishing and hunting	651	611	-40	(6%)	1.0	0.9

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to traditional practices which include lakes and rivers for fishing and trapping corridors and trails for hunting and trapping. Many Indigenous communities rely on traditional practices, such as fishing and hunting as a source of food and income. As such, it is important to identify areas where traditional practices are used, to determine potential effects of the Project on Indigenous communities and their traditional use of lands and resources.

Aroland First Nation recognizes the following as culturally significant in their traditional harvest: moose; pickerel/ walleye; whitefish; sucker; sturgeon; trout; dace; minnows, wild rice; weekah; raspberries; blueberries (Stantec, 2017).

Sites used for traditional activities include the following: Potato Island; Blueberry Hill; Moose River; Ozhiski Lake; Pym Island; Attawapiskat River; Albany River; Winisk River; McFaulds Lake; and Muketei River (LeBlanc, 2014).

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas including travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

Aroland First Nation has a deep connection to the waters and lands in the traditional territory and a strong reliance on traditional land use activities including fishing, hunting, trapping, and gathering (Aroland First Nation, 2022).

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the Project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinabe/ Mushkeego and Métis Peoples. “The Anishiniimowin/ Anishinabe/ Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022a). The Métis homelands are also present within the James Bay Treaty area. The Anishiniimowin/ Anishinabe/ Mushkeego and Métis Peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and self-determination and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define on-going rights and obligations on all sides. These agreements set out continuing treaty rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations; and
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013)*

Treaty No. 9 was signed between the Anishiniimowin/ Anishinabe/ Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023b).

DRAFT

In April 2023, leaders from 10 Treaty No. 9 First Nations announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which the legal title is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

At this time, Aroland First Nation does not have a Land Code under the *First Nations Land Management Act* and land use is governed under the *Indian Act*.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the *Public Lands Act* (Section 6.6.2).

As described in Section 5, traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to CBLUPs initiated by Indigenous communities.

6.5 Road/ Transportation Studies

No Road/ Transportation Studies were available for review for Aroland First Nation at this time.

DRAFT

6.6 Provincial Plans and Policies

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with First Nations communities and groups, among other land uses in First Nations areas, traditional and customary use, as well as the potential for permissible use of lands for forestry, tourism, recreation, mineral exploration and mining, renewable energy, access and infrastructure, fire management, and climate change management.

6.6.2 Public Lands Act

The Ontario *Public Lands Act* provides MNRF the authority to manage Crown land. Crown land occupies approximately 87% of all land and water in Ontario with 95% of northern Ontario considered Crown Land (MNRF, 2023a). The *Public Lands Act* outlines the use, management, sale and disposition of public lands and forests (Ontario, 2022). The Act guides Ontario's public land use planning and development, regulating public and private roads on public lands.

6.6.3 The Planning Act

The Ontario *Planning Act* is provincial legislation that sets out the ground rules for land use planning. The *Planning Act* outlines how land may be used and controlled and the purpose of this Act is to make sure that planning processes are fair, open, accessible, timely, efficient and promote the best economic and environmental interest within the provincial policy framework. The *Planning Act* allows the province to integrate matters of provincial interest into municipal and regional planning decisions by requiring that all decisions that are made are in conformance with provincial plans.

6.6.4 Northern Ontario Transportation Plan

The draft Northern Ontario Transportation Plan, 2020 was developed to serve as a guide to help build a modern and sustainable transportation system for people in northern Ontario. It contains actions that will connect communities, provide safer and more reliable travel and unlock economic potential in the region. Goal 6 of this Plan outlines reliable travel options for remote and Far North communities. This plan is a living document and will be updated with actions to reflect the evolving needs of the region.

The Project is aligned with the objectives of this Plan and will support the goal of achieving sustainable development for northern Ontario.

DRAFT

6.6.5 Fisheries Management Plan

Fisheries Management Planning as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and rivers and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake and river system in a holistic manner and includes a range of management options to secure a healthy lake and river environment that conserves the diversity of the fish community and provides opportunities to contribute to the social and economic well-being of the surrounding area. Ontario is divided into Fisheries Management Zones (FMZ). Each specific FMZ outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023b).

Aroland First Nation and the majority of its traditional territory lies within FMZ 7, and limited parts of Zones 2 and 3.

6.7 Land Use Plans and Policies

Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the Socio-Economic Baseline for the Project.

Many First Nation communities have developed CBLUPs, which outline land ownership, land access, and traditional uses of the land. Traditional land and resource use is described in Section 5.

Limited information is publicly available about Aroland First Nation's documented plans for land use; however, as information becomes available through dialogue with the community, with permission from the community, information will be considered as part of the EA/IA.

6.8 Industrial Land Use

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022a). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, is done online through the Mining Lands Administrative System (MLAS).

DRAFT

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council.

To enhance Indigenous community participation, the Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act*. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022b).

There is no information on industrial land use specific to Aroland First Nation available at this time.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is also important because it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Aroland First Nation has a community hall, outdoor hockey rink, sports field and playground.

Aroland First Nation businesses – O'Sullivan Lake Gas Bar and Towedo Buslines operate within Nakina – 15 minutes from the community (211 Ontario North, 2023).

DRAFT

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Aroland First Nation settlement.

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/Anishinaabe/Mushkegowuk communities.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Aroland First Nation.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Aroland First Nation.

Re: Preliminary draft Aroland First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Gagnon,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the Aroland First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;
- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;

- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Aroland First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox

Chief Sonny Gagnon
Aroland First Nation
P.O. Box 10
Aroland, ON
P0T 1B0

Dear Chief Gagnon,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates XX.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Aquatic Habitat Preliminary Findings.**

The livestreaming event is scheduled for **April 1st, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Gagnon,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Surface Water Preliminary Findings**

The livestreaming event is scheduled for **April 8th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

April 24, 2024

Dear Chief Gagnon,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 6th from 12:00-12:45pm EST** for Aroland First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/89083057547?pwd=T3x7nT2u7OHv7Jff1aZEseHmmFS0Rt.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 890 8305 7547 **Passcode:** 306296

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

THREE ROAD PROJECTS GATHERING & EXPO

WEBEQUIE SUPPLY ROAD (WSR) • **MARTEN FALLS COMMUNITY ACCESS ROAD** (MFCAR) • **NORTHERN ROAD LINK** (NRL)

YOU ARE INVITED!

THREE ROAD PROJECTS GATHERING & EXPO
Led by Webequie First Nation and Marten Falls First Nation
Funded by the Province of Ontario, our Treaty Partner

Superior Inn Hotel and Conference Centre
555 Arthur St W

June 11,12, & 13, 2024

Continuing to build on the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests, Marten Falls First Nation and Webequie First Nation are excited to host the ***Three Road Projects Gathering & Expo***. The Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. We will also engage with you on a common approach to reviewing the draft of the Environmental Assessment Report/Impact Statement (EAR/IS) for the WSR and the MFCAR Projects. In response to feedback received at previous events, a day has been set aside specifically for Elders to engage with the Project Teams and share perspectives on the projects.

Day 1: Elder's Gathering
Day 2: Three Road Project Presentations & Expo
Day 3: Common Approach to Review Draft of EAR/IS Workshop

PARTICIPANT FUNDING

The Province of Ontario will fund up to 3 representatives from your community to attend, including travel, accommodation, and meals. All questions about funding or the coordination of funding should be directed to the Province of Ontario at **ea.participant.fund@ontario.ca**.

Additional community representatives are welcome to attend.

PURPOSE

The purpose of this Gathering is to create a respectful, and collaborative space for consultation to continue to build an understanding of the three road projects and their potential impacts by:

- Providing a comfortable space for Elders to gather and discuss the Projects,
- Creating opportunities to engage directly with the Project proponents and consulting teams sharing information about the Projects, and
- Discussing the upcoming draft EAR/IS Review Process for WSR and MFCAR.

WHO SHOULD ATTEND FROM YOUR COMMUNITY

Representatives who are knowledgeable and comfortable speaking and sharing information about the road projects and the potential impacts on your community are encouraged to attend. Elders are especially encouraged to attend the Elder's Gathering.

RSVP to ea.participant.fund@ontario.ca by May 29, 2024 to reserve your room at the Superior Inn Hotel and and Conference Centre. *(Later RSVP for Gathering attendance is OK!)*

12:15	Closing Comments and Gathering Closing

WSR WEBEQUIE SUPPLY ROAD

MARTEN FALLS FIRST NATION COMMUNITY ACCESS ROAD

NRL Northern Road Link

Ontario

June 3, 2024

Dear Chief Gagnon,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 17th from 12:00-12:45pm EST** for Aroland First Nation, where there will be a second presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85396528144?pwd=LazsPzpWf8sr7hpxlzCWSnpr6DvuvW.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 853 9652 8144 **Passcode:** 718315

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, AtkinsRéalis

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Gagnon,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Gagnon:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description

Craig Wallace, Project Manager, AtkinsRéalis

November 18, 2024

Dear Chief Gagnon,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, November 25th from 12:00-12:45 PM EST for Aroland First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/81927274993?pwd=y99s3wcazxR1Ib8iPbMb05rZ5wN5Kr.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

Method	Description
	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

December 16, 2024

Chief Sonny Gagnon
Aroland First Nation
P.O. Box 10
Aroland, ON
P0T 1B0

Dear Chief Gagnon,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package has been delayed and is currently in transit to your community. We are aware of the Canada Post strike which began on November 15, 2024, that has caused a further delay to the delivery of the report. Because of the strike, our team will be sending the files for Consultation Progress Report Round 3 via WeTransfer in a separate email.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board

	meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

December 16, 2024

Chief Sonny Gagnon
Aroland First Nation
P.O. Box 10
Aroland, ON
P0T 1B0

Dear Chief Gagnon,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package has been delayed and is currently in transit to your community. We are aware of the Canada Post strike which began on November 15, 2024, that has caused a further delay to the delivery of the report. Because of the strike, our team will be sending the files for Consultation Progress Report Round 3 via WeTransfer in a separate email.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board

	meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

THREE ROAD PROJECTS GATHERING & EXPO

WEBEQUIE SUPPLY ROAD (WSR) • **MARTEN FALLS COMMUNITY ACCESS ROAD** (MFCAR) • **NORTHERN ROAD LINK** (NRL)

YOU ARE INVITED!

THREE ROAD PROJECTS GATHERING & EXPO

Led by Webequie First Nation and Marten Falls First Nation
Funded by the Province of Ontario, our Treaty Partner

Valhalla Inn
1 Valhalla Rd
Thunder Bay

February 19th & 20th 2025

Continuing to build on the momentum of the last two Aboriginal and/or Treaty Rights and Interests Forums and the June 2024 Three Road Projects Gathering and Expo, **Marten Falls First Nation** and **Webequie First Nation** are excited to host another Three Road Projects Gathering & Expo. The Gathering and Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback. The WSR and MFCAR projects will focus on the circulation of the draft Environmental Assessment Report/Impact Statement (EAR/IS). The NRL Project will focus on the consideration and evaluation of alternatives as well as the approach to the cumulative effects assessment and other key aspects of the three projects.

You will be able to participate in one-on-one sessions with the proponent teams and/or Government representatives to ask questions, provide feedback, and engage directly. You can also engage during the Expo Session on specific aspects of the Projects.

Day 1: Three Road Projects Overview, Consultation Panel, Individual Community Breakout sessions & Project Expo

Day 2: ATRI Panel Discussion, Individual Community Breakout sessions & Project Expo

PARTICIPANT FUNDING

The Province of Ontario will fund up to 3 representatives from your community to attend, including travel, accommodation, and meals. All questions about funding or the coordination of funding should be directed to the Province of Ontario at ea.participant.fund@ontario.ca.

Additional community representatives are welcome to attend.

PURPOSE

The purpose of this Gathering is to create a comfortable, respectful, and collaborative space for consultation to continue to build an understanding of the three road projects and their potential impacts by:

- Creating opportunities to engage directly with the Project proponents and consulting teams who will be sharing information about the Projects and discussing the draft EAR/IS circulation and review for WSR and MFCAR, soliciting preliminary feedback and answering any questions participants may have
- Discussing the approach consideration and evaluation of Alternatives for the NRL Project.

WHO SHOULD ATTEND FROM YOUR COMMUNITY

Representatives who are knowledgeable and comfortable speaking and sharing information about the road projects and the potential impacts on your community are encouraged to attend.

RSVP to ea.participant.fund@ontario.ca by Jan 31st, 2025 to reserve your room at Valhalla Inn.
(Later RSVP for Gathering attendance is OK!)

WSR WEBEQUIE SUPPLY ROAD
MARTEN FALLS FIRST NATION COMMUNITY ACCESS ROAD
NRL Northern Road Link
Ontario

January 17, 2025

Dear Chief Gagnon,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, January 27th from 12:00-12:45 PM EST for Aroland First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/81968272292?pwd=erbTjm3qsFnuZJ5bfjRnfKiD2f6TWe.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hard copies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

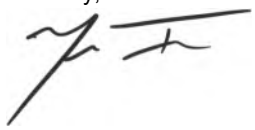
Method	Description
Focus Group Sessions	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

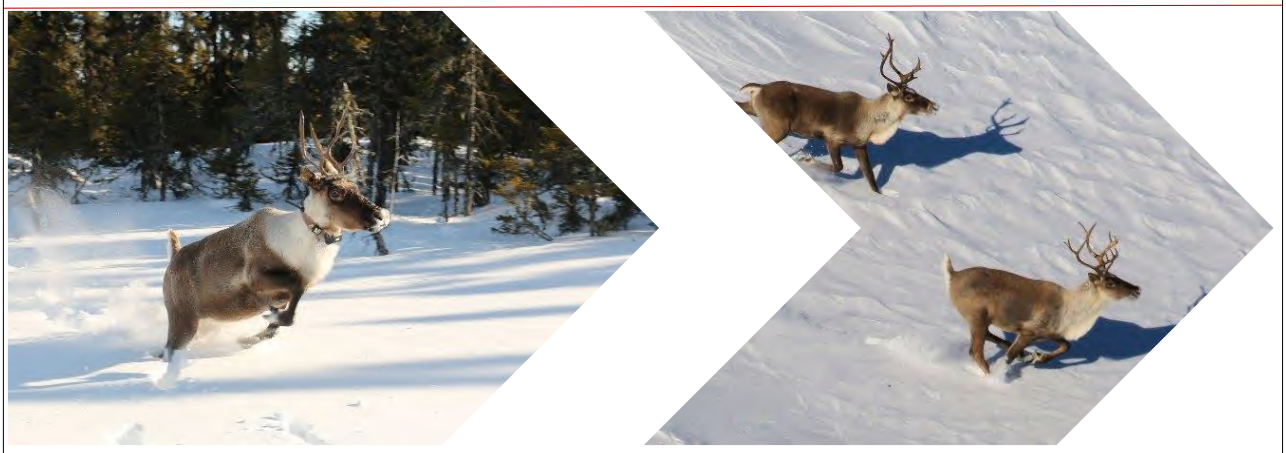
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Gagnon,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Gagnon,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: **https://www.supplyroad.ca/draftea**.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

APPENDIX P2.I.3

Correspondence with Indigenous Communities and Groups – Attawapiskat First Nation

Webequie Supply Road Project Consultation Log

Records Found: 1

Attawapiskat First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Attawapiskat First Nation's (ATFN) Chief David Nakogee, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if ATFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Attawapiskat First Nation's (ATFN) Chief David Nakogee, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether ATFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked ATFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if ATFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Attawapiskat First Nation's (ATFN) Chief David Nakogee, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited ATFN to participate in the WSR socio-economic primary data collection program. The letter asked ATFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if ATFN has any questions.

Topics to be Discussed: Virtual Information Session
Marian Tibor-McMahon of Indigenous and Community Engagement (ICE) and Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Attawapiskat First Nation (ATFN) on April 25, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Marian and Don discussed several questions that had been previously asked by ATFN. These questions were regarding the hydrology and drainage of peatlands, combined effects on wildlife and fish, impacts on forests, and dust emissions from road use. The WSR Project Team had a platform which provided real time translation of the session in Cree to accommodate community members. There were no community members in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: EA / IA Process, Cumulative Effects, and Regional Assessment
Kate Kempton, legal advisor of Attawapiskat First Nation (ATFN) sent an email to Michael Fox and Marian Tibor-McMahon of Indigenous and Community Engagement and Don Parkinson and Craig Wallace of SNC-Lavalin and the Webequie Supply Road (WSR) Project Team in response to the email Marian sent on April 26, 2022 regarding the WSR Socio-Economic Primary Data Collection Program. Kate stated that the WSR Project Team should copy ATFN advisors and staff on all correspondence moving forward. Kate also stated ATFN believes that pursuing any developments in the James Bay Lowlands region before a Regional Assessment (RA) is done may be harmful to ATFN and other First Nations. As such, ATFN is of the opinion that the Project Team should halt all activities related to the Environmental Assessment / Impact Assessment (EA / IA) of the WSR until a RA is complete and there is a good understanding of the potential impacts on First Nations from such developments. Kate indicated that the EA / IA process is not comprehensive enough to fully understand the cumulative effects of the project and that the process has previously been criticized by Indigenous peoples and Western science. Kate requested the Project Team respond to ATFN's request to halt EA / IA activities and if the response is no, to provide a full explanation as to why.

Contact Date: May 06, 2022 17:49 Method: E-mail
Topics to be Discussed: EA / IA Process and Regional Assessment
Michael Fox of Indigenous and Community Engagement and the Webequie Supply Road (WSR) Project Team sent an email to Chief David Nakogee of Attawapiskat First Nation (ATFN) and Kate Kempton, legal advisor of ATFN, in response to the email Kate sent on April 27, 2022 and April 29, 2022 regarding ATFN's request that the WSR Project Team halts all activities related to the Environmental Assessment / Impact Assessment (EA / IA) until a federal Regional Assessment (RA) for the Ring of Fire area is complete. Michael noted that the RA is the responsibility of the Impact Assessment Agency of Canada (the Agency) and indicated that in previous correspondence to ATFN it was noted that the Tailored Impact Statement Guidelines for the WSR Project and the federal Impact Assessment Act require that relevant information generated through the RA for the Ring of Fire Area be used to inform the WSR Project effects assessment as the information becomes available. As a result, Michael notes that the WSR EA / IA timelines are not impacted by the federal RA process and any questions related to the RA process should be directed to the Agency. Michael also stated that the WSR EA / IA and federal RA are distinct assessment processes and directly quoted specific sections in the Agency's draft agreement for the RA that reiterates this point. Michael provided details on where to find more information on the draft agreement. Michael acknowledged ATFN's request for the WSR to pause their EA / IA, stating that while there is a mechanism for proponents to seek an extension to the impact statement phase of the IA, the WSR Project Team is not currently seeking an extension. Michael indicated the WSR Project Team expects ATFN will engage with the EA / IA process so that community views, perspectives, knowledge, and rights and interests are understood and responded to accordingly.

19:51
Kate Kempton, advisor of Attawapiskat First Nation (ATFN) replied to Michael's email stating that ATFN disagrees with Michael's response in that individual EA's do not provide a comprehensive cumulative effects analysis. Kate stated concerns that by not halting activities related to the EA / IA, the WSR Project Team is not addressing this gap.

Topics to be Discussed: Environmental Assessment, Regional Assessment
Kate Kempton, legal advisor of Attawapiskat First Nation (ATFN) sent an email to Michael Fox of Indigenous and Community Engagement and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on June 14, 2022 providing the WSR June newsletter. Kate stated her belief that the Virtual Information Sessions being held by the Project Team for each community are unilateral and cannot be considered consultation. Kate stated ATFN's position that the Environmental Assessment (EA) should be put on hold until the First Nations conduct a comprehensive Regional Assessment to fully understand the cumulative effects of development in the Project region. Kate indicated that ATFN would be happy to engage with the WSR Project if the EA is put on hold.

Topics to be Discussed: Environmental Assessment, Regional Assessment
Michael Fox of Indigenous and Community Engagement and the Webequie Supply Road (WSR) Project Team sent an email to Kate Kempton, advisor of Attawapiskat First Nation (ATFN) in response to the email Kate sent on June 14, 2022 with concerns regarding the WSR Environmental Assessment (EA). Michael noted the importance of the WSR Environmental Assessment / Impact Assessment (EA/IA) as a critical step to better understand and mitigate any potential impacts of the proposed Project. Michael stated that the WSR Project Team will be proceeding with the robust and rigorous EA/IA and provided the reasoning for this decision. Michael reminded ATFN that the Regional Assessment is a completely separate process from the EA/IA and is outside the scope of the WSR Project. Regarding the Virtual Community Information Sessions, Michael noted that they are one-on-one meetings where community members are able to ask questions, raise concerns, and have a discussion directly with WSR Project Team members. Michael indicated that the Project Team has made repeated attempts to engage and consult with the Attawapiskat council and community and highlighted the various methods that have been used to reach out. Michael stated the importance of engaging Indigenous communities to help ensure the WSR's assessments are informed by their concerns, Indigenous knowledge, and any potential impacts. A list of the various engagement options available to ATFN was provided. It was reiterated that anyone from ATFN can contact Michael to discuss options to sharing information or to hear from ATFN's leadership or membership.

Topics to be Discussed: Environmental Assessment, Regional Assessment
Kate Kempton, legal advisor of Attawapiskat First Nation (ATFN) sent an email to Michael Fox of Indigenous and Community Engagement and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on June 28, 2022 regarding the WSR Environmental Assessment/Impact Assessment (EA/IA) and engagement options. Kate stated ATFN's position that the WSR Project Team's reasoning for not putting the EA/IA on hold is illogical, since it is because the Regional Assessment is a separate process that the WSR EA/IA needs to be put on hold. Kate stated their belief that the EA/IA is not robust in considering the cumulative effects across the region. Kate noted that if Webequie First Nation (WFN) were to follow ATFN's request to the halt the assessments, ATFN would welcome WFN with open arms.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team emailed Chief David Nakogee, Council, and Advisors of Attawapiskat First Nation (ATFN) to follow up regarding the previous email sent on April 26, 2022 about the Socio-Economic Primary Data Collection Program. Marian indicated that the WSR Project team has reached out via fax, letter, and phone and has not received a response from ATFN. Marian requested the community to let the WSR Project team know if they are interested in participating in the program and explained the need for conducting a Socio-Economic study program as outlined in the Tailored Impact Statement Guidelines. Marian explained that the program will enable the WSR Project Team to consider all existing information and evidence regarding the socio-economic conditions of surrounding communities which will inform decision-making and help mitigate any potential impacts of the proposed project. A link to the WSR Project website was provided as well as a fact sheet and letter with more information on the Socio-Economic Primary Data Collection Program. Marian indicated that the WSR Project team would be happy to meet with ATFN to discuss the program by phone or virtual meeting and provided ATFN with her phone number and email to further discuss the program.

Topics to be Discussed: Environmental Assessment, Regional Assessment
Orit Rivietz, assistant legal advisor for Attawapiskat First Nation (ATFN), sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team in response to the email Marian Tibor-McMahon of ICE sent to ATFN on July 5, 2022 regarding the WSR Socio-Economic Program. Orit's response included a letter from Chief David Nakogee, stating ATFN's position that the WSR Project Team should pause the Environmental Assessment (EA) to allow an Indigenous-led Regional Assessment be completed first. Chief Nakogee explained this would allow for a cumulative effects assessment to understand the full impact of opening up the Ring of Fire to all-season road access. Chief Nakogee requested that the WSR Project Team send ATFN drafts of the EA chapters as they become available and before they are submitted to regulators to allow ATFN to integrate their Indigenous knowledge, and information about impacts to rights, directly into the EA. ATFN stated that this should not be taken to as an indication that ATFN consents to the processes of an individual EA for the north sound corridor.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Attawapiskat First Nation's (ATFN) Chief David Nakogee with a letter following up on the correspondence sent on December 13, 2021 regarding the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program, inviting ATFN to participate in the program. The letter noted that the Project Team also followed up on January 17, 2022, February 24, 2022 and April 13, 2022 to advise that the IKLRU Program has commenced and confirm if the community is interested in participating. The letter reminded ATFN of the purpose of the IKLRU Program and that the WSR Project is currently in the Environmental Assessment / Impact Assessment (EA/IA) phase. The letter acknowledged that ATFN currently has an expired funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project and encouraged the community to contact Ontario to determine how to proceed with reviving the funding agreement. The Project Team welcomed the community to reach to them out for support throughout the process. The letter stated that if ATFN is interested in participating in the IKLRU Program, the Project Team is available to meet either in-person or virtually.

Topics to be Discussed: WSR Consultation Progress Report Round 1 Follow Up and Newsletter #18
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team, sent a fax to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin which included a letter and English WSR Newsletter - Issue 18. The letter included a follow-up to the community regarding the package sent by the WSR team on October 28, 2022, containing the Consultation Progress Report for Round 1. The letter also provided an overview of the report with key milestones and topics that were covered in Round 1 of consultation as well as various community engagement options to help create awareness of the Project in the community.

The fax also included the English WSR Newsletter - Issue 18 which provided information about Consultation Round 2 topics as well as fish and fish habitat baseline study findings. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if ATFN has any questions or comments.

Topics to be Discussed: Caribou Data Sharing Agreements
Dorothee Schreiber, consultant on behalf of Attawapiskat First Nation (ATFN) sent an email to Hilary Gignac and Kevin Green of the Ministry of the Environment, Conservation, and Parks (MECP) and Nancy Berglund of the Ministry of Natural Resources and Forestry (MNRF) as a follow up regarding caribou data-sharing agreements for the Northern Road Link (NRL) Project and Webequie Supply Road (WSR) Project. The email indicated ATFN understands that the WSR 2018-2019 caribou data is winter survey data, and a collaring survey is underway as well. Dorothee noted that ATFN was told that Ontario has advised Webequie First Nation on the data-sharing agreement and that as of December 12, 2022, it was waiting to be signed by Chief Cornelius Wabasse. Dorothee indicated that ATFN has been waiting a month and a half for the agreement to be sent and requested an update on the status of the agreements.

Topics to be Discussed: ATRI Forum Invitation Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin of Attawapiskat First Nation (ATFN) to follow up on the invitation for the Aboriginal and Treaty Rights and Interests (ATRI) Forum hosted by the Province of Ontario in Thunder Bay on February 8 & 9, 2023. The email explained that it is not too late to RSVP for the event. Attached to the email was the poster which explained that the 2-day forum will focus on discussing potential impacts to Northern Indigenous Communities ATRI as they relate to the WSR, Northern Road Link (NRL), and Marten Falls First Nation Community Access Road (MFCAR) Projects. The poster provided more information on how community representatives can attend, the purpose of the forum, who should attend from each community, and an email address for the community to RSVP. A preliminary agenda was also included on the poster. The Province of Ontario, Michael Fox of WSR, Andrea Nokleby of MFCAR, and Mishal Naseer of NRL provided their emails on the poster for further information if ATFN has any questions or comments. There was a system error and the email bounced back indicating that the following email recipients were not found: bernard.spence@attawapiskat.org, antoine.kataquapit@attawapiskat.org, raphael.wheesk@attawapiskat.org, christopher.kataquapit@attawapiskat.org.

Topics to be Discussed: Radio, Livestreams, Engagement Options
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Attawapiskat First Nation (ATFN)'s Chief Sylvia Koostachin-Metatawabin which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 14, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of the Alternatives Assessment Process, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team will begin Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if ATFN has any questions or comments.

11:33
Orit Rivietz of OKT Law, advisor for ATFN, responded to the email requesting to be removed from the contact list since they are no longer working on the WSR Project.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Attawapiskat First Nation (ATFN)'s Chief Sylvia Koostachin-Metatawabin, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of ATFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

13:46
Orit Rivietz of OKT Law, representative for ATFN responded to the email asking Heather to remove them from the list since they are no longer working on the Project.

13:53
Heather thanked Orit Rivietz for the confirmation.

15:40
Heather forwarded the original email to the new Chief and Council of ATFN with the letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR EA/IA.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Attawapiskat First Nation (ATFN) on April 3, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, the Project Team played a voiceover presentation which included a testimony by the Webequie First Nation Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don mentioned several concerns that had been previously raised by ATFN. Don mentioned that the concerns are regarding impact on caribou, inclusion of Indigenous Knowledge, regional assessment, participation funding, Aboriginal Treaty Rights, and cumulative effects of the project. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no attendees present at this session.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent a fax to Attawapiskat First Nation (ATFN)'s Chief Sylvia Koostachin-Metatawabin which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on April 12, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on Evaluation of Alternative Road Corridors, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if ATFN has any questions or comments.

The fax also included the English WSR Newsletter - Issue 21 which provided information about the Human Health Study, Country Foods Assessment, and the livestream and radio schedule for April 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if ATFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Attawapiskat First Nation (ATFN)’s Chief Sylvia Koostachin-Metatawabin as a follow up to the email sent on March 17, 2023 regarding the invitation to participate in the Socio-Economic Primary Data Collection Program as part of the Environmental Assessment / Impact Assessment. Heather asked the Chief if they had any questions regarding the original email and letter and indicated that the WSR Project team would like to hear back by April 17, 2023 as to ATFN’s interest in participating in the program. The letter detailed the purpose of the socio-economic study, the type of information that the WSR Project team is seeking, the study area, how information will be collected, schedule, and next steps. Heather requested the Chief to let the WSR Project team know if they prefer a call to discuss the request in the letter.

Topics to be Discussed: ATRI Forum Follow Up
Andrea Nokleby of Dillon Consulting sent an email on behalf of Marten Falls First Nation Community Access Road (MFFN CAR), Webequie Supply Road (WSR), and Northern Road Link (NRL) Project Teams to thank Chief Sylvia Koostachin-Metatawabin of Attawapiskat First Nation (ATFN) and representatives who attended the Aboriginal and Treaty Rights (ATRI) and Forum that was hosted in Thunder Bay on February 8th and 9th 2023. Michael Fox of Indigenous and Community Engagement (ICE) and the WSR Project team were copied on the email. The Forum focused on discussing potential impacts to Northern Indigenous communities' Aboriginal and/or Treaty Rights and Interests as they relate to the MFFN CAR, WSR and NRL projects. The email contained attachments with information including: (1) a thank you note to all participants; (2) a general summary of ATRI comments; and (3) community-specific summaries from the breakout sessions. The email indicated that any comments or questions about the attached information is welcomed and that representatives on the project teams would be happy to set up additional meetings to further discuss any aspects of the projects, including ATFN's ATRI as they relate to each project. The email also indicated that each Project team would be following up separately on any project-specific correspondence.

The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if ATFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin of Attawapiskat First Nation (ATFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding ATFN’s participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted that the Project team has also phoned the band office on January 17, 2022, February 24, 2022, April 13, 2022, and sent an email on January 20, 2022 to follow up and advise that the IKLRU Program has started and to confirm if the community is interested in participating. The letter noted that to date, the Project team has not received a response regarding ATFN’s interest in participating in the IKLRU Program. The letter noted that the community has an expired funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project and encouraged the community to contact Ontario to determine how to proceed with reviving the community’s funding agreement. The Project team noted their availability to discuss how the community can participate to lead an IKLRU study that will help document how the community’s Aboriginal and Treaty Rights are impacted by the WSR Project. The letter requested an indication of the community’s interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Attawapiskat First Nation (ATFN)'s Chief Sylvia Koostachin-Metatawabin which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on June 20, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on Proposed Aggregate / Rock Source Areas, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if ATFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Dorothee Schreiber, representative on behalf of Attawapiskat First Nation (ATFN) responded to the correspondence sent by Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team on June 13, 2023, regarding the Indigenous Knowledge / Land and Resource Use (IKLRU) Program. The email referred to ATFN's letter from August 24, 2022, to state that communication between ATFN and the WSR Project team needs to improve and noted that their capacity is limited and exchanging letters with no consequence is a drain on their resources. The email also noted letters from July 6, 2022 and July 26, 2022 responding to the various requests for engagement and attached the letters to the email. ATFN indicated that they have yet to receive a direct and clear response from the WSR Project Team on (1) ATFN's request for draft chapters as they become available, and (2) ATFN's request for access to the Project baseline caribou monitoring data. ATFN noted that they were told in a meeting with Ontario on December 12, 2022, that Ontario has advised Webequie First Nation (WFN) on the caribou data sharing agreement with ATFN and that the agreement was waiting to be signed by the Chief of WFN.

The email noted that the refusal to share the baseline caribou data that is being collected as part of the Project team's work on the Impact Assessment for the WSR goes against the expectation of the Impact Assessment Agency of Canada, that the proponent share baseline data with the affected First Nations communities when they request it. The email included a link to the government of Canada website regarding Indigenous Participation in Impact Assessment, which ATFN explained highlights the need for proponents to work in collaboration with consulted communities over the course of the process. The email noted that anything ATFN identifies as a valued component for the project should lead to ATFN having complete information about the item so that ATFN can prepare its own impacts to the rights assessment. ATFN noted that they can not assess the impacts on valued components/land/rights if they do not have complete information and stated that they cannot wait for the Project team to submit the impact statement to the regulator to have access to the analysis and the baseline data that the Project team is collecting.

The email also referred to the Indigenous Engagement and Partnership Plan for the WSR Project which ATFN noted makes clear that IAAC expects the proponent, during the development of the impact statement, to "present project information, results of baseline studies, and brief Indigenous groups on technical matters." ATFN also noted that the Indigenous Engagement and Partnership Plan makes clear that an Indigenous community's preferred approach to consultation should be respected.

ATFN requested the WSR Project team to answer ATFN's request for draft chapters of the impact statement as well as the baseline caribou data that the Project team is collecting.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Attawapiskat First Nation (AFN) on June 19, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 2 of Consultation Round 2 will discuss the Project team's work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from AFN were in attendance. Don reiterated that the Project Team would like to hear from AFN community members in-person and that a recording of the session would be available through YouTube and the WSR Website.

Topics to be Discussed: Engagement Options, Virtual Information Sessions 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent a fax to Attawapiskat First Nation (ATFN)'s Chief Sylvia Koostachin-Metatawabin which included a letter that offered various community engagement options to help create awareness of the Project. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if ATFN has any questions or comments.

