Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris, which included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether KIFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked KIFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if KIFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited KIFN to participate in the WSR socio-economic primary data collection program. The letter asked KIFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if KIFN has any questions.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team called the Kitchenuhmaykoosib Inninuwug First Nation (KIFN) band office and spoke with Chief Donald Morris as a follow up on the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program letter that was sent on December 13, 2021, inviting KIFN to participate in the program. Brianna noted that the IKLRU Program has started and would like to know if KIFN is interested in participating in the program by January 27, 2022. Brianna reminded KIFN of the purpose of the IKLRU Program, and stated that if the community needs more time to discuss it with their Council or Team or would like to meet with the Project Team for a detailed overview of the program, then to please let the team know. Chief Donald Morris indicated that KIFN is not interested in participating in the program and that their only concern, as previously indicated, is regarding the caribou migratory route.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Kitchenuhmaykoosib Inninuwug First Nation (KIFN) on July 4, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Don noted that no issues or questions had been raised by KIFN regarding the WSR Project to date. Don encouraged KIFN members to connect with the Project Team via the Project website or social media to communicate feedback and/or ask questions about the Project. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community representatives in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: Engagement Options
Brianna Patrick and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris with a letter requesting a meeting with the community to discuss the WSR Environmental Assessment/Impact Assessment (EA/IA) process, provide project updates, and seek input and feedback to help inform the EA/IA. The letter provided various community engagement options and noted that the WSR Project Team will continue offering both virtual and in-person methods of engagement. The letter also noted that the Project Team is concluding Consultation Round 1, provided the topics of Consultation Round 2, and links to access additional information on the Project. Michael's email and cell phone contact information was provided if KIFN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 1 Follow Up and Newsletter #18
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team, sent a fax to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris which included a letter and English WSR Newsletter - Issue 18. The letter included a follow-up to the community regarding the package sent by the WSR team on October 28, 2022, containing the Consultation Progress Report for Round 1. The letter also provided an overview of the report with key milestones and topics that were covered in Round 1 of consultation as well as various community engagement options to help create awareness of the Project in the community.

The fax also included the English WSR Newsletter - Issue 18 which provided information about Consultation Round 2 topics as well as fish and fish habitat baseline study findings. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if KIFN has any questions or comments.

Topics to be Discussed: ATRI Forum Invitation Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Donald Morris of Kitchenuhmaykoosib Inninuwug First Nation (KIFN) to follow up on the invitation for the Aboriginal and Treaty Rights and Interests (ATRI) Forum hosted by the Province of Ontario in Thunder Bay on February 8 & 9, 2023. The email explained that it is not too late to RSVP for the event. Attached to the email was the poster which explained that the 2-day forum will focus on discussing potential impacts to Northern Indigenous Communities ATRI as they relate to the WSR, Northern Road Link (NRL), and Marten Falls First Nation Community Access Road (MFCAR) Projects. The poster provided more information on how community representatives can attend, the purpose of the forum, who should attend from each community, and an email address for the community to RSVP. A preliminary agenda was also included on the poster. The Province of Ontario, Michael Fox of WSR, Andrea Nokleby of MFCAR, and Mishal Naseer of NRL provided their emails on the poster for further information if KIFN has any questions or comments.

12:31
Josephine Childforever of KIFN responded to the email indicating that Deputy Chief Stanley Bluecoat of KIFN accepts the invitation to the meeting.

Topics to be Discussed: WSR Newsletter 17 and 18
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris which included 50 copies of the English WSR Newsletter – Issue 17 and 50 copies of the English WSR Newsletter - Issue 18. Newsletter 17 provided information about the Surface Water baseline study findings and Cumulative Effects. Newsletter 18 provided information about Consultation Round 2 topics as well as fish and fish habitat baseline study findings. Both of the newsletters provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their e-mail address and phone number if KIFN has any questions or comments.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Kitchenuhmaykoosib Inninuwug First Nation (KIFN)'s Chief Donald Morris which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 14, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of the Alternatives Assessment Process, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team will begin Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KIFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kitchenuhmaykoosib Inninuwug First Nation (KIFN)'s Chief Donald Morris, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of KIFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Kitchenuhmaykoosib Inninuwug First Nation (KIFN) on April 11, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, the Project Team played a voiceover presentation which included a testimony by the Webequie First Nation's Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don discussed several concerns that had been previously raised by KIFN. Don mentioned that the concerns are regarding Indigenous Knowledge inclusion and impacts on caribou. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Kitchenuhmaykoosib Inninuwug First Nation (KIFN)’s Chief Donald Morris as a follow up to the email sent on March 17, 2023 regarding the invitation to participate in the Socio-Economic Primary Data Collection Program as part of the Environmental Assessment / Impact Assessment. Heather asked the Chief if they had any questions regarding the original email and letter and indicated that the WSR Project team would like to hear back by April 17, 2023 as to KIFN’s interest in participating in the program. The letter detailed the purpose of the socio-economic study, the type of information that the WSR Project team is seeking, the study area, how information will be collected, schedule, and next steps. Heather requested the Chief to let the WSR Project team know if they prefer a call to discuss the request in the letter.

The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KIFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Donald Morris of Kitchenuhmaykoosib Inninuwug First Nation (KIFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding KIFN's participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted the phone conversation with Chief Morris on January 17, 2022 where KIFN expressed that they are not interested in participating in the IKLRU Program and that the community's only concern is regarding the caribou migratory route. The letter provided an overview of the IKLRU Program as part of the Environmental Assessment / Impact Assessment and indicated that the community is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. The Project team encouraged the community to contact Ontario to determine how to proceed with submission of an application to receive funding for the community and offered support throughout the process. The letter indicated that the Project team would like to confirm whether the community has an interest in participating in the IKLRU Program and noted that the Project team is available to discuss how KIFN can participate with capacity funding provided to lead a study that will help to document how the community's Aboriginal and Treaty rights could be impacted by the WSR Project. The letter requested an indication of the community's interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

The email also included a letter and poster advising that the WSR Project Team is hosting a virtual information session for KIFN on June 26, 2023, between 2:00-3:00pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KIFN has any questions or comments.