Topics to be Discussed: Caribou Data Sharing Agreements
Dorothee Schreiber, consultant on behalf of Attawapiskat First Nation (ATFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team and Hilary Gignac, Kevin Green, and Susan Ecclestone of the Ministry of Environment, Conservation, and Parks (MECP) to follow up regarding the caribou data sharing agreements with ATFN for the WSR Project. Dorothee noted that she has not received a response to her original email that was sent to MECP on January 31, 2023. Dorothee noted that ATFN has been promised caribou data sharing agreements since December 2022 and asked the WSR Project team to kindly advise on the status of the agreements and when to expect to receive them.

Topics to be Discussed: Aboriginal Treaty Rights and Interests Forum Invitation
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin of Attawapiskat First Nation (ATFN) with an attached invitation for the Aboriginal and Treaty Rights and Interests (ATRI) Forum hosted by the Province of Ontario in Thunder Bay on November 21-23, 2023. The poster explained that Webequie First Nation and Marten Falls First Nation encourage the community to participate in the follow-up Forum to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link (NRL), and Marten Falls Community Access Road (MFCAR) Projects. The poster provided more information on how community representatives can attend, the purpose of the forum, who should attend from each community, and an email address for the community to RSVP. The Province of Ontario, Michael Fox of WSR, Andrea Nokleby of MFCAR, and Mishal Neesar of NRL provided their emails for further information if ATFN has any questions or comments.

Topics to be Discussed: Caribou Data Sharing Agreements
Hilary Gignac of the Ministry of the Environment, Conservation, and Parks (MECP) sent an email to Dorothee Schreiber, Kate Kempton, and Pauline Tookate of Attawapiskat First Nation (ATFN) in response to Dorothee's email sent on August 29, 2023 with regards to a data share agreement to obtain species at risk data including data collected as part of the Webequie Supply Road (WSR) Environmental Assessment project. Michael Fox of Indigenous and Community Engagement (ICE) and the WSR Project team were copied on the email. MECP welcomed the opportunity to meet with ATFN to initiate development of a Sensitive Data License Agreement between ATFN and the Province of Ontario to obtain the sensitive data requested. MECP requested ATFN to respond in writing to indicate ATFN's interest in a meeting to discuss the data share agreement and ATFN's availability.

Contact Date: Nov 02, 2023 11:00 Method: E-mail
Topics to be Discussed: ATFN Request for Caribou Data
Michael Fox of Indigenous and Community Engagement (ICE) sent an email to Chief Sylvia Koostachin-Metatawabin and Dorothee Schreiber, representative on behalf of Attawapiskat First Nation (ATFN), in response to ATFN's email on June 14, 2023 regarding sharing baseline caribou data. Michael thanked the Chief and Dorothee for their patience and explained that the field team has completed the study and needed time to process the caribou data and get it reviewed by the Webequie Project team before anything could be shared with other parties. Michael also explained that the team had to get insights into the parameters for sharing sensitive data in accordance with provincial regulations and the existing Sensitive Data Use Licence Agreement between Webequie First Nation and the Ministry of the Environment, Conservation, and Parks (MECP). Michael noted that the team is now ready to have discussions with ATFN's council, staff, and technicians and requested ATFN to provide their availability to discuss the WSR Project as it relates to the request to access baseline caribou monitoring data and review of draft chapters of the Environmental Assessment Report / Impact Statement (EA/IA).

17:00
Dorothee Schreiber thanked Michael for the email and indicated that ATFN heard from the MECP about the sharing of caribou data the previous day and that they have a meeting with MECP on November 06, 2023 to discuss the Sensitive Data License. Dorothee asked Michael if the draft chapters of the EA/IA are ready to be shared.

Contact Date: Nov 02, 2023 13:45 Method: E-mail
Topics to be Discussed: Caribou Data Sharing Agreement
Natalie Watts of the Ministry of the Environment, Conservation, and Parks (MECP) sent an email to Dorothee Schreiber, consultant on behalf of Attawapiskat First Nation (ATFN) as a follow up on the email regarding the Caribou Sensitive Data License Agreement (SDLA). The email noted that Caribou data is classified as sensitive data as it pertains to a species at risk and an SDLA will be required in advance of sharing the data with ATFN. The email provided a list of information needed from ATFN to facilitate a draft of the SDLA.

Topics to be Discussed: ATRI Forum Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin of Attawapiskat First Nation (ATFN) as a reminder to confirm if the community will be attending the Aboriginal and Treaty Rights and Interests (ATRI) Forum. The email reminded the community that the Province of Ontario is funding to cover travel expenses for up to 3 participants from the community and provided the email address to contact. The original invitation was also attached to the email which indicated that the ATRI Forum is being hosted by the Province of Ontario in Thunder Bay on November 21-23, 2023. The poster explained that Webequie First Nation and Marten Falls First Nation encourage the community to participate in the follow-up Forum to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link (NRL), and Marten Falls Community Access Road (MFCAR) Projects. Dorothee Schreiber, consultant on behalf of Attawapiskat First Nation (ATFN) sent an email to Natalie Watts of the Ministry of the Environment, Conservation, and Parks (MECP) with the information required to facilitate a draft of the Sensitive Data License Agreement (SDLA). Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was copied on the email.

15:33
Natalie Watts of MECP thanked Dorothee for providing the information to facilitate the draft of the SDLA and indicated that MECP will let ATFN know if more information is required. The email also included questions for ATFN to respond to: 1) ATFN to indicate if they require caribou data collected by the Ministry of Natural Resources and Forestry Science and Research Branch; and 2) ATFN Chief and Council approve Pauline Tookate as the delegate signatory.

Contact Date: Nov 13, 2023 17:48 Method: E-mail
Topics to be Discussed: Caribou Data Sharing Agreement
Dorothee Schrieber, consultant on behalf of Attawapiskat First Nation (ATFN) responded to the email from Natalie Watts of the Ministry of the Environment, Conservation, and Parks (MECP) with responses to MECP's questions from November 9, 2023 regarding the Sensitive Data Licensing Agreement (SDLA). Dorothee confirmed that ATFN does not require caribou data collected by the Ministry of Natural Resources and Forestry Science and Research Branch. She also confirmed that Pauline Tookate is the most senior administrative official for ATFN to be the delegate signatory on the SDLA.

Topics to be Discussed: Draft Sensitive Data License Agreement
Dorothee Schreiber, consultant on behalf of Attawapiskat First Nation (ATFN) sent an email to Natalie Watts of the Ministry of the Environment, Conservation, and Parks (MECP) regarding the draft Sensitive Data License Agreement (SDLA) confirming that she has completed the NHIC Data Sensitivity Training and will work on getting the agreement signed by ATFN.

19:10
Dorothee Schreiber sent another email to Natalie Watts of MECP. Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was copied on the email. Dorothee indicated that ATFN completed a legal review of the SDLA and provided a list of proposed edits in the email. Dorothee asked MECP to get back to ATFN with further edits or acceptance of the changes to the SDLA.

Contact Date: Dec 19, 2023 09:11 Method: E-mail
Topics to be Discussed: Draft Sensitive Data License Agreement
Natalie Watts of the Ministry of the Environment, Conservation and Parks (MECP) responded to the email from Dorothee Schreiber, consultation of Attawapiskat First Nation (ATFN) from December 7, 2023 regarding proposed changes to the Sensitive Data Licensing Agreement. Natalie indicated that the suggested revisions to Sections 1.6 and 3.6 have been accepted but the revision to Section 7.3 cannot be accepted as the MECP is just providing access to data that others have submitted. Attached to the email was the revised SDLA and Natalie noted that the "Effective Date" has been updated on the cover page along with the Marten Falls Community Access Road shapefile name and extraction date in Schedule B.

11:22
Dorothee Schreiber, consultant on behalf of Attawapiskat First Nation (ATFN) responded to an email from Natalie Watts of the Ministry of the Environment, Conservation and Parks (MECP) regarding the draft Sensitive Data License Agreement (SDLA). Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was copied on the email. Dorothee thanked MECP for providing the revised SDLA and indicated that ATFN would try and get the agreement signed and sent back in the new year since ATFN is closed for the holidays.

Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a fax to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin the English WSR Newsletter – Issue 30. The newsletter provided information about the surface water study plan, vegetation study plan, and resumption of the radio shows and live stream. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael and Don Parkinson of AtkinsRéalis provided their email address and phone number if ATFN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Attawapiskat First Nation’s (ATFN) Chief Sylvia Koostachin-Metatawabin which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if ATFN has any questions or comments.

Topics to be Discussed: Community-Specific Existing Conditions Summary
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin with a letter and report attached regarding the Community-Specific Existing Conditions Summary Document. The letter requested the community's review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for ATFN. The letter provided a list of the community-specific baseline information provided in the document and indicated that the Project Team would appreciate to hear back from the community on the document as the team is always open to working with the community for further improvement on the content.

Topics to be Discussed: Caribou Data Sharing Agreements
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin and community contacts of Attawapiskat First Nation (ATFN) to address ATFN's previous concerns about Caribou Data Sharing and Sharing of the draft Environmental Assessment/Impact Statement documents. The letter thanked ATFN for their patience as the WSR Project team works to respond to the outstanding concerns in past letters and emails namely regarding: 1) Sharing of caribou data collected by the WSR Project team and; 2) Request to review draft chapters of the Environmental Assessment Report/Impact Statement when they become available for review prior to its formal release to allow for ATFN to complete its own assessment of impacts to Aboriginal and/or Treaty rights and interests. The letter also indicated that the Project team has been working to get information together to help determine the best approach forward.

Regarding sharing caribou data, the letter explained that the Project team is working with the Ministry of Environment, Conservation, and Parks (MECP) Species at risk Branch as to the best way to share caribou data with Attawapiskat First Nation based on the existing sensitive data licensing agreement (SDLA) between Webequie First Nation and MECP and restrictive conditions related to distribution and use of the data. On December 14, 2023, the Project team received confirmation from the MECP-SAR Branch that it is working on the SDLA with ATFN that will include the WSR Project and through the agreement it will be sharing the baseline caribou data being collected as part of the WSR environmental/impact assessment with the community. The letter also outlined the schedule of submission of caribou data and indicated that the team would be happy to discuss the caribou study for the WSR Project with ATFN and the approach on how the data will be interpreted and used in the EA/IA process.

Regarding the sharing of draft chapters of the EA/IS Report, the letter indicated that the Project team would like to sit down with ATFN to develop a process of how, when, and which chapters would be shared, and a reasonable amount of time to review. The letter requested a meeting (virtual or in person) to work through the process together. The letter explained that the Project team is always willing to meet, listen and learn to better understand issues and concerns that are raised during the EA/IA Process. The letter noted that the WSR Project team would like to have more regular dialogue with ATFN and welcomed the opportunity to schedule regular meetings.

Topics to be Discussed: Draft Socio-Economic Existing Conditions Report
Dorothee Schreiber, consultant for Attawapiskat First Nation (ATFN) responded to the email sent on February 9, 2024 regarding the Draft Socio-Economic Existing Conditions Report. Dorothee noted repeated reference to citations which are not included in the report's bibliography, but are used as references for many statements about ATFN's history and colonial impacts. Dorothee asked Michael to let ATFN know what the reference is and requested a copy of the documents.

The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter provided the status of delivery as of March 14, 2024. An overview of the Consultation Progress Report for Round 2 was provided and the letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on March 25, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on what protections are after the EA, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if ATFN has any questions or comments.

Contact Date: May 27, 2024 11:00 Method: Indigenous Community Meeting
Topics to be Discussed: Virtual Information Session Round 3 Part 1
The Webequie Supply Road consultation team conducted a virtual community meeting on the Zoom platform with Attawapiskat First Nation. An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 1 presentation that began with a review of the project to date, followed by a discussion of preliminary results for two valued components: surface water and fish and fish habitat. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. Dorothee Schreiber, advisor to Attawapiskat First Nation asked when the full set of draft chapters of the environmental/impact assessment document will be available for an initial review. Michael Fox responded that the chapters will likely be available by late Fall 2024. Dorothee Schreiber then asked when she could expect a response to her February 21, 2024 email asking for specific references used in the Webequie Supply Road Existing Conditions Summary relating to historical colonial impacts on Attawapiskat First Nation. Michael Fox stated that he would investigate the status of the preparation of the response to the email and provide an update or the actual response very shortly.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Dorothee Schreiber, representative on behalf of Attawapiskat First Nation (ATFN) as a follow up to her participation in the virtual information session for ATFN earlier in the day. Attached to the email was the invitation to the Three Project Gathering and Expo that was sent the previous week. The email noted that Ontario is funding 3 representatives from ATFN and offering capacity funds for ATFN to participate in the environmental impact assessment.

Topics to be Discussed: Preliminary Draft Socio-Economic Existing Conditions Summary
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Dorothee Schreiber, Chief Sylvia Koostachin-Metatawabin, Pauline Tookate, and Jack Linklater Jr. of Attawapiskat First Nation (ATFN) in response to Dorothee's email on February 21, 2024 regarding the Preliminary Draft Attawapiskat First Nation Existing Conditions Summary. The email explained that this document will make up part of the draft WSR Socio-Economic Existing Conditions Report for the Environmental Assessment/Impact Assessment (EA/IA). Michael clarified that the citations referred to in Dorothee's email "SNC Lavalin 2022" and "SNC Lavalin 2023" correspond to Transcripts from Interviews and Focus Groups with Webequie Knowledge Holders prepared in 2022 and 2023 which were prepared as part of the WSR Socio-Economic Primary Data Collection Program. Michael explained that the information was used in the Socio-Economic Existing Conditions Summary document to provide general context from the perspective of Webequie First Nation, as the proponent of the Project, and as a First Nation potentially affected by the Project. Based on ATFN's feedback, Michael noted the team will reframe the statements from these references to ensure that it is clear that the views expressed come from Webequie knowledge holders. The email welcomed ATFN's review of the document and any further input and feedback from the community. The email explained that the Socio-Economic Existing Conditions Summary document is intended to reflect the Project Team's current understanding of existing conditions using available information. The Project Team welcomed opportunities to work with ATFN to best reflect the community, and values and rights that could be affected as a result of the Project.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin of Attawapiskat First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Superior Inn and Conference Centre in Thunder Bay on June 11-13, 2024.

The purpose of the Gathering was to create a respectful, and collaborative space for consultation to continue to build an understanding of the three road projects and their potential impacts by: 1) Providing a comfortable space for Elders to gather and discuss the Projects; 2) Creating opportunities to engage directly with the Project proponents and consulting teams sharing information about the Projects and; 3) Discussing the upcoming draft Environmental Assessment Report / Impact Statement (EAR/IS) Review Process for WSR and the Marten Falls Community Access Road (MFCAR) Project.

Day 1 was set aside exclusively as an Elders Gathering to gather and engage with the individual Project Teams for all three projects to share their perspectives. By design, there were no government representatives in attendance on Day 1; only Indigenous people and Indigenous consultants, to encourage a more open and comfortable discussion. This was a new and innovative approach to engaging with Indigenous communities by the creation of a sacred space that was authentic, comfortable and open.

Day 2 was open to all participants. The morning focused on a series of technical presentations on key issues identified in previous engagement and consultation opportunities (peatlands (and other terrain), building roads on peatlands, aspects of water and fish populations). The afternoon was an Expo where participants could visit a series of booths to have one-on-one conversations with Project Team members from each of the road projects, various technical aspects of the Projects, Ontario and the Impact Assessment Agency of Canada.

Day 3 was also open to all participants. This session was a half day workshop on a common approach to reviewing the upcoming circulation of draft EAR/ISs for two of the three road projects so that there would be sufficient time to review and provide feedback. Each project team wanted to share the common approach to reviewing the draft EAR/ISs with Indigenous Nations early so that there was a shared understanding of what to expect and when. This would allow Indigenous communities to prepare themselves in advance with respect to resources to assist in the review.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 44 individuals signed in for Day one of the gathering, A total of 62 individuals signed in for Day 2, and a total of 48 individuals signed in for Day 3, but please note that not all participants opted to sign in. In total, 2 participants from Attawapiskat First Nation attended the Gathering.

Topics to be Discussed: Virtual Information Session Round 3 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for ATFN on July 8, 2024, from 11:00-11:45am EST with registration links for the session. The information session will include the second part of the presentation on WSR's Environmental Assessment / Impact Assessment (EA/IA) activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if ATFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 2
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Attawapiskat First Nation (ATFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 2 presentation that began with a review of the project to date, followed by a discussion of preliminary results for the vegetation, wildlife, social environment, aboriginal and Treaty rights valued components. The presentation concluded with discussion on the cumulative effects assessment and the assessment of other aspects and effects. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from ATFN were in attendance.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for ATFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Dorothee Schreiber, environment advisor for Attawapiskat First Nation (ATFN), sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team in response to the notice sent out by Micheal about the early circulation of the draft EAR/IS on September 20, 2024. Dorothee requested that the draft EAR/IS to be sent via electronic file transfer to her and Noel Tookate, and that ATFN will require Cree-language (n-dialect) summaries of all sections of the Impact Statement submitted by the proponent ("pre-draft," "draft," and "final" versions) and for the summaries to include detailed information on impacts of the WSR Project, methods used to reach the conclusions, and proposed mitigation measures. She also requested that the sections of the EAR/IS to include impacts to rights, species at risk, water, fish, wildlife, and cumulative effects. An English version of the summaries developed for the sections were also requested.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if ATFN has any questions or comments.

Topics to be Discussed: Assessment of Effects on Surface Water Resources
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent email to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin with a letter and poster attached. The letter advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on November 18, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on the Assessment of Effects on Surface Water Resources, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if ATFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 4 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Attawapiskat First Nation. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. One participant from ATFN was in attendance.

Topics to be Discussed: Consultation Progress Report Round 3 Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) sent an email to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin with a letter attached regarding follow up for the Consultation Progress Report for Round 3. The letter indicated that on November 5, 2024, the Project team mailed a package via Canada Post to the community containing the Consultation Progress Report for Round 3, and as of today, December 16, 2024, the package status indicates it was delivered to the community on November 22, 2024. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. A list of key milestones and topics covered in the round of consultation was provided. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. Michael's email and cell phone contact information was provided if ATFN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin, Deputy Chief Jack Linklater Jr., Director of Operations Pauline Tookate, Dorothee Schreiber, and Councillors Ignace Wesley, James Kataquapit, Kara Shisheesh, Maggie Koostachin, Paul Wesley, Sheldon Wesley, Steve Hookimaw, Tesla Koostachinnakogee, Xavier Wheesk, Robert Sutherland, and Roseanne Sutherland of Attawapiskat First Nation. The email was also sent to lawyer Kate Kempton from Woodward & Company LLP. The email contained links to?invitations for the Three Road Project Gathering & Expo hosted by Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin and Council with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Three Road Projects Gathering & Expo June 2024 Report
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Cedar Meadows & Spa in Timmins on February 25-26, 2025.

The purpose of the Gathering was to provide an engaging and interactive consultation space to discuss the Webequie Supply Road (WSR) Draft Environmental Assessment Report / Impact Statement (EAR/IS), Marten Falls Community Access Road (MFCAR) Draft EAR/IS and Northern Road Link (NRL) Projects.

Day 1 of the event was set aside for Project overviews, consultation panels, individual community breakout sessions, and project expo including information to assist with review of the draft EAR/IS for MFCAR and WSR and cumulative effects assessment.

Day 2 of the event covered the Aboriginal and/or Treaty Rights and Interests (ATRI) panel discussions, breakout sessions, and project expo including information to assist with review of the draft EAR/IS and MFCAR for WSR and cumulative effects assessment.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 7 individuals signed in for Day one of the gathering, A total of 16 individuals signed in for Day 2, but please note that not all participants opted to sign in. In total 1 participants from Attawapiskat First Nation (ATFN) attended the Gathering over the 2 days.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin-Metatawabin with English WSR Newsletter - Issue 43 attached. The newsletter provided information about the virtual community information sessions for round 4, the virtual water crossing simulation, and the early circulation of the draft Environmental Assessment Report/Impact Assessment. Michael and Don Parkinson of AtkinsRéalis provided their email address and phone number if ATFN has any questions or comments.

Topics to be Discussed: WSR Newsletter - Issue 42, 43
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a package via Canada Post to Attawapiskat First Nation's (ATFN) Chief Sylvia Koostachin Metatawabin, with English WSR Newsletter - Issue 42 and 43. Newsletter 42 provided information about the Three Road Projects Gathering, Cumulative Effects, and the upcoming Draft Environmental Assessment. Newsletter 43 provided information about the virtual community information sessions for round 4, the virtual water crossing simulation, and the early circulation of the draft Environmental Assessment Report/Impact Assessment. Michael and Don Parkinson of AtkinsRéalis provided their email address and phone number if ATFN has any questions or comments.

Contact Date: Jun 09, 2025 09:00 Method: E-mail
Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Sylvia Koostachin-Metatawabin of Attawapiskat First Nation (ATFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

Chief David Nakogee
Attawapiskat First Nation
PO Box 248
Attawapiskat, ON P0L 1A0

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief David Nakogee,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Attawapiskat First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Attawapiskat First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Attawapiskat First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

c.c. Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

Project Map
Draft Indigenous Knowledge Sharing Agreement

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Attawapiskat First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Attawapiskat First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Attawapiskat First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Attawapiskat First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Attawapiskat First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Attawapiskat First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Attawapiskat First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief David Nakogee,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Attawapiskat First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

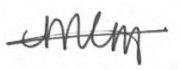
Next Steps

In order to confirm that Attawapiskat First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

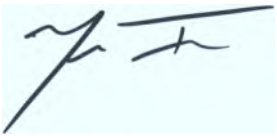
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. April 11, 2022

Dear Chief Nakogee,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, April 25 between 12pm and 1:30pm** for Attawapiskat First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZUtcOuvpjwvG92vDCDpkllRr4Fw3268nM1.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: supplyroad.ca/vropenhouse.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead

April 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on human health. This upcoming week's session is: **WSR Presents: Human Health.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 20th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

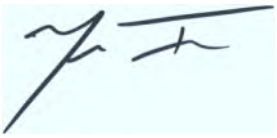
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

WEBEQUIE SUPPLY ROAD (WSR) PROJECT

Socio-Economic Study Plan
Fact Sheet

What is the primary purpose of the Socio-Economic Study Plan?

To characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) as a result of the construction and operation/maintenance of the WSR. Provide recommendations for minimizing negative socio-economic effects and enhancing beneficial effects of the Project.

What are socio-economics?

Studying socio-economics provides information about current jobs, income, education and housing conditions in a community.

What kind of information is going to be gathered?

- Community values;
- Community demographics (age, gender, marital status, education, labor force activity, health, etc.);
- The type of access each community has to education, jobs, or transportation; and
- Well being and safety.

Who is the information being gathered from?

- The 22 Indigenous communities that have been identified as the ones whose established or asserted Aboriginal and Treaty rights may be adversely affected by the Project and/or may have interests in the project.

WSR240-WEB-PR-FS-0016 Web-Socio Economic Fact Sheet-English-website-2022-04-26

*The Project Team will respect protocols and work with each community to understand how the information will be transferred, stored, and applied, and will be protected and kept confidential.

How is the information on community socio-economics being collected?

Primary information will be collected from Indigenous communities:

- A socio-economic survey using Survey Monkey, which will be sent by e-mail/letter;
- Key informant interviews with Chief and Councils, band administration staff, social service providers, healthcare providers, and knowledge keepers; and
- Collection of Indigenous knowledge through engagement activities.

Secondary information will be collected and reviewed:

- Published data from government websites, Indigenous community websites, municipal websites, and other open-source data. This information will be used to identify community demographics, community infrastructure, community social services, etc.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief David Nakogee,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Attawapiskat First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

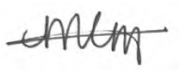
Next Steps

In order to confirm that Attawapiskat First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist

Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

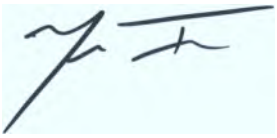
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

WSR
WEBEQUIE
SUPPLY ROAD

May 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on wildlife and species at risk. This upcoming week's session is: **WSR Presents: Wildlife and Species at Risk.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 18th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

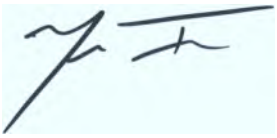
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

June 24, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on cultural heritage This upcoming week's session is: **WSR Presents: Cultural Heritage.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 29th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

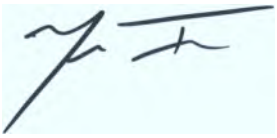
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.

Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief David Nakogee,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Attawapiskat First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

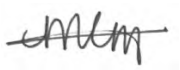
Next Steps

In order to confirm that Attawapiskat First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist

WEBEQUIE SUPPLY ROAD (WSR) PROJECT

Socio-Economic Study Plan
Fact Sheet

What is the primary purpose of the Socio-Economic Study Plan?

To characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) as a result of the construction and operation/maintenance of the WSR. Provide recommendations for minimizing negative socio-economic effects and enhancing beneficial effects of the Project.

What are socio-economics?

Studying socio-economics provides information about current jobs, income, education and housing conditions in a community.

What kind of information is going to be gathered?

- Community values;
- Community demographics (age, gender, marital status, education, labor force activity, health, etc.);
- The type of access each community has to education, jobs, or transportation; and
- Well being and safety.

Who is the information being gathered from?

- The 22 Indigenous communities that have been identified as the ones whose established or asserted Aboriginal and Treaty rights may be adversely affected by the Project and/or may have interests in the project.

WSR240-WEB-PR-FS-0016 Web-Socio Economic Fact Sheet-English-website-2022-04-26

*The Project Team will respect protocols and work with each community to understand how the information will be transferred, stored, and applied, and will be protected and kept confidential.

How is the information on community socio-economics being collected?

Primary information will be collected from Indigenous communities:

- A socio-economic survey using Survey Monkey, which will be sent by e-mail/letter;
- Key informant interviews with Chief and Councils, band administration staff, social service providers, healthcare providers, and knowledge keepers; and
- Collection of Indigenous knowledge through engagement activities.

Secondary information will be collected and reviewed:

- Published data from government websites, Indigenous community websites, municipal websites, and other open-source data. This information will be used to identify community demographics, community infrastructure, community social services, etc.

July 6, 2022

Dear Mr. Fox and Mr. Parkinson,

Attawapiskat First Nation received your emails of June 28th and July 5th, outlining engagement opportunities on the Webequie Supply Road project and the Socio-Economic Primary Data Collection Program.

As we have already said many times, we are happy to meet with your project team if you agree to pause the EA and restart it only once a comprehensive, First Nations co-led, co-enforced Regional Impact Assessment ("co-led RA") has been completed. Without the cumulative effects assessment that a co-led RA can provide, it is not possible to understand the full impact that opening up the Ring of Fire to all-season road access will have on our rights and interests. You may be aware that several First Nations in the Hudson Bay Lowlands are actively negotiating with Canada about a co-led RA.

At this point, please send us drafts of the EA chapters, as they become available, and before you submit them to regulators. This will allow us to integrate our Indigenous knowledge, and information about impacts to rights, directly into the EA. However, this should not be taken to as an indication that we consent to the processes of an individual EA for this segment of the north south corridor. We do not accept or consent.

Please also share with us the baseline caribou monitoring data you are currently collecting.

Sincerely,

Chief David Nakogee
Attawapiskat First Nation

July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:
https://www.youtube.com/channel/UCh_heAjQoY2hPBPMr68MCzw

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

July 26, 2022

Dear Mr. Fox,

Attawapiskat First Nation received your email of July 12th, informing us of the engagement options available regarding the Webequie Supply Road project.

Please refer to our letter of July 6th, 2022, in which we state that we are happy to meet with your project team if you agree to pause the EA/IA and restart it after a comprehensive, First Nations co-led, co-enforced Regional Impact Assessment ("co-led RA") has been completed. Without the cumulative effects assessment that a co-led RA can provide, it is not possible to understand the full impact that opening the Ring of Fire region through all-season road access will have on our rights and interests. You may be aware that several First Nations in the Hudson Bay Lowlands are currently negotiating with Canada about a co-led RA.

At this point, please send us drafts of the EA chapters, as they become available, and before you submit them to regulators. This will allow us to integrate our Traditional Indigenous Knowledge, and information about impacts to rights, directly into the EA. However, this should not be taken as an indication that we consent to the processes of individual EA/IAs for this segment of the north south corridor. We do not accept or consent.

Please also share with us the baseline caribou monitoring data you are currently collecting.

Sincerely,

Chief David Nakogee
Attawapiskat First Nation

July 26, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:
https://www.youtube.com/channel/UCh_heAjQoY2hPBPMr68MCzw

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

August 3, 2022

Dear Chief Nakogee,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to you on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022, February 24, 2022 and April 13, 2022 to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating. To date, we have not received a response regarding your interest in participating in the Program.

As you may know, Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Attawapiskat First Nation currently has an expired funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. We encourage you contact Ontario to determine how to proceed with reviving your community’s funding agreement. Please let us know if there is any way we can offer our support throughout this process.

If you are interested in participating in the IKLRU Program, we would like to meet with you and your team to discuss the scope of the IKLRU Program and how it will be carried out in terms of the study area, valued components, criteria and indicators, and community participation. We are available to meet and discuss the IKLRU Program in detail at your convenience, and in any method that you and your community prefers, either in-person or virtually. Please inform on how you wish to proceed at your earliest convenience.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project website also has various informational videos, communication materials and project updates. Please visit: https://www.supplyroad.ca/

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

August 24, 2022

Dear Mr. Fox,

Communication between Attawapiskat First Nation and the Webequie Supply Road (WSR) project team needs to improve. Please directly address our comments below in your next response. Like many First Nations in this region, our capacity is limited and exchanging letters with no consequence is a drain on our resources.

On August 3, 2022, you invited us to participate in your Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the WSR. On August 12, 2022, you reminded us of all our engagement options. We have received many invitations to engage with you. We will repeat what was in our last two letters, which we suggest you re-read.[1]

We are happy to meet with the WSR project team if you agree to pause the EA and restart it after a comprehensive, First Nations co-led, co-enforced Regional Impact Assessment has been completed.

The Tailored Impact Statement Guidelines for the WSR project require you to share with us sections of the EA that pertain to Indigenous peoples and impacts to our rights, prior to submission to the regulator.[2] As previously requested, please send us drafts of all the EA chapters, as they become available, and before you submit them to regulators. This will allow us to integrate our Traditional Indigenous Knowledge, and information about impacts to rights, directly into the EA. However, this should not be taken as an indication that we consent to the process of an individual EA or an individual federal impact assessment for this segment of the north south corridor. We do not accept or consent.

[1] July 6 and 26, 2022 – for your reference
[2] See: "The proponent is required to provide an opportunity for Indigenous groups to review the information that pertains to them prior to submission of the Impact Statement" WSR Tailored Impact Statement Guidelines pps 76 and 115

We also ask that you please also share with us the baseline caribou monitoring data you are currently collecting.

Sincerely,

Chief David Nakogee
Attawapiskat First Nation

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

October 21, 2022

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L 1A0

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

Craig Wallace, Project Manager, SNC-Lavalin Inc.

2

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Other Ways to Stay Up To Date

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 30, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Cumulative Effects – An Explanation and Illustration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, December 6th, 2022 at 11:00am – 12:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

December 14, 2022

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L 1A0

Dear Chief Koostachin-Metatawabin:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status indicates that it has been successfully delivered to your community on November 3, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Activity Date: Dec 20, 2022 15:58
File Name: Save the Date - 2 Day Aboriginal and Treaty Rights and Interests Forum - Thunder Bay February 2023.pdf
Activity Method: E-mail
Date Published: Dec 20, 2022

ABORIGINAL AND/OR TREATY RIGHTS AND INTERESTS
WEBEQUIE SUPPLY ROAD (WSR) • MARTEN FALLS FIRST NATION COMMUNITY ACCESS ROAD (MFFN CAR) • NORTHERN ROAD LINK (NRL)
YOU ARE INVITED!
2-DAY ABORIGINAL AND/OR TREATY RIGHTS AND INTERESTS FORUM
HOSTED BY THE PROVINCE OF ONTARIO
Thunder Bay
Victoria Inn Hotel and Convention Centre
555 Arthur Street West
February, 8 & 9 2023
Webequie First Nation and Marten Falls First Nation encourage you to participate in a 2-day forum focused on discussing potential impacts to northern Indigenous communities' Aboriginal and/or Treaty Rights and Interests as they relate to the following Projects:
Webequie Supply Road (WSR) • Northern Road Link (NRL)
Marten Falls First Nation Community Access Road (MFFN CAR)
Participant Funding
The Province of Ontario will fund up to 3 representatives from your community to attend, including travel, accommodation and meals. All questions about funding or the coordination of funding should be directed to the Province of Ontario at ea.participant.fund@ontario.ca.
Additional community representatives are welcome to attend.
Purpose
The Purpose of this Forum is to create a respectful, culturally-sensitive, and collaborative space to develop an understanding of Aboriginal and/or Treaty Rights and Interests in any of the Project areas (WSR, MFFN CAR, and NRL) as your Aboriginal and/or Treaty Rights and Interests and Interests may be impacted by these Projects. Please note the purpose of this event is to discuss Aboriginal and/or Treaty Rights and Interests and not to collect Indigenous Knowledge.
Who Should Attend from your Community
Representatives who are knowledgeable about and comfortable speaking to the Rights and Interests of your community in any of the Project areas are encouraged to attend.
RSVP to ea.participant.fund@ontario.ca by January 27th
(note that you can still attend without an RSVP)

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023**.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 21, 2023

Dear Chief Koostachin-Metatawabin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, April 3rd from 12:00pm-1:00pm EST** for Attawapiskat First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85923496689.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 859 2349 6689.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/attawapiskat/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 6, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternative Road Corridors.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, April 12th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to serene.spence@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

ABORIGINAL AND/OR TREATY RIGHTS AND INTERESTS

WEBEQUIE SUPPLY ROAD (WSR) • **MARTEN FALLS FIRST NATION COMMUNITY ACCESS ROAD** (MFFN CAR) • **NORTHERN ROAD LINK** (NRL)

MIIGWECH / MIIGWETCH / THANK YOU!

Webequie First Nation and Marten Falls First Nation greatly appreciate your community's participation in the 2-day Aboriginal and/or Treaty Rights and Interests Forum held in Thunder Bay on February 8th & 9th, 2023. The Forum focused on discussing potential impacts to northern Indigenous communities' Aboriginal and/or Treaty Rights and Interests as they relate to the following Projects:

Webequie Supply Road (WSR) • **Northern Road Link** (NRL)
Marten Falls First Nation Community Access Road (MFFN CAR)

AS PART OF THE ASSESSMENT PROCESSES FOR THE PROJECT(S), OUR GOAL IS TO WORK WITH YOU TO:

Develop an understanding of Aboriginal and/or Treaty Rights and Interests by each community within each distinct Project area

By understanding Rights and Interests we will be in a better position to have discussions about potential Project(s) impacts

Together, we can then look at ways of avoiding, reducing and mitigating potential negative impacts while enhancing potential opportunities to support Aboriginal and/or Treaty Rights and Interests

The Forum was also an important opportunity to:

- Meet face-to-face
- Connect on how we can work together
- Better understand the roles we all play in assessing potential impacts to Aboriginal and/or Treaty Rights and Interests
- Reduce consultation fatigue
- Provide input into the MFFN CAR Cultural Heritage and Archaeology Program

For your review and comment, please find attached:

- Summary of comments your community provided in the individual Project-Specific Breakout Session(s) and the MFFN CAR Cultural Heritage and Archaeology Workshop
- Summary of comments provided during the group plenary session (Day One Morning)

As First Nation Proponents we understand that assessing potential impacts to Aboriginal and/or Treaty Rights and Interests is complex and iterative. As such, we would greatly appreciate the opportunity to meet with your community one-on-one to further our conversations on this important part of the assessment processes.

Based on positive feedback, we plan on hosting another session in the coming months.
Please stay tuned for more information.

To ***schedule a one-on-one meeting*** or to share further information about your Aboriginal and/or Treaty Rights and Interests with Project Team Representatives please contact:

ABORIGINAL AND/OR TREATY RIGHTS AND INTERESTS FORUM
FEBRUARY 7th & 9th, 2023
THUNDER BAY, ON
GENERAL SUMMARY

#	Indigenous Community	Comment/Issue Raised	Post Forum Response
1.	Webequie First Nation	Need to condense information in a way communities can understand as big documents is not their way to looking at things.	The proponents are taking steps to ensure the project information is understood, such as generating fact sheets, newsletters, and plain language summaries of key documents. In addition, some key documents are translated to Indigenous languages. The proponents will endeavour to continue to provide project information in a way that is concise and uses layman's terms whenever possible.
2.	Webequie First Nation	Important to take the time to listen and learn from First Nations.	Comment acknowledged. The proponents are committed to pursuing open dialogue and consultation with Indigenous communities during the environmental assessment processes.
3.	Attawapiskat First Nation	Community members do not know what is going on with the road Projects. Proponents tend to deal with Chief and Council and information does not get down to the grassroots people. The colonial processes of Chief and Council do not always represent the interests of the Treaty Rights holders.	The proponents will continue to discuss with community leadership how to ensure that community members are reached directly during consultation and engagement activities.
4.	Attawapiskat First Nation	Do not see Treaty people at the forum, only business people.	All Indigenous communities scoped into the EA/IA processes by the Province and IAAC were invited to attend the ATRI Forum.
5.	Attawapiskat First Nation	Do not see Treaty people at the forum, only business people.	All Indigenous communities scoped into the EA/IA processes by the Province and IAAC were invited to attend the ATRI Forum.

6.	Attawapiskat First Nation	We (Attawapiskat First Nation) only received notice for the IAAC Northern Road Link Project Open House one day before the session. IAAC is not advertising its consultation and they are not meeting with the people.	Thank you for this comment. We will share with IAAC.
7.	Attawapiskat First Nation	It is important to talk to Treaty Rights holders and that is why he is streaming the session back to the community.	The proponents will look into options to live-stream consultation and engagement activities when possible.
8.	Webequie First Nation (Chief)	Information being shared at the Forum will help the Proponents see what the impacts to Aboriginal and Treaty Rights may be and will help them make good decisions.	Comment acknowledged.
9.	Webequie First Nation (Chief)	Need to find balance between traditional way of living and the new way of life.	Comment acknowledged. The proponents looks forward to learning more about Indigenous communities' traditional way of life through the Indigenous Knowledge (IK) Programs.
10.	Webequie First Nation (Chief)	There are challenges of keeping Aboriginal and/or Treaty Rights and Interests information confidential. It will be up to each community to decide whether to share information, get feedback and report back to their communities	The proponents acknowledge that it is up to each community to decide whether to share information. It is anticipated that Indigenous Knowledge (IK) collected through the IK Programs will be governed by IK Sharing Agreements that indicate how confidential information will be used to inform the effects assessment but will be protected from public or third-party disclosure.
11.	Webequie First Nation (Chief)	Transparency is important when discussing Aboriginal and/or Treaty Rights and Interests.	Comment acknowledged.

#	Indigenous Community	Comment/Issue Raised	Post Forum Response
12.	Aroland First Nation	Some communities pulled out of the Forum because they were told that advisors were not welcome at the Forum. Aroland First Nation decided to stay despite the fact they did not have their advisors with them to get information as they were not able to meet because of the COVID pandemic.	"The proponents acknowledge there was a miscommunication during the planning of the ATRI Forum. The proponents thank Aroland First Nation for staying in the forum despite this miscommunication. The proponents welcome Indigenous community Advisors/Consultants in all Indigenous consultation and engagement activities for the EA/IA processes.
13.	Aroland First Nation	The group is talking about consultation but this cannot be consultation if community advisors are not present.	The proponents welcome Indigenous community Advisors/Consultants in all Indigenous consultation and engagement activities for the EA/IA processes.
14.	Aroland First Nation	Aroland First Nation is key to the Projects but feels left out. Further, it is a hard position us (for Aroland First Nation) if our neighbours to the north want to do things. The Proponents need to do better.	Comment acknowledged. Marten Falls First Nation and Aroland First Nation have initiated a nation to nation dialogue to resolve concerns raised by Aroland First Nation and are working towards building a collaborative relationship.
15.	Aroland First Nation	The Proponents need to do better to understand what Aroland First Nation wants to do as well.	The proponents are committed to collaborating with Aroland First Nation throughout the EA/IA processes.
16.	Aroland First Nation	We (Aroland First Nation) is attending the Forum to build relationships with our neighbours.	The proponents thank Aroland First Nation for participating in the ATRI Forum. The proponents also aim to build relationships with our neighbours, and are committed to pursuing open dialogue and consultation with Indigenous communities during the EA/IA processes.

#	Indigenous Community	Comment/Issue Raised	Post Forum Response
17.	Aroland First Nation	Aroland First Nation will not support any development until the federal Regional Assessment is completed. What will the cumulative effects be. Aroland First Nation has written letters to that effect.	"The proponents acknowledge Aroland First Nation's request that the Regional Assessment precede the individual road assessments; however, completion of the Regional Assessment in the Ring of Fire Area is not a requirement for the proponents to proceed with the individual EA/IA processes. It is the proponents' understanding that the Impact Assessment Agency of Canada (the Agency) is currently engaging with interested Indigenous communities on a proposed approach for a Regional Assessment that could be co-led by the Agency, Indigenous communities and Ontario. Information generated by the Regional Assessment will be incorporated into the Project's EA/IA as it becomes available. The decision to proceed with the EA/IA processes for the three road projects is consistent with the agreements between the proponents and the Province of Ontario. The proponents are committed to realizing the intended/perceived benefits of the roads for their respective communities, and the region as a whole, within a reasonable timeframe. Deferring/pausing the individual EA/IA processes does not align with these objectives. The EA/IA for the road projects will each include a cumulative effects assessment. The scoping of the cumulative effects assessments will include other past, present or reasonably foreseeable projects and activities, including the other road projects as well as proposed mining projects in the region.

18.	Aroland First Nation	The parties need to rethink the strategy about not allowing advisors. It is strange that government and Proponent advisors are here, yet First Nations are denied their advisors. Aroland First Nation will listen, watch, participate and report back to the community.	The proponent acknowledges there was a miscommunication during the planning of the ATRI Forum. The proponent welcomes Indigenous community Advisors/Consultants in all Indigenous consultation and engagement activities for the NRL Project's EA/IA process.
19.	Aroland First Nation (Chief)	Need to work with Council to answer to members. We came to listen and everyone needs to work together. Proponents need to work with Aroland First Nation.	The proponents are committed to collaborating with Aroland First Nation throughout the EA/IA processes.
20.	Aroland First Nation (Chief)	We (Aroland First Nation) welcome and support Marten Falls First Nation for the Community Access Road Project only, but now there are other things attached (NRL, WSR). Why is Aroland First Nation not involved and why wasn't the community been asked to participate in the development of the Project(s).	Comment acknowledged. Marten Falls First Nation and Aroland First Nation have initiated a nation to nation dialogue to resolve concerns raised by Aroland First Nation and are working towards building a collaborative relationship.
21.	Aroland First Nation (Chief)	The Road Projects will affect everyone and we (Aroland First Nation) are already seeing impacts that will change everything. You can not reverse impacts.	The proponents understand the roads would result in effects/changes, and are conducting individual EA/IA processes in an effort to better understand those effects and develop measure to mitigate negative effects and enhance positive effects.
22.	Aroland First Nation (Chief)	We (Aroland First Nation) want to build a relationship with Marten Falls First Nation and we don't want to fight with our relations. Government is making us fight with our relations and it is confusing.	The proponents appreciate Aroland First Nation's desire to build a relationship and work together.
23.	Aroland First Nation (Chief)	Received texts from other First Nations about opting out of the Forum. We thought about opting out, but I wanted to be open and share my feelings, so we stayed at the Forum.	The proponents appreciates Aroland First Nation's participation in the ATRI Forum.
24.	Marten Falls First Nation	Marten Falls First Nation representative asked to respond to some of the comments made by the Aroland First Nation Chief.	Comment acknowledged.

25.	Marten Falls First Nation	Marten Falls First Nation representative noted that the Proponents have made every effort to meet and consult with Aroland First Nation, but this has been refused for a number of reasons including the COVID pandemic.	Comment acknowledged.
26.	Marten Falls First Nation	There are many ways to communicate, so the Marten Falls First Nation representative disagrees with the notion that the Proponent is not consulting. Issues should not be construed as an argument but rather debating.	Comment acknowledged.
27.	Marten Falls First Nation	Marten Falls First Nation representative recalled a story of a proposed forestry agreement between 3 First Nations that was stalled for more than a year. The Chiefs finally met to discuss and they were able to reach an agreement. There needs to be meetings with just the Chiefs. They did not have advisors and consultants back then. Chiefs need to get together and talk. That is why they are elected.	Comment acknowledged.

1	The Province advised that Indigenous Community Advisors/Consultants were not invited to attend.	The Proponent was not aware that this was communicated to Indigenous Communities and that this is not the position of the Proponents and that Indigenous Community Advisors/Consultants will be invited to participate at the request of the communities in the future. There was a miscommunication within the Province as to this message.	The proponent acknowledges there was a miscommunication during the planning of the ATRI Forum. The proponent welcomes Indigenous community Advisors/Consultants in all Indigenous consultation and engagement activities for the NRL Project's EA/IA process.
2	The Initial Project Description should be put on hold until an Indigenous-led Regional Assessment is complete. Attawapiskat First Nation Chief and Council believe that this is all one project	"The Seven Principles prepared by Matawa and Mushkegowuk articulate that the Road Projects will not be put on hold until the Regional Assessment is complete. Information collected for the Road Project(s) can be utilized in the Regional Assessment. The assessment(s) for the Project(s) will not be put on hold."	"The proponent acknowledges that Attawapiskat First Nation's priority remains a comprehensive, Indigenous community co-led Regional Assessment for the Ring of Fire Area; however, completion of the Regional Assessment in the Ring of Fire Area is not a requirement for the proponent to proceed with the EA/IA process for the NRL Project. It is the proponent's understanding that the Impact Assessment Agency of Canada (the Agency) is currently engaging with interested Indigenous communities on a proposed approach for a Regional Assessment that could be co-led by the Agency, Indigenous communities and Ontario.

			The decision to proceed with the EA/IA process for the NRL Project is consistent with the agreement between the proponent and the Province of Ontario. The proponent has also committed to realizing the Project's intended/perceived benefits for their respective communities, and the region as a whole, within a reasonable timeframe. Deferring/pausing the Project's EA does not align with these objectives. It is reiterated that information generated by the Regional Assessment will be incorporated to the Project's EA/IA as it becomes available. "
3	Every letter that Attawapiskat First Nation has sent, requested that the Project(s)/assessment(s) be put on hold until the Regional Assessment is complete.	"If the EA/IA is complete prior to the Regional Assessment then the information can feed into the Regional Assessment. If the Regional Assessment is complete first then that information can feed into the EA/IA for the Project(s). Marten Falls First Nation and Webequie First Nation will participate in the Regional Assessment."	"The proponent acknowledges that Attawapiskat First Nation has requested that the NRL EA/IA be put on hold until the Regional Assessment for the Ring of Fire Area is completed; however, completion of the Regional Assessment in the Ring of Fire Area is not a requirement for the proponent to proceed with the EA/IA process for the NRL Project. It is the proponent's understanding that the Impact Assessment Agency of Canada (the Agency) is currently engaging with interested Indigenous communities on a proposed approach for a Regional Assessment that could be co-led by the Agency, Indigenous communities and Ontario.

Deferring/pausing the Project's EA does not align with these objectives. It is reiterated that information generated by the Regional Assessment will be incorporated to the Project's EA/IA as it becomes available. "
4	There is concern that once the Project(s) are complete a door will be open (i.e., development) that can not be closed. Development will occur that will affect the area for thousands of years.		The proponent understands there are significant concerns surrounding development in the Ring of Fire region. The proponent plans to conduct a cumulative effects assessment that will include reasonably foreseeable projects mining projects in the region. It is the proponent's understanding that the Impact Assessment Agency of Canada (the Agency) is currently engaging with interested Indigenous communities on a proposed approach for a Regional Assessment in the Ring of Fire region that could be co-led by the Agency, Indigenous communities and Ontario. Other developments in the Ring of Fire may undergo separate EA processes, if required under the EA Act.

#	Comment/Issue by Attawapiskat First Nation	Project Response at Forum	Post Forum Response
5	There is a concern that the Cumulative Effects will not be robust enough (without the Regional Assessment).	"Marten Falls First Nation and Webequie First Nation are aiming to do something bigger and broader to address those concerns. The NRL is going to take a long time to complete - another ~4 years for the EA/IA and then an additional ~2 years of permitting. There is still a lot of time to plan and consider cumulative effects, and information from the Regional Assessment."	The proponent recognizes the need for a robust cumulative effects assessment. The cumulative assessment will follow existing federal guidance, in the absence of clear provincial guidance. The scoping of the cumulative effects assessment will include other past, present or reasonably foreseeable projects and activities. It is reiterated that information generated by the Regional Assessment will be incorporated to the Project's EA/IA as it becomes available. There will be further opportunities for Indigenous communities to provide feedback on the cumulative effects assessment. Indigenous communities and regulators will be consulted on the cumulative effects assessment study plan, methodology, results and mitigation/impact management measures during preparation of the EAR/IS. The draft EAR/IS will include a cumulative effects consultation report to accompany the cumulative effects assessment within the EA (Section 6.7.3 of the ToR).
6	There will be impacts to the whole region including the James Bay Lowlands and Attawapiskat First Nation does not want to open the floodgates.		The proponent recognizes the value and potential impacts to the peatlands in the James Bay Lowlands, and peatlands will be considered in the hydrology, groundwater, vegetation, and climate change assessments.

7	The regional scope/study area has to be wider than what is currently proposed.		The study areas presented in the Proposed ToR, including Regional Study Areas, are preliminary. The proponent will consult and engage with federal and provincial regulators, Indigenous groups, the public, and other interested parties to determine the appropriate spatial boundaries to be used in the EA/IA. As part of the Project's Indigenous Knowledge (IK) Program a memorandum titled 'Memo on the Preliminary Study Areas for the Aboriginal and Treaty Rights and Interests Assessments – Northern Road Link Project' was provided to Indigenous communities, including Attawapiskat First Nation, on November 17, 2022, with follow up communications on December 2 and 12, 2022. Please provide feedback on the memorandum including the RSA boundaries that Attawapiskat First Nation proposes be used, and the rationale for these boundaries, so that they can be considered during refinement of the study areas for the EA/IA. While the proponent considers that the requirements of the ToR have been met, the proponent would welcome the opportunity to meet with Attawapiskat First Nation early in the EA/IA process to further discuss their concerns about spatial boundaries.

#	Comment/Issue by Attawapiskat First Nation	Project Response at Forum	Post Forum Response
8	The assessment processes are a justification for the development of the Far North.		The EA/IA is a planning tool to: (i) identify potential effects (positive and negative) to the environment; (ii) identify mitigation measures to reduce or remove potential negative effects; (iv) facilitate decision-making; and (iv) provide opportunities for communities to provide input on how a project may impact communities and their use of land.
9	The decision to develop the north was done without consultation with Attawapiskat First Nation and the decision to develop the north is a Treaty violation. Free Prior and Informed Consent (FPIC) is required prior to developing the Road(s).		Comment acknowledged. We advise that this comment be directed to Ontario.
10	The assessment processes are "cookie cutter". Field work is going on for the NRL Project before the Project Description has been submitted and the TISG have been issued.	Project Team stated that multiple years of data will be required. Additional data could be requested when the TISG are issued and Marten Falls First Nation and Webequie First Nation are committed to collecting that data.	Each EA/IA process is unique, tailored to fit the project. There will be some similarities between the EA/IA process for the three road projects as the projects are all proposed roads in similar terrain and some of the effects will be similar. In the case of the NRL project, the Terms of Reference provide the workplan for the provincial environmental assessment and TISGs will provide the requirements of the federal impact assessment if an IA is required. Baseline studies have commenced during the planning phase because multiple years of baseline data are required for the EA/IA. MFFN and WFN are committed to collecting these data.

Webequie Supply Road Breakout Session – Attawapiskat First Nation Comments/Responses

#	Comment/Issue by Attawapiskat First Nation Community	Project Response at Meeting	Post Forum Response
1.	Road studies should not proceed until the IAAC Regional Assessment is complete.	Noted.	Comment acknowledged. A Regional Assessment is not a requirement for the proponent to complete the EA/IA for the WSR project. The Impact Assessment Agency of Canada (IAAC) is engaging with interested Indigenous communities on the Regional Assessment.
2.	Attawapiskat has not been consulted on any aspects of regional planning associated with the Ring of Fire and does not recognize the ATRI event as meaningful consultation.	Noted.	Comment acknowledged.

#	Comment/Issue by Attawapiskat First Nation Community	Project Response at Meeting	Post Forum Response
3.	Victor mine negotiations were not supported by all community members. There was a missed opportunity to negotiate a better deal. Some people think they are a laughing stock.	Noted.	Comment acknowledged.
4.	There were issues of worker and subcontractor discrimination at the Victor mine site.	Noted.	Comment acknowledged. The Proponent will consider this information in the socio-economic study.
5.	Government is slowly taking away the community's ability to exercise their rights. Social conditions in the community are poor. There is homelessness, and the water is contaminated.	Noted.	Comment acknowledged. The Proponent will consider this information in the socio-economic study.
6.	The Victor mine has been shut down for two years and are now undertaking remediation. Ever since the blasting stopped at the mine, the caribou have started to return to the area previously affected.	Noted.	Comment acknowledged. The Proponent is undertaking several baseline studies, along with Indigenous Knowledge information to include in the EA/IA which will also consider monitoring programs and mitigation measures.
7.	Treaty rights rest with the grass roots people. Attawapiskat people are environmentalists. Community members use water, rock and animals within their traditional territory. There are sturgeon in the	Noted.	Comment acknowledged. Treaty rights and potential impacts of the Project on Aboriginal and treaty rights and interests will be addressed in the EA/IA.

	rivers that people hunt. The people also have spiritual rights.		
8.	Attawapiskat has sent requests for information, in particular, results of the 2018 and 2019 caribou study, including collaring work. No response has been received to date. It is Attawapiskat's understanding that Chief Wabasse needs to sign off on the data before circulating.	WSR Project Team to enquire as to status of information sharing.	Comment acknowledged. The Proponent will work towards a knowledge sharing agreement with Attawapiskat First Nation.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

June 6, 2023

Dear Chief Koostachin-Metatawabin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 19th between 12:00pm-1:00pm EST** for Attawapiskat First Nation, where there will be the second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87826878170

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 878 2687 8170**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/attawapiskat/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 13, 2023

Dear Chief Koostachin-Metatawabin,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to former Chief David Nakogee on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022, February 24, 2022, April 13, 2022, and sent an email on January 20, 2022 to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating. To date, we have not received a response regarding your interest in participating in the Program.

As you know from our previous correspondence, Webequie First Nation is the proponent of the WSR, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Attawapiskat First Nation currently has an expired funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. We encourage you to contact Ontario to determine how to proceed with reviving your community's funding agreement. Please let us know if there is any way we can offer our support throughout this process.

Today, we are writing to confirm whether your community has an interest in participating in the IKLRU Program. Our Project Team is available to discuss how your community can participate to lead an IKLRU study that will help to document how your Aboriginal & Treaty rights are impacted by the WSR Project.

We want to learn more about your community from your perspective on a range of topics, including:

- Community history
- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests, and ensuring they are protected.

We have a timeframe for the EA/IA process, to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you, to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

July 6, 2022

Dear Mr. Fox and Mr. Parkinson,

Attawapiskat First Nation received your emails of June 28th and July 5th, outlining engagement opportunities on the Webequie Supply Road project and the Socio-Economic Primary Data Collection Program.

As we have already said many times, we are happy to meet with your project team if you agree to pause the EA and restart it only once a comprehensive, First Nations co-led, co-enforced Regional Impact Assessment ("co-led RA") has been completed. Without the cumulative effects assessment that a co-led RA can provide, it is not possible to understand the full impact that opening up the Ring of Fire to all-season road access will have on our rights and interests. You may be aware that several First Nations in the Hudson Bay Lowlands are actively negotiating with Canada about a co-led RA.

At this point, please send us drafts of the EA chapters, as they become available, and before you submit them to regulators. This will allow us to integrate our Indigenous knowledge, and information about impacts to rights, directly into the EA. However, this should not be taken to as an indication that we consent to the processes of an individual EA for this segment of the north south corridor. We do not accept or consent.

Please also share with us the baseline caribou monitoring data you are currently collecting.

Sincerely,

Chief David Nakogee
Attawapiskat First Nation

July 26, 2022

Dear Mr. Fox,

Attawapiskat First Nation received your email of July 12th, informing us of the engagement options available regarding the Webequie Supply Road project.

Please refer to our letter of July 6th, 2022, in which we state that we are happy to meet with your project team if you agree to pause the EA/IA and restart it after a comprehensive, First Nations co-led, co-enforced Regional Impact Assessment ("co-led RA") has been completed. Without the cumulative effects assessment that a co-led RA can provide, it is not possible to understand the full impact that opening the Ring of Fire region through all-season road access will have on our rights and interests. You may be aware that several First Nations in the Hudson Bay Lowlands are currently negotiating with Canada about a co-led RA.

At this point, please send us drafts of the EA chapters, as they become available, and before you submit them to regulators. This will allow us to integrate our Traditional Indigenous Knowledge, and information about impacts to rights, directly into the EA. However, this should not be taken as an indication that we consent to the processes of individual EA/IAs for this segment of the north south corridor. We do not accept or consent.

Please also share with us the baseline caribou monitoring data you are currently collecting.

Sincerely,

Chief David Nakogee

August 24, 2022

Dear Mr. Fox,

Communication between Attawapiskat First Nation and the Webequie Supply Road (WSR) project team needs to improve. Please directly address our comments below in your next response. Like many First Nations in this region, our capacity is limited and exchanging letters with no consequence is a drain on our resources.

On August 3, 2022, you invited us to participate in your Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the WSR. On August 12, 2022, you reminded us of all our engagement options. We have received many invitations to engage with you. We will repeat what was in our last two letters, which we suggest you re-read.[1]

We are happy to meet with the WSR project team if you agree to pause the EA and restart it after a comprehensive, First Nations co-led, co-enforced Regional Impact Assessment has been completed.

The Tailored Impact Statement Guidelines for the WSR project require you to share with us sections of the EA that pertain to Indigenous peoples and impacts to our rights, prior to submission to the regulator.[2] As previously requested, please send us drafts of all the EA chapters, as they become available, and before you submit them to regulators. This will allow us to integrate our Traditional Indigenous Knowledge, and information about impacts to rights, directly into the EA. However, this should not be taken as an indication that we consent to the process of an individual EA or an individual federal impact assessment for this segment of the north south corridor. We do not accept or consent.

[1] July 6 and 26, 2022 – for your reference
[2] See: "The proponent is required to provide an opportunity for Indigenous groups to review the information that pertains to them prior to submission of the Impact Statement" WSR Tailored Impact Statement Guidelines pps 76 and 115

We also ask that you please also share with us the baseline caribou monitoring data you are currently collecting.

Sincerely,

Chief David Nakogee
Attawapiskat First Nation

June 28, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Construction Camps.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, July 5th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

January 25, 2024

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON P0L 1A0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L1A0

Re: Preliminary draft Attawapiskat First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for Attawapiskat First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;
- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;

- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Attawapiskat First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

The information provided in this document is preliminary at this time, and it has been prepared with information that is known specifically for Attawapiskat First Nation. This is a living draft document that has yet to be reviewed and validated by the Community. Information on existing conditions is used to provide a baseline understanding of the valued components of the community. Potential effects of the Project on valued components will be assessed by comparing baseline conditions to those expected to result from the construction and operation and maintenance of the Project.

Webequie First Nation is the proponent for the Project. The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk (Cree) Indigenous Knowledge as it relates to the Project and to help inform the Socio-Economic Baseline. This document will be continuously updated when information from the Webequie First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources of communities as well as following culturally relevant protocols, which require relationship building and consistency to establish trust.

Webequie is an Anishinaabemowin (Oji-Cree) Tawin (community) in Treaty No. 9 territory, located about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe (Ojibway) and Mushkegowuk (James Bay Cree).

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (The good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, and that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie like many Indigenous Nations and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' Socio-Economic data because Webequie the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

DRAFT

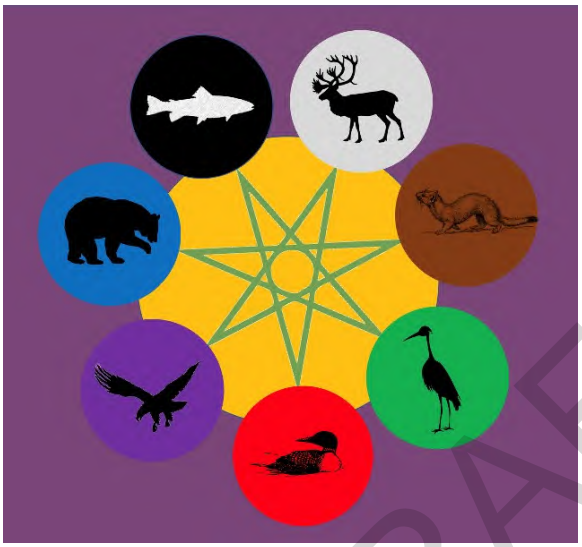
Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2.

Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan-System")



Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) established itself and exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation mode for the people living in their homelands. (SNC-Lavalin, 2022). Before that time, Anishinaabemowin had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The Indian Act, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC, officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern hub of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	Established constitutional basis for future negotiations of treaties and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	Signed treaties with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	Established staking and prospectors' licenses for exclusive rights to stake and work upon Crown lands.
Ontario Registered Trapline System, 1946	Imposed sole ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples, 1996	Mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada, 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

DRAFT

It is important to tell the story of Indigenous Nations in order to understand how they have arrived at their current Socio-Economic conditions and Indigenous Knowledge. Part of that story includes not only the history of Indigenous Nations, but also that of Indigenous Peoples in Canada.

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Attawapiskat First Nation is a fly-in Mushkegowuk (Cree) Nation in Treaty No. 9 territory in Northwestern Ontario, located 800 km northeast of the City of Thunder Bay, and 330 km east of Webequie First Nation in Northern Ontario, surrounded by the Unorganized Kenora District. The community is the northerly-most destination on the 310 km winter road from Moosonee (The Winter Road Company, 2023). It is situated near the mouth of the Attawapiskat River, roughly 10 km west of where the river empties into James Bay.

Attawapiskat is home to the James Bay Cree - also known as Mushkegowuk Cree and Omushkegowuk Cree, western James Bay, west-coast, Swampy, and Hudson Bay Lowland Cree. The Swampy Cree language is Indigenous to this area (Attawapiskat Education Authority, 2023).

Attawapiskat means “people of the parting of the rocks” in Swampy Cree language, from the limestone island formations at the mouth of the Attawapiskat River (Reuters, 2016).

Attawapiskat is a Nishnawbe Aski Nation (Treaty No. 9) First Nation. In 1930, an adhesion to Treaty No. 9 provided a reserve for the Attawapiskat First Nation. The Treaty adhesion set aside Attawapiskat Indian Reserve 91 on the Ekwan River, a parallel river north of the Attawapiskat River, which drains into James Bay, totalling 27,040.1 ha. In time, it was decided by local leaders to establish the community in its present location on the Attawapiskat River instead. This was due to an existing trading post and better access to James Bay shipping routes from this location. The new reserve, which contains 235.8 ha, was then numbered Attawapiskat Indian Reserve 91A (CIRNAC, 2023b).

Attawapiskat First Nation has a Registered Population of 3,708, with 2,017 members living on- reserve (CIRNAC, 2023b). It is a fly-in community, serviced by a Visual Flight Rules (VFR) all-season airport. A temporary seasonal road constructed each winter, connects the community to other towns and communities along the shore of James Bay -- Kashechewan First Nation, Fort Albany First Nation, Moose Factory First Nation and the Town of Moosonee. As noted above, First Nation fly-in communities have observed that winter road seasons are getting shorter, and this is a major concern for shipping in supplies (CBC, 2023b).

Attawapiskat First Nation has a Custom Electoral System, with one Chief, one Deputy Chief and twelve Councillors elected every three years. The next election will be in August 2025.

The community is formally affiliated with the following political territorial organizations:

- Nishnawbe Aski Nation;
- Matawa First Nations; and
- Chiefs of Ontario.

2.2 Community History

The people of Attawapiskat First Nation are Muskegowuk Cree Peoples and are among the First Peoples of the region (Archaeological Services Inc., 2021). Traditionally the Attawapiskat Cree have hunted, fished, and trapped to support themselves, and moved their camps seasonally in pursuit of game.

European colonization included establishment of the first permanent Christian church in 1893 (Archaeological Services Inc., 2021). The HBC established a trading post near the church in 1901. Additional trading posts were established throughout Attawapiskat’s traditional territory to increase opportunities for trading with family groups further away from the original trading post (Cummins, 1992).

DRAFT

2.3 Community Values and Aspirations

Protection of their traditional way of life and protection of water is a primary interest to the Attawapiskat First Nation People (Koostachin, 2005). Water is a sacred part of Attawapiskat ceremonies (Koostachin, 2005). Attawapiskat First Nation is one of 10 northern First Nations who launched a lawsuit against the Ontario and federal government in April 2023 (McIntosh, 2023). They have requested that the Canadian government be barred from making any decisions about how land could be used in the Ring of Fire for mining and other purposes without Indigenous consent. The lawsuit centres on Treaty No. 9 and the contrast between the verbal and written promises of Treaty No. 9 as recorded (McIntosh, 2023). The First Nations assert that they did not cede or surrender their territories and that Treaty No. 9 did not give the Ontario government the right to allow resource extraction (McIntosh, 2023). Attawapiskat First Nation expressed concerns about the Project regarding adequate consultation, regulatory process and cumulative effects on its community (Attawapiskat First Nation, 2021).

The initial Impact Benefit Agreement (IBA) between Attawapiskat First Nation and De Beers Canada promised numerous benefits, including training, employment, business opportunities, environmental management, and financial compensation (Canada Mining Journal, 2005). However, after the closure of the Victor diamond mine, it became evident that the promised prosperity did not materialize for the community. Attawapiskat First Nation suffered from persistent poverty, unemployment, and deteriorating infrastructure, while the diamond royalties and public revenues generated by the mine were disproportionately low. As a result, the Attawapiskat people have lost trust in future projects entering their community, given the broken promises and lack of equitable benefits from the previous agreement (SP The Bullet, 2020).

DRAFT

SOCIAL ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools to assess Socio-Economic conditions in communities, as these data can identify vulnerable groups, the effects on vulnerable population groups such as women, disabled persons, Elders and youth, segments of the population that will either benefit or be negatively impacted (directly or indirectly) by the Project, and barriers to participation for local under-represented groups. The existing conditions of population and demographics are described in this section using the following indicators:

- Population overview, including gender and age;
- Indigenous identity/Nationhood; (First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into the Socio-Economic existing conditions where the Project is being considered. They can help assess the potential effects of the Project and develop strategies to mitigate any negative effects.

3.1.1 Population Overview

The 2021 Census 2021 included, for the first time, a question on self-identified gender and added “at birth” to the gender question, which enabled cisgender, transgender and non-binary individuals to report their gender (Statistics Canada, 2023).

Table 3-1 below presents the forecasted population over the projection period broken down by self-identified gender. Population trends by self-identified gender are summarized as follows:

- Over the projection period there is an increase in both the male and female populations;
- Between 2016 and 2043 the male population increases from 785 to 1,206, a 53.6% increase;
- Between 2016 and 2043 the female population increases from 710 to 856, a 20.5% increase; and
- The gap of the male and female population distribution is growing over the projection period.