The email bounced back indicating that the domain could not found.

The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KIFN has any questions or comments. Fax transmittal error: fax failed.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team mailed a package via Canada Post to Chief Donald Morris of Kitchenuhmaykoosib Inninuwug First Nation (KIFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding KIFN's participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted the phone conversation with Chief Morris on January 17, 2022 where KIFN expressed that they are not interested in participating in the IKLRU Program and that the community's only concern is regarding the caribou migratory route. The letter provided an overview of the IKLRU Program as part of the Environmental Assessment / Impact Assessment and indicated that the community is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. The Project team encouraged the community to contact Ontario to determine how to proceed with submission of an application to receive funding for the community and offered support throughout the process. The letter indicated that the Project team would like to confirm whether the community has an interest in participating in the IKLRU Program and noted that the Project team is available to discuss how KIFN can participate with capacity funding provided to lead a study that will help to document how the community's Aboriginal and Treaty rights could be impacted by the WSR Project. The letter requested an indication of the community's interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

The package also included a letter and poster advising that the WSR Project Team is hosting a virtual information session for KIFN on June 26, 2023, between 2:00-3:00pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KIFN has any questions or comments.

Topics to be Discussed: ATRI Forum Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Donald Morris of Kitchenuhmaykoosib Inninuwug First Nation (KIFN) as a reminder to confirm if the community will be attending the Aboriginal and Treaty Rights and Interests (ATRI) Forum. The email reminded the community that the Province of Ontario is funding to cover travel expenses for up to 3 participants from the community and provided the email address to contact. The original invitation was also attached to the email which indicated that the ATRI Forum is being hosted by the Province of Ontario in Thunder Bay on November 21-23, 2023. The poster explained that Webequie First Nation and Marten Falls First Nation encourage the community to participate in the follow-up Forum to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link (NRL), and Marten Falls Community Access Road (MFCAR) Projects. The poster provided more information on how community representatives can attend, the purpose of the forum, who should attend from each community, and an email address for the community to RSVP. The Province of Ontario, Michael Fox of WSR, Andrea Nokleby of MFCAR, and Mishal Neesar of NRL provided their emails for further information if KIFN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if KIFN has any questions or comments.

Topics to be Discussed: Consultation Round 2 Report Follow Up
McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team phoned the Kitchenuhmaykoosib Inninuwug First Nation (KIFN) band office to follow up with Chief Donald Morris regarding the Consultation Progress Report for Round 2. There was no answer and McKenna tried to leave a voice message but the voicemail message box was full.

Contact Date: Mar 11, 2024 11:06 Method: E-mail
Topics to be Discussed: Draft Community-Specific Preliminary Existing Conditions Document
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris with a letter and report attached regarding the Community-Specific Existing Conditions Summary Document. The letter requested the community's review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for KIFN. The letter provided a list of the community-specific baseline information provided in the document and indicated that the Project Team would appreciate hearing feedback from the community on the document as the team is always open to working with the community for further improvement on the content.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Donald Morris of Kitchenuhmaykoosib Inninuwug First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a package via Canada Post to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for KIFN on June 10, 2024, from 12:00-12:45pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment (EA/IA) activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KIFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Kitchenuhmaykoosib Inninuwug First Nation (KIFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 1 presentation that began with a review of the project to date, followed by a discussion of preliminary results for two valued components: surface water and fish and fish habitat. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from KIFN were in attendance.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for KIFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kitchenuhmaykoosib Inninuwug First Nation’s (KIFN) Chief Donald Morris which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if KIFN has any questions or comments.

Topics to be Discussed: Assessment of Effects on Surface Water Resources
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent email to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris with a letter and poster attached. The letter advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on November 18, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on the Assessment of Effects on Surface Water Resources, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KIFN has any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3 Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) sent an email to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris with a letter attached regarding follow up for the Consultation Progress Report for Round 3. The letter indicated that on November 5, 2024, the Project team mailed a package via Canada Post to the community containing the Consultation Progress Report for Round 3, and as of today, December 16, 2024, the package status indicates it was delivered to the community on December 3, 2024. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. A list of key milestones and topics covered in the round of consultation was provided. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. Michael's email and cell phone contact information was provided if KIFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 4 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Kitchenuhmaykoosib Inninuwug First Nation (KIFN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from KIFN were in attendance.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Donald Morris of Kitchenuhmaykoosib Inninuwug First Nation with links to?invitations for the Three Road Project Gathering & Expo hosted by ?Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Contact Date: Jun 09, 2025 09:00 Method: E-mail
Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Donald Morris of Kitchenuhmaykoosib Inninuwug First Nation (KIFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

Topics to be Discussed: Coordination of Hand Delivery of Draft EAR/IS
McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team phoned the band office of Kitchenuhmaykoosib Inninuwug First Nation (KIFN) to try and coordinate a ride for the Project team from the airport to hand deliver the hard copy of the Draft Environmental Assessment/Impact Statement (EAR/IS). There was no answer and no option to leave a voicemail.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator

Web-Preliminary Study Areas for Indigenous Land Use and Interests-2021-12-13

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Kitchenuhmaykoosib Inninuwug First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Kitchenuhmaykoosib Inninuwug First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Kitchenuhmaykoosib Inninuwug First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Kitchenuhmaykoosib Inninuwug First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Kitchenuhmaykoosib Inninuwug First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Kitchenuhmaykoosib Inninuwug First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Kitchenuhmaykoosib Inninuwug First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Donald Morris,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Kitchenuhmaykoosib Inninuwug First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Kitchenuhmaykoosib Inninuwug First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Kitchenuhmaykoosib Inninuwug First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Donald Morris,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Kitchenuhmaykoosib Inninuwug First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

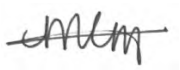
Next Steps

In order to confirm that Kitchenuhmaykoosib Inninuwug First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

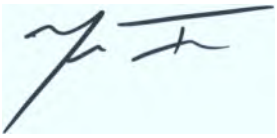
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

WEBEQUIE SUPPLY ROAD (WSR) PROJECT

Socio-Economic Study Plan
Fact Sheet

What is the primary purpose of the Socio-Economic Study Plan?

To characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) as a result of the construction and operation/maintenance of the WSR. Provide recommendations for minimizing negative socio-economic effects and enhancing beneficial effects of the Project.

What are socio-economics?

Studying socio-economics provides information about current jobs, income, education and housing conditions in a community.

What kind of information is going to be gathered?

- Community values;
- Community demographics (age, gender, marital status, education, labor force activity, health, etc.);
- The type of access each community has to education, jobs, or transportation; and
- Well being and safety.

Who is the information being gathered from?

- The 22 Indigenous communities that have been identified as the ones whose established or asserted Aboriginal and Treaty rights may be adversely affected by the Project and/or may have interests in the project.

WSR240-WEB-PR-FS-0016 Web-Socio Economic Fact Sheet-English-website-2022-04-26

*The Project Team will respect protocols and work with each community to understand how the information will be transferred, stored, and applied, and will be protected and kept confidential.

How is the information on community socio-economics being collected?

Primary information will be collected from Indigenous communities:

- A socio-economic survey using Survey Monkey, which will be sent by e-mail/letter;
- Key informant interviews with Chief and Councils, band administration staff, social service providers, healthcare providers, and knowledge keepers; and
- Collection of Indigenous knowledge through engagement activities.

Secondary information will be collected and reviewed:

- Published data from government websites, Indigenous community websites, municipal websites, and other open-source data. This information will be used to identify community demographics, community infrastructure, community social services, etc.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Donald Morris,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Kitchenuhmaykoosib Inninuwug First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

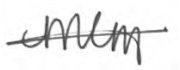
Next Steps

In order to confirm that Kitchenuhmaykoosib Inninuwug First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

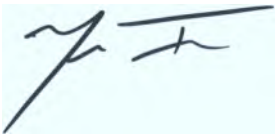
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

May 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on wildlife and species at risk. This upcoming week's session is: **WSR Presents: Wildlife and Species at Risk.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 18th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

June 22, 2022

Dear Chief Morris,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 4 between 12pm and 1:30pm** for Kitchenuhmaykoosib Inninuwug First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZMvcO-hpzkrGdK1-V3QV8QPvLy8giNOP_Zr.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 872 7699 2136 & Passcode: 207203.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/kitchenuhmaykoosib/.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead

June 24, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on cultural heritage This upcoming week's session is: **WSR Presents: Cultural Heritage.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 29th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

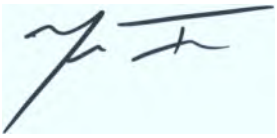
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

October 21, 2022

Chief Donald Morris
Kitchenuhmaykoosib Inninuwug First Nation
P.O. Box 329
Big Trout Lake, ON
P0V 1G0

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

1

WSR240-WEB-PR-LT-0405 Web-WSR Letter to KIFN re Consultation Round 1-2022-10-21

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

2

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

December 14, 2022

Chief Donald Morris
Kitchenuhmaykoosib Inninuwug First Nation
P.O. Box 329
Big Trout Lake, ON
P0V 1G0

Dear Chief Morris:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status indicates that it has been successfully delivered to your community on November 2, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

3

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 17, 2023

Chief Donald Morris
Kitchenuhmaykoosib Inninuwug First Nation
P.O. Box 329
Big Trout Lake, ON
P0V 1G0

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 28, 2023

Dear Chief Morris,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Tuesday, April 11th from 2:00pm-3:00pm EST** for Kitchenuhmaykoosib Inninuwug First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/89562013747

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 895 6201 3747**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/kitchenuhmaykoosib/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 6, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternative Road Corridors.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, April 12th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to serene.spence@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description

May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 13, 2023

Dear Chief Morris,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to you on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. Based on our phone conversation with you on January 17, 2022, we understand that KIFN is not interested in participating in the program and that KIFN's only concern, as previously indicated, is regarding the caribou migratory route.

As you know from our previous correspondence, Webequie First Nation is the proponent of the WSR Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Kitchenuhmaykoosib Inninuwug First Nation is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. We encourage you to contact Ontario to determine how to proceed with submission of an application to receive funding for your community. Please let us know if there is any way we can offer our support throughout this process.

Today, we are writing to confirm whether your community has an interest in participating in the IKLRU Program. Our Project Team is available to discuss how your community can participate with capacity funding provided to lead a study that will help to document how your Aboriginal & Treaty rights could be impacted by the WSR Project.

WSR
WEBEQUIE
SUPPLY ROAD

We want to learn more about your community from your perspective on a range of topics, including:

- Community history
- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests, and ensuring they are protected.

We have a timeframe for the EA/IA process, to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you, to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 13, 2023

Dear Chief Morris,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 26th between 2:00pm-3:00pm EST** for Kitchenuhmaykoosib Inninuwug First Nation, where there will be the second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/86343453200.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 863 4345 3200.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/kitchenuhmaykoosib/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 28, 2023

July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

August 9, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

WSR
WEBEQUIE
SUPPLY ROAD

January 25, 2024

Chief Donald Morris
Kitchenuhmaykoosib Inninuwug First Nation
P.O. Box 329
Big Trout Lake, ON P0V 1G0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

February 15, 2024

Chief Donald Morris
Kitchenuhmaykoosib Inninuwug First Nation
P.O. Box 329
Big Trout Lake, ON
P0V 1G0

Dear Chief Morris,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates it has been delivered to your community as of January 31, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet

with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions

Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Morris,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 22, 2024, the package status indicates it was delivered to your community on January 31, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Bridges and Water Crossings.**

The livestreaming event is scheduled for **February 26th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

Information on existing conditions is used to provide a baseline understanding of the valued components of the community. Potential effects of the Project on valued components will be assessed by comparing baseline conditions to those expected to result from the construction and operation and maintenance of the Project. The information provided in this document is preliminary at this time, and it has been prepared with information that is known specifically for Kitchenuhmaykoosib Inninuwug First Nation. This is a living draft document that has yet to be reviewed and validated by the Community.