Table 3-1: Population Forecast by Self-Identified Gender, Attawapiskat (2016, 2021, 2028, 2033, 2043)

Year	Total	Male	Female
2016	1,505	785	710
2021	1,585	850	735
2028	1,713	950	771
2033	1,810	1,029	799
2043	2,021	1,206	856

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-2 presents forecasted population growth to 2043, broken down by age group. The age groups represented are 0 – 14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group are summarized as follows:

- All age groups, except 65 years and over age group, are forecast to grow over the projection period.
- Between 2016 and 2043, the 0 – 14 years age group is projected to increase from 480 to 1,001, an 108.5% growth.
- Between 2016 and 2043, the 15 – 64 years age group is estimated to increase from 935 to 1,019, a 9.0% growth.
- Between 2016 and 2043, the 65 years and over age group is not projected to increase, staying at an estimated 85 persons. However, the population distribution of this age group decreases over time, in comparison to other age groups which increase.

Table 3-2: Population Forecast by Age Group, Attawapiskat (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	1,500	100%	480	32%	935	62%	85	6%
2021	1,585	100%	550	35%	950	60%	85	5%
2028	1,721	100%	665	39%	971	56%	85	5%
2033	1,835	100%	763	42%	987	54%	85	5%
2043	2,105	100%	1,001	48%	1,019	48%	85	4%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 3-3 below presents the population by Indigenous identity for 2021. Indigenous identity for Attawapiskat First Nation is summarized as follows:

- 98.1% identify as First Nation; and
- The remaining population identifies non-Indigenous (1.9%).

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Attawapiskat (2021)

Indigenous Identity	Count	Distribution
First Nations	1,510	98.1%
Métis	0	0%
Inuk	0	0%
Non-Indigenous	30	1.9%
Total	**1,540**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.3 Languages

Table 3-4 below presents the languages spoken most often in homes at Attawapiskat First Nation. Languages used by the Nation is summarized as follows:

- The majority of households speak English while at home at approximately 75.4%; and
- Indigenous languages are the second most spoken within the home at 24.6%.

DRAFT

Table 3-4: Language Used Most Often at Home, Attawapiskat (2021)

Language	Count	Distribution
English	1,090	75.4%
Other Non-Official Languages	0	0%
Indigenous Languages	355	24.6%
Total	**1,445**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of residents of Attawapiskat First Nation in 2020. Mobility status refers to the status of a person with regard to their place of residence on Census Day in relation to their place of residence on the same date 1 or 5 years earlier (Statistics Canada, 2022a).

Residents are categorized as “non-movers” or “movers”. Persons who, on Census Day, lived in the same residence as they did on the same date 1 year or 5 years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did 1 year, or 5 years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Attawapiskat First Nation is summarized as follows:

- 98% of residents were in the “non-movers” category, with a relatively equal distribution between the male and female population.
- 2% of residents were in the “movers” category, with a relatively equal distribution between the male and female population.

Table 3-5: Mobility Status of Residents, Attawapiskat (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	1,530	98%	820	98%	710	97%
Movers	35	2%	15	2%	20	3%
Total	**1,565**	**100%**	**835**	**100%**	**730**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2 Housing and Accommodations

Housing and accommodations are an important factor among First Nations people living on reserves. In 2021, it was recorded that one in five First Nations people (21.4% or 224,280 people) reported that they consider the household they live in as being crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

DRAFT

These indicators help with understanding existing Socio-Economic conditions of the community and predict potential effects of the Project on the community's quality of life.

3.2.1 Housing Characteristics

Table 3-6 below presents the total private dwellings and private dwellings occupied by usual residents in the Attawapiskat First Nation. Private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are a total of 763 dwellings in community in 2021;
- Of the total private dwellings, 359 (47.1%) are occupied by usual residents; and
- The highest percentage of dwellings are total private dwellings at 404 (52.9%).

Table 3-6: Total Private Dwellings and Occupied Private Dwellings in Attawapiskat First Nation (2021)

Dwelling	Count	Distribution
Total private dwellings	404	52.9%
Private dwellings occupied by usual residents	359	47.1%
Total	**763**	**100.0%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-7 below presents the total number of occupied dwellings for Attawapiskat First Nation by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of dwellings are classified as single-detached at 73.2% of total dwellings;
- Following single-detached homes, the second most common structure for dwellings in semi-detached at 18.3%; and
- The remaining structural types, row houses at 2.8% and moveable dwellings at 5.6%, make up 8.4% of the dwellings.

Table 3-7: Total Occupied Private Dwellings by Structural Type in Attawapiskat (2021)

Structural Type	Count	Distribution
Single-detached house	260	73.2%
Semi-detached house	65	18.3%
Row house	10	2.8%
Apartment or flat in duplex	0	0.0%
Apartment in a building that has fewer than five storeys	0	0.0%
Apartment in a building that has five or more storeys	0	0.0%
Other single-attached house	0	0.0%
Moveable dwelling	20	5.6%
Total	**355**	**100%**

DRAFT

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Attawapiskat First Nation in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings are considered government or band housing, accounting for 76.4% of dwellings;
- Attawapiskat First Nation has the highest concentration of owner-occupied dwellings at 16.7%; and
- The remaining 6.9% of dwellings are rented properties.

Table 3-8: Private Dwellings by Tenure in Attawapiskat (2021)

Tenure	Count	Distribution
Owner	60	16.7%
Renter	25	6.9%
Dwelling provided by the local government, First Nation or Indian band	275	76.4%
Total	**360**	**100%**

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Attawapiskat First Nation. Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Attawapiskat First Nation in 2021:

- The majority of households are occupied by five or more persons (43.1%);
- Households occupied by four persons and households occupied by two persons are second highest in the community, at 16.7%; and
- The remaining 23.6% are households occupied by one person (11.1%) and households occupied by three persons (12.5%).

Table 3-9: Number of Households by Household Size in Attawapiskat (2021)

Household Size	Count	Distribution
1 person	40	11.1%
2 persons	60	16.7%
3 persons	45	12.5%
4 persons	60	16.7%
5 persons or more	155	43.1%
Total	**360**	**100%**

3.2.3 Housing Conditions

The following subsections describe housing conditions which include the numbers of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as suitability and conditions of dwellings for Attawapiskat First Nation.

Table 3-11 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Attawapiskat First Nation:

- Dwellings constructed during the period from 1991 to 2000 is the largest group with 30.6% of private dwellings constructed during this period;
- The least amount of constructed dwelling was from 1960 or before (2.8%) and from 2001 to 2005 (4.2%);
- 57% of the occupied private dwellings in Attawapiskat First Nation were constructed during or prior to 2000; and
- Over the last two decades, 155 dwellings were constructed which comprises of 43.1% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Attawapiskat (2021)

Construction Period	Count	Distribution
1960 or before	10	2.8%
1961 to 1980	50	13.9%
1981 to 1990	35	9.7%
1991 to 2000	110	30.6%
2001 to 2005	15	4.2%
2006 to 2010	50	13.9%
2011 to 2015	45	12.5%
2016 to 2021	45	12.5%
Total	**360**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-12 below presents the suitability of occupied private dwellings in Attawapiskat First Nation in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- The majority of dwellings (59.7%) in Attawapiskat First Nation were categorized as suitable; and
- 40.3% of the occupied private dwellings were categorized as unsuitable.

DRAFT

Table 3-12: Occupied Private Dwellings by Suitability in Attawapiskat (2021)

Suitability	Count	Distribution
Suitable	215	59.7%
Not suitable	145	40.3%
Total	**360**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-13 below presents the conditions of the private dwellings in Attawapiskat First Nation in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 31.9% of the private dwellings in Attawapiskat First Nation were categorized as requiring major repairs; and
- The majority of dwellings (68.1%) conditions only required regular maintenance and minor repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Attawapiskat (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	245	68.1%
Major repairs needed	115	31.9%
Total	**360**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.3 Community Services

Community services are a significant issue in remote communities because many services that are required by community members need to be accessed outside the community or are only available intermittently within the community. Historically, remote Indigenous communities have been under-serviced, which has had detrimental effects on the health and well-being of community members. Some of the most vulnerable people in the community have difficulty accessing services outside the community due to health and financial factors. The community services in Attawapiskat First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care). The existing conditions of community services in the Attawapiskat First Nation are described in this section.

Community Services information for Attawapiskat First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal on social, community, health and government services in Northern Ontario. To-date, Attawapiskat First Nation has not confirmed that it wishes to undertake Socio-Economic primary data collection.

3.3.1 Family Services

Family Well-Being Program

The Family Well-Being Program is a Nishnawbe Aski Nation initiative that aims to support each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improving the overall health of communities. Its activities and programs include revitalizing Indigenous languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counselling and child/youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events. The program works towards eliminating family violence, reducing the number of youths involved in the justice system, and decreasing the number of children in care (211 Ontario North, Attawapiskat First Nation, 2023a).

3.3.2 Child Care and Youth Programs

Child and Family Services

The Child and Family Services department is responsible for delivering childcare and protection services as well as family support services to members of the Attawapiskat First Nation community. The department administers services to Payukotayno Child and Family Services, which is a mandated Indigenous child welfare agency. The prevention services provided by the department include teaching parenting skills, developing healthy social and recreational programs for families, hosting community forums to address various issues, organizing Elders' meetings that address traditional child rearing methods, and providing information sessions about understanding substance dependency and family violence.

The department also offers repatriation services, which involve processing requests to bring children in external foster care back to their home community and providing advocacy on behalf of the child and family (211north.ca, Attawapiskat First Nation, 2023b).

3.3.3 Elder Care

Home Care and Community Health

Home Care and Community Health offers healthcare services for ill, injured, seniors and Elders of the Attawapiskat First Nation community in the comfort of their own homes. (211 Ontario North, 2023au).

Funding and advice for senior and Elder care is provided by Indigenous Services Canada under the First Nations and Inuit Home and Community Care (FNIHCC) program. It aims to develop home and community care services to Indigenous people living in First Nations and Inuit communities (Indigenous Services Canada, 2023). The FNIHCC program covers First Nations persons living on-reserve and having been assessed as requiring one or more services.

The FNIHCC program focuses on services, such as:

- Client need, case management and care coordination;
- In-home respite care and temporary care;
- Nursing care planning; and
- Personal care management.

DRAFT

3.3.4 Health Services

3.3.4.1 Neepeeshowan Midwives

The Neepeeshowan Midwives offer a range of prenatal, postnatal and labour and delivery services to all pregnant women in the Attawapiskat First Nation community. They have admitting privileges at Weeneebayko Area Health Authority and provide skilled physical and emotional support during labour, clinical monitoring after birth and collaborate with other health professionals if concerns arise during pregnancy, birth or postpartum. The program also provides access to midwifery education when possible. The term 'Neepeeshowan' means a blooming flower in Cree. Attawapiskat community experiences around 50 births per year. Eligibility is limited to female members of Attawapiskat First Nation and Weeneebayko Area Health Authority (WAHA) communities experiencing low-risk pregnancy. High-risk pregnancies are flown out of the community at 38 weeks (211 Ontario North, Attawapiskat First Nation, 2023c).

3.3.4.2 Health Clinic

The Health Clinic offers services that focus on promoting physical and mental health for members of the Attawapiskat First Nation community. The clinic coordinates outpatient health care services through visiting health professionals, including Home Care and Community Health Nurses, and weekly visits from a physician. It provides health awareness and counselling, education and prevention workshops, as well as a Midwifery Program and mental health and addictions services. The clinic also coordinates clinics for various health areas, including Diabetes, Immunization, Sexual Health, and Communicable Diseases. Additionally, it provides a full range of dental treatment through the WAHA. The clinic addresses individual health care needs by providing advocacy on behalf of individuals with other health professionals, coordinating one-on-one prenatal care with the Community Health Nurse, home visits to the sick, Elders, new mothers, and persons with healthcare needs, as well as assistance with coordinating local and long-distance travel arrangements for medical appointments (211north.ca, 2023au).

3.3.4.3 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program provides assistance and support to individuals and families in Attawapiskat First Nation struggling with addiction issues. This program offers Alcohol Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides transportation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counselling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to other services such as detoxification and medical assistance (211 Ontario North, Attawapiskat First Nation, 2023d).

3.3.4.4 Diabetes Program

The Diabetes Program provides education, prevention, management and treatment services for Attawapiskat First Nation individuals living with diabetes or at risk of developing diabetes. The program is offered through the Weeneebayko Diabetes Education Program, which is administered by the WAHA. In addition to case management and screening services, the program also provides basic foot care services and aims to reduce the number of avoidable complications that can arise from uncontrolled diabetes. The program also offers advice on developing and implementing an approach to care and management of diabetes and assists individuals in finding appropriate services (211 Ontario North, Attawapiskat First Nation, 2023e).

3.3.4.5 Extended Health Benefits

The Extended Health Benefits program provides a range of health benefits to individuals and families experiencing high health care costs. Eligibility for the program is determined based on need and is open to members of Attawapiskat First Nation aged 16-65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing

DRAFT

aids, prescription drugs, surgical supplies and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Attawapiskat First Nation, 2023f).

3.3.5 Recreational Services

The Recreation Services department is responsible for planning and executing social, recreational, and special events for community members of all ages in Attawapiskat First Nation. The Maytawaywin Authority oversees recreational services at the community centre and Reg Louttit Sportsplex, including an arena and ice surface, gymnasium, and fields for football, baseball, and soccer. They coordinate and supervise various programs, such as adult volleyball/ basketball nights, game nights, group fitness classes, dances, bingos, and public skating. In addition, they offer gym rentals for private events and structured/unstructured activities during school Professional Development (PD) days, as well as assist with the annual pow wow (211 Ontario North, Attawapiskat First Nation, 2023g).

3.4 Education and Training Services and Facilities

Education and training services and facilities are limited in many fly-in First Nation communities. In the 2015/2016 school year, high-school completion and post-secondary participation were higher among non-Indigenous youths in Canada compared to Indigenous youths (Statistics Canada, 2023). However, when comparing First Nation youth living on-reserve to First Nation youth living off-reserve, those that live off- reserve are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on education and training services and facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

Attawapiskat First Nation has two schools on-reserve. They are operated/managed by the Attawapiskat First Nation Education Authority (AFNEA) (AFNEA, 2023). Kattawapiskak Elementary school (Junior Kindergarten to Grade 8) has been in use since 2014 and includes a computer lab, cafeteria, music room, tech shop and classrooms (AFNEA, 2023). The school can accommodate up to 540 students. There are multiple outdoor playing fields and a gym located at the school. Vezina Secondary School includes 10 classrooms, a kitchen, an art room, a computer lab and a tech shop (AFNEA, 2023). The school schedule allows students to participate in spring and fall hunts (e.g., a two-week Goose Break). There are approximately 800 students who attend both schools (211 Ontario North, Attawapiskat First Nation, 2023h).

AFNEA provides additional community support with the Community Learning Office at the Attawapiskat Development Corporation. Contact North has a partnership with Attawapiskat First Nation, and they provide over 18,000 online and distance education courses at the centre through e-learning and distance courses (Bell, 2015). The online courses include college and university courses as well as literacy, basic skills and other training (Bell, 2015). The centre is operated by Contact North, Ontario's Distance Education and Training Network, and is equipped with learning technologies, internet access, computer workstations. The centre is staffed by a local coordinator who provides additional assistance.

DRAFT

Attawapiskat has a Northern College access centre to support Northern College students in the area (211 Ontario North, Northern College, 2023).

The Mushkegowuk Council Employment & Training Service (METS) is a training service offered for members of the Mushkegowuk Nations, which includes Attawapiskat First Nation (Mushkegowuk Council, 2023e). METS has been operating since 1997 and provides employment and training funds for Mushkegowuk Council First Nations. Financial assistance provided by the service may cover staff wages, mandatory employment related costs, and overhead costs. The objective of METS is to assist individuals preparing to enter the labour market by providing work experience and developmental learning experience to in-school individuals during the summer. METS offers workplace-based training to assist employers (including self-employed individuals) through negotiated contributions to training to meet their current or future skill needs, as well as to retrain individuals whose skills have been made redundant through technology, or by market, legislative or regulatory change. The services provided by METS include computers and internet access, employment insurance application, cover letter and resume writing, employment and training applications, social insurance applications, local job postings, and resource materials (Mushkegowuk Council, 2023e).

Camp services are available to the youth in the Attawapiskat community by Camp Chikepak, a two-week youth camp held at Camp Bickell on Chapman Lake (Grech, 2022). This is an annual camp that is open to youths aged 9-14 years old across the Mushkegowuk territory. The camp experience focusses on land-based/cultural activities. Costs are covered by Choose Life, which is funded through a Nishnawbe Aski Nation program.

In 2019, Omushkego Education Student Success hosted a Cree Language and Culture Teachers Gathering to create a culturally relevant curriculum based on land-based Omushkego culture (Omushkego Mushkegowuk Council, 2021). Omushkego Education Student Success supports Attawapiskat First Nation community. The Omushkego Land-Based Camp Activities Teacher's and Principal's Toolkit was developed from this gathering. This toolkit provides educators with resources to integrate seasonality into their classroom programs. Land-based camp activities for children such as Spring Goose Camp Activities, Summer Celebrations, Fall or Winter Moose Camp Activities and Winter Fishing Camp outline specific activities that can be undertaken during each camp (Omushkego, 2021).

3.5 Emergency and Protective Services

Many fly-in First Nation communities have limited access to Emergency and Protection Services. These services are often not available within the community which must then rely on services such as emergency medical care provided off-reserve. This section describes the existing conditions of emergency and protective services using the following indicators:

- Demand for community emergency and protective services; and
- Supply and capacity of community emergency and protective services.

These indicators were selected to determine emergency and protective services that are available within the Attawapiskat First Nation, and those services that are either not available to the community or are only available outside the community. Emergency and protective services include police services, fire services, and emergency medical services (EMS). Information was primarily collected through the 211 Ontario North website and municipal/community websites.

The Socio-Economic Baseline includes a description of the following emergency and protective services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

DRAFT

Police: The Attawapiskat First Nation Reserve has a police station (Five Nations Energy Inc., 2021) which is a detachment of Nishnawbe Aski Police Services, Northeast Region (211 Ontario North, Attawapiskat First Nation, 2023j). In 2004, Attawapiskat had a detachment of 5-6 members (Clairmont, 2006).

Fire: Attawapiskat has an on-reserve fire department which includes one fire chief, one lieutenant and seven firefighters (211 Ontario North, Attawapiskat First Nation, 2023i).

EMS: James Bay Ambulance Service is located on-reserve but there are limited hospital services within the community. Weeneebayko Area Health Authority Paramedic Service has a base on-reserve (WAHA, 2023). If emergency care is required, patients are airlifted to Moose Factory or Timmins (211 Ontario North, Attawapiskat First Nation, 2023j).

3.6 Community Infrastructure

This section describes community infrastructure, including community roads, electrical power systems, drinking water management systems, wastewater management systems, solid waste management systems, telecommunications systems, and other infrastructure using the following indicators:

- Demand for community services and/or infrastructure; and
- Supply and capacity of community services and/or infrastructure.

These indicators were selected to define community infrastructure that is available in the Attawapiskat First Nation, community infrastructure that is needed, and the condition of the infrastructure (i.e., if infrastructure requires upgrading and/or repair). Information was collected from various websites, including municipal/community websites, service provider websites (e.g., Hydro One), and federal and provincial sources (i.e., Government of Canada, and Government of Ontario).

Attawapiskat First Nation is not currently under a boil water advisory, although the community has historically been plagued with water quality and availability concerns. In 2019, the community faced potentially harmful levels of chemicals in the water, rendering it unusable (Barrera, 2019). Table 3-14 provides a list of community infrastructure present in Attawapiskat First Nation.

Table 3-14: Description of Community Infrastructure in Attawapiskat

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 3 Water Treatment Facility. ▪ Water Quality: fails health guidelines.	▪ Level 1 Wastewater System. ▪ Constructed in 2001. ▪ Facultative Lagoon. ▪ Effluent Quality: meets federal guidelines.	Connected to grid via Five Nations Energy Corp.	Landfill on/near site.

3.7 Transportation

Transportation and access to goods and services outside of communities is a key consideration for communities in Ontario's Far North. The only paved road in the Far North is Highway 599 (IBI Group & Hemson Consulting Ltd, 2016). For communities without all-season road access, remote airports running year-round connect communities to regional hubs to the south and other communities for services, and for the delivery of goods.

In addition, during the coldest weeks of winter with deep freeze conditions, communities use winter roads to connect them to all-season road networks and rail connections. The winter road season tends to be from mid-January to Spring thaw (Ontario Ministry of Northern Development, 2023). Hauling heavy bulk supplies is more cost effective and critical for the communities to maintain supplies of fuel, water, housing materials, food and other goods (IBI Group & Hemson Consulting Ltd, 2016). Living in First Nation communities with no all-season roads has many implications including limited access and the high cost associated with travelling and shipping. The shortening of winter road

DRAFT

seasons has been a matter of concern for Indigenous communities in Northern Ontario in recent years. More snow than usual and warm spells in the winter months disrupts transportation of goods and services over winter roads. Higher average temperatures expected to be the result of climate change have been observed to impact the viability of winter roads and have shortened the winter road season (CBC, 2023a, 2023b). With climate change, the duration of safe lake ice is also projected to decrease. A study has shown that a 1.5ºC (degree Celsius) increase in average temperatures due to climate change can lead to 90% of current ice roads no longer being sustainable (Woolway et al, 2022).

For generations, Indigenous communities have relied on waterways in various ways including for travel to support community life. Waterways are recognized to be vital to the sustainability of communities.

This section describes the transportation options available using the following indicators:

- Road transportation;
- Air transportation; and
- Waterways.

Moosonee/James Bay corridor connects Attawapiskat First Nation to the Ontario Winter Road System (IBI Group & Hemson Consulting Ltd, 2016). The James Bay Winter Road Corridor runs north from Moose Factory along the James Bay coast to four First Nation communities, and connects to a gravel road in Otter Rapids and to the south via the Wetum winter road.

Attawapiskat First Nation has flight access via Thunder Airlines (Thunder Airlines, 2023), SkyCare (SkyCare, 2023) and Air Creebec (AirCreebec, 2023).

3.7.1 Winter Road Traffic Volumes in the Local Study Area

Information is not currently available/section not complete.

3.7.2 Waterways in Attawapiskat First Nation Traditional Territory

Attawapiskat First Nation traditional territories are within the secondary watersheds of Lower Albany River Watershed, Attawapiskat River, and Ekwan River – Coastwatersheds (Government of Ontario, 2023).

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being to First Nation communities over the last 35 years, the Socio-Economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The Socio-Economic Baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

DRAFT

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key Socio-Economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four Socio-Economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that "well-being" means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people's overall "well-being."

The four Socio-Economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high-school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

Table 3-15: CWB Index Scores for Attawapiskat First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	**58**	**40**	**69**	**54**	**71**
First Nations in Ontario	**59**	**38**	**72**	**53**	**70**
Attawapiskat First Nation	48	24	64	52	52

Source: Indigenous Services Canada, 2019b.

Attawapiskat First Nation has a low CWB score for education (24), in comparison to First Nations in Canada (40) and First Nations in Ontario (59).

Attawapiskat First Nation's income score is 52, which is only one point lower than the First Nations in Ontario (53).

Attawapiskat First Nation has an average housing score of 52, which is much lower than First Nations in Ontario (70) and First Nations in Canada (71).

Attawapiskat First Nation with a score of 48, is below average in terms of overall community's well-being in comparison to First Nations in Ontario and First Nations in Canada.

DRAFT

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments in Canada responsible for serving Indigenous communities (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-16 provides a generalized summary of the regional crime rates based on available information and as reported by the noted police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the Ontario Provincial Police (OPP). The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (OPP, 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within Northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-16: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total Crime, Rate, 2021*	Total Violent Crime, Rate, 2021*	Total sexual Assault, Rate, 2021*	Total Drug Violations, Rate, 2021*
Nishnawbe Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224

ECONOMIC ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

4. Economic Environment

4.1 Labour Force and Employment

First Nations people are under-represented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural piece in Indigenous communities who are very connected to the lands on which they live. This means there are specific guidelines for where economic activity can occur and how lands are used.

The traditional economy is another important cultural aspect within the communities. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities.

4.1.1 Labour Force Characteristics

Table 4-1 present the forecasted working age population in Attawapiskat First Nation over the projection period: 2016, 2021, 2028, 2033, and 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada, 2017, 2022a). The values for 2028, 2023, and 2043 were forecasted based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64. Projected trends of working age population in Attawapiskat First Nation are summarized as follows:

- The total working age population is increasing over the projection period;
- The male working age population decreases by 99 between 2016 and 2043, a decline of approximately 24%;
- The female working age population increases by 227 between 2016 and 2043 which is a growth of approximately 35%; and
- Based off current growth trends, the total working age population is forecasted to increase by 84 between 2016 and 2043, a growth of approximately 8%.

Table 4-1: Projected Working Age Population in Attawapiskat First Nation (2016, 2021, 2028, 2033, 2043)

Year	Total		Total		Total	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	935	100%	510	54.5%	425	45.5%
2021	950	100%	490	51.6%	460	48.4%
2028	971	100%	463	47.7%	514	52.9%
2033	987	100%	445	45.1%	556	56.4%
2043	1,019	100%	411	40.3%	652	64.0%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 4-2 present the breakdown of the population in the labour force and those not in the labour force for Attawapiskat First Nation in 2021.

- The majority of the population is not in the labour force at 65.4%. Female and male count among the non-labour force population is equal at 340, however the distribution is skewed with higher rate of 68% being females;
- The participation rate for the total working age population is 34.6%;
- The participation rate for males is 37%; and
- The participation rate for females is 32%.

Table 4-2: Labour Force Participation in in Attawapiskat First Nation (2021)

Labour Force Participation	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
In the labour force	360	34.6%	200	37.0%	160	32.0%
Not in the labour force	680	65.4%	340	63.0%	340	68.0%
Total	**1,040**	**100%**	**540**	**100%**	**500**	**100%**

DRAFT

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the Land. The Knowledge passed on from the ancestors sustain Attawapiskat Oji-Cree identity and way of life.

Table 4-4 present the highest level of western educational attainment for the population aged 15 years and over in private household in Attawapiskat for 2021.

- The majority of the population aged 15 and over has no certificate, diploma, or degree at 51.7%;
- 160 residents in the community have obtained a post-secondary certificate, diploma, or degree which accounts for 15.5% of the population aged 15 and over. The female population has a higher rate of post-secondary qualification attainment at 17%, compared to 14% of the male population; and
- The second highest distribution of population are those with a secondary school diploma or equivalent qualification at 32.9%, 185 of which are male (34.6%) and 150 are female (30%).

Table 4-4: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Attawapiskat First Nation (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
No certificate, diploma or degree	535	51.7%	275	51.4%	265	53.0%
High (secondary) school diploma or equivalency certificate	340	32.9%	185	34.6%	150	30.0%
Post-secondary certificate, diploma or degree	160	15.5%	75	14.0%	85	17.0%
Total	**1,035**	**100%**	**535**	**100%**	**500**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-5 present the major fields of study for Attawapiskat First Nation's population aged 15 and over who had obtained a post-secondary education as of 2021.

- The most popular field of study pursued in Attawapiskat is Health and related fields with a total of 35 graduates. This accounts for 20.6% of certificates, degrees, or diplomas obtained, of which approximately 26.3% were female;
- The fields least studied include mathematics, computer and information sciences (0%), and other (0%);
- The field of study most commonly pursued by females was health and related fields (26.3%) while the least common were architecture, engineering, and related trades, physical and life sciences and technologies, mathematics, computer and information sciences, and agriculture, natural resources and conservation, and other fields of study, each with zero completed certificates, diplomas, and degrees; and
- The field of study most commonly pursued by males was architecture, engineering, and related trades with 26.7% of individuals pursuing this field while the least common fields of study for males were humanities, social and behavioural sciences and law, physical and life sciences and technologies, mathematics, computer and information sciences and visual and performing arts, and communications technologies, and other fields of study, with zero completed certificates, diplomas, and degrees.

Table 4-5: Major Field of Study for the Population Aged 15 Years and Over in Private Households in Attawapiskat First Nation (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution

DRAFT

4.1.3 Labour Income

Table 4-6 presents the total individual income by group for the population aged 15 and over for 2020 in Attawapiskat First Nation by self-identified gender.

- The largest individual income group for males is under $10,000 (including loss) with a total of 90 individuals across Attawapiskat in this category. This accounts for 23.7% of income earning males within Attawapiskat;
- The largest individual income group for females is $10,000 to $19,999 with 85 individuals in this category. This accounts for 23.3% of income earning females within Attawapiskat;
- In 2020, 5.5% of females were making between $100,000 to $149,000, this is the highest reported income bracket with earning individuals; and
- In 2020, 2.6% of males were making between $100,000 to $149,000, this is the highest reported income bracket with earning individuals.

Table 4-6: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Attawapiskat (2020)

Income Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Under $10,000 (including loss)	150	19.9%	90	23.7%	65	17.8%
$10,000 to $19,999	170	22.5%	85	22.4%	85	23.3%

4.2 Overall Economy

4.2.1 Cost of Living

Fly-in communities such as Attawapiskat First Nation generally experience lower economic productivity and higher cost of living due in part due to there not being an all-season road connection to the provincial highway system and ease of interacting with wider markets. There are projects and initiatives in the community that support economic development, although historically one factor that has challenged economic development is the road connectivity limitations. All-season road connection is therefore thought to potentially lead to better economic productivity and jobs overall, and lower food and gas prices and better accessibility (SNC-Lavalin, 2023).

Existing conditions of the overall economy in Attawapiskat First Nation are described in this section using the following indicators:

- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends; and
- Traditional economy.

Data on Gross Domestic Product for the Attawapiskat First Nation is unavailable from Statistics Canada.

Due to the relative remoteness of Attawapiskat First Nation and supply chain challenges (i.e., transporting goods into the community), the cost of living can be substantially higher in comparison to urban areas. In general, the community is far from urban centres, which creates transportation challenges for both goods and services coming into the community as well as residents leaving the community for goods and services.

Practicing traditional culture is an important element of life in Indigenous communities, with members being very connected to the lands on which they live.

DRAFT

The traditional economy is another important cultural aspect within the community. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the community.

A significant portion of the economic development activities occurring are focused on business development, access to services, advisory services, and employment counselling.

Table 4-8 presents the number of people considered to be low-income living in Attawapiskat First Nation in 2021. Individuals are considered low-income based on the low-income measures (LIM). The LIM is a relative measure of low-income and considers individuals to be low-income if their income is less than 50% of the median income level.

- The largest age group living in low-income according to the LIM across Attawapiskat First Nation are people aged 18 to 64 years (49%) followed very closely by people aged 0 to 17 years (46.3%);
- Approximately 4.8% of the population in low-income are 65 years and over; and
- Apart from 0 to 17 years age group where the male population is higher, other age groups have approximately even distribution between the male and female low-income populations.

Table 4-8: Population in Low-Income Based on the LIM After Tax for Attawapiskat First Nation (2021)

Age Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
0 to 17 years	340	46.3%	185	49.3%	155	43.7%
18 to 64 years	360	49.0%	175	46.7%	180	50.7%
65 years and over	35	4.8%	15	4.0%	20	5.6%
Total	**735**	**100%**	**375**	**100%**	**355**	**100%**

Source: Statistics Canada, 2022a.

In the Nishnawbe Aski Nation 2020-2021 Annual Report it is stated that many families in remote, semi-remote and isolated First Nations face acute hardship due to the extremely high cost of living, including: food, housing, fuel, and basic expenses (Nishnawbe Aski Nation, 2022). Nishnawbe Aski Nation community members often need to travel to larger urban centres to access medical and mental health care services and other specialist services and may end up having to stay in urban centres longer than planned (Nishnawbe Aski Nation, 2022).

4.2.2 Economic Development

4.2.2.1 Nishnawbe Aski Nation

The Nishnawbe Aski Nation is the governing body of all Indigenous communities with the exception of Fort Albany First Nation, Kashechewan First Nation and Kitchenuhmaykoosib Inninuwug First Nation. Resource development (i.e., mining and forestry), small business, and employment and training are all files that fall under the Economic Development portfolio at Nishnawbe Aski Nation.

Due to the COVID-19 pandemic, the primary focus of the Nishnawbe Aski Nation during the 2020-2021 fiscal year was to verify that public health was at the forefront of any work or advances undertaken at the community level. The Economic Development portfolio also included food security/food self-determination. As the COVID 19 pandemic progressed, monitoring food security throughout Nishnawbe Aski Nation territory became critical, as did intervening and assisting communities directly when issues arose.

Resources and services offered by Nishnawbe Aski Nation include the Nishnawbe Aski Development Fund which operates as a Client Services office which provides business and economic development services to First Nations communities and majority-owned Aboriginal businesses in Northern Ontario. The following services are offered (211 Ontario, 2021a):

- Appraisal Services;

DRAFT

- Bookkeeping Training;
- Business Support Services;
- Community Planning;
- Due Diligence Services;
- Financing (Loans and Grants); and
- Workshops.

4.2.2.2 Wakenagun Community Futures Development Corporation

The Wakenagun Community Futures Development Corporation provides technical and professional advisory services and training to enhance the overall managements skills and opportunities within the Mushkegowuk Region. Included in the Mushkegowuk Region are Attawapiskat First Nation, Fort Albany First Nation, Kashechewan First and Weenusk First Nation.

Programs and services offered by the Wakenagun Community Futures Development Corporation include (211 Ontario North, 2021):

- Commercial/Business Financing
  - Offers financing in the form of loans, loan guarantees, and equity participation to individuals or for-profit businesses with a well-documented business plan seeking to establish or expand a new or existing business; and
  - Offers financing in the form of a loan to assist Aboriginal entrepreneurs with business start-ups or expansion.
- Business Advisory and Support Services
  - Works at the community and regional levels to promote partnerships and develop opportunities for economic growth and job creation for Aboriginal businesses and communities;
  - Offers self-employment benefits in partnership with Mushkegowuk Council Employment and Training Services;
  - Provides business research and technical support; and
  - Assists with online business name registration.
- Community Economic Development Strategic Planning Support
  - Offers technical support to member communities who are undertaking community strategic planning projects.
- Financing for Micro-Community Economic Development Projects
  - Assists in the implementation of small-scale community economic development initiatives.

4.2.2.3 Attawapiskat Development Corporation

Attawapiskat Development Corporation is responsible for stimulating local economy and developing economic initiatives and opportunities for Attawapiskat First Nation.

Economic initiatives that Attawapiskat Development Corporation is involved with include (211 Ontario, 2021b):

- Neegan Naynowan Stantec LP, a 51% owned Attawapiskat Aboriginal business which provides consulting, engineering and environmental services for infrastructure, industrial, urban planning, natural resources, and environmental projects;
- Advisory for local business such as the Northern Store and Warehouse; and
- Operates and manages the James Bay Winter Road through a jointly owned corporation with Fort Albany and Kashechewan First Nations.

DRAFT

4.2.3 Traditional Economy

A traditional economy is a system that relies on customs, history, and time-honored believes. Tradition guides economic decisions such as production and distribution. Communities with traditional economies depend on agriculture, fishing, hunting, gathering, or some combination of them (Amadeo, 2022). This section outlines the traditional economy within Attawapiskat First Nation to identify community concerns with the Project, specifically how they view the Project will affect the traditional economy.

The traditional economy is an important cultural aspect within the community. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within.

Traditional economic activity is typically not captured by commonly used data sources so it is difficult to provide a complete picture of the traditional economy labour market in Attawapiskat First Nation.

Note: The Project Team is working with communities that are providing information, including the traditional economy of their community. This information will be incorporated as it becomes available.

4.3 Business Environment

4.3.1 Local Economy

A high-level description of the local economy of other Local Study Area (LSA) Indigenous communities is presented below, based on data available that describes occupations and industry spending using an industry database for statistical information, Lightcast.[1]

The industries with the largest job presence within the other LSA Indigenous communities in 2022 include - public administration, health care and social assistance and educational services The industries with the highest growth in jobs between 2018 and 2022 include retail trade (32%), public administration (28%), and health care and social assistance (25%).

Out of approximately $101 million in spending across all industries in the other LSA Indigenous communities in 2020, the percentage of in-region purchases across all industries is low. This amounted to under $4 million of purchases which represents 3.9% of total purchases in 2020. The majority of demand for goods and services within the LSA Indigenous communities is met by imports (92.3%).

4.3.2 Mining, Aggregate and Forestry Activities

The initial Impact Benefit Agreement between Attawapiskat First Nation and De Beers Canada promised numerous benefits, including training, employment, business opportunities, environmental management, and financial compensation (Canada Mining Journal, 2005). However, after the closure of the Victor Diamond mine, it became evident that the promised prosperity did not materialize for the community. Attawapiskat suffered from persistent poverty, unemployment, and crumbling infrastructure, while the diamond royalties and public revenues generated by the mine were disproportionately low. As a result, the Attawapiskat people have lost trust in future projects entering their community, given the broken promises and lack of equitable benefits from the previous agreement (SP The Bullet, 2020).

[1] Lightcast products provide detailed information about occupations, skills in demand, and career pathways, providing labor market insight to employers, educational institutions, and government agencies.

DRAFT

Attawapiskat First Nation is one of 10 northern First Nations who launched a lawsuit against the Ontario and federal government in April 2023 (McIntosh, 2023). They have requested that the Canadian government be barred from making any decisions about how land could be used in the Ring of Fire for mining and other purposes without Indigenous consent. The lawsuit centres on Treaty No. 9 and the contrast between the verbal and written promises of Treaty No. 9 as recorded (McIntosh, 2023).

DRAFT

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to achieving Mino Bimaadziwin (The Good Life). Mino Bimaadziwin is a cultural value that includes spiritual, physical, mental and emotional well-being which may be tied to a reciprocal relationship with Aki (the Land).

The Mushkegowuk way of life includes fishing, trapping, hunting, harvesting and stewardship of Aki while keeping in mind the respectful value of sustainability. The types of practices are well known generally; however, specific sites and areas of use require in-depth information from communities participating in the information gathering.

Attawapiskat First Nation is located along the Attawapiskat River, 5 km inland from the James Bay coastline. The Attawapiskat First Nation traditional lands extend from Kapiskau River in the south to Hudson Bay in the north, westwards along Hudson Bay towards the Winisk River, and from Akimiski Island in the east to Lake Missisa in the west. Attawapiskat Cree continue to hunt, fish and trap as a means of community sustainability (Attawapiskat, 2015). Their original hunting territories extended from the Hudson Bay area to the north, to the Kapuskau River to the south. The traditional sustainable harvest focused on fish, waterfowl, moose, caribou, rabbit, beaver, bear, and Canada geese (Cummins, 1992).

Akimiski Island is the largest island in James Bay and Attawapiskat First Nation is the closest community located 80 km to the west. This area is a traditional hunting and trapping area of the Attawapiskat people and is located on land designated as Crown Land. Akimiski Island includes a migratory bird sanctuary on the east of the island, with the west side of the island not regulated. This island is an historically important place to the Attawapiskat people that has traditionally been used for harvesting, gathering berries and trapping (Kataquapit, ND). Interviews with Cree Elders held in 2008 for research on Akimiski Island outlined that pre-European arrival, Akimiski Island was highly populated with Cree people and that the island was “Full with game, rabbits, geese, ducks. Fishing was plenty. Beaver was also killed in those days” (Tsuji et al., 2019). Attawapiskat First Nation claims that their traditional territory extends into the WSR Project Area due to the location of the Attawapiskat River. The Attawapiskat community has expressed concerns about potential effects to the “western portion” of its territory (Archaeological Services Inc., 2021).

DRAFT

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas in their Community-Based Land Use Plans (CBLUPs), which outline the locations and history of these areas, and the cultural and spiritual importance to their community. Although some of these areas may not currently be used for traditional practices, the sites may still hold cultural and historic importance.

The Attawapiskat River traditionally provided Attawapiskat First Nation with transportation routes, water sources, temporary camp sites and fishing and hunting locations (Cummins, 1992). Akimiski Island, which is now part of Nunavut, is an important historic place to the Attawapiskat First Nation People that was historically used for harvesting, gathering berries and trapping (Kataquapit, ND). Akimiski Island is also important for social and cultural reasons and contains graves, spiritual sites and Cree seasonal camps (Tsuji et al., 2019).

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinabe/Mushkeego Peoples. “The Anishiniimowin/Anishinabe/Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022). The Anishiniimowin/Anishinabe/Mushkeego Peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define ongoing rights and obligations on all sides. These agreements set out continuing Treaty rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations; and
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013)*

Treaty No. 9 was signed between the Anishiniimowin/Anishinabe/Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which the legal title is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the *Public Lands Act*.

Traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to CBLUPs initiated by Indigenous communities.

6.5 Road/Transportation Studies

No Road/Transportation Studies were available for review for Attawapiskat First Nation. Communities in the LSA do not currently have all-season road access to the provincial highway system to the south and are currently fly-in or winter road access and the existing local road network is limited. The communities in the LSA use remote airports and winter roads for travel and shipping. Limited information is available on winter roads daily traffic counts within the LSA. Living in a community with no all-season roads limits access to people living in these communities and the high cost associated with travelling and shipping goods, and high cost of living.

6.6 Provincial Plans and Polices

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

DRAFT

Section 1 of the *Far North Act* outlines:

The purpose of this Act is to provide for community-based land use planning in the Far North that:

a. Sets out a joint planning process between the First Nations and Ontario[2];

b. Supports the environmental, social and economic objectives for land use planning for the peoples of Ontario that are set out in Section 5; and

c. Is done in a manner that is consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult. 2010, c. 18, s. 1.

The Far North is defined in the Act as:

a. The portion of Ontario that lies north of the land consisting of:

i. Woodland Caribou Provincial Park;

ii. The following management units designated under Section 7 of the *Crown Forest Sustainability Act, 1994* as of May 1, 2009: Red Lake Forest, Trout Lake Forest, Lac Seul Forest and Caribou Forest;

iii. Wabakimi Provincial Park; and

iv. The following management units designated under Section 7 of the *Crown Forest Sustainability Act*, 1994 as of May 1, 2009: Ogoki Forest, Kenogami Forest, Hearst Forest, Gordon Cosens Forest and Cochrane-Moose River; or

b. The area, if any, that is set out in the regulations made under this Act and that describes the area described in clause (a) more specifically; ("Grand Nord").

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The province must approve CBLUPs.

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with First Nations communities and groups, among other land uses, the potential for permissible use of lands for forestry in First Nation's areas of interest. ToRs for CBLUP Terms of Reference have noted in the objectives that plans would include consideration of the following (Eabametoong and Mishkeegogamang First Nations, 2013):

- Traditional and Customary Use;
- Conservation and Protection;
- Forest Management (commercial forestry);
- Forest Management (non-timber forest products);
- Tourism (and Eco-Tourism);
- Geoscience and the Mineral Sector (exploration and mining);
- Recreation;

[2] Community-based land use plans require provincial approval.

DRAFT

- Water Conservation and Protection;
- Renewable Energy;
- Access and Infrastructure;
- Climate Change; and
- Fire Management.

6.6.2 Northern Ontario Transportation Plan

The draft Northern Ontario Transportation Plan, 2020 was developed to serve as a guide to help build a modern and sustainable transportation system for people in Northern Ontario. It contains actions that will connect communities, provide safer and more reliable travel and unlock economic potential in the region. Goal 6 of this Plan outlines reliable travel options for remote and Far North communities. This plan is a living document and will be updated with actions to reflect the evolving needs of the region.

The Project is aligned with the objectives of this Plan and will support the goal of achieving sustainable development for Northern Ontario.

6.6.3 Fisheries Management Plan

The Fisheries Management Plan as administered by Ministry of Natural Resources and Forestry (MNRF) is designed to highlight and protect the value of the diversity of lakes and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake in a holistic manner and includes a range of management options to secure a healthy lake environment that conserves the diversity of the fish community and provides opportunities to contribute to the social and economic well-being of the surrounding area. Each specific zone outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h).

6.7 Land Use Plans and Policies

A number of remote fly-in and winter road access First Nation communities have been (or are currently) undertaking community land use planning, which considers the remote nature of these communities. Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the Socio-Economic Baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses on the land.

The following section provides information on the Attawapiskat First Nation CBLUP.

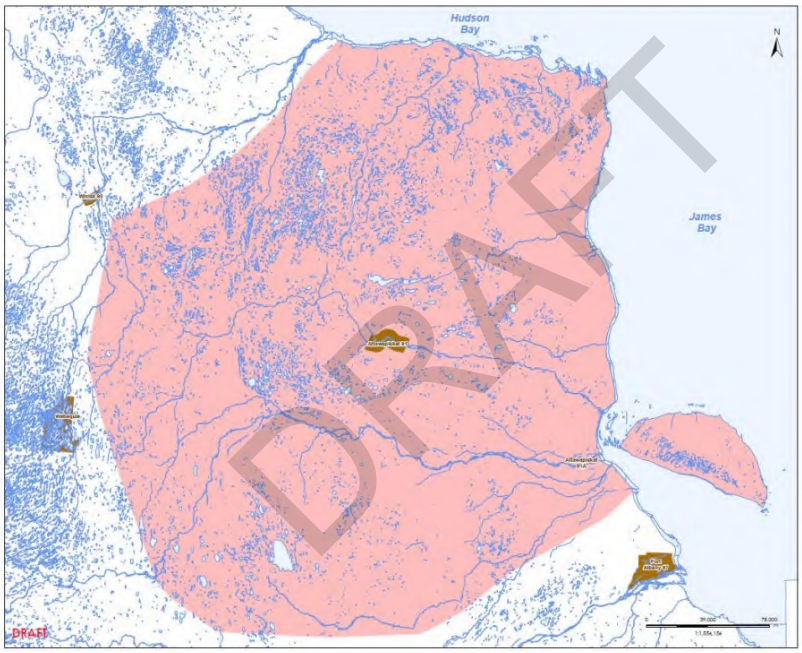
The Terms of Reference (ToR) for the Attawapiskat First Nation CBLUP was signed in 2015 (Attawapiskat First Nation, 2015). It outlines the community's valued components, proposed planning process and their guiding principles. The document reviews environmental and cultural issues, interconnectedness and economic development related to natural resources. The Planning area, shown in the figure below, covers a land mass known as the community's traditional area that extends from Kapiskau River in the south, to Hudson Bay in the north, and westward along Hudson Bay towards the Winisik River, and from Akimiski Island in the east to Lake Missisa in the west (Attawapiskat First Nation, 2015).

DRAFT

Figure 6-1 below presents the limits of the Attawapiskat First Nation traditional land, recognizing that traditional territories associated with adjacent First Nations may overlap with these boundaries. The planning principles within the ToR for the CBLUP consist of:

- Cultural and heritage values;
- Biodiversity;
- Cumulative effects of land use activities;
- Climate change;
- Areas of natural resource value for economic development;
- Infrastructure;
- Tourism; and
- Protected areas.

Figure 6-1: Attawapiskat First Nation Traditional Lands



Source: Attawapiskat First Nation, 2015.

6.8 Industrial Land Use

The economy of Northern Ontario relies heavily on resource extraction, with the mining, aggregate and forestry industries significant factors in land use planning in the region. The Ring of Fire, a significant mineral development region has long term potential to contribute to the Ontario economy (Ministry of Mines, 2022). These contributions include creating more jobs, generating revenue, building infrastructure, and bringing prosperity to communities to the north, including First Nation communities. Minerals found in the Ring of Fire to-date include chromite, copper, zinc, gold, diamond, nickel and platinum group elements (Ministry of Mines, 2022).

In April 2023, leaders from 10 Treaty No. 9 First Nations from announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including, trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino-Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act*, *1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, is done online through the Mining Lands Administrative System (MLAS). Applicants are required to create a MLAS user account, which allows them to view active unpatented mining claims, register new mining claims, manage user mining claims, and buy or renew a prospector's license. Non-registered users are only able to use the MLAS map viewer to view active unpatented mining claims.

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

DRAFT

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide Socio-Economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council. The Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the Aggregate Resources Act. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

Attawapiskat First Nation initially came to an impact benefit agreement with De Beers Canada with the Victor diamond mine opening, but the lack of equitable benefits from the agreement never materialized for the community (SP The Bullet, 2020)..

There is no information on industrial land use specific to Attawapiskat First Nation.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct Gross Domestic Product (GDP), among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is an important aspect as it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Recreational activities in the Indigenous communities involve community-based sports and activities organized by the community administration or other groups such as schools. Recreation facilities typically include baseball diamonds, gym/community centres, hockey arenas, playgrounds, playing fields and other facilities. Youth and community events are hosted by communities.

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

DRAFT

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Attawapiskat First Nation.

- Albany River Provincial Park

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/Anishinaabe/Mushkegowuk communities. First Nation members have cabins and camps which they use for harvesting and hunting within their traditional territory.

- Otoskwin/Attawapiskat River Provincial Park

Southwest of the Webequie Reserve, approximately 24 km from WSR, is the Otoskwin/Attawapiskat River Provincial Park. The park is approximately 82,529 ha in size, most of the area is water. The park is located within the traditional territories of Neskantaga, Marten Falls, Eabametoong, Mishkeegogamang and Attawapiskat First Nations. The area features several historical sites with significance to Indigenous communities dating back to 3,000 BC. The Otoskwin-Attawapiskat River Provincial Park Management Plan specifics the objectives to provide opportunities for recreational uses that are compatible with the area's remote nature (Ontario Parks, 2002). A preliminary survey of the archaeological resources of the Attawapiskat Lake area has identified over 30 sites and First Nations have placed a high priority on the protection of cultural sites (Ontario Parks, 2002). This park does not feature facilities for visitors but activities such as white-water paddling, canoe and kayaking, back country camping, fishing, hunting and snowmobiling are supported within the park (Ontario Parks, 2023b).

- Winisk River Provincial Park

In 1966, the growing demand for tourism led to provincial government setting aside the "Winisk Wild River Indian Guide Territory" and established the Winisk River Provincial Park over Winisk Lake and Winisk River in 1968 (Ministry of the Environment Conservation and Parks, 2021a). This move, however, intersected with Indigenous Nations exercise of their inherent rights to traditional lands, water usage, and the pursuit of economic and community development goals. The Winisk River Provincial Park is located to the north of the Webequie First Nation Reserve, approximately 2.17 km from WSR. The parkland is approximately 141,000 ha in size and boasts unique landforms including a large moraine and drumlin fields. The only access to the park is by canoe, air or by float plane park (Ministry of Natural Resources, 1991). This park does not feature facilities for visitors but activities such as white-water paddling, canoe and kayaking, back country camping, fishing, hunting and snowmobiling are supported within the park (Ontario Parks, 2022). Five outpost camps are located along the Winisk River System to support fishing and hunting tourism. The Winisk River Provincial Park Interim Management Plan, 1991 provides direction for the management of the park (Ministry of Natural Resources, 1991). Additional tourism development will only be permitted once the management plan is complete (Ministry of Natural Resources, 1991).

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Attawapiskat First Nation.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Attawapiskat First Nation.

WSR WEBEQUIE SUPPLY ROAD

February 15, 2024

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L 1A0

Dear Chief Koostachin-Metatawabin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates it has been delivered on February 7, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to

	explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

c.c. Heather Swan, Deputy Project Manager, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Inc (formerly SNC-Lavalin Inc)

February 15, 2024

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L 1A0

Re: Webequie Supply Road: Caribou Data Sharing and Review of Draft EA/IA Documents

Dear Chief Koostachin-Metatawabin,

We thank you for your patience as we work to respond to two of the outstanding concerns that you have articulated with the proposed Webequie Supply Road (WSR) project in past letters and emails, namely:

1. Sharing of caribou data collected by the WSR Project Team; and
2. Request to review draft chapters of the Environmental Assessment Report/Impact Statement (EAR/IS) when they become available for review prior to its formal release to allow for Attawapiskat First Nation to complete its own assessment of impacts to Aboriginal and/or Treaty rights and interests..

We apologize for the delay, but we have been working on getting information together that would help us determine with you the best approach forward. This letter includes a response to your correspondence.

Sharing of Caribou Data

Determining the best approach to share caribou collaring data that the WSR team has gathered has taken some time to figure out. Along with the other road project teams, we have been working with the Ministry of the Environment, Conservation and Parks (MECP), Species at Risk (SAR) Branch as to the best way to share caribou data with Attawapiskat First Nation based on the existing sensitive data licensing agreement between Webequie First Nation and MECP, and restrictive conditions related to distribution and use of the data. On December 14, 2023, we received confirmation from the MECP-SAR Branch that it is working on a sensitive data license agreement with Attawapiskat First Nation that will include the WSR Project, and that through this agreement it will be sharing the baseline caribou data being collected as part of the WSR environmental/impact assessment with the community.

With respect to the WSR project, the Project Team is submitting caribou data according to the schedule and conditions outlined in the WSR Project's Endangered Species Act permit which was issued on February 8 , 2021. This includes the submission of raw collar data and mortality locations to MECP twice per year, and all Species at Risk observations to the Natural Heritage Information Centre (NHIC) by December 31 of each year (including observations that occurred during the aerial surveys for caribou and incidental observations of SAR during other natural science field programs). The most recent submission of caribou collar data was completed on February 9, 2023. The collars will remain active until March 1, 2024 and it is anticipated that analyses of caribou collaring data to be included in the EAR/IS will include data up until March 2024.

We would be happy to discuss the caribou study for WSR project with Attawapiskat First Nation, and the approach on how the data will be interpreted and used in the EA/IA process. If there is an interest, we would be pleased to set up a meeting with the appropriate Project team members.

Sharing of Draft Chapters of the Environmental Assessment/Impact Statement Report

In regards to the request to review chapters of the EAR/IS to allow for Attawapiskat First Nation to complete its own assessment of impacts to Aboriginal and/or Treaty rights and interests, the Project Team would like the opportunity to sit down with Attawapiskat First Nation to develop a process together of how, when and which chapters would be shared, and a reasonable amount of time to review. We are requesting a meeting (virtually or in person) to work through this process together.

We and/or our Project Team are always willing to meet, to listen and learn so that we can better understand issues and concerns that are raised during the EA/IA process. We would like to have more regular dialogue with Attawapiskat First Nation and would welcome the opportunity to schedule regular meetings. We strongly believe in the importance of ensuring that any development that may take place is done in a responsible manner and protects the environment and Aboriginal and/or Treaty rights and interests.

Miigwetch,

Michael Fox

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L 1A0

Dear Chief Koostachin-Metatawabin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 22, 2024, the package status indicates it has been delivered to your community on February 7, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Bridges and Water Crossings.**

The livestreaming event is scheduled for **February 26th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L 1A0

Dear Chief Koostachin-Metatawabin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 28, 2024, the package status indicates it has been delivered to your community on February 7, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: How We Use Your IK in the EA.**

The livestreaming event is scheduled for **March 4th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to

	explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

P.O. Box 248
Attawapiskat, ON
P0L 1A0

Dear Chief Koostachin-Metatawabin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 27, 2024, the package status indicates it has been delivered to your community on February 7, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Aquatic Habitat Preliminary Findings.**

The livestreaming event is scheduled for **April 1st, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Dear Chief Koostachin-Metatawabin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Inc (formerly SNC-Lavalin Inc)

May 14, 2024

Dear Chief Koostachin-Metatawabin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 27th from 11:00-11:45am EST** for Attawapiskat First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87249135064?pwd=qPdhQ1koh6oHdLjeocnbjExlyHkztI.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 872 4913 5064 **Passcode:** 989976

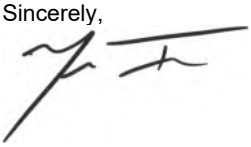
In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

June 25, 2024

Dear Chief Koostachin-Metatawabin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 8th from 11:00-11:45am EST** for Attawapiskat First Nation, where there will be a second presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85375912462?pwd=p26SRLllOFnCHP42GxGb9IABYo3Tdg.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 853 7591 2462 **Passcode:** 838704

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

November 27, 2024

Dear Chief Koostachin-Metatawabin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, December 9th from 11:00-11:45 AM EST for Attawapiskat First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/84389156136?pwd=sn2cOScYxGwFLsAAFqaHYxA5WEZetb.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

December 16, 2024

Chief Sylvia Koostachin-Metatawabin
Attawapiskat First Nation
P.O. Box 248
Attawapiskat, ON
P0L 1A0

Dear Chief Koostachin-Metatawabin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on November 22, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

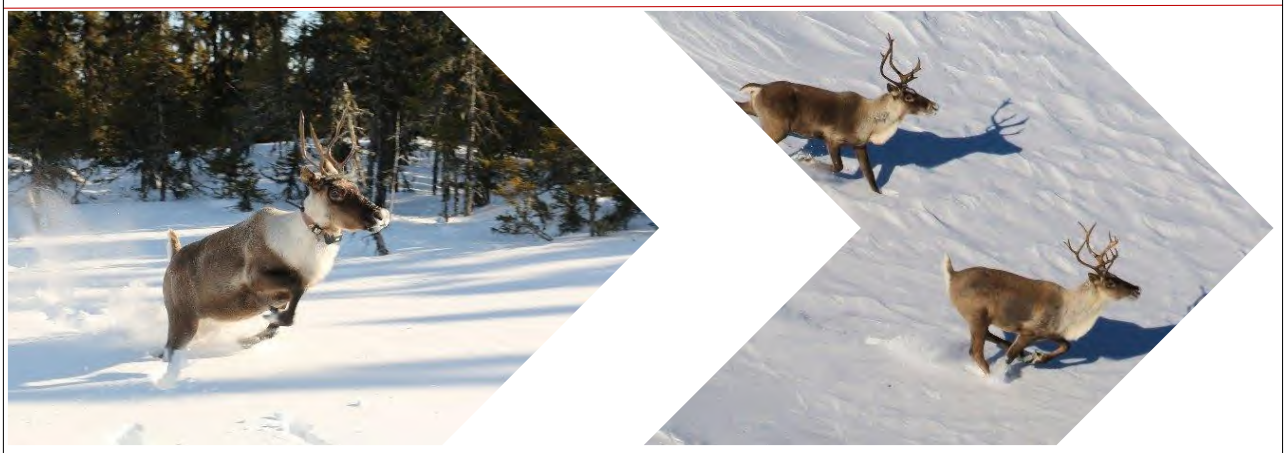
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

NOTES
DISCLAIMER

January 27, 2025

Dear Chief Koostachin-Metatawabin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, February 10th from 11:00-11:45 AM EST for Attawapiskat First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/89991631225?pwd=X9NsFmM1AI4Ye4PPweRX3cPzII0e3i.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Webequie Supply Road Project
Spring Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a multipurpose helicopter transportable drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in early April 2025 and will continue until approximately early May 2025, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Koostachin-Metatawabin,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

WSR
WEBEQUIE
SUPPLY ROAD

WEBEQUIE FIRST NATION

Webequie Supply Road Project Consultation Log

Records Found: 1

Constance Lake First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if CLFN has any questions or comments.

Attached File: Web-Newsletter Issue 5-English-2021-10-21-Rev0.pdf
Attached File: Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01.pdf

Contact Date: Nov 22, 2021 14:20 Method: Fax
Topics to be Discussed: Terms of Reference, Live stream: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team faxed a letter and poster, to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland, advising that the WSR Project Team is hosting a live stream show and Wawatay radio session on November 23, 2021 with a livestream from 4:00-4:30pm EST and Wawatay Radio call-in show from 2:00-3:00pm EST, with access links and the toll-free call-in phone number. The sessions will include a presentation on topics including: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds Work Plans along with question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations, Michael's email and cell phone contact information if CLFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether CLFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked CLFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if CLFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited CLFN to participate in the WSR socio-economic primary data collection program. The letter asked CLFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if CLFN has any questions.

Topics to be Discussed: Virtual Information Session
Michael Fox of Indigenous and Community Engagement and Laura Drumbrell and Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Constance Lake First Nation (CLFN) on June 20, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Michael and Laura discussed several questions that had been previously asked by CLFN. These questions were regarding: addressing insufficient resources to conduct a thorough review of the Terms of Reference, overcoming COVID-19 related restrictions, how watersheds, fish, land, animals and air quality will be protected, environmental monitoring throughout the life of the Project, how Indigenous Knowledge will be used to inform the EA / IA, respect for community engagement protocols, regional assessment, implications to the health and safety of community members from increased traffic, the impact on moose populations, the location of aggregate resources, and potential cumulative effects. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community members in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: Terms of Reference and Environmental Assessment
Chief Ramona Sutherland of Constance Lake First Nation (CLFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on July 14, 2022 sharing the WSR July Newsletter. Chief Sutherland requested a copy of the WSR Terms of Reference and re-stated GFN's question regarding whether First Nations are taking the lead in the Environmental Assessment (EA). Chief Sutherland noted that First Nations are stewards of the land and therefore should be leading the EA.

10:54pm
Michael responded to Chief Sutherland, noting that Webequie First Nation (WFN) is the proponent for the WSR Project, Marten Falls First Nation (MFFN) is the proponent for the Community Access Road project, and both WFN and MFFN are co-proponents for the recent Northern Road Link Project. Michael indicated he would welcome the opportunity to have a conversation with Chief Sutherland to provide additional information on the Projects and provided his phone number to be contacted at. Michael also provided links to the Project's website.

Topics to be Discussed: Environmental Assessment
Chief Ramona Sutherland of Constance Lake First Nation (CLFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on July 14, 2022 answering Chief Sutherland's question regarding the Environmental Assessment. Chief Sutherland stated that being a proponent is not being an environmental assessor, and asked again if any First Nations are involved with the Environmental Assessment. Chief Sutherland stated it would be irresponsible for Canada and Ontario to proceed without First Nation environmental assessors.

Topics to be Discussed: WSR Newsletter - Field Studies and Virtual Information Sessions
Michael Fox and Brianna Patrick of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland that included 50 copies of the English WSR Newsletter – Issue 12. The newsletter provided information about the Cultural Heritage and Fish & Fish Habitat field studies and highlighted the importance of field studies in the WSR Environmental Assessment / Impact Assessment. It also included information on the virtual community information sessions. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their e-mail address and phone number if CLFN has any questions or comments.

Topics to be Discussed: Engagement Options
Brianna Patrick and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland with a letter requesting a meeting with the community to discuss the WSR Environmental Assessment/Impact Assessment (EA/IA) process, provide project updates, and seek input and feedback to help inform the EA/IA. The letter provided various community engagement options and noted that the WSR Project Team will continue offering both virtual and in-person methods of engagement. The letter also provided information on the Socio-Economic Primary Data Collection Program and provided a link to access additional information. Michael's email and cell phone contact information was provided if CLFN has any questions or comments.

16:02
Chief Sutherland responded to Michael thanking him for the information and noted that the First Nations are not party at same level as federal and provincial governments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland with a letter following up on the correspondence sent on December 13, 2021 regarding the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program, inviting CLFN to participate in the program. The letter thanked CLFN for expressing interest in participating in the program and reminded the community of the purpose of the IKLRU Program and that the WSR Project is currently in the Environmental Assessment / Impact Assessment (EA/IA) phase. The letter acknowledged that CLFN currently has an active funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. The Project Team requested a meeting either in-person or virtually to discuss the program in further detail.

Topics to be Discussed: Environmental Assessment / Impact Assessment
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland in response to the Chief's email on July 15, 2022 inquiring whether any First Nations are involved with the Environmental Assessment/Impact Assessment (EA/IA). Michael stated that the Webequie Working Group is facilitating Indigenous Knowledge information from Webequie First Nation and other First Nations in a collaborative manner with the EA/IA Consultant Team to assess potential effects to each valued component, including measures to mitigate and/or avoid adverse effects, as well as follow-up monitoring programs to verify the accuracy of the effects assessment. Michael noted that for other First Nations that are willing to contribute Indigenous Knowledge, a validation process is proposed to provide communities with an opportunity to review the proponent's interpretation of the information provided, to add or revise draft results, and to provide informed consent for the use of the information in the EA/IA documentation. Michael invited CLFN to let the Project Team know if they need more information or would like to meet to discuss the WSR Project in further detail.

Topics to be Discussed: Time Limit Extension Request for the Federal Impact Assessment Process
Bertha Sutherland of Constance Lake First Nation (CLFN) sent an email to Impact Assessment Agency of Canada (IAAC) with an attached letter in response to IAAC's letter and email dated October 25, 2022, regarding the Time Limit Extension Request for the Federal Impact Assessment (IA) Process of the Webequie Supply Road (WSR) Project. Michael Fox of Indigenous & Community Engagement and Don Parkinson of SNC Lavalin were copied on the email. The letter explained that CLFN is in support of WSR's request for a timeline extension (to January 2027) to complete their IA, and understands the challenges and limitations placed on the IA to-date due to the global pandemic. CLFN noted that they continue to experience ongoing challenges surrounding participation in this IA, and requests at this time that the Proponent increase efforts to engage and consult with CLFN directly. CLFN expressed their concern regarding the summary of Indigenous Engagement to-date because no one from CLFN's Leadership or technical team attended the June 20th session, and the table misleadingly implies that a proper consultation event occurred at this date. CLFN reiterated the contact information of the technical team to be included on all engagement efforts. The letter explained that CLFN would like to better understand the WSR team's plans for in-person engagement throughout the project and explained their desire to see all Indigenous communities engaged on this project for a collective discussion and knowledge sharing session. Regarding the technical content of the document, CLFN explained that it is far too complex for effective community-level conversations and that documents should be made more approachable by providing summaries to convey key messages. A thorough review of this document respective of CLFN's community communication processes was not possible. Regarding the technical studies completed to-date, CLFN indicated that they appear to have been very limited in-scale, with the Regional Study Area (RSA) restricted to a buffer around the proposed road. CLFN explained that they would also like to see the project take into consideration the full cumulative effects of impacts to the region as this road contributes to the opening of the Ring of Fire area for mineral development. The letter explained that the road cannot be discussed in isolation of the larger development looming on the horizon, since its very construction will increase the feasibility of mineral development in the area. The letter closed by CLFN welcoming continued engagement by the WSR team and the IAAC throughout the IA process.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation (CLFN)'s Chief Ramona Sutherland, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of CLFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

14:10
Heather forwarded the email to Kim Jorgenson of Four Rivers Group, representative for CLFN, indicating that the original email was sent to the wrong email address due to a spelling error in the email.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Constance Lake First Nation (CLFN) on March 20, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included a testimony by the WFN Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don discussed several concerns that had been previously raised by CLFN. These questions were regarding the cumulative effects of multiple projects, impacts on health and safety, Indigenous Knowledge data collection, impact on the natural environment, the regional assessment and resource constraints. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation (CLFN)'s Chief Ramona Sutherland which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 28, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of Alternatives Routing in the Preferred Corridor, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if CLFN has any questions or comments.

The email also included the English WSR Newsletter - Issue 20 which provided information about Consultation Round 2 Topics, the Socio-Economic Primary Data Collection Program, the Indigenous Knowledge and Land Resource Use Program, and the livestream and radio schedule for March 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if CLFN has any questions or comments.

16:30
Michael Fox and McKenna Baxter of ICE sent another email to the Chief with an updated letter that had the correct date.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Constance Lake First Nation (CLFN)'s Chief Ramona Sutherland as a follow up to the email sent on March 17, 2023 regarding the invitation to participate in the Socio-Economic Primary Data Collection Program as part of the Environmental Assessment / Impact Assessment. Heather asked the Chief if they had any questions regarding the original email and letter and indicated that the WSR Project team would like to hear back by April 17, 2023 as to CLFN's interest in participating in the program. The letter detailed the purpose of the socio-economic study, the type of information that the WSR Project team is seeking, the study area, how information will be collected, schedule, and next steps. Heather requested the Chief to let the WSR Project team know if they prefer a call to discuss the request in the letter.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Wayne Neegan of Constance Lake First Nation (CLFN) sent an email to Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team to express interest for CLFN's participation in the Socio-Economic Primary Data Collection Program. The email explained that CLFN knows and challenges that communities face, and that the study would be helpful for CLFN. The email explained that collecting information is always welcome and that he would reach out to Heather the following day, if she is available.