Webequie First Nation is the proponent of the Project. The Project Team led by Webequie First Nation is striving to gather as much Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree) and Métis Indigenous Knowledge as it relates to the Project and to help inform the socio-economic baseline. This document will be continuously updated when information from the Kitchenuhmaykoosib Inninuwug First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources and capacities of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trust.

Webequie is an Anishinaabemowin Tawin (community) located in Treaty No. 9 territory, located about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (the good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, and that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation like many Indigenous Nations and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' socio-economic data because Webequie First Nation, the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2. Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands. (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern tip of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established the constitutional basis for future treaty negotiations and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	The *Indian Act*: Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claim staking procedures and prospectors' licenses providing exclusive rights to stake and work upon Crown lands.
Ontario Registered Trapline System, 1946	The Registered Trapline System imposed exclusive ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP was mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada (TRC), 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR Socio-Economic Baseline are Anishiniimowin, Anishinaabe and Mushkeego First Nations, and Métis Peoples. First Nation traditional territories cover the lands in the study areas. A number of First Nations in the RSA are predominantly located north of the provincial highway system, and accessible only by air and by winter road. Other First Nations, and the Métis community, located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850.

Kitchenuhmaykoosib Inninuwug First Nation is located 605 km north of the City of Thunder Bay and 190 km northwest of Webequie First Nation in northern Ontario. The community is situated on an island close to the eastern shores of Big Trout Lake and is accessible via air, water and winter road.

The community is formally affiliated with the Independent First Nations Alliance regional territorial organization (Independent First Nations Alliance, 2023), and the Nishnawbe Aski Nation provincial territorial organization.

Kitchenuhmaykoosib Inninuwug First Nation has a Chief, Deputy Chief and six Councillors, with a custom electoral system, and is expecting the next election on June 23, 2024 (CIRNAC, 2023o).

Kitchenuhmaykoosib Inninuwug First Nation is situated within the census District of Kenora.

2.2 Community History

Kitchenuhmaykoosib Inninuwug First Nation, also known as Big Trout Lake, is located on Big Trout Lake at the head water of the Fawn River near its confluence with the Severn River, adjacent to the Fawn River Provincial Park, which provides a major canoe route (Hudec, 1964). The Northwest Company, in 1793, established a trading post at the east end of Big Trout Lake, and in 1830 HBC built a post at Post Island (Hudec, 1964). Radiocarbon dating of human bones discovered near Big Trout Lake indicate that people settled in Big Trout Lake territory over 5,000 years ago (Kitchenuhmaykoosib Inninuwug First Nation, 2023).

Historically, Kitchenuhmaykoosib Inninuwug First Nation was an important location during the late fur trade period, as the area served as a centre for communication and supplies, and later became the principal community and later the reserve, with government administration services, medical services, and schools (Kayahna Tribal Area Council, 1985). Trapping territories historically were wide-ranging, in part due to Kitchenuhmaykoosib Inninuwug First Nation building connections with groups from distant homelands (Kayahna Tribal Area Council, 1985). Members of the Kitchenuhmaykoosib Inninuwug First Nation have historically used several summer and winter roads to connect with other communities and access land resources.

2.3 Community Values and Aspirations

Kitchenuhmaykoosib Inninuwug is one of 10 northern First Nations who have launched a lawsuit against the Ontario and federal government in April 2023 (McIntosh, 2023). They have requested that the Canadian government be barred from making any decisions about how land could be used without Indigenous consent. The lawsuit centres on Treaty No. 9 and the contrast between the verbal and written promises of Treaty No. 9 as recorded (McIntosh, 2023). The Nations are arguing that they did not cede or surrender their territories and that Treaty No. 9 did not give the Ontario government the right to allow resource extraction (McIntosh, 2023). Kitchenuhmaykoosib Inninuwug is also part of an alliance with Grassy Narrows, Wapekeka and Neskantaga to defend their lands and waters against mining prospectors (Alhmidi, 2023).

DRAFT

Kitchenuhmaykoosib Inninuwug has a proud history of outspoken protection of its homeland and opposition to mineral exploration in its territory. In 2008, six members of Kitchenuhmaykoosib Inninuwug First Nation were jailed as they resisted a mining company's (Platinex) efforts to explore on Kitchenuhmaykoosib Inninuwug traditional lands without adequate prior consultation. In 2009, Ontario paid Platinex $5 million in settlement of a lawsuit against Ontario and the Kitchenuhmaykoosib Inninuwug First Nation over the company's Big Trout Lake Property (Energy, Northern Development and Mines, 2009). Platinex later surrendered their mining claims and leases at Big Trout Lake and did not proceed further with mineral exploration in that area (Energy, Northern Development and Mines, 2009).

In 2011, Kitchenuhmaykoosib Inninuwug held a community referendum that resulted in 96% of community members voting in support of the Kitchenuhmaykoosib Inninuwug Water Declaration (Intercontinental Cry Magazine, 2011), that declared "all waters that flow into and out of Big Trout Lake, and all lands whose waters flow into those lakes, rivers, and wetlands, to be completed protected through our continued care under Kitchenuhmaykoosib Inninuwug's authority, laws and protocols" (CBC News, 2014).

In 2018 the Thawikayhigan Limited Partnership (known as the TKG Group) was established. The Group is owned equally by Kingfisher Lake, Kasabonika Lake, Kitchenuhmaykoosib Inninuwug, Wapekeka, Wawakapewin and Wunnumin Lake First Nations. Based in Thunder Bay, the Group works to generate new economic opportunities for its communities. "This is our first business acquisition that will directly service our First Nations," said Jonathon Mamakwa, President of the TKG Group. "This is key in our overall plan in contributing to the development of healthy First Nation communities with vibrant economies that support future generations" (Dryden Now, 2023).

Wataynikaneyap Power plans to complete the high capacity transmission line to Kitchenuhmaykoosib Inninuwug by December 2023, energizing the community and ending sole reliance on diesel generation for power, which has placed constraints on the community's infrastructure. According to Margaret Kenequanash, CEO of Wataynikaneyap Power, there have been capacity issues with the community's existing diesel generation system, where the limited electricity capacity has meant disconnecting old homes in order to connect new homes to power, which isn't solving housing capacity issues (TBnewswatch, 2022).