12:34
Heather Swan responded to the email indicating that she is unavailable the following day for a call, but provided the email of Michael Fox of ICE and the WSR Project Team, who may be available.

13:11
Michael Fox responded to the email with his availability for a call and requested that Wayne let him know which time works for him.

Topics to be Discussed: Virtual Information Session Round 2 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for CLFN on June 5, 2023, between 2:00-3:00pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if CLFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 2 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for CLFN on June 5, 2023, between 2:00-3:00pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if CLFN has any questions or comments.

Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation (CLFN)'s Chief Ramona Sutherland which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on June 6, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if CLFN has any questions or comments.

Topics to be Discussed: Virtual Information Session
The Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Constance Lake First Nation on May 29, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don Parkinson of the Project Team explained that Part 2 of Round 2 will discuss the Project Team’s work on the evaluation of alternatives for supportive infrastructure, including aggregate / rock sources, access roads and construction camps. Don presented information on how the technical factors were evaluated to produce preferred options. Don also explained in detail the engineering aspects of infrastructure components such as culverts, bridges and access roads. Graphics were shared illustrating what the proposed structures would look like after completion. The entire virtual community meeting was translated into Oji-Cree in real-time. The Project Team encouraged feedback from the audience and mentioned that that Project Team would like to conduct an in-person meeting when it is convenient for community members. The Project Team also added that a recording of the session would be available through YouTube and the WSR Website.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Ramona Sutherland of Constance Lake First Nation (CLFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding CLFN's participation in the Indigenous Knowledge / Land and Resource Use (IKLRU) Program for the WSR Project. The letter noted that the team also followed up by phone on January 17, 2022, and sent an email on January 20, 2022 and August 3, 2022 to advise that the IKLRU Program has started and to confirm if the community was interested in participating. To date, the Project team has not received a response regarding CLFN's interest in participating in the Program. The letter noted that CLFN currently has an active funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. The letter provided an overview of the information that the the IKLRU Program aims to collect as part of the Environmental Assessment / Impact Assessment and requested an indication of the community's interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation (CLFN)'s Chief Rick Allen which included a letter that offered various community engagement options to help create awareness of the Project. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if CLFN has any questions or comments.

Topics to be Discussed: Aboriginal and/or Treaty Rights and Interests Forum #2
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Aboriginal and/or Treaty Rights and Interests Forum held at the Valhalla Inn in Thunder Bay on November 21-23, 2023.

The purpose of the Forum was to create a respectful, culturally-sensitive, and collaborative space to develop and/or confirm understanding of the Project areas (WSR, MFCAR, and NRL) as communities Aboriginal and / or Treaty Rights and Interests (ATRI) may be impacted by these Projects. The purpose of this event was to discuss ATRI and not to collect Indigenous Knowledge. Day 3 of the Forum was set aside for a half-day discussion on Cumulative Effects as they relate to the Projects. Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the Province of Ontario.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Constance Lake First Nation’s (CLFN) Chief Rick Allen which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if CLFN has any questions or comments.

Topics to be Discussed: Consultation Round 2 Report Follow Up, Livestream, Radio Show
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent email to Constance Lake First Nation's (CLFN) Chief Rick Allen, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter provided the status of delivery as of February 15, 2024. An overview of the Consultation Progress Report for Round 2 was provided and the letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on February 20, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Construction Camps and other Project opportunities, along with a question-and-answer period. Topics to be Discussed: Consultation Round 2 Report Follow Up, Livestream, Radio Show
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Constance Lake First Nation's (CLFN) Chief Rick Allen, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter provided the status of delivery as of February 15, 2024. An overview of the Consultation Progress Report for Round 2 was provided and the letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on February 20, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Construction Camps and other Project opportunities, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if CLFN has any questions or comments.

Topics to be Discussed: Draft Community-Specific Preliminary Existing Conditions Document
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Constance Lake First Nation's (CLFN) Chief Rick Allen with a letter and report attached regarding the Community-Specific Existing Conditions Summary Document. The letter requested the community's review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for CLFN. The letter provided a list of the community-specific baseline information provided in the document and indicated that the Project Team would appreciate hearing feedback from the community on the document as the team is always open to working with the community for further improvement on the content.

Topics to be Discussed: Consultation Round 2 Report Follow Up, Livestream, Radio Show
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Constance Lake First Nation's (CLFN) Chief Rick Allen, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on April 15, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Groundwater Preliminary Findings, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if CLFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 3 for Constance Lake First Nation (CLFN) on May 6, 2024. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 1 of Consultation Round 3 will provide an overview of the Environmental Assessment/Impact Assessment (EA/IA), how the EA/IA will be carried out, and the preliminary results of effects assessment for select value components. Don provided an update on the engagement and consultation to date and provided an overview of the key themes of feedback from communities in Round 1 and 2. Don explained that the presentation provided in the session is a shorter version of the full presentation available on the WSR website. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. There were CLFN council members in attendance. Don reiterated that the Project Team would like to hear from CLFN community members and that a recording of the session would be made available through YouTube and the WSR Website. During the question and answer period, the council members requested that the Project team have a community visit to provide a Project update.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Rick Allen of Constance Lake First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Superior Inn and Conference Centre in Thunder Bay on June 11-13, 2024.

The purpose of the Gathering was to create a respectful, and collaborative space for consultation to continue to build an understanding of the three road projects and their potential impacts by: 1) Providing a comfortable space for Elders to gather and discuss the Projects; 2) Creating opportunities to engage directly with the Project proponents and consulting teams sharing information about the Projects and; 3) Discussing the upcoming draft Environmental Assessment Report / Impact Statement (EAR/IS) Review Process for WSR and the Marten Falls Community Access Road (MFCAR) Project.

Day 1 was set aside exclusively as an Elders Gathering to gather and engage with the individual Project Teams for all three projects to share their perspectives. By design, there were no government representatives in attendance on Day 1; only Indigenous people and Indigenous consultants, to encourage a more open and comfortable discussion. This was a new and innovative approach to engaging with Indigenous communities by the creation of a sacred space that was authentic, comfortable and open.

Day 2 was open to all participants. The morning focused on a series of technical presentations on key issues identified in previous engagement and consultation opportunities (peatlands (and other terrain), building roads on peatlands, aspects of water and fish populations). The afternoon was an Expo where participants could visit a series of booths to have one-on-one conversations with Project Team members from each of the road projects, various technical aspects of the Projects, Ontario and the Impact Assessment Agency of Canada.

Day 3 was also open to all participants. This session was a half day workshop on a common approach to reviewing the upcoming circulation of draft EAR/ISs for two of the three road projects so that there would be sufficient time to review and provide feedback. Each project team wanted to share the common approach to reviewing the draft EAR/ISs with Indigenous Nations early so that there was a shared understanding of what to expect and when. This would allow Indigenous communities to prepare themselves in advance with respect to resources to assist in the review.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 44 individuals signed in for Day one of the gathering, A total of 62 individuals signed in for Day 2, and a total of 48 individuals signed in for Day 3, but please note that not all participants opted to sign in. In total 5 participants from Constance Lake First Nation (CLFN) attended the Gathering over the 3 days.

Contact Date: Jun 17, 2024 13:00 Method: Indigenous Community Meeting
Topics to be Discussed: Virtual Information Session Round 3 Part 2
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Constance Lake First Nation (CLFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a discussion of preliminary results for the vegetation, wildlife, social environment, aboriginal and Treaty rights valued components. The presentation concluded with discussion on the cumulative effects assessment and the assessment of other aspects and effects. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from CLFN were in attendance.

Topics to be Discussed: CLFN Community Meeting
Christopher McKay of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team hosted an Open House for Constance Lake First Nation (CLFN) from 11:00am to 3:00pm at the Anglican Church. The information session was advertised in-house by CLFN. Christopher McKay gave a presentation on the WSR Project followed by a question and answer period. Communication materials were provided to attendees and to a council member for distribution to community members including: WSR newsletter, a copy of the presentation and feedback forms. Poster boards were also displayed for the event. There was a total of 8 participants. The questions received were regarding the general project information concerns for caribou crossing, the type of mines being considered, impacts on the land and animals, mitigation measures, and control & access.

Topics to be Discussed: Field Notice Fall Geo-Technical Drilling Program
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation's (CLFN) Chief Rick Allen regarding a Field Notice for the Fall geo-technical drilling program. The email indicated that AtkinsRéalis is providing a notification to complete a drilling program for the WSR project to further engineering design and support the coordinated provincial Environmental Assessment and Federal Impact Assessment. The letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). The email indicated that all works will be conducted in accordance with the permit conditions issued by MNR. Attached to the email was the Field Notice explaining what is happening, the schedule and what to expect. For further questions, the contact information for Hayden Yip of AtkinsRéalis was provided.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Constance Lake First Nation's (CLFN) Chief Rick Allen with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for CLFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Constance Lake First Nation's (CLFN) Chief Rick Allen which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if CLFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 4 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Constance Lake First Nation. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from CLFN were in attendance.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Ramona Sutherland, Bertha Sutherland, Roger Wesley, and Wayne Neegan of Constance Lake First Nation. The email was also sent to Jennifer Duncan and Kimberly Jorgenson of Four Rivers Environmental Services Group. The email contained links to?invitations for the Three Road Project Gathering & Expo hosted by ?Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Constance Lake First Nation's (CLFN) Chief Rick Allen with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Summary of Aboriginal and/or Treaty Rights and Interests Forum November 2023
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Chief Rick Allen and community contacts of Constance Lake First Nation (CLFN) with a letter and summary of comments from CLFN from the Aboriginal and/or Treaty Rights and Interests (ATRI) Forum in November 2023. The letter indicated that attached is the summary of comments provided by CLFN in the individual Project-specific breakout sessions and the comments are being integrated into the Environmental Assessment/Impact Assessment Process. The letter noted that the Project team will seek further feedback from the community at future EA/IA milestones.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
The Webequie Supply Road (WSR) consultation team conducted a virtual community meeting on the Zoom platform with Constance Lake First Nation (CLFN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 2 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment. After the effects assessment discussion, potential effects and associated mitigation measures were explained using examples from geology, terrain and soils and fish and fish habitat. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from CLFN were in attendance.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a package via Canada Post to Constance Lake First Nation's (CLFN) Chief Rick Allen, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for Round 4 Part 2 for CLFN on January 27, 2024, from 1:00-1:45pm EST with registration links for the session. The information session will include the second presentation on WSR's Cumulative Effects Assessment. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. The letter also attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if CLFN has any questions or comments.

Topics to be Discussed: CLFN Community Visit
The Webequie Supply Road Project Team attended a community meeting in Constance Lake First Nation (CLFN) to share a project update regarding the Webequie Supply Road (WSR) Environmental/Impact Assessment (EA/IA). The format of the meeting was a presentation by the Project Team followed by a question and answer period. The presentation consisted of a brief project description, followed by an explanation of how the WSR EA/IA is related to the federal regional assessment, themes of what has been so far from consultation efforts to date, potential project effects, the EA/IA decision-making process and post EA/IA decision activities. In an effort to seek feedback on Valued Components and potential project effects in preparation for the Draft chapters of the Environmental/Impact Assessment, an engagement exercise to select the top three most important valued components was provided to community members. All present participated in the exercise. Communication materials were provided to community members for their information and reference including: a copy of the presentation, WSR Environmental/Impact Assessment Project update Constance Lake First Nation December 18, 2024. A total of 18 community members attended the session, with 10 completing the sign-in sheet.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Ramona Sutherland, Bertha Sutherland, Roger Wesley, and Wayne Neegan of Constance Lake First Nation. The email was also sent to Jennifer Duncan and Kimberly Jorgenson of Four Rivers Environmental Services Group. The email contained links to?invitations for the Three Road Project Gathering & Expo hosted by ?Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Three Road Projects Gathering & Expo June 2024 Report
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Valhalla Inn in Thunder Bay on February 19-20, 2025.

The purpose of the Gathering was to provide an engaging and interactive consultation space to discuss the Webequie Supply Road (WSR) Draft Environmental Assessment Report / Impact Statement (EAR/IS), Marten Falls Community Access Road (MFCAR) Draft EAR/IS and Northern Road Link (NRL) Projects.

Day 1 of the event was set aside for Project overviews, consultation panels, individual community breakout sessions, and project expo including information to assist with review of the draft EAR/IS for MFCAR and WSR and cumulative effects assessment.

Day 2 of the event covered the Aboriginal and/or Treaty Rights and Interests (ATRI) panel discussions, breakout sessions, and project expo including information to assist with review of the draft EAR/IS and MFCAR for WSR and cumulative effects assessment.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 28 individuals signed in for Day one of the gathering, A total of 38 individuals signed in for Day 2, but please note that not all participants opted to sign in. In total 3 participants from Constance Lake First Nation (CLFN) attended the Gathering over the 2 days.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Rick Allen of Constance Lake First Nation (CLFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

09:08
Roger Wesley, Lands and Resources Manager for CLFN responded to the email thanking the WSR Project team for keeping CLFN posted and for sending hard copies for review. The email indicated that CLFN will look into next steps and get back in touch with the team as per community engagement and scheduling. Roger wished Michael the best.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road
michael.fox@supplyroad.ca

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Don Parkinson, Consultation Lead, SNC-Lavalin Inc.

WSR240-REF-PR-MAP-0005

Web-Preliminary Study Areas for Indigenous Land Use and Interests-2021-12-13

December 13, 2021

Chief Ramona Sutherland
Constance Lake First Nation
PO Box 4000
Constance Lake, ON P0L 1B0

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Ramona Sutherland,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Constance Lake First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Constance Lake First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Constance Lake First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Constance Lake First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Constance Lake First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Constance Lake First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Constance Lake First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Constance Lake First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Constance Lake First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Constance Lake First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Ramona Sutherland,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Constance Lake First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

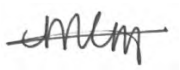
Next Steps

In order to confirm that Constance Lake First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

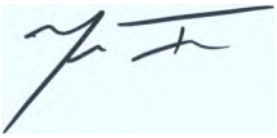
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. April 1, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Socio-Economics. This upcoming week's session is: **WSR Presents: Socio-Economics.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 6th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to brianna.patrick@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

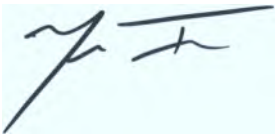
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

April 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on human health. This upcoming week's session is: **WSR Presents: Human Health.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 20th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Ramona Sutherland,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Constance Lake First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

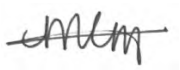
Next Steps

In order to confirm that Constance Lake First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Encl.
Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

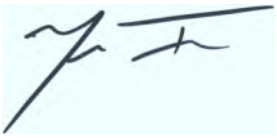
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

May 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on wildlife and species at risk. This upcoming week's session is: **WSR Presents: Wildlife and Species at Risk.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 18th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. May 27, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on field studies related to water. This upcoming week's session is: **WSR Presents: Field Studies - Water.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 1st, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
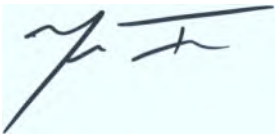
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

June 7, 2022

Dear Chief Sutherland,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 20 between 12pm and 1:30pm** for Constance Lake First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZUqcuyuqzIuG9O6hreA-XtIQFFCjKmAQ9g2.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 817 5565 9417 & Passcode: 455530.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/constancelake.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

CC: Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 10, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on field studies related to fish and fish habitat. This upcoming week's session is: **WSR Presents: Field Studies - Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 15th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

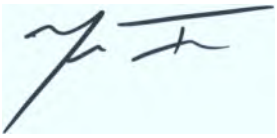
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 24, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on cultural heritage This upcoming week's session is: **WSR Presents: Cultural Heritage.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 29th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

August 3, 2022

Dear Chief Sutherland,

We hope that this letter finds you and your community well.

Thank you for expressing interest on January 27, 2022 in participating in the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project.

As you may know, Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Constance Lake First Nation currently has an active funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. As such, we would like to meet with you and your team to discuss the scope of the IKLRU Program and how it will be carried out in terms of the study area, valued components, criteria and indicators, and community participation,. We are available to meet and discuss the IKLRU Program in detail at your convenience, and in any method that you and your community prefers, either in-person or virtually. Please inform on how you wish to proceed at your earliest convenience.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project website also has various informational videos, communication materials and project updates. Please visit: https://www.supplyroad.ca/

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

October 19, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Wolverine.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 25th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sutherland:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

1 Introduction

1.1 Project Background

The proposed Webequie Supply Road (WSR) Project (the Project) is a new all-season road of approximately 107 kilometres (km) in length from Webequie First Nation to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire) in the James Bay lowlands. The Project proponent is Webequie First Nation, a Matawa First Nation Ojibway community located in northwestern Ontario, approximately 525 km north of Thunder Bay, with remote access by air and seasonal winter road.

A road corridor of 35 metres (m) in width, within the broader approximately 2 km wide preliminary preferred corridor, is proposed for the Project to accommodate a permanent two (2)-lane gravel surface all-season road. Waterbody crossing structures, aggregate extraction and processing areas, construction camps and storage and laydown yards also form part of the Project components.

On May 3, 2018, the Ontario Minister of the Environment, Conservation and Parks (MECP) (then Minister of the Environment and Climate Change) signed a voluntary agreement with Webequie First Nation to make the Project subject to an Individual Environmental Assessment (EA) under Ontario's *Environmental Assessment Act.* The Project is also subject to an Impact Assessment (IA) through meeting the requirements of the federal *Impact Assessment Act.*

In August 2020, a draft Terms of Reference (ToR) for the EA was submitted to MECP. As part of the development of the ToR, consultation and engagement was initiated with 22 Indigenous communities (identified by the province as requiring consultation), as well as the public, government agencies, and stakeholders, and comments received during the review period were incorporated into the ToR as applicable.

In October 2021, a Notice of Approval (NoA) of the ToR was circulated by MECP, defining the framework for preparing the EA. This includes adhering to the approved ToR and all amendments made during its development. Finally, a Notice of Commencement (NoC) of the EA was published in November 2021, signifying the formal start of the EA/IA coordinated assessment process and related consultation and engagement activities.

1.2 Purpose

This Consultation Progress Report seeks to fulfill requirements that are defined within the NoA of the ToR. Per Amendment 3, "Consultation Reporting at Key EA Milestones", MECP specifies that Progress Reports must be prepared for consultation activities associated with each EA milestone, which have been conceptualized as the three consultation rounds further detailed in **Section 2.3** below. Furthermore, the Consultation Progress Report must:

- Be organized by Indigenous community;
- Contain a consultation log and summary that tracks consultation activities, information shared by Webequie First Nation with the community, any community input and Webequie First Nation's responses to such input; and
- Contain a discussion of how any input and information provided by Indigenous communities have informed the development of the EA milestone.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

The Consultation Progress Report must be provided to both MECP and each Indigenous community, with a copy of the community-specific portion of the Consultation Progress Report that relates to that community, before proceeding to the next EA milestone. The WSR Project Team will respond to any questions or concerns raised by MECP or an Indigenous community in response to the Consultation Progress Report including making any revisions to the Consultation Progress Report as considered applicable. Each final Consultation Progress Report must be appended to the record of consultation submitted with the Environmental Assessment Report/ Impact Statement (EAR/IS) for the Project. Therefore, this Consultation Progress Report supports the comprehensive documentation of consultation and engagement activities to facilitate successful completion of the EA/IA process for the Project.

The purpose of this Consultation Progress Report is to summarize the Engagement and Consultation Program for the EA/IA process and to document the results of activities carried out as part of Consultation Round 1. Key outcomes (including activities undertaken, feedback received, and responses provided by the Project Team)- are documented for each of the 22 Indigenous communities being consulted as part of the Project.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

2 Engagement and Consultation Program Background

2.1 Principles and Approach

2.1.1 Webequie-Led Indigenous Communities Consultation

The plan for Consultation Round 1 with Indigenous communities was developed in accordance with the following overarching components:

- Elders' guiding principles;
- Webequie First Nation Three-Tier approach to Indigenous community consultation/engagement; and
- Requirements of applicable legislation, policies and guidelines.

Elders provided guidance to the Project Team to ensure consultation and engagement were conducted in a respectful manner that reflects the culture and tradition of the Webequie people and their clans and neighbours outside the community. The Project Team ensured that all Project-related consultation and engagement activities were inclusive of the following guiding principles (and will continue to do so for Consultation Rounds 2 and 3):

- Mutual recognition of nation to nation;
- Mutual recognition of ancestral knowledge;
- Mutual recognition of traditional knowledge and practices;
- Mutual recognition of clan families and relationships;
- Mutual recognition of sustainable livelihood; and
- Mutual recognition of traditional protocols.

2.1.2 Duty to Consult with Indigenous Peoples

As further explained in the ToR, the Project falls under the jurisdiction of both the provincial *Environmental Assessment Act* (EA Act), and the federal *Impact Assessment Act*. The Crown can delegate some procedural aspects of the Duty to Consult to Project proponents, and Project proponents are obliged under the EA Act to consult with all interested parties, including Indigenous communities. To ensure each round of engagement and consultation with Indigenous communities is meaningful, it is recognized that Indigenous communities have varying rights and interests in respect of the Project, and community requests for different approaches to consultation and engagement have been accommodated wherever possible to mitigate impacts to their rights and interests. In addition, the "public" consultation process is also open to Indigenous communities.

The MECP and the Ministry of Northern Development and Mines (MNDM) (now Ministry of Northern Development and Ministry of Mines),on behalf of the Ontario Government, have also formally delegated some procedural aspects of consultation required under the EA Act to Webequie First Nation, as proponent.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

While some Duty to Consult responsibilities have been delegated to the proponent, the Government of Ontario (MECP and MNDM) will still retain overall responsibilities related to the Crown's obligations under the Duty to Consult.

A Memorandum of Understanding (MOU) between MECP, MNDM and Webequie First Nation, setting out how roles and responsibilities related to the Duty to Consult will be shared between the Crown and the proponent, was finalized on February 7, 2020. In general, Webequie First Nation is responsible for carrying out Statutory Consultation in respect of the Project in accordance with the EA Act and will consult with the Aboriginal Communities for that purpose; and the Crown may rely on Statutory Consultation in fulfilling its Duty to Consult. Further details regarding Webequie First Nation's roles and responsibilities in conducting Statutory Consultation for the Project are provided in Section 10.1.2 of the ToR.

2.2 Identification of Indigenous Communities and Organizations

In coordination with other provincial government agencies, Ontario (MECP) identified a list of 22 potentially affected Indigenous communities that are to be consulted by the WSR Project Team as part of its Project planning. These communities were identified by Ontario, as per direction provided in the letter from MECP to the Webequie First Nation on December 19, 2018, as potentially having their rights and/or interests affected by the Project. Of these Indigenous communities, 16 were identified as potentially being affected by the Project, while six other Indigenous communities may have an interest in the Project. For the purposes of the ToR, all 22 communities will be referred to as potentially affected. The full list of communities is presented in **Table 2-1** below.

2.3 Overview of Consultation and Engagement Program

The Engagement and Consultation Program for the EA/IA has been categorized into three different rounds which are associated with distinct Project milestones, topics, and timelines. These rounds are defined in the sections below.

2.3.1 Round 1

Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e., during the ToR phase);
- Study Plans for discipline studies;
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (routes, aggregate areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

2.3.2 Round 2

Consultation Round 2 will be conducted from Fall 2022/Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives;
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

2.3.3 Round 3

Consultation Round 3 is proposed to take place from Fall 2023/Winter 2024 to Winter 2026. As the final round of engagement and consultation activities for the EA/IA process, the following milestones and topics will be the focus for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project;
- Proposed impact management, mitigation and follow-up monitoring program; and,
- Next steps in EA/IA process.

2.4 Schedule of Consultation Activities

Table 2-2 below provides a high-level schedule of activities that are planned to occur in Consultation Rounds 1, 2, and 3 of the Engagement and Consultation Program for the Project. The schedule is subject to change. **Section 3** provides more detailed activity-specific schedules for activities that occurred during Consultation Round 1.

Table 2-2: Planned Activities by Consultation Round

Regulatory Milestone/Activity	Consultation Activity	Date(s)
CONSULTATION ROUND # 1		
Notice of Commencement of EA/IA	Notification letters, emails, fax	October – November 2021
Topic-Specific Information Sessions	Virtual live-stream sessions and Wawatay radio call-in shows	October 2021 – June 2022
Indigenous Knowledge and Land and Resource Use (IKLRU) Program	Invitation letters	December 2021
Socio-Economic Data Collection	Invitation letters	December 2021
	Key informant interviews and focus groups	October 2021 – July 2022
Chief and Council Meetings	Project update meetings with Webequie First Nation Chief and Council (as requested)	March – August 2022
Community Meetings	Round #1 virtual community information sessions with all 22 potentially affected communities	April – September 2022
	In-person on-reserve community meetings with Webequie First Nation	October – November 2021
Public Information Centre (PIC) #1	Open House for interested community members in Thunder Bay	August 2022
Project Website	Updates to Project website with communication materials, videos, and key Project information	Ongoing

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

CONSULTATION ROUND #2		
Development and Evaluation of Alternatives	Notification letters, emails, fax	Winter 2023
Topic-Specific Information Sessions	Virtual live-stream sessions and Wawatay radio call-in shows	Fall 2022/Winter 2023
Chief and Council Meetings	Project update meetings with Chief and Councils from all potentially affected communities (as requested)	Winter 2023 to Summer 2023
Community Meetings	Round #2 virtual community information sessions with all 22 potentially affected communities	Winter 2023 to Summer 2023
	In-person on-reserve community meetings with all potentially affected communities (as requested)	Winter 2023 to Summer 2023
Off-Reserve Community Meeting	Open-house session in Thunder Bay	Summer 2023
Project Website	Updates to Project website with communication materials, videos, and key Project information	Ongoing
CONSULTATION ROUND #3		
Topic-Specific Information Sessions	Virtual live-stream sessions and Wawatay radio call-in shows	Fall 2023
Chief and Council Meetings	Engagement regarding Draft EAR/IS with Chief and Councils from all potentially affected communities (as requested)	Winter 2024 to Fall 2024
Community Meetings	In-person on-reserve community meetings with all potentially affected communities (as requested) regarding draft EAR/IS	Winter 2024 to Fall 2024
Off-Reserve Community Meeting	Open-house sessions in Thunder Bay regarding Draft EAR/IS	Fall 2024
Notice of Draft Environmental Assessment Report/ Impact Statement (EAR/IS) for Review	Notification letters, emails, fax	Winter 2025
Notice of Submission of Final EAR/IS for Review	Notification letters, emails, fax	Spring 2026
Project Website	Updates to Project website with communication materials, videos, and key Project information	Ongoing

3 Engagement and Consultation Activities During the EA/IA Process To-Date

During Consultation Round 1, various virtual and in-person activities were facilitated by the Project Team to ensure proactive engagement and consultation with all 22 potentially affected Indigenous communities. The following subsections provide an overview of all activities that have been carried out as part of Consultation Round 1, including dates, involved communities, general summaries, and other details as applicable. Further information is provided in the detailed Consultation Log in **Appendix A**.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

3.1 Chief and Council Meetings

Four Chief and Council meetings were held during Consultation Round 1, which involved providing Project updates, study-specific updates, and other information to Webequie First Nation's Chief Wabasse, and Council and Weenusk First Nation's Chief Hunter and Council. Details are provided in **Table 3-1**.

Table 3-1: Consultation Round 1 Chief and Council Meetings

#	Community	Date/Time	Meeting Summary
1	**Webequie First Nation**	March 30, 2022 12:00 PM	A meeting was held with Chief Wabasse and Council to provide a Project update to new council members following the recent election of officials, and to discuss upcoming EA/IA activities.
2	**Webequie First Nation**	June 20, 2022 2:00 PM	A meeting was held with Chief Wabasse and Council to provide an update on the socio-economic and human health studies and to coordinate a community visit to collect primary information to support both studies.
3	**Weenusk First Nation**	July 19, 2022 10:00 AM	A meeting was held with Chief Hunter and Council to provide information on topics in Consultation Round 1 – EA/IA updates, study plans for valued components, assessment approach, IK, consideration of alternatives and consultation approach and next steps.
4	**Webequie First Nation**	August 26, 2022 11:00AM	A meeting was held with Chief Wabasse and Council to provide an update on the IKLRU program and to discuss next steps.

3.2 Virtual Community Information Sessions/ Open Houses

22 virtual community information sessions were held during Consultation Round 1 – one with each of the potentially affected Indigenous communities at the start of each week. The Virtual Information Sessions were scheduled for 1.5 hours. The actual length of the meetings varied depending on the number of participants and questions / comments raised. **Table 3-2** shows the schedule of sessions. Session duration and number of community participants is listed by each Indigenous community in **Section 4**. An invitation letter and poster were sent to the Chief of each community at least two weeks in advance of the event. Each session was hosted by the Project Team via Zoom and live-streamed via YouTube. Beginning in April 2022, each session was advertised in advance via event posts on Facebook, Instagram, and LinkedIn. Detailed analytics for each Virtual Community Information Session are presented in **Section 4**. Sessions included an introduction to the current status of the WSR Project, a pre-recorded video presentation summarizing topics for engagement and EA/IA activities to date, and a Q&A period, during which time responses were provided to questions raised by the community during the EA ToR phase. At the session, attendees were also encouraged to pose new questions to the Project team. After each session, the video of the recorded virtual information session was posted to the Project

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Website and YouTube, ensuring community members who were unable to attend could still watch the session pertaining to their community and submit questions and feedback. Comments received from each community and responses provided by the Project Team are detailed in **Section 4.1**.

Table 3-2: Schedule for Consultation Round 1 Community Virtual Information Sessions

#	Indigenous Community/ Group	Session Date	Invitation Letter
1	**Webequie First Nation**	Monday, April 4, 2022	Tuesday, March 29, 2022
2	**Weenusk (Peawanuck) First Nation**	Monday, April 11, 2022	Tuesday, March 29, 2022
3	**Kaschechewan First Nation**	Tuesday, April 19, 2022	Monday, April 4, 2022
4	**Attawapiskat First Nation**	Monday, April 25, 2022	Monday, April 11, 2022
5	**Fort Albany First Nation**	Monday, May 2, 2022	Tuesday, April 19, 2022
6	**Marten Falls First Nation**	Monday, May 9, 2022	Monday, April 25, 2022
7	**Neskantaga First Nation**	Monday, May 16, 2022	Monday, May 2, 2022
8	**Kasabonika Lake First Nation**	Tuesday, May 24, 2022	Monday, May 9, 2022
9	**Eabametoong First Nation**	Monday, May 30, 2022	Monday, May 16, 2022
10	**Nibinamik First Nation**	Monday, June 6, 2022	Tuesday, May 24, 2022
11	**Aroland First Nation**	Monday, June 13, 2022	Tuesday, May 31, 2022
12	**Constance Lake First Nation**	Monday, June 20, 2022	Tuesday, June 7, 2022
13	**Ginoogaming First Nation**	Monday, June 27, 2022	Monday, June 13, 2022
14	**Kitchenuhmaykoosib Inninuwug First Nation**	Monday, July 4, 2022	Thursday, June 23, 2022
15	**Kingfisher Lake First Nation**	Monday, July 11, 2022	Monday, June 27, 2022
16	**Long Lake #58 First Nation**	Monday, July 18, 2022	Monday, July 4, 2022
17	**Mishkeegogamang First Nation**	Monday, July 25, 2022	Monday, July 11, 2022
18	**North Caribou Lake First Nation**	Tuesday, August 2, 2022	Monday, July 18, 2022
19	**Wapekeka First Nation**	Monday, August 8, 2022	Monday, July 25, 2022
20	**Wawakapewin First Nation**	Monday, August 15, 2022	Tuesday, August 2, 2022
21	**Wunnumin Lake First Nation**	Monday, August 22, 2022	Monday, August 8, 2022
22	**Métis Nation of Ontario – Region 2**	Monday, August 29, 2022	Monday, August 15, 2022

3.3 Project Notifications and Updates

3.3.1 Notices/ Invitations (i.e., Notice of Commencement of EA/IA)

Notices regarding key Project milestones and invitation letters for data gathering activities were sent to Indigenous communities via email, mail (Canada Post), and fax (where applicable), as further described in **Table 3-3**.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-3: Notices/ Invitations Circulated During Consultation Round 1

#	Notice	Date(s)	Description
1	**Notice of Commencement of EA**	October 29, 2021 – Email November 3, 2021 – Mail	The NoC of EA/IA was circulated to all Indigenous communities/groups and stakeholders on the WSR Project contact list. The notice informed recipients that the ToR had been approved- with amendments- by MECP.
2	**IKLRU Program Invitation Letter**	December 13, 2021 – Email December 13, 2021 – Mail December 13, 2021 – Fax	The IKLRU invitation letter was sent to all 22 Indigenous communities to share information regarding the program and solicit participation.
3	**Socio-Economic Primary Data Collection Invitation Letter**	December 21, 2021 – Email December 20, 2021 – Mail December 20, 2021 – Fax	The Socio-Economic invitation letter was sent to all 22 Indigenous communities to introduce the socio-economic primary data collection program, including its purpose, methods, and criteria, and to solicit participation.
4	**Engagement Options Letter #1 (with information on virtual community information sessions, including past sessions)**	July 12, 2022 – Email July 12, 2022 – Fax	A letter was distributed to all 22 Indigenous communities to summarize all available engagement options and provide an overview of the status of virtual community information sessions, including where to access past sessions
5	**Engagement Options Letter #2 (with information on the Socio-Economic primary data collection program)**	July 26, 2022 – Email July 26, 2022 – Fax	A letter was distributed to all 22 Indigenous communities as a refresher on all available engagement options, also providing an overview of the Socio-Economic primary data collection program and reminding communities of opportunities for participation
6	**Engagement Options Letter #3 (with information on Consultation Round 2 topics)**	August 12, 2022 – Email August 12, 2022 – Fax	A letter was distributed to all 22 Indigenous communities as another refresher on all available engagement options, also providing information on the conclusion of Consultation Round 1 and topics to be covered in the upcoming Consultation Round 2.
7	**Notice of Public Information Centre #1**	August 17, 2022 – Newspaper August 18, 2022 – Email August 23, 2022 – Email	A Notice of PIC #1 was published in local newspapers, posted on the project website, and sent to all 22 Indigenous communities/groups and stakeholders on the WSR Project contact list. The notice informed recipients of the Project purpose, planning process, and PIC details including date, time, location, and contact information.