The Wataynikaneyap Power Transmission Project marks a transition to the future as the community prepares to join the provincial power grid. Ms. Kenequanash said the project represents a vision of reliability, with 24 First Nations joined together as stakeholders to bring an equitable future for generations to come.

SOCIAL ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools used to assess socio-economic conditions in communities, as these data can also be used to identify vulnerable groups such as women, disabled persons, Elders and youth. These are segments of the population that could either benefit or be negatively impacted (directly or indirectly) by the Project, and often experience barriers to participation as under-represented groups. Population and demographics are described in this section using the following indicators using Census data:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into existing socio-economic conditions where the Project is being considered. The information is to be used in the assessment of potential effects of the Project and to develop strategies to mitigate any negative effects.

3.1.1 Population Overview

The Kenora District has a substantial population projected to have slight growth over the projection period increasing from 66,000 in 2021 to 68,095 by 2043. Nearly half of the Kenora District population identifies as either First Nation, Métis, or Inuk. English is spoken in nearly all homes and there is a small percentage of in-migration to the District.

Table 3-1 presents the forecasted population in the Kenora District for the period 2021 to 2043, broken down by self-identified gender. Population trends by self-identified gender in Kenora District are summarized as follows:

- Over the projection period there is a slight decline in the female population and accompanying increase in the male population.
- Between 2016 and 2043 the male population is forecast to increase from 32,895 to 35,716, an 8.6% increase.
- Between 2016 and 2043 the female population is forecast to decrease from 32,640 to 32,425, a 0.7% decrease.
- Between 2016 and 2043, the distribution of the male population is forecast to increase from 50.2% to 52.5% and the female population is forecast to decrease from 49.8% to 47.6%.

Table 3-1: Kenora District – Population Forecast by Self-Identified Gender (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	32,895	50.2%	32,640	49.8%
2021	66,000	100%	33,400	50.6%	32,600	49.4%
2028	66,657	100%	34,120	51.2%	32,544	48.8%
2033	67,130	100%	34,644	51.6%	32,504	48.4%
2043	68,086	100%	35,716	52.5%	32,425	47.6%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-2 presents the forecasted population for the Kenora District over the projection period by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in the Kenora District are summarized as follows:

- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 14,440 to 12,527, a 13.2% decrease;
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 41,820 to 38,152, an 8.8% decrease; and
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 9,275 to 21,313, a 129.8% increase.

Table 3-2: Kenora District – Population Forecast by Age Group (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	14,440	22%	41,820	64%	9,275	14%
2021	66,000	100%	14,065	21%	41,115	62%	10,820	16%
2028	67,129	100%	13,556	20%	40,148	60%	13,425	20%
2033	68,336	100%	13,204	19%	39,471	58%	15,661	23%
2043	71,992	100%	12,527	17%	38,152	53%	21,313	30%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 3-3 presents the population of the Kenora District by Indigenous identity for 2021. Indigenous identity of the Kenora District population is summarized as follows:

- 50.6% of the population identifies as non-Indigenous.
- The majority of the population that identifies as Indigenous identifies as First Nations at 43.1% of the population, followed by Métis (6.3%). No respondents identified as Inuit.

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Kenora District (2021)

Indigenous Identity	Count	Distribution
First Nations	27,815	43.1%
Métis	4,070	6.3%
Inuk	30	0.1%
Non-Indigenous	32,680	50.6%
Total	**64,595**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.1.3 Languages

Table 3-4 presents the languages spoken most often in the home within the Kenora District in 2021. Languages used by the Kenora District population in 2021 are summarized as follows:

- The majority of homes in the Kenora District speak English while at home at approximately 94%;
- Indigenous languages are the second most spoken within the home at 5.5%, this category includes 39 Indigenous languages; and
- French and other non-official languages make up the remaining 1.1% of homes at 0.7% and 0.4%, respectively.

Table 3-4: Language Used Most Often at Home, Kenora District (2021)

Language	Count	Distribution
English	59,670	93.5%
Indigenous Languages	3,510	5.5%
Other Non-Official Languages	430	0.7%
French	225	0.4%
Total	**63,835**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of Kenora District residents in 2020. Mobility status refers to the status of a person with regard to their place of residence on Census Day in relation to their place of residence on the same date 1 or 5 years earlier (Statistics Canada, 2022a).

Residents are categorized as “non-movers” or “movers”. Persons who, on Census Day, lived in the same residence as they did on the same date one year or five years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did one year, or five years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Kenora District is summarized as follows:

- 90.6% of residents were identified as “non-movers”, 50.6% (29,440) of which were male and 49.4% (28,705) female; and
- “Movers” accounted for 9.4% of the population, 48.9% (2,950) of which were male and 51.2 % (3,090) female.

Table 3-5: Mobility Status of Residents, Kenora District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	58,140	90.6%	29,440	90.9%	28,705	90.3%
Movers	6,035	9.4%	2,950	9.1%	3,090	9.7%
Total	**64,175**	**100%**	**32,390**	**100%**	**31,795**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-6 presents the immigration status of Kenora District residents for 2021.

- 4% of the population were classified as immigrants; and
- The distribution of immigrants between genders was equivalent in 2021.

Table 3-6: Immigration Status of Population in Kenora District (2021)

Immigration Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-immigrants	62,160	96%	31,465	96%	30,700	96%
Immigrants	2,490	4%	1,185	4%	1,305	4%
Total	**64,650**	**100%**	**32,650**	**100%**	**32,005**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2 Housing and Accommodations

Housing and accommodations are an important issue in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

The following section provides an overview of population and demographics at a district level.

3.2.1 Housing Characteristics

The Kenora District has 32,914 dwellings, 75% of which are occupied by usual residents. A private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2022a). The Kenora District has the highest number of dwellings occupied by non usual residents in the RSA. This is likely due to the high number of cottagers within the region. The majority of the dwellings in the district are owned however the Kenora District has the largest percentage of government or band housing with just over 20% of occupied dwellings falling within this category. Over 60% of dwellings are occupied by 1 to 2 persons. Most of the dwellings in the Kenora District were constructed over 20 years ago, 50% of which were built prior to 1980. Most occupied dwellings are considered suitable for the household size and less than 20% require major repairs.