3.3.2 Newsletters

Monthly newsletters providing up-to-date information on various aspects of the Project (such as field studies, study plans, the IKLRU program, socio-economic primary data collection, and consultation events) were sent to all 22 potentially affected Indigenous communities via email, mail (50 copies through Canada Post), and fax, as further described in **Table 3-4**. They are also posted on the Project website, ensuring they are accessible to all community members. Additionally, WFN receives a community-specific newsletter

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

on a quarterly basis that provides information and updates on the WSR Project with highlights on community participation and community-specific activities.

Table 3-4: Monthly Newsletters Circulated During Consultation Round 1

Issue	Month	Description of Newsletter Contents
5	**November 2021**	› Description of ToR approval and "what happens now that the ToR has been approved?" › Summary of (and link to) the Notice of Commencement of EA/IA › Overview of baseline studies and identification of alternatives to be completed › General description of the engagement and consultation approach
6	**January 2022**	› Reminder of ToR approval and what this means for the Project/ the difference between the federal IA and provincial EA › Overview of the role of study plans › List of field studies completed in the past year › What to expect in 2022
7	**February 2022**	› Reminder of the difference between federal IA and provincial EA › Overview of the coordinated assessment process › Description of what will be studied (valued components/indicators) › Summary of the IKLRU program, including its purpose, phases, and its role in the EA/IA
8	**March 2022**	› Reminder of what the coordinated provincial-federal assessment process entails › Overview of IKLRU, including the purpose of the IKLRU program, its importance in the EA/IA, and information being gathered › Summary of the socio-economic primary data collection program
9	**April 2022**	› Description of the current stage of the Project › Overview of upcoming virtual community information sessions › Summary of the socio-economic program, including "what are socio-economics?", what the primary data collection program entails, and methods that will be used to gather this information
10	**May 2022**	› Quick refresher on the current phase of the EA/IA › Description of virtual community information sessions › Summary of valued components, indicators, and fact sheets- which explain how these will be studied › Overview of additional upcoming engagement opportunities
11	**June 2022**	› Update on virtual community information sessions, including communities whose sessions have already occurred and those whose sessions are upcoming, how to watch recordings and submit comments, and a description of what each session involves › Overview of ongoing field studies
12	**July 2022**	› General description of the objective of field studies for the Project › Definition of key terms associated with cultural heritage assessment, including built heritage resources, cultural heritage landscapes, and cultural heritage resources › Summary of the objectives of fish and fish habitat assessments › Overview of ongoing virtual community information sessions
13	**August 2022**	› Overview of the outcomes/wrap-up of the virtual community information sessions › Introduction to activities and topics for Consultation Round 2 › Promotion of the upcoming WSR Open House on August 25th
14	**September 2022**	› Overview of July 26 & 27 community visit and upcoming fall visit › Introduction to Country Foods and Human Health surveys › Refresher on Socio-Economic Primary Data Collection and IKLRU Programs › Summary of August 25 WSR Open House

3.4 Project Website

A dedicated website, www.supplyroad.ca, was created at the beginning of the Project (during the ToR phase) to provide Indigenous communities, Indigenous organizations and councils, and stakeholders with information on the Project, post notifications of upcoming activities and engagement events, and provide access to important documentation for review. Public notices/invitations, community information session presentations, and other relevant documents and communication materials (such as fact sheets and study plan summaries) are posted on the website to provide Indigenous community members and stakeholders easy access to Project information.

Throughout Consultation Round 1, recorded topic-specific live-streaming information sessions and community virtual information sessions have also been continuously uploaded to the website, ensuring community members who are unable to attend sessions can access Project information and provide their feedback to the Project team.

In addition, a unique webpage was created for each of the 22 potentially affected communities, which can be accessed by entering “supplyroad.ca/[communityname]” into the web browser. Each community-specific webpage contains the following:

- Videos with information on a range of topics related to the WSR Project;
- A live-stream recording of the community virtual information session;
- A Virtual Reality (VR) open house walkthrough, replicating a traditional open house setting with display boards presenting information on various aspects of the Project;
- A sign-up form for the WSR monthly newsletter; and,
- A comment form, allowing community members to ask questions or provide feedback to the Project Team with ease.

The website also provides interested individuals contact information. It is updated regularly to ensure all relevant documentation to date is readily available and to provide information and notices in a practical manner. Key documents are provided in Ojibway, Cree, Oji-Cree, French, and English.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

3.4.1 Frequently Asked Questions

Table 3-5 below contains a list of Frequently Asked Questions (FAQs) and corresponding responses, which represent key themes related to the WSR Project and are available to all interested parties on the Project website.

Table 3-5: FAQs from WSR Project Website

Question	Response
Will there be a hydro component to the Webequie Supply Road and if so, who will be the hydro provider?	At this time, Webequie First Nation is seeking approval for the development of a supply road; however, the basic corridor for the supply road that will undergo an Environmental / Impact Assessment will be wide enough to accommodate future communications (e.g., broadband fibre optic line) and low voltage power distribution lines, if and when connection is established to the provincial highway and electricity grid system. However, given the current uncertainty regarding how and when power and communications infrastructure will be extended into the Project area, these components have not been included in the scope of the Project. This means that details, such as potential hydro providers, are currently unknown.
How will the differences in vegetation types (i.e., string bogs versus muskegs) be accounted for in planning, constructing and operations and maintenance?	A vegetation study will be done to understand vegetation that may be affected by the Webquie Supply Road, as well as the species that inhabit those vegetation types. As part of the study, surveys will be conducted to collect information on various vegetation types, such as string bogs and muskeg. The goal of these surveys is to identify and consider the effects of the Project on vegetation, as well as to provide recommendations for minimizing negative environmental, health, social, project constructability and economic effects related to vegetation during construction and operation/maintenance of the Project. Potential effects to Upland, Wetland and Riparian Landcovers/Habitats will be assessed by determining the removals of landcover types because of the Project, including quality of vegetation available to wildlife species. The Assessment will also examine potential effects to any known or assumed critical life cycle role the habitats provide in the study areas. To learn more about how the Project Team is planning to study vegetation review the Fact Sheet and Study Plan Summary.
How will the Project Team determine the types of technologies for construction that best suit the environmental and geographic conditions of the Project area?	There are various technically feasible design and construction solutions for implementing all-season roads in Canada's northern regions which are being considered for this Project as well as proven technologies for construction of all-season roads in the challenging geographical conditions (e.g., use of styrofoam slabs and geotextile/geogrid in peat/muskeg soils).

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
Has consideration been given to using existing eskers as aggregate sources?	There are number of aggregate sources that provide options for extracting materials needed for the Project; however, several source locations will require further evaluation in the Environmental / Impact Assessment. Esker formations are a source option and are present along the north-south section and towards the end of the east-west section of the proposed supply road corridor. Temporary and permanent access roads from aggregate source locations to the Webequie Supply Road corridor will be required during the construction and operation phases of the Project. Alternative routes for access roads will be considered in the EA, with the goal of minimizing haul route distances and negative effects on the environment. Currently, the Project Team is collecting data on the terrain and information from: • Existing published literature; • Mapping; and • Field survey results. Data gathered will be incorporated into a map for evaluation which will include information on: • Information on eskers and other post-glacial deposits; • Geomorphology, topography and geotechnical characteristics in Project area, including the presence and distribution of eskers and permafrost; and Ground instability. Additionally, terrain and soil investigations will facilitate the identification of potential aggregate sources, characterization of stream crossings and mapping of route alternatives. To learn more about how the Project Team is planning to study geology, terrain, and soils review the Fact Sheet and Study Plan Summary.
How tall will the road be in comparison to the muskeg?	Where the proposed road is located in muskeg/peatlands there is low relief and the surface of the road will likely be typically about 1 m in height over the peatlands. Approaches to build the road may include the use of geo-fabric/geo-grid reinforcement at the road base-peatland interface with aggregate/fill material placed over it, with some compression of the peat expected. In this design scenario there would be minimal removal of the muskeg/peat. Other techniques to build roads over peatland include use of wick/sand drains, floating foundations, and piled foundation. Details of the optimal engineering solution and techniques for building in the road in the peatlands will presented the Environmental Assessment Report/Impact Statement for the Project.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
How will construction on the Webequie Supply Road (WSR) be initiated? Will construction start at one end and proceed along the length of the road?	Construction of the WSR is estimated to occur within a 33-month period, after securing all of the required approvals, permits, licences, authorizations and clearances to construct. Construction will occur in two stages: • Pre-construction: Activities will include field delineation of vegetation buffers and known nearby features of cultural or environmental importance that may require specialized application of mitigation measures or monitoring during construction; and • Construction: Activities will continue year-round, with some construction activities being staged and implemented to avoid or minimize potential effects to Indigenous traditional land and resource use areas and/or culturally sensitive areas/uses, and life cycle periods of wildlife (i.e., by avoiding the clearing of vegetation during the migratory bird nesting period). The detailed construction plans and sequencing of the Project will be determined during the Detailed Design phase through discussions between Indigenous communities and the construction contractor.
Why is the Project Team proposing to build a supply road rather than flying materials to mine sites in the Ring of Fire area?	The Webequie First Nation (WFN) Reserve is currently serviced by the Webequie Airport. Since 2015, the community has been involved in the investigation of an all-season road corridor to better service the community and provide economic development opportunities for its members and businesses that reside in or around the community's reserve and traditional territory. The Webequie Supply Road could be constructed and operated as a facility that only provides a connection between WFN and the McFaulds Lake area to serve mineral exploration and future mining development activities, with no connection to the provincial highway system. However, with implementation of the Project and future mining and road infrastructure developments in the McFaulds Lake area, it is likely that WFN could gain year-round access to the provincial highway system.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
How will the Indigenous Traditional Knowledge studies be undertaken?	The Webequie Supply Road Project Team is commencing an Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The IKLRU Program will provide important information that will inform the Environmental / Impact Assessments. The information gathered through the IKLRU Program will be used in combination with scientific approaches. Both knowledge systems will be given equal consideration in forming the baseline conditions and predicting potential Project effects, including potential effects to Indigenous rights and interests. The purpose of the IKLRU Program is to: • Promote sharing of IKLRU information relevant to the Project; • Help identify potential effects of the Project, including those on Indigenous rights and interests; and • Collaborate with Indigenous communities to enhance positive effects and/or to identify measures to avoid/reduce potential effects on Indigenous rights and interests. The IKLRU Program will occur in two phases: • Information Gathering Phase: Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are willing to share with the Project Team to help inform the early stages of the Assessments; and • Information Integration Phase: Completing project-specific Indigenous Knowledge and Lands & Resource Use studies or compiling information/data, for integration into the Assessment. Currently, the Project Team is determining which First Nations are interested in participating in the Program. Communities may share as much or as little IKLRU information as they wish, and in whatever form they prefer. The communities can also review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the Assessment. You can learn more about the IKLRU Program here.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
What information are you seeking for the Socio-economic Study and how can First Nations participate?	The goal of the Socio-Economic Study is to understand how, and to what extent, community socio-economic well-being could be affected by the construction and operation/maintenance of the Webequie Supply Road. The study will involve: • Collecting information on existing socio-economic conditions; • Defining the study area(s) within which potential effects are considered; • Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects; • Identifying appropriate mitigation measures to eliminate or reduce potential effects; • Identifying net effects following mitigation; and • Assessing cumulative effects. The Project Team is asking for participation from Indigenous communities to discuss and collect socio-economic information and to verify the information gathered so far. Participation options for First Nations include: • Community Socio-Economic Survey (communities can choose from various in-person and/or online survey delivery method options); • Focus Groups; and • Key Informant Interviews. Learn more about the Socio-economic Program.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
How are cumulative effects and climate change being considered in the Webequie Supply Road (WSR) Assessment process?	The WSR Project Team is undertaking a Cumulative Effects Assessment and a Climate Change Assessment. The Cumulative Effects Assessment will aim to: • Identify and characterize the effects of the Project that remain after action has been taken to reduce or manage predicted adverse effects (referred to as residual or net effects). This will help focus the Cumulative Effects Assessment on selected Valued Components (VCs) (for example, fish/fish habitat, wildlife, surface water/groundwater, vegetation and wetlands, traditional land and resource use); • Define the area and timeframe within which the study will be done for each VC where net effects have been identified; • Identify other past, current and foreseeable projects and activities with effects likely to overlap with the predicted net effects of the Project; • Work with Indigenous communities to reflect their historical experiences of colonialism and environmental change through building an understanding and overview of events, activities, and policies that have impacted and disrupted Indigenous communities and their way of life in the region; • Predict the likely combined/cumulative effects of the WSR and other projects and activities under consideration, and develop additional mitigation measures, if warranted; and • Evaluate and determine the significance of the predicted cumulative effects. To learn more about how the Project Team is planning to study cumulative effects, review the Fact Sheet and Study Plan Summary. The Climate Change Assessment will aim to: • Understand the changes and trends in climate and the effects of these changes on traditional lands and resources from the perspective of Indigenous communities through consultation with these communities; • Incorporate information prepared by construction and operations / maintenance experts such as: ○ The description of related construction activities and camps; vehicle/equipment fuel consumption and emission rates; and duration and extent of vehicle/equipment emissions;

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
	○ Expected volume and types of vehicular traffic on the new roadway; ○ Extent and frequency of maintenance operations on the new roadway; ○ Electric power usage for buildings sheltering maintenance vehicles/equipment • Collect historical and present climate data for the Project site and Northern Ontario from weather and water survey stations; • Project climatic conditions, using regional-scale models • Understand baseline air quality conditions from an assessment of existing ambient air monitoring stations located in Northern Ontario and other northern and or remote areas in Canada; and • Incorporate Indigenous Knowledge to assist in developing mitigation measures and monitoring commitments, where necessary. To learn more about how the Project Team is planning to study climate change, review the Fact Sheet and Study Plan Summary.
How will the potential effects of the Webequie Supply Road (WSR) on water be studied and assessed?	The Project Team is conducting two studies to understand the potential effects of the WSR on water. These studies are the Aquatic Habitat Study and the Groundwater and Surface Water Study. **Aquatic Habitat Study** This study will gather information regarding the existing aquatic conditions at the 26 waterbody crossings identified along the preliminary preferred corridor for the WSR. The information collected in this study includes information about fish habitats such as: • Habitat availability: both habitat quantity and quality; • Habitat quantity: will involve a quantitative assessment of potential changes to the total area of habitat and any known or assumed critical life cycle habitat (e.g., spawning, rearing, etc.) affected by the construction and operation/maintenance of the WSR; • Habitat quality: will examine changes to the quality of spawning, rearing, or overwintering type habitats for four criteria species (Brook Trout, Northern Pike, Walleye and Lake Sturgeon) as well as consideration of other species • that may be consumed or have Indigenous cultural importance (i.e., Lake Whitefish, Chain Pickerel, Yellow Perch, Cisco, Burbot, Longnose Sucker, White Sucker and Lake Chub); and

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
	• Habitat sensitivity: will be assessed and rated at each waterbody as rare, high, moderate, low, or no fish habitat based on species sensitivity, species dependence on habitat, rarity of certain types of habitat and ability of certain habitat to recover from change (resiliency). To learn more about how the Project Team is planning to study the aquatic habitat, review the Fact Sheet and Study Plan Summary. **Groundwater and Surface Water Study** This study will gather information about groundwater and surface water including: • Groundwater quantity: assessing potential changes to groundwater recharge, groundwater level (including seasonal changes) and groundwater flow/movement; • Groundwater quality: assessing the physical, chemical and biological properties of groundwater that may change as a result of the Project; • Surface Water Quantity: assessing potential changes to stream flows, water levels, and erosion and sedimentation processes at waterbody crossings, as well as overall drainage patterns within the Project area; and • Surface Water Quality: assessing potential changes to biological or chemical properties of surface water in the Project area. To learn more about how the Project Team is planning to study groundwater and surface water, review the Fact Sheet and Study Plan Summary.
How will the safety and well-being of Indigenous communities be considered as part of the Socio-economic Study?	As part of the Socio-economic Study, the Project Team is gathering information related to several preliminary criteria, also known as valued components (VCs). VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders. VCs may be affected by the Project in both positive and negative ways. One of the preliminary VCs the Project Team is considering is Community Well-Being and Safety. To examine this VC, the Project Team is looking for information about social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault and air quality and noise. To better understand Community Well-Being and Safety, the Project Team is conducting research by gathering information from publicly available sources such as: • Statistics Canada; • First Nations Community Profiles;

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
	• Community websites; and • Publicly available reports/studies. In addition, the Project Team will collect information from Indigenous communities using several methods including: • Surveys; • Community meetings; • Focus groups; and • Key-informant interviews. All data collection activities will respect and adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Understanding how the Project may affect the social and economic conditions of Indigenous communities begins with understanding the current conditions in the communities potentially effected by the Project. Once the Project Team understands current socio-economic conditions in the communities, they can assess how the Project may affect Indigenous communities and provide measures to mitigate negative effects and enhance positive effects. Learn more about the Socio-economic Program and the Indigenous Knowledge and Traditional Land and Resource Use Program.
How does the Socio-economic Study plan to investigate the potential effects of the Webequie Supply Road (WSR) culture and community well-being and safety?	As part of the Socio-economic Study, the Project Team is gathering information related to several preliminary criteria, also known as valued components (VCs). VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders. VCs may be affected by the Project in both positive and negative ways. The VCs related to culture include: • Community Well-Being and Safety: including social cohesion, participation in social and/or cultural events, perceptions of safety; • Social and Infrastructure services: demand for community services and infrastructure such as education, training, childcare, water, waste management, energy and communications;

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-5 (Cont'd): FAQs from WSR Project Website

Question	Response
	• Land Use Compatibility: existing and proposed land uses; • Recreation and Tourism: land/waterway access and resource availability; • Provincial Parks and Protected Areas: areas of natural and scientific interest and conservation reserves; and • Regional and Local Economy: economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity. To better understand the VCs related to culture, the Project Team is conducting research by gathering information from publicly available sources such as: • Statistics Canada; • First Nations Community Profiles; • Community websites; and • Publicly available reports/studies. In addition, the Project Team will collect information from Indigenous communities using a number of methods including: • Surveys; • Community meetings; • Focus groups; and • Key-informant interviews. All data collection activities will respect and adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Understanding how the WSR may affect the culture of Indigenous communities begins with understanding the current conditions in the communities potentially effected by the Project. Once the Project team understands the baseline conditions in the communities, they can assess how the Project may affect the culture of Indigenous communities and provide measures to mitigate negative effects and enhance positive effects. Learn more about the Socio-economic Program and the Indigenous Knowledge and Traditional Land and Resource Use Program.

3.5 Virtual Topic-Specific Information Sessions and Radio Call-In Shows

Throughout Consultation Round 1, the Project Team hosted virtual topic-specific information sessions and radio call-in shows relevant to the WSR Project, as listed in **Table 3-6**. Each began with a live radio show at 2:30 PM EST on Wawatay Radio and was followed by a livestream topic-specific event on Facebook Live and YouTube at 4:30 PM EST. In the two weekdays leading up to each information session/radio call-in show, the Project Team ran a 30 second ad on Wawatay Radio three times each day to advertise the event.

Table 3-6: Virtual Topic-Specific Information Sessions and Radio Call-In Shows During Consultation Round 1

Date	Topic	Discussion Points
October 8, 2021	WSR EA/ToR Approval	› Description of Project background and setting (regional and local) › Summary of Webequie First Nation's approach to engagement › Description of how the ToR was prepared and how the EA phase will proceed
October 12, 2021	Socio-Economic and Human Health Study Plans	› Project update, explaining that the ToR had been approved › Discussion of Socio-Economic and Human Health study plans- including their purpose and details of the activities associated with each
October 14, 2021	WSR EA/ToR Approval	› Description of Project background and setting (regional and local) › Summary of Webequie First Nation's approach to engagement › Description of how the ToR was prepared and how the EA phase will proceed
October 26, 2021	Acoustic Environment, Visual Environment, Climate Change/Air Quality and Cumulative Effects	› Project update, explaining that the ToR had been approved › Discussion of Acoustic Environment, Visual Environment, Climate Change/Air Quality, and Cumulative Effects study plans- including their purpose and details of the activities associated with each
November 9, 2021	Soils, Vegetation, Groundwater, Surface Water, and Aquatic Habitat Study Plans	› Project update, explaining that the ToR had been approved › Discussion of Soils, Vegetation, Groundwater, Surface Water, and Aquatic Habitat study plans- including their purpose and details of the activities associated with each

Table 3-6 (Cont'd): Virtual Topic-Specific Information Sessions and Radio Call-In Shows During Consultation Round 1

Date	Topic	Discussion Points
November 23, 2021	Caribou, Wolverine, Wildlife and Wildlife Habitat, Species at Risk, and Breeding Birds Study Plans	› Project update, explaining that the ToR had been approved › Discussion of Caribou, Wolverine, Wildlife and Wildlife Habitat, Species at Risk, and Breeding Birds study plans- including their purpose and details of the activities/ field studies associated with each
January 12, 2022	Looking Back and Ahead: WSR Activities in 2021 and 2022	› Current status from provincial regulatory perspective › Updates on activities related to engineering, noise, geotechnical, hydrogeology, socio-economic and biological studies › Completed and upcoming community engagement
January 26, 2022	What We Have Heard: Key Themes of Project Questions and Concerns	› Opportunities for providing Project feedback › Indigenous communities and organizations who have provided input › Discussion of key themes of input provided
February 9, 2022	The Provincial EA and Federal IA Processes	› Coordination of the two processes and a general comparison › Purpose of components of technical study plans › Explanation of valued components/indicators and discussion of assessment boundaries › Role and purpose of baseline studies
February 23, 2022	Indigenous Knowledge Part 1 – What is IK?	› General description of what IK entails › Discussion of the importance of IK in the EA/IA process and the blend of IK with western science › Summary of the WSR IK Program
March 9, 2022	Indigenous Knowledge Part 2 – Weaving IK into EAs and IAs	› Review of "What is IK?' › Specific examples of IK contribution from various disciplines › Presentation of a graphic showing the combination of IK and western science data collection methods
March 23, 2022	Indigenous Knowledge Part 3 – IK from a Community Member's Perspective	› Consisted of 3 videos, as follows: • The first provided a community Elder's explanation of Webequie's Three-Tier Model based on traditional use of the land • The second was a more detailed explanation of the Three-Tier Model including its relationship with government and industry

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

- The third featured a community elder sharing stories on how Indigenous people moved within their homeland

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 3-6 (Cont'd): Virtual Topic-Specific Information Sessions and Radio Call-In Shows During Consultation Round 1

Date	Topic	Discussion Points
April 6, 2022	Socio-Economics	› Definition of socio-economics › Discussion of socio-economic study plan, preliminary valued components, the local and regional study areas, baseline data collection, secondary information collection, Gender-Based Analysis Plus (GBA+) analysis, effects assessment, and mitigation of negative effects
April 20, 2022	Human Health	› Description of Health Impact Assessments (HIAs) › Discussion of HIA objectives, the Webequie First Nation proxy approach, the basis of an HIA, social determinants of health, First Nations health and wellness, and criteria and indicators
May 4, 2022	Air, Noise and Vibration	› Divided into two parts: (1) Noise and vibration, including a discussion of spatial boundaries, temporal boundaries, noise/vibration guidelines, measurement of background noise levels and results, noise monitoring locations, and mitigation methods › (2) Air Quality, including a discussion of information collection, valued components, and mitigation methods
May 18, 2022	Wildlife and Species at Risk (SAR)	› Objectives of the wildlife and SAR field studies › Description of field studies and criteria and indicators › Exploration of potential mitigation methods
June 1, 2022	Groundwater and Surface Water	› Objectives of the groundwater and surface water field studies › Discussion of study areas, field surveys, and potential mitigation methods
June 15, 2022	Fish and Fish Habitat	› Objectives of the fish and fish habitat field studies › Description of the various field surveys to be conducted and criteria and indicators › Explanation of potential mitigation methods
June 29, 2022	Cultural Heritage	› Key definitions associated with cultural heritage assessments › Description of the purpose of the assessment, regulatory requirements, and steps involved in identifying built heritage resources and cultural heritage landscapes › Overview of preliminary impact assessment methodology

3.6 On-Reserve Community Meetings

Four in-person on-reserve community meetings were held during Consultation Round 1, three with Webequie First Nation and one with Weenusk First Nation (refer to **Table 3-7**). The purpose of each community meeting was to share information on the WSR EA/IA process, study plans for valued components, assessment approach, IKLRU, consideration of alternatives and consultation approach and next steps. The presentation materials were translated to Ojibway and Cree in real-time by local translators, and all COVID-19 protocols were adhered to. Each meeting ended with a Q&A period and an overview of other upcoming engagement and consultation opportunities.

Table 3-7: Consultation Round 1 On-Reserve Community Meetings

#	Community	Date/Time	Location	Topics Covered
1	**Webequie First Nation**	October 13, 2021 1:00 PM	Webequie First Nation Band Hall	› EA/IA process Study Plans for: › Socio-Economic/ › Human Health
2	**Webequie First Nation**	October 27, 2021 12:00 PM	Webequie First Nation Band Hall	› EA/IA Process Study Plans for: › Acoustic/Visual Environment › Climate Change/Air Quality › Cumulative Effects
3	**Webequie First Nation**	November 10, 2021 2:00 PM	Webequie First Nation Band Hall	› EA/IA Process Study Plans for: › Geology, Terrain & Soils › Vegetation, › Groundwater & Surface Water › Aquatic Habitat
4	**Weenusk First Nation**	July 19, 2022 7:00 PM	Community Centre	› Topics in Consultation Round 1 – EA/IA updates, study plans for valued components, assessment approach, IKLRU, consideration of alternatives and consultation approach/ next steps

3.7 Off-Reserve Community Meetings

A meeting was held for Webequie First Nation off-reserve members at the Italian Cultural Centre in Thunder Bay on May 31, 2022, to provide information on topics in Consultation Round 1, including: EA/IA updates,

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

study plans for valued components, assessment approach, IKLRU, consideration of alternatives and consultation approach and next steps.

3.8 Public Information Centre (PIC) #1

The WSR Project Team hosted PIC #1 at the Valhalla Hotel and Conference Centre in Thunder Bay on August 25, 2022. This was an Open House for all interested community members, the public and stakeholders. It consisted of two sessions: one between 2:00 – 5:00 PM and the second from 6:00 – 9:00 PM, followed by an informal drop-in centre with display information about the Project. Topics covered during PIC #1 included Project updates since the ToR approval, the EA/IA process, studies being conducted for valued components, ongoing and future engagement and consultation opportunities, IKLRU, and the evaluation of alternatives. A total of 24 individuals attended the sessions. The main concern was heard was the need for the incorporation of Indigenous ways of communication in the process and the critical need for infrastructure in the communities.

Upon arriving at the PIC, attendees were greeted by the Project Team and encouraged to sign-in at the registration table. Communication materials provided at the open house included: 50 copies of the EA and Preliminary Engineering Fact Sheet in Ojibway and English; 50 copies of the ToR Fact Sheet in Ojibway and English; 50 copies of the Community Newsletter in English; 50 copies of Frequently Asked Questions in English; and 50 Community Meeting Feedback Forms. Project Team members encouraged attendees to complete the Feedback Forms and provide any comments and questions at the conclusion of the event to the Project Team.

3.9 Communication Materials

To compliment activities, meetings, and events that occurred during Consultation Round 1, communication materials were developed. These included presentation slide decks, study plan and general summary fact sheets for each valued component, handouts, display boards, video tutorials, and other materials. All materials were written/recorded in plain language free of technical jargon and have been produced to ensure that information is clear and easy to understand. Many are available on the Project Website to ensure community members and all interested parties can download them following engagement and consultation activities. More specifically, the following materials can be accessed on the Project website:

- **Fact Sheets** – a brief overview of the assessment purpose, study area, timeline, existing conditions, and data requirements for each valued component;
- **Study Plan Summaries** – a more in-depth summary of the objectives, assessment areas/ considerations, study methods, potential mitigations, study area boundaries, and criteria and indicators for each valued component;
- **Study-specific web-pages** – summarize ongoing field studies and the socio-economic and IKLRU programs, including data collection topics, methods, rationale, and ways to get involved;
- **Round #1 Virtual Community Information Session presentation slide deck** – provides an overview of the EA/IA process, Project description, engagement and consultation to date, study

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

plans, assessment approach, baseline studies for select valued components, IKLRU program, evaluation of alternatives, and next steps;

- **Discipline-Specific Tutorial Videos** – provide tutorials on various disciplines, or VECs, that are being studied as part of the EA/IA process; and,
- **Virtual Community Information Session Videos** – videos of recorded virtual information sessions, allowing community members to watch their community-specific session on-demand and provide comments or feedback.

4 Engagement and Consultation Results

4.1 Social Media and Associated Analytics – Definitions

The social media analytics described in Table 4-1 have been used to quantify engagement on the WSR Project via social media.

Table 4-1: Social Media Analytics Definitions Used for the WSR Project

Platform/Metric	Definition
Facebook	
Page likes	The number of people who liked your page.
Page followers	The number of people who have clicked on the 'follow' button on your page.
Page views	The number of people who have visited your page.
Engagement	Engagement is any action someone takes on your Facebook page or one of your posts. This includes the likes, reactions, number of likes and shares. It can also include saves, viewing a video or clicking on a link.
Reach	The number of people who saw your page posts on their news feed at least once.
Profile visits	This is the number of times a page's profile has been viewed by people, including people who are logged into Facebook and those who aren't.
Impressions	Impressions are the number of times any content from your page or about your page entered a person's screen. It is the number of times your post was seen. It can even be more than once.
Organic like	The likes you receive without the use of the promotions. You can use hashtags and trending keywords to help the post reach more people.
Paid like	If someone sees a promoted or sponsored post and likes it, it's counted as a paid like.
Page clicks	The number of people who clicked on your page after seeing your post, video or story.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Engagement by post type	This lets you know the engagement your page has by its type. We can get to know which kind of content will receive the most engagement (e.g., if it's an image or multiple images, or a video).

Table 4-1 (Cont'd): Social Media Analytics Definitions Used for the WSR Project

Platform/Metric	Definition
Paid reach	The number of people who saw your post due to an ad you paid for.
Video minutes viewed	The total number of minutes your video was watched for.
LinkedIn	
Likes	The total number of likes/reactions on your post.
Comments	The total number of comments on your post.
Engagement	The total number of reactions, comments, clicks and shares on your LinkedIn posts published during the selected period.
Impressions	Impressions refers to the number of times your post is displayed on someone's news feed – regardless of whether they click on it or not.
Reach	The number of people who see your content.
Page views	The total number of times your company page was viewed during your specified date range.
Unique views	The total number of unique users that have viewed your company page. This number excludes multiple visits form a single user.
Average engagement rate per post	The average engagement rate for posts published during the selected date range. For each post, the engagement rate is calculated by taking the reactions, comments, clicks and shares received, divided by the number of followers at the time of the post.
Total reactions	The total number of reactions received on posts published during the selected period. This includes all types of responses such as like, celebrate, love, insightful and curious.
YouTube	

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Channel	A YouTube page is referred to as a “channel”.
New subscribers	YouTube’s equivalent of a new follower.
Watch time (HOURS)	Watch time is the total amount of minutes viewers have spent watching your videos. The higher the watch time, the higher the chances of YouTube elevating your video in the recommended videos.

Table 4-1 (Cont’d): Social Media Analytics Definitions Used for the WSR Project

Platform/Metric	Definition
Subscribers growth	This will show you which videos, locations, and periods gain and lose subscribers.
Audience retention	Audience retention shows you the percentage of viewers who watch and leave your video at every single moment of the video.
Engagement	Comments, shares, likes, and dislikes.
Impressions click-through rate	Impressions click-through rate measures your video’s ability to prompt people to watch your video after seeing it on their homepage, recommendation section, or trending section.
View	YouTube counts a “view” when someone watches 30 seconds of your video.
Twitter (Tweets)	
Impression	Anytime a Twitter user sees your Tweet. Think of an impression as a Tweet that shows up on someone’s monitor or mobile screen.
Engagement	The number of Likes/Favourites, ReTweets, Replies and Mentions received by a Twitter account.
Likes	Used to show appreciation for a Tweet.
Retweets	A re-posting of a Tweet.
Twitter (Live Stream)	
Views	Occurs when a user plays the live stream or joins a broadcast full screen or three seconds after a video starts to auto-play. Replays are considered as views as well.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Instagram (Posts)	
Likes	The total number of likes (favourable reactions) on your post
Comments	The number of comments on your post.
Saved	The number of unique accounts that saved your post.
Engagement	Anytime a user likes or comments on one of your post.
Impressions	The total number of times your post has been seen.

Table 4-1 (Cont'd): Social Media Analytics Definitions Used for the WSR Project

Platform/Metric	Definition
Reach	The number of times your website was clicked because of a post.
Instagram (Stories)	
Views	An Instagram story is a picture, video or series of the two that is shared on Instagram for only 24 hours. Views are the number of times stories were viewed, even if they were just swiped right past.

4.2 Engagement and Consultation Activities Undertaken and Results

4.2.1 Constance Lake First Nation

4.2.1.1 Key Consultation Activities Undertaken to Date

Table 4-2 below describes key consultation activities that occurred during Consultation Round 1 with Constance Lake First Nation.

Table 4-2: Key Consultation Activities Undertaken During Round 1 - Constance Lake First Nation

Date	Description of Key Consultation/Engagement Activities
October – November 2021	NoC distributed via email and mail
October 2021 – September 2022	Virtual live-stream sessions and Wawatay radio call-in shows, including circulation of letters and posters to advertise each session via email, mal, and fax
December 2021	IKLRU and Socio-Economic Program invitation letters circulated via email, mail, and fax
April 26, 2021	Follow up on Socio-Economic Program invitation letter via email
June 7, 2022	Letter and poster advertising the upcoming virtual community information session circulated via email, mail, and fax
June 20, 2022	Round #1 virtual community information session including an introduction, video presentation summarizing EA/IA activities to date, and a Q&A period
July 12, 2022	Letter describing community engagement options and providing information on virtual information sessions (including past sessions) circulated via email and fax
July 26, 2022	Letter describing community engagement options and providing information on the Socio-Economic primary data collection program circulated via email and fax
August 3, 2022	Additional follow up on IKLRU invitation letter via email and fax, including thanking CLFN for expressing interest in participating
August 12, 2022	Letter describing community engagement options and providing information on the conclusion of Consultation Round 1/ Round 2 topics circulated via email and fax
August 18 & 23, 2022	Notice of PIC #1 circulated via email blast

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

August 25, 2022	PIC #1 at Valhalla Hotel and Conference Centre in Thunder Bay
Monthly (November 2021 – September 2022)	Newsletters 5 - 13 circulated via email, mail, and fax

4.2.1.1.1 Virtual Community Information Session

A Live Virtual Community Information Session with Constance Lake First Nation was held on Monday June 20, 2022, at 12:00pm EST. An invitation to participate was sent on June 7, 2022. The meeting was 80 minutes long and 0 community members attended. The session was advertised through word of mouth and through Facebook, Instagram and LinkedIn. As of October 18, 2022, the recording of the session was viewed on YouTube 1 time. Detailed information regarding the social media outreach analytics for this session are presented below.

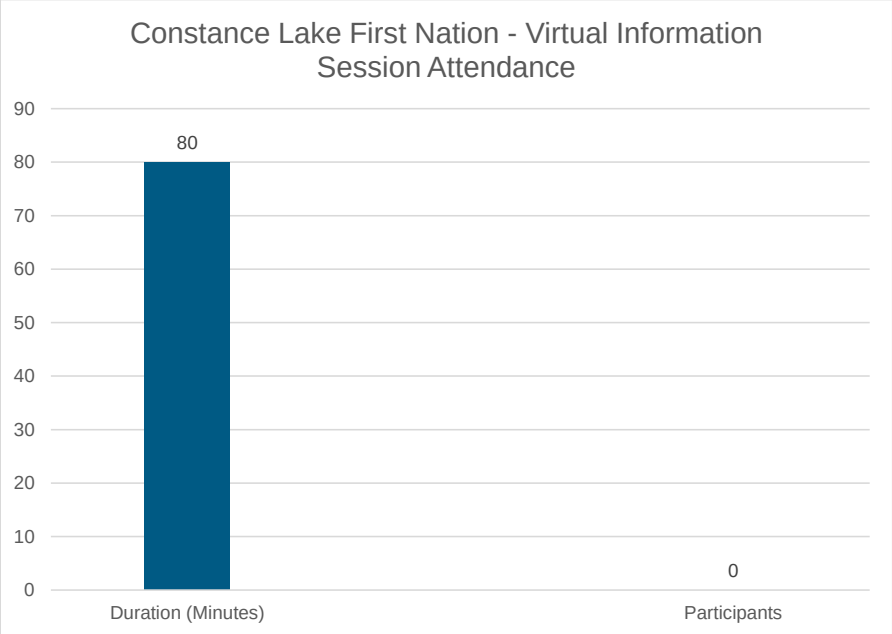

Figure 4-1: Constance Lake First Nation Virtual Information Session Attendance

4.2.1.2 Summary of Feedback Received and Response

Table 4-3 below describes feedback received from Constance Lake First Nation during Consultation Round 1 for the WSR Project.

Table 4-3: Feedback Received and Responses Provided During Consultation Round 1 – Constance Lake First Nation

Communication Date	Method of Engagement	Incoming	Outgoing	Contact Name and Title	Summary
27-Jan-2022	Email	x		Chief Ramona Sutherland (CLFN)	Chief Ramona Sutherland of Constance Lake First Nation (CLFN) sent an email to Brianna Patrick of Indigenous and Community Engagement (ICE) in response to the email Brianna sent on January 20, 2022 following up on the Indigenous Knowledge, Land and Resource Use (IKLRU) program. Chief Sutherland stated that she had included Wayne Neegan, who is CLFN's Councillor with this portfolio. Chief Sutherland stated that Wayne would schedule a meeting.
25-Feb-2022	Email	x		Kim Jorgenson (Matawa First Nations management)	Kim Jorgenson, Environmental Services Coordinator for Matawa First Nations Management, representing Constance Lake First Nation (CLFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and Craig Wallace of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team, noting that CLFN's Leadership has not yet had a chance to discuss their potential participation in the WSR Indigenous Knowledge, Land and Resource Use (IKLRU) Program. Kimberly indicated that the ongoing state of emergency in CLFN is hindering their ability to engage with the Program, but would be in touch when they are able.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 4-10 (Cont'd): Feedback Received and Responses Provided During Consultation Round 1 – Constance Lake First Nation

Communication Date	Method of Engagement	Incoming	Outgoing	Contact Name and Title	Summary
4-Mar-2022	Email	x		Wayne Neegan (CLFN)	Wayne Neegan, Councillor of Constance Lake First Nation (CLFN), emailed Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team in response to an email Michael sent on March 4, 2022 regarding the live stream session and radio show being hosted on March 9, 2022. Wayne indicated he would be in attendance.
12-Jul-2022	Email	x		Chief Ramona Sutherland (CLFN)	Chief Ramona Sutherland of Constance Lake First Nation (CLFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on July 12, 2022 regarding engagement options. Chief Sutherland inquired whether First Nations are involved in the Environmental Assessment.
14-Jul-2022	Email	x		Chief Ramona Sutherland (CLFN)	Chief Ramona Sutherland of Constance Lake First Nation (CLFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on July 14, 2022 sharing the WSR July Newsletter. Chief Sutherland requested a copy of the WSR Terms of Reference and re-stated GFN's question regarding whether First Nations are taking the lead in the Environmental Assessment (EA). Chief Sutherland noted that First Nations are stewards of the land and therefore should be leading the EA.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 4-10 (Cont'd): Feedback Received and Responses Provided During Consultation Round 1 – Constance Lake First Nation

Communication Date	Method of Engagement	Incoming	Outgoing	Contact Name and Title	Summary
14-Jul-2022	Email		x	Michael Fox (WSR Project Team)	Michael responded to Chief Sutherland, noting that Webequie First Nation (WFN) is the proponent for the WSR Project, Marten Falls First Nation (MFFN) is the proponent for the Community Access Road project, and both WFN and MFFN are co-proponents for the recent Northern Road Link Project. Michael indicated he would welcome the opportunity to have a conversation with Chief Sutherland to provide additional information on the Projects and provided his phone number to be contacted at. Michael also provided links to the Project's website.
15-Jul-2022	Email	x		Chief Ramona Sutherland (CLFN)	Chief Ramona Sutherland of Constance Lake First Nation (CLFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on July 14, 2022 answering Chief Sutherland's question regarding the Environmental Assessment. Chief Sutherland stated that being a proponent is not being an environmental assessor and asked again if any First Nations are involved with the Environmental Assessment. Chief Sutherland stated it would be irresponsible for Canada and Ontario to proceed without First Nation environmental assessors.
26-Jul-2022	Email	x		Chief Ramona Sutherland (CLFN)	Chief Sutherland responded to Michael thanking him for the information and noted that the First Nations are not party at same level as federal and provincial governments.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

Table 4-10 (Cont'd): Feedback Received and Responses Provided During Consultation Round 1 – Constance Lake First Nation

Communication Date	Method of Engagement	Incoming	Outgoing	Contact Name and Title	Summary
10-Aug-2022	Email		x	Michael Fox (WSR Project Team)	Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland in response to the Chief's email on July 15, 2022 inquiring whether any First Nations are involved with the Environmental Assessment/Impact Assessment (EA/IA). Michael stated that the Webequie Working Group is facilitating Indigenous Knowledge information from Webequie First Nation and other First Nations in a collaborative manner with the EA/IA Consultant Team to assess potential effects to each valued component, including measures to mitigate and/or avoid adverse effects, as well as follow-up monitoring programs to verify the accuracy of the effects assessment. Michael noted that for other First Nations that are willing to contribute Indigenous Knowledge, a validation process is proposed to provide communities with an opportunity to review the proponent's interpretation of the information provided, to add or revise draft results, and to provide informed consent for the use of the information in the EA/IA documentation. Michael invited CLFN to let the Project Team know if they need more information or would like to meet to discuss the WSR Project in further detail.
18-Aug-2022	Email	x		Chief Ramona Sutherland (CLFN)	Chief Ramona Sutherland of Constance Lake First Nation (CLFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team in response to the email Michael sent on August 17, 2022 regarding the August newsletter. Chief Sutherland re-stated CLFN's position that the First Nations should be leading the environmental assessment and inquired if this was the case.

Table 4-10 (Cont'd): Feedback Received and Responses Provided During Consultation Round 1 – Constance Lake First Nation

Communication Date	Method of Engagement	Incoming	Outgoing	Contact Name and Title	Summary
19-Aug-2022	Email		x	Michael Fox (WSR Project Team)	Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Constance Lake First Nation's (CLFN) Chief Ramona Sutherland in response to the Chief's email on August 18, 2022 inquiring whether any First Nations are involved with the Environmental Assessment/Impact Assessment (EA/IA). Michael stated that Webequie First Nation (WFN) is the sole proponent for the WSR EA/IA and that WFN through its Working Group and Consultant Team will be assessing potential effects of each valued component. Michael referred to his previous response from August 10, 2022, stating that the Webequie Working Group is facilitating Indigenous Knowledge information from WFN and other First Nations in a collaborative manner with the EA/IA Consultant Team to assess potential effects to each valued component, including measures to mitigate and/or avoid adverse effects, as well as follow-up monitoring programs to verify the accuracy of the effects assessment. Michael noted that for other First Nations that are willing to contribute Indigenous Knowledge, a validation process is proposed to provide communities with an opportunity to review the proponent's interpretation of the information provided, to add or revise draft results, and to provide informed consent for the use of the information in the EA/IA documentation. Michael requested to meet with CLFN to discuss the WSR Project in further detail.

5 Integration of Feedback into the EA/IA Process

As part of Consultation Round 1, the engagement and consultation activities listed in **Section 3** (including Chief and Council Meetings, virtual and in-person open houses, virtual topic-specific information sessions and radio call-in shows, on-reserve and off-reserve community meetings, and posting of content on the Project website) sought to generate comments and feedback from the 22 potentially affected Indigenous communities regarding various aspects of the WSR Project and EA/IA study process. The feedback that has been received to date will be integrated into the ongoing EA/IA process and studies in various ways.

Study area boundaries and indicators (which represent a resource, feature, or issue that, if changed, may represent an effect on the environment) for each valued component will be refined and validated based on input from Indigenous communities generated during Consultation and Engagement as well as through the IKLRU program. Furthermore, this feedback will inform the Project Team's understanding of potential effects on Aboriginal and Treaty Rights and Interests and will be woven into the assessments for valued components (such as socio-economic, vegetation, human health, aquatic environment, wildlife, and others), as applicable.

Consultation and engagement with Indigenous communities could also result in the alteration of technically and economically feasible alternative methods of carrying out the Project, such as the alignment options for the road or aggregate source areas identified during the ToR phase, before the proposed or final Project development area/footprint (i.e., the Undertaking) is confirmed and presented in the EAR/IS. Any comments provided by Indigenous communities that influence the evaluation of alternatives and selection of the preferred alternative or commitments to mitigation and monitoring/reporting will be addressed in relevant sections of the EAR/IS. Other comments relating to the Project will be addressed in the Consultation Section of the EAR/IS and in a summary table within the final Record of Consultation, summarizing the comments and the responses provided. Where resolution of issues has not been possible by the time of publication of the Draft EAR/IS, this will be noted, along with a record of all attempts to resolve the issue.

In order to receive input and inform in the decision-making process for the planning and development of the Project, Indigenous communities will have the opportunity to review the Draft and Final EAR/IS. Copies of the Draft EAR/IS and Final EAR/IS for Indigenous communities' review and comment will be made available, including at the Administration office of each Indigenous community, at Tribal Council and Nishnawbe Aski Nation offices, at participating municipal offices and libraries, and through the Project website.

© 2022 SNC-Lavalin Inc. All Rights Reserved. Confidential.

6 Conclusions/ Next Steps

As demonstrated within this Consultation Progress Report, during the EA/IA phase of the Project, the WSR Project Team is committed to ongoing efforts to engage and consult with potentially affected communities through various activities and initiatives. The WSR Project Team will respond to any questions or concerns raised by MECP or an Indigenous community in response to the Consultation Progress Report, including making any revisions to the progress report as considered applicable. This report will also be appended to the record of consultation submitted with the EAR/IS.

Next steps for the WSR Project consultation and engagement program will involve proceeding with various consultation and engagement activities as part of Consultation Round 2, which is tentatively scheduled to start in Winter 2022/2023 and continue through Summer 2023. Key milestones and topics to be included as part of the consultation program for this round include identification and evaluation of alternatives, preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection, and preliminary engineering design elements (bridges/culverts). Following Consultation Round 2, a second Consultation Progress Report will be produced in order to meet MECP's requirements as defined in the NoA of the ToR (Amendment 3 "Consultation Reporting at Key EA Milestones"). Finally, Consultation Round 3 will occur in Winter 2023/2024 and will focus on the outcomes of the preliminary effects assessment and the proposed impact management, mitigation, and follow-up monitoring program. This round will occur in tandem with the development and notice of the Draft and Final EAR/IS, which will include the final record of consultation (including the outcomes of consultation and engagement activities from all three rounds) and be circulated to all 22 potentially affected Indigenous communities for review and comment.

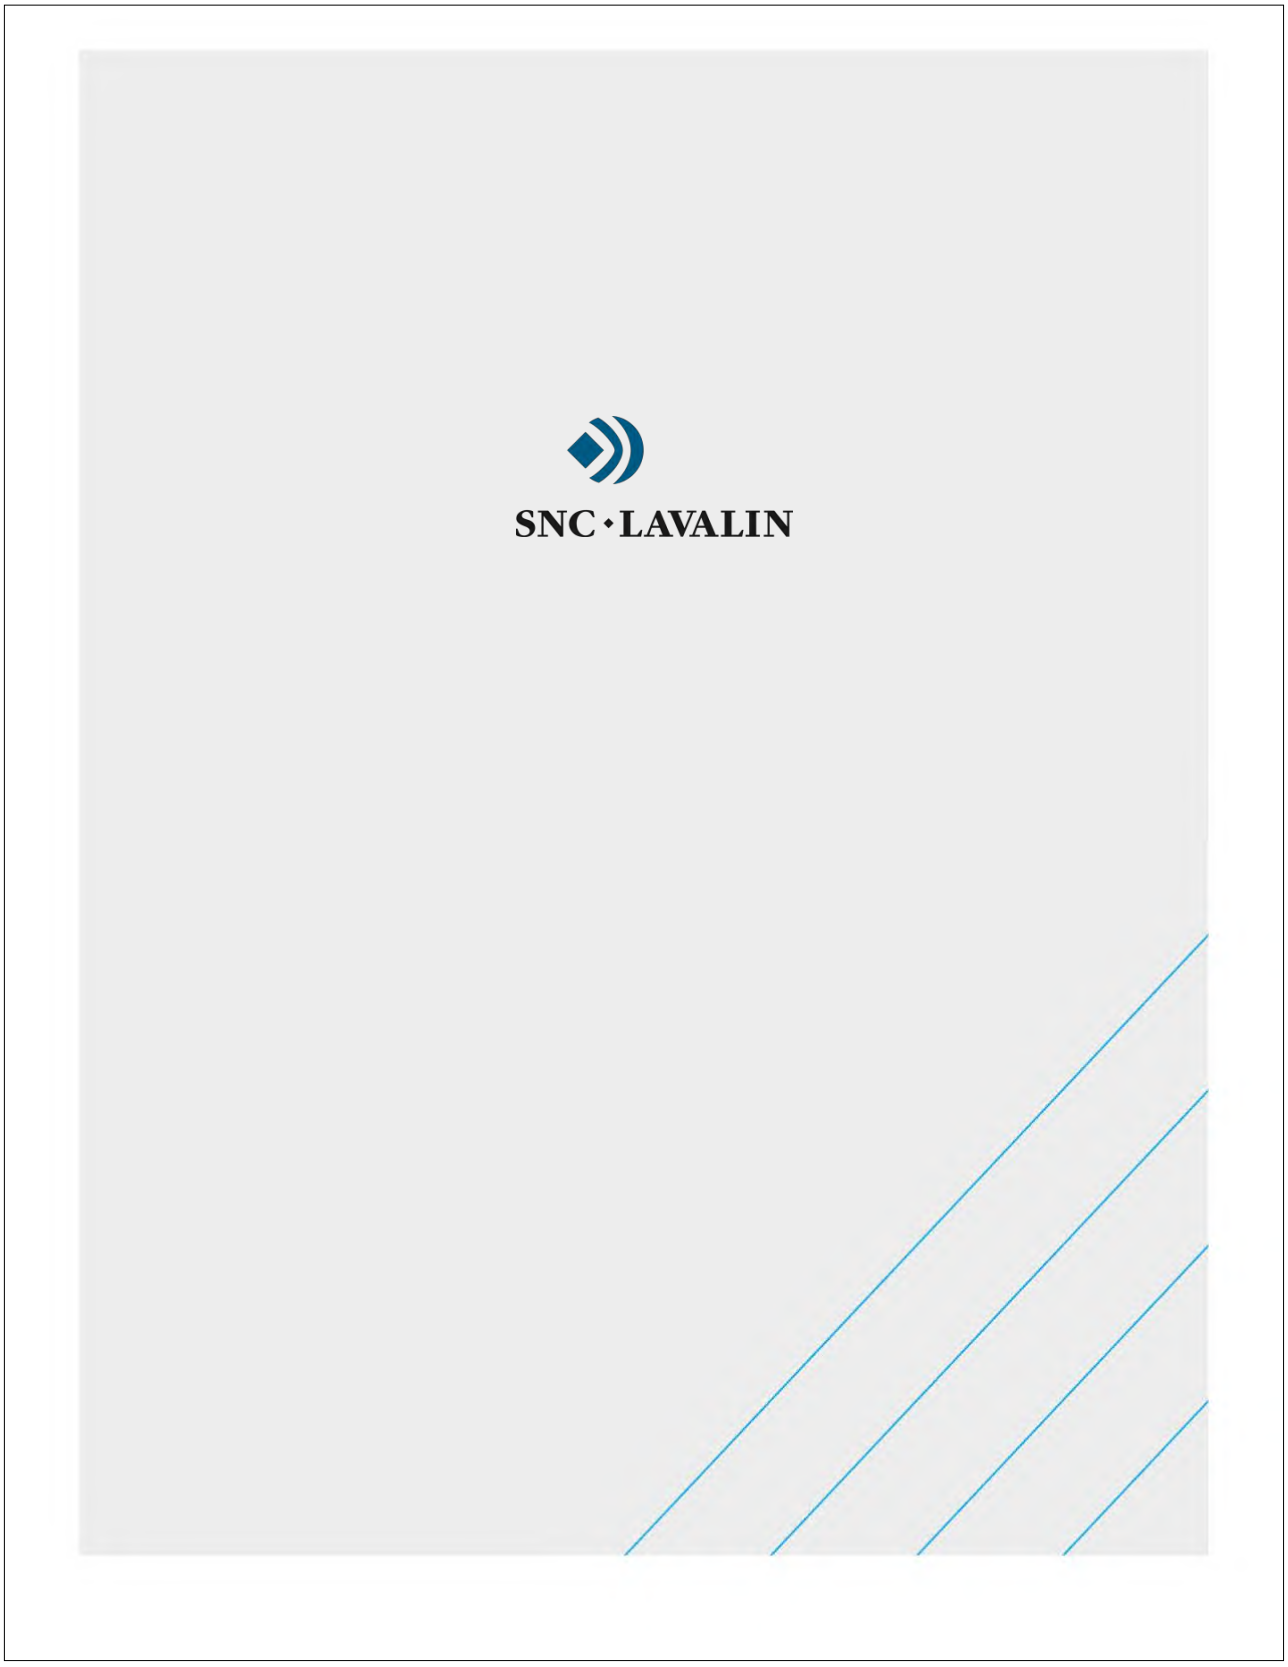
Appendix A

Praxis Record of Consultation Report



SNC·LAVALIN

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Via e-mail: webequie@iaac-aeic.gc.ca

Re: Time Limit Extension Request for the Federal Impact Assessment Process of the Webequie Supply Road Project

Dear Ms. Cafaro,

I am writing in response to the IAAC's letter dated October 25, 2022, regarding the Time Limit Extension Request for the Federal Impact Assessment (IA) Process of the Webequie Supply Road (WSR) Project. Constance Lake First Nation (CLFN) was asked to provide input on the extension request and the WSR's engagement plans.

CLFN is in support of WSR's request for a timeline extension (to January 2027) to complete their IA, and understands the challenges and limitations placed on the IA to-date due to the global pandemic. CLFN also continues to experience ongoing challenges surrounding participation in this IA, and requests at this time that the Proponent increase efforts to engage and consult with CLFN directly.

Regarding the summary of Indigenous Engagement to-date (highlighted in Section 5.1 of the document), CLFN is concerned with the information provided in Table 5-2. No one from CLFN's Leadership or technical team attended the June 20th session. The invitation letter, one of hundreds of emails sent daily to Leadership, was simply missed, however the table misleadingly implies that a proper consultation event occurred at this date. CLFN's technical team has engaged with the WSR team previously (including a session in November 2020) and has provided appropriate technical community contacts. All engagement efforts need to include CLFN's full technical team, reiterated below:

- Chief Ramona Sutherland, Constance Lake First Nation (chief@clfn.on.ca)
- Councillor Wayne Neegan, Community Communications Liaison Officer (wayne.neegan@clfn.on.ca)
- Bertha Sutherland, Lands & Resources Officer (bertha.sutherland@clfn.on.ca)
- Stephen Peltonen, Consultation Coordinator (stephen.peltonen@clfn.on.ca)
- Kimberly Jorgenson, Four Rivers, CLFN Technical Support (kjorgenson@fourrrivers.group)

CLFN would like to better understand the WSR team's plans for in-person engagement throughout the project, now that pandemic restrictions have eased. 22 Indigenous communities are listed as requiring engagement, however CLFN knows that a 'lesser level' of consultation effort is being applied to communities perceived to be further from the impacts of the project. CLFN would like to see efforts made to bring together all Indigenous communities engaged on this project for a collective discussion and knowledge sharing session.

Regarding the technical content of this document, it is far too complex for effective community-level conversations. Documents need to be made more approachable by being paired down or by providing summaries to clearly convey key messages. A thorough review of this document respective of CLFN's community communication processes was not possible.

Regarding the technical studies completed to-date, they appear to have been very limited in-scale, with the Regional Study Area (RSA) restricted to a buffer around the proposed road. The RSA would be more appropriately sized at the watershed scale, since all of the waters surrounding the project will be affected by the road's construction (impacting flows in the region, animal pathways, etc.). CLFN would also like to see the project take into consideration the full cumulative effects of impacts to the region as this road contributes to the opening of the Ring of Fire area for mineral development, forever changing the face of the north. The road cannot be discussed in isolation of the larger development looming on the horizon, since its very construction will increase the feasibility of mineral development in the area. It is not 'just a road' as the Proponent has insisted; indeed this proposal would not even exist in the absence of mineral development interests in the Ring of Fire.

CLFN welcomes continued engagement by the WSR team and the IAAC throughout this IA process.

Respectfully,

Councillor Wayne Neegan

November 30, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Cumulative Effects – An Explanation and Illustration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, December 6th, 2022 at 11:00am – 12:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

December 14, 2022

Chief Ramona Sutherland
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON
P0L 1B0

Dear Chief Sutherland:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status indicates that it has been successfully delivered to your community on November 3, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions

March 7, 2023

Dear Chief Sutherland

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, March 20th from 2:00pm-3:00pm EST** for Constance Lake First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/86762300311

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 867 6230 0311**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/constancelake/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks

Chief Ramona Sutherland
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON
P0L 1B0

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sutherland,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

2

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

May 30, 2023

Dear Chief Sutherland,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 5th between 2:00pm-3:00pm EST** for Constance Lake First Nation, where there will be a second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85242353771.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 852 4235 3771.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/constancelake/**.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 6, 2023

Dear Chief Sutherland,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to you on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022 and sent an email on January 20, 2022 to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating. On February 25, 2022, Kimberly Jorgenson sent an email to the WSR Project Team indicating that Constance Lake leadership had not discussed the community's participation in the IKLRU Program due to the ongoing state of emergency in the community due to COVID-19, but that the community would be in touch after reviewing the Program. The Project Team sent a follow up email on August 3, 2022. To date, we have not received a response regarding your interest in participating in the Program.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Constance Lake First Nation currently has an active funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project.

We want to learn more about your community from your perspective on a range of topics, including:

- Community history
- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests, and ensuring they are protected.

We have a timeframe for the EA/IA process, to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WEBEQUIE SUPPLY ROAD
COMMUNITY MEETING

Constance Lake First Nation
June 22nd,2023

OVERVIEW

The Webequie Supply Road Project Team held a meeting with Constance Lake First Nation (CLFN) at the CLFN community centre 20km outside of Hearst Ontario. The purpose of this meeting was to provide an overview on the Webequie Supply Road (WSR) Project and status. The community meeting was scheduled from 12pm-3pm and a luncheon was provided.

Don Parkinson (SNC Lavalin IE3) provided an overview presentation on the WSR as well as the latest project updates

Twenty one (21) community members attended the luncheon and presentation. They were given the opportunity to voice question and/or concerns.

FEEDBACK FROM COMMUNITY

After the presentation, Community Members provided comments and feedback.

General comments were made around community benefit and access to reserve lands.

Comments were made on negative impacts to the social side of community access.

The community understands that it may not be the immediate territory they are grateful for the opportunity to learn

NEXT STEPS

The Project Team advised that we would be willing to come back again to provide the next project update

June 28, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Construction Camps.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, July 5th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 12, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Road Foundation Design.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, July 18th, 2023 at 12:00pm – 1:00pm (EST). The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

Attachment 01

Comments and Feedback Received during Second Aboriginal and/or Treaty Rights and Interest Forum 2023: Constance Lake First Nation

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
1	Constance Lake First Nation asked if the Webequie Supply Road (WSR) project is currently looking for people to construct the road.	The proponent responded that Webequie Supply Road will be looking for people for construction if it moves forward.	The proponent welcomes any information that Constance Lake First Nation wishes to share, including suggestions for job creation opportunities through the ongoing consultation and engagement and Indigenous Knowledge programs.
2	Constance Lake First Nation asked how long the Webequie Supply Road is.	The proponent stated the road is 107 KM in its current proposal, but that it could change in length as it is still being defined.	The proponent will continue to share information regarding the Webequie Supply Road with the community as the design is finalized.
3	Constance Lake First Nation asked additional questions about the design of the Webequie Supply Road including: if it would be a gravel road, how many areas have been identified to go over muskeg and how wide the current design is. Constance Lake First Nation noted that for the Eagles Nest Mine Site, the Environmental Assessment showed that there were at least 500 different organisms within the muskeg.	The proponent outlined that the current design includes 21 culverts and 5 bridges to cross streams and muskeg. The road will be gravel, and the design criteria will comply with Provincial standards and guidelines	The proponent will continue to share information regarding the Webequie Supply Road with the community as the design is finalized.
4	Constance Lake First Nation indicated that Elders are interested in meeting with other Elders outside of their community to connect and discuss this project.	The comment was acknowledged. The proponent responded that these discussions are important to have as there are close kinship ties between First Nation communities.	Thank you for sharing this information.

1

WSR
WEBEQUIE
SUPPLY ROAD

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
5	Constance Lake First Nation noted that there were discussions with Fort Albany First Nation and Marten Falls First Nation along the river, before the pandemic. There is currently a plan to reunite to discuss values and relationships with each other. Constance Lake First Nation indicated that a typical meeting spot is the English River Reserve Land located within Constance Lake First Nation. This is known as Mamawmatawa. This was once an established HBC trading post. There are many connections with Marten Falls First Nation, Fort Albany First Nation and Kashechewan. English River Reserve has 4-5 permanent structures.	The proponent outlined we have identified English River Reserve Land as an area of significance.	Thank you for sharing this information. The proponent will ensure that the mapping is updated and will use the traditional location name of Mamawmatawa going forward.
6	Constance Lake First Nation noted that historically and politically, they were an Oji Cree community. The reserve was created with people travelling to areas around the historical HBC trading post. There was a hill that overlooked the water and is at the mouth of the river Mamawmatawa.	The proponent said they are open to learning more about Mamawmatawa	Thank you for sharing this information.
7	Constance Lake First Nation indicated that they would be considered the host community of Mamawmatawa. Constance Lake First Nation noted that there is a place called the "landing,' - 27 km north of the community and it connects to the Kabinakagami River. This is a natural water route that is still being utilized and there used to be tourism and outfitters in the area, but not recently. Hunters and fishers used to come to the area, but this is not as common	Proponent stated they were open to learning more about potential impacts and monitoring programs.	Thank you for sharing this information. The proponent recognizes the value and potential impacts to important places and water routes. The Environmental Assessment/ Impact Assessment (EA/IA) will identify ways to avoid and/or minimize these impacts.

2

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	anymore. Constance Lake First Nation noted that they would like to have monitoring along the river.		
8	Constance Lake First Nation indicated that it is important to them that the water is fresh and continues to flow, with Sturgeon in the waters. Constance Lake First Nation noted that every spring there is a harvest with the community, which also includes maintaining burial sites in the area. During this time, there is also data collection for water in the river. Constance Lake First Nation members also check fish for parasites and send the fish to labs to see what food is being eaten by the fish. Constance Lake First Nation indicated that there is a small bird hunt in the spring.	The comment was acknowledged.	Thank you for sharing this information.
9	Constance Lake First Nation noted that when Constance Lake First Nation was created, people came together from other settlements (e. Kabinakagami River, Hornepayne) and areas. Within Constance Lake First Nation there are different family trees within the reserve but with the same last name.	The comment was acknowledged.	Thank you for sharing this information. The proponent welcomes any information that Constance Lake First Nation wishes to share regarding Constance Lake First Nation's history and lineage.
10	Constance Lake First Nation agreed that there is a connection with Marten Falls First Nation as the river connects them.	The comment was acknowledged.	Thank you for sharing this information.
11	Constance Lake First Nation indicated that local businesses include a logging company - Lecours Lumber, gas bar and grocery store. Constance Lake First Nation has previously	The comment was acknowledged.	Thank you for sharing this information.

3

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	had the opportunity to partner with a drilling and construction company as they have partnered with construction companies in the past. Constance Lake First Nation has a local economic development corporation, but it is not active. The previous economic development officer passed away.		
12	The Proponent asked if there have been conversations with Greenstone Gold Mine	Constance Lake First Nation noted that they are not a signatory to the Greenstone Gold Mine Project Agreement.	Thank you for sharing this information.
13	Constance Lake First Nation noted that they have recently bought 10 tiny homes. There are training opportunities for people in construction. Constance Lake First Nation noted that they would like to train people in construction, but there is low capacity in the community. When members go off reserve and find employment, they usually stay off reserve.	The comment was acknowledged.	Thank you for sharing this information.
14	Constance Lake First Nation indicated that quarries in the area should be owned by First Nations. Previous discussions were had with Marten Falls First Nation about owning the quarries and being the construction crew.	The comment was acknowledged.	The proponent welcomes any information that Constance Lake First Nation wishes to share, including suggestions for economic participation in the project and job creation opportunities through ongoing consultation and engagement.
15	Constance Lake First Nation noted that the blastomycosis crisis shut down the community.	The comment was acknowledged.	Thank you for sharing this information.
16	Constance Lake First Nation noted that broadband is another big issue, and if a fibreline or transmission line were included	The comment was acknowledged.	Thank you for sharing this information.

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	along the Northern Road Link right-of-way, this would be a big economic opportunity.		
17	Constance Lake First Nation asked if a draft document with information about Constance Lake First Nation can be provided	The proponent stated that some socio-economic baseline work has been shared with Constance Lake First Nation for the EA/IA. Input from the community would help the proponent provide a more accurate description of the community. The proponent will be sharing a draft EAR/IS in 2024.	Thank you for sharing this information. The proponent will follow up with the EAR/IS for Constance Lake First Nation.
18	Constance Lake First Nation indicated that a draft Community Based Land Use Plan is almost complete. The mapping has been done internally as well as with the Ministry of Natural Resources and Forestry (MNRF) team. Constance Lake First Nation outlined that Elders do not want to share direct information. Areas of "no go" should be shown on the publicly available mining and land system.	The comment was acknowledged.	Thank you for sharing this information. The proponent looks forward to receiving any information from Constance Lake First Nation as it becomes available. Information that is publicly available will be included in the EA/IA. Documents and reports that are provided by Constance Lake First Nation would be very helpful to the proponent in assessing potential impacts and measures to mitigate those impacts.
19	The mining and land system should show an "alienation" layer where it shows the areas where people cannot prospect for minerals.	The comment was acknowledged.	Thank you for sharing this information. The proponent will review this layer on MLS and include this in the mapping as required.

January 25, 2024

Chief Rick Allen
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON P0L 1B0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Allen:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.