DRAFT

Figure 3-1 below presents the total private dwellings and private dwellings occupied by usual residents in the Kenora District. Private dwellings occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 32,914 total private dwellings in the Kenora District as of 2021.
- Of the 32,914 private dwellings, 24,818 (75.4%) are occupied by usual residents.

Figure 3-1: Total Private Dwellings and Occupied Private Dwellings in Kenora District, 2021

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-7 below presents the total number of occupied dwellings for Kenora District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of dwellings are classified as single-detached home at 81%;
- Apartments make up 10.1% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.3%.

Table 3-7: Kenora District – Occupied Private Dwellings by Structure Type, 2021

Structural Type	Count	Distribution
Single-detached house	20,100	81%
Semi-detached house	1,745	7%
Row house	915	3.7%
Apartment or flat in duplex	700	2.8%
Apartment in a building that has fewer than five storeys	550	2.2%
Apartment in a building that has five or more storeys	535	2.2%
Other single-attached house	200	0.8%
Moveable dwelling	75	0.3%
Total	**24,820**	**100%**

Source: Statistics Canada, 2022a.

DRAFT

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Kenora District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings in the Kenora District are owned at 59.8%; and
- Occupied private dwellings which are rented or considered to be provided by the local government or band housing are nearly equal at 19.5% and 20.7% respectively.

Table 3-8: Private Dwellings by Tenure in Kenora District (2021)

Tenure	Count	Distribution
Owner	14,835	59.8%
Renter	4,840	19.5%
Dwelling provided by the local government, First Nation or Indian band	5,140	20.7%
Total	**24,815**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Kenora District. Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Kenora District in 2021:

- The majority of households are occupied by two persons at 34%.
- The least number of households are occupied by four persons at 12%.

Table 3-9: Number of Households by Household Size in Kenora District (2021)

Household Size	Count	Distribution
1 person	6,835	28%
2 persons	8,385	34%
3 persons	3,470	14%
4 persons	3,005	12%
5 persons or more	3.130	13%
Total	**24,825**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-10 below presents the number of rooms per household in Kenora District in 2021:

- The majority of households in the Kenora District consist of 1 to 4 rooms at 25% followed by 8 or more rooms at 22.6%; and
- The least number of households are comprised of 7 rooms at 14.1%.

DRAFT

Table 3-10: Number of Households by Number of Rooms per Household in Kenora District (2021)

Household Size	Count	Distribution
1 to 4 rooms	6,210	25.0%
5 rooms	5,155	20.8%
6 rooms	4,350	17.5%
7 rooms	3,500	14.1%
8 or more rooms	5,605	22.6%
Total	**24,820**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.3 Housing Conditions

The following subsections describe housing conditions including the number of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and condition of dwellings for Kenora District.

Table 3-11 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Kenora District:

- Dwellings constructed during the period from 1961 to 1980 is the largest group with 29% of private dwellings being built during this period;
- Dwellings constructed during the period from 2011 to 2015 is the smallest group with 4.3% of private dwellings being built during this period;
- 80.8% of the occupied private dwellings in the Kenora District were constructed during or prior to 2000.
- Over the last two decades, 4,760 dwellings were constructed which comprises less than 20% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Kenora District (2021)

Construction Period	Count	Distribution
1960 or before	5,300	21.4%
1961 to 1980	7,200	29.0%
1981 to 1990	3,770	15.2%
1991 to 2000	3,790	15.3%
2001 to 2005	1,290	5.2%
2006 to 2010	1,170	4.7%
2011 to 2015	1,055	4.3%
2016 to 2021	1,245	5.0%
Total	**24,820**	**100%**

DRAFT

Table 3-12 below presents the suitability of occupied private dwellings in Kenora District in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- In 2021, 9.2% of the occupied private dwellings in the Kenora District were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Kenora District (2021)

Suitability	Count	Distribution
Suitable	22,540	90.8%
Not suitable	2,285	9.2%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-13 below presents the conditions of the private dwellings in Kenora District in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 17.3% of the occupied private dwellings in the Kenora District were categorized as requiring major repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Kenora District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	20,535	82.7%
Major repairs needed	4,290	17.3%
Total	**24,825**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.3 Community Services

Community services in Kitchenuhmaykoosib Inninuwug First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care).

Community Services information for Kitchenuhmaykoosib Inninuwug First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal which provides information on social, community, health and government services in northern Ontario. To-date, Kitchenuhmaykoosib Inninuwug First Nation has not confirmed that it wishes to undertake socio-economic primary data collection.

3.3.1 Family Services

3.3.1.1 Family Services

Kitchenuhmaykoosib Inninuwug signed into law on April 1, 2023, along with the Government of Canada Minister of Indigenous Services and the Government of Ontario Minister of Children, Community and Social Services its own community-led child and family services agency, called the Kitchenuhmaykoosib Inninuwug Dibenjikewin Onnakonikewin (KIDO), which in Anishiniimowin means Kitichenuhmaykoosib Inninuwug Family Law (CBC News, 2023). Previously, Tikanigan Child and Family Services supported the community with these services.

3.3.1.2 Women's Shelter

Kitchenuhmaykoosib Inninuwug First Nation operates a short-term emergency shelter for abused women and their children and operates a 24-hour crisis line. This facility can accommodate a maximum of 10 individuals. It also helps women understand options to assist in making life choices, offers assistance in accessing housing, legal and other community services and provides individual counselling (Northwest Health Line, 2023).

3.3.2 Child Care and Youth Programs

3.3.2.1 Healthy Babies Healthy Children

The Healthy Babies Healthy Children program aims to support parenting and promote healthy child development for Kitchenuhmaykoosib Inninuwug First Nation families with children under 6 years old, as well as Indigenous children at risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care (Baby's Best Chance), organizes prenatal classes, and operates a children's library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre- and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child's early years to offer development guidance and referrals to other programs and services (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023a).

3.3.3 Elder Care

Indigenous Services Canada, through the First Nations and Inuit Home and Community Care (FNIHCC) program, provides funding and guidance for Elder care. This program aims to establish home and community care services for Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services. The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services (Indigenous Services Canada, 2023).

3.3.4 Health Services

3.3.4.1 Home and Community Care

Home and Community Care offers healthcare services for ill, injured, or Elder members of the Kitchenuhmaykoosib Inninuwug First Nation community who require assistance to stay in their home. The team assesses the health history of individuals and develops a personalized care plan. The services offered include home care nursing, personal care assistance with tasks such as dressing and bathing, basic or advanced practice foot care, teaching individuals to care for themselves, home support with light housekeeping, laundry, and meal preparation, respite for family members and caregivers, and help with light outdoor/ yard work. This service is provided through a Case Manager/ Nurse, Personal Support Workers and Homemakers (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023b).

DRAFT

3.3.4.2 Health Department

The Kitchenuhmaykoosib Inninuwug First Nation Health Department is dedicated to promoting the physical and mental well-being of the community and coordinates health care services through the Nursing Station. Health care team consists of Community Health representatives, Nurse Practitioner, home support workers and visiting doctors, dentists and specialists. It provides health awareness and counselling, education and prevention workshops in areas that may include Diabetes, Immunization, Sexual Health and Communicable Diseases. Further, it provides services of visiting doctors through a contract agreement with Independent First Nations Alliance and Anton Meyers Doctors.

The Department addresses individual health care needs by providing treatment of on-going health problems, emergency services, dental care including children's oral health, advocacy on behalf of individual with other health professionals, coordinating one-on-one pre-natal care with the community health nurse, home visits to the sick, Elders, new mothers and persons with health care needs. It also provides assistance with coordinating local and long-distance travel arrangements for medical appointments (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023c).

3.3.4.3 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program provides assistance and support to individuals and families in Kitchenuhmaykoosib Inninuwug First Nation struggling with addiction issues. This program offers Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides transportation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counseling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to band services, social services, detoxification and treatment centres and medical assistance (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023d).

3.3.4.4 Mamow Against Drugs Healing Program

The Mamow Against Drugs Healing Program operates a treatment centre for community members struggling with oxycodone addiction. This facility operates a 25-day program for a maximum of 6 individuals per program. As part of the program, it administers medications to minimize the effects of withdrawal and alternates between men and women intakes. The program includes intake, detoxification & withdrawal treatment, counselling, sharing circles, traditional land-based activities and aftercare services. Additionally, the program provides mental health and addiction counselling, as well as referrals to other treatment centres and programs such as Nodin Child & Family Intervention Services in Sioux Lookout (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023e).

3.3.4.5 Extended Health Benefits

The Extended Health Benefits Program provides a range of health benefits to individuals and families who experience high health costs. Eligibility for the program is determined based on need and is open to members of Kitchenuhmaykoosib Inninuwug First Nation aged 16 to 65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023f).

DRAFT

3.3.4.6 Home and Community Care - Physiotherapy Services

The Home and Community Care - Physiotherapy Services Program provides rehabilitative care to help people preserve or regain independence in-home or at nursing station depending on client. These services may include physiotherapy, occupational therapy, speech-language pathology and case management (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023g).

3.3.4.7 Medical Transportation Program

The Medical Transportation Program provides medical transportation services and assistance in making medical appointment arrangements to members of the community. It provides transportation within the community for individuals accessing the Nursing station or Health office while also providing assistance with completing prior approval applications for long distance medical appointments. It also offers assistance with arrangements for accommodation and travel details for individuals attending medical appointments out of community including Sioux Lookout Meno Ya Win Health Centre or Red Lake Margaret Cochenour Memorial Hospital.

This program also provides assistance in processing Non-Insured Health Service claims for community and Band members. This program also submits medical appointment travel, mileage, meal and accommodation requests on behalf of individual. It assists with making travel arrangements and maintains client documentation, receipts and related information (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023h).

3.3.4.8 Mental Health Program

The Mental Health Program aims to promote good mental health and provide services for individuals with mental health issues in the community. It provides information, services and activities in areas such as depression, family violence and stress management. It provides counselling services, cultural activities and craft, recreational activities and wellness activities (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023i).

3.3.5 Recreational Services

3.3.5.1 Youth Centre

The Youth Centre is responsible for planning, developing and implementing all social, recreational and special events for children and youth of the community. It provides various activities such as arts and crafts, video game nights, movie nights and sports events and organizes various outdoor activities for youth during summer months such as baseball, basketball, soccer, dodgeball and frisbee. It also assists with community events such as feasts, sports tournaments and homecoming celebration.

Community events and facilities in the community include a community hall, an indoor arena (includes Fitness Centre), an outdoor rink, a basketball court, baseball fields and track/ field area, winter, spring and summer carnivals, Bingos, raffles, radio/ television auctions, rummage/ bake sales and walkathons (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023j).

3.3.6 Communications Services

3.3.6.1 Ontario Telemedicine Network (OTN)

The OTN offers specialized medical care through videoconferencing and other tele-diagnostic equipment, enabling specialists to remotely examine and prescribe treatments to patients in their home communities. This reduces the need for patients to travel to receive care, providing greater convenience and accessibility for those living in remote or underserved areas. Further, it allows for consultations for patients with specialty services such as physiotherapy and provides opportunity for workshops and education sessions for staff and patients (211 Ontario North, Kitchenuhmaykoosib Inninuwug First Nation, 2023d).

DRAFT

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation were higher among non-Indigenous youth in Canada compared to Indigenous youth (Statistics Canada, 2021b). However, when comparing First Nation youth living on reserves to First Nation youth living off reserves, those that live off reserves are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities for Kitchenuhmaykoosib Inninuwug First Nation using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

Kitchenuhmaykoosib Inninuwug First Nation has one school on-reserve - Aglace Chapman Education Centre which offers schooling from junior kindergarten to Grade 10 (Teach for Canada, Kitchenuhmaykoosib Inninuwug, 2017). The school has approximately 40 staff and 305 students. There are four houses and two apartment complexes for teachers near the school (Teach for Canada, Kitchenuhmaykoosib Inninuwug, 2017). The school includes two Indigenous cultural program leaders and two native language teachers (Teach for Canada, Kitchenuhmaykoosib Inninuwug, 2017). The school includes a gym, library, computer room, science lab and indoor and outdoor arena (Teach for Canada, Kitchenuhmaykoosib Inninuwug, 2017).

3.5 Emergency and Protective Services

The socio-economic baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

Police services in most Indigenous communities in the Nishnawbe Aski are provided by Nishnawbe Aski Police Services (NAPS), the Anishinabek Police Service (APS) municipal police services, or the Ontario Provincial Police (OPP). Fire services typically include both volunteer, and community and municipal fire services and departments. Emergency medical services in fly-in First Nation communities are limited in nature and tend to be supported by regional service centres.

Police services in Kitchenuhmaykoosib Inninuwug were amalgamated with the OPP in 2023 and are administered by the OPP police in the community (NWOnewswatch, 2023).

If emergency care is required within remote Indigenous communities, patients are typically transported by air ambulance to the larger regional service centres. The larger regional centres have EMS teams available, and they are well connected with road access.

Where information is available, community input indicates a general need for additional emergency and protective services to address socio-economic challenges experienced in the Indigenous communities.

DRAFT

3.6 Community Infrastructure

The socio-economic baseline includes a description of the following community infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in Kitchenuhmaykoosib Inninuwug First Nation is described in Table 3-14.

Table 3-14: Description of Community Infrastructure in Kitchenuhmaykoosib Inninuwug First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 2 Water Treatment System. ▪ Water Quality: No current drinking water advisory.	▪ Level 1 Wastewater System. ▪ Constructed in 2002. ▪ Facultative Lagoon. ▪ Effluent Quality Unknown.	▪ Diesel. Served by Hydro One Remotes. ▪ Part of Watay Power Project, planned to be completed by December 2023.	▪ Community garbage dump approximately three miles from the community. (community website).

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2021; Government of Canada, 2019; Hydro One, 2021; Hydro One 2018; Five Nations Energy Ince., 2021; Wataynikaneyap Power, 2021; Government of Ontario, 2021; 211 Ontario North, 2021.

3.7 Transportation

The socio-economic baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the socio-economic baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure available in the region, including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd, 2016).

The remote First Nations communities are reachable only by air, water or winter roads. While communities, predominantly further south, have access to the provincial highway network.

3.7.1 Winter Road Traffic Volumes

Information is not currently available.

DRAFT

3.7.2 Air Transportation Network in Kitchenuhmaykoosib Inninuwug First Nation

Kitchenuhmaykoosib Inninuwug First Nation has flight access via Wasaya Airways Limited Partnership (LP) (Wasaya Airways Limited Partnership, 2023), and North Star Air (North Star Air, 2023).

3.7.3 Waterways in Kitchenuhmaykoosib Inninuwug First Nation Traditional Territory

Waterways are an integral part of community life. Waterways have been and continue to be an important socio-cultural and economic part of daily life of Indigenous communities. They connect families and friends and provide an important part of the transportation network.

Kitchenuhmaykoosib Inninuwug First Nation traditional territories are within the secondary watersheds of the Severn River (Government of Ontario, 2023). Big Trout Lake is the home lake of the community according to its Kitchenuhmaykoosib Inninuwug Water Declaration (CPAWS Wildlands League, 2013)-Watershed.pdf). Big Trout Lake "interacts with the rivers and streams that feed and drain it, the lands whose waters flow into those rivers and wetlands (CPAWS Wildlands League, 2013).

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The socio-economic baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key socio-economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four socio-economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that "well-being" means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people's overall "well-being."

DRAFT

The four socio economic factors used in the scoring of the CWB:

- Education – based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity – measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income – calculated based on a community's total income per capita; and
- Housing – based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

CWB index scores in Kitchenuhmaykoosib Inninuwug First Nation is described in Table 3-15.

Table 3-15: CWB Index Scores for Kitchenuhmaykoosib Inninuwug First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	**58**	**40**	**69**	**54**	**71**
First Nations in Ontario	**59**	**38**	**72**	**53**	**70**
Kitchenuhmaykoosib Inninuwug First Nation	43	13	66	42	52

Source: Indigenous Services Canada, 2019b.

Kitchenuhmaykoosib Inninuwug First Nation has a low CWB score for education (13), in comparison to First Nations in Canada (40) and First Nations in Ontario (38).

Kitchenuhmaykoosib Inninuwug First Nation's income score is 42, which is below those of First Nations in Canada (54) and First Nations in Ontario (53).

With a score of 66, the Kitchenuhmaykoosib Inninuwug First Nation score for labour is comparable to, but below that of First Nations in Canada (69) and First Nations in Ontario (72).

Kitchenuhmaykoosib Inninuwug First Nation has a housing score of 52, which is significantly lower than First Nations in Ontario (70) and First Nations in Canada (71).

Kitchenuhmaykoosib Inninuwug First Nation with a score of 43, is lower in terms of overall community's well-being and safety is comparable to but below to that of First Nations in Ontario (59) and First Nations in Canada (58).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments responsible for serving Indigenous communities in Canada (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-16 Provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the OPP. The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (Ontario Provincial Police (OPP), 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

4. Economic Environment

4.1 Labour Force and Employment

Indigenous people are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live. The traditional economy is an important cultural and economic aspect of community life. .

Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for Kitchenuhmaykoosib Inninuwug First Nation.

The following section provides an overview of population and demographics at a District level.

The working age population in the Kenora District is projected to decline over the projection period from 41,115 in 2021 to 38,152 by 2043 (Statistics Canada, 2017; 2022a). The unemployment rate within the District is lower than Ontario at just under 9%, however, the participation rate is 57% in comparison to 63% for Ontario (Statistics Canada, 2022a).

The Kenora District population has the lowest percentage of population with postsecondary certificate, diploma or degree in the RSA at 40% (Statistics Canada, 2022a).

Over half of the population who pursued postsecondary education studied either architecture, engineering, and related trades, health and related field, or business, management, and public administration (Statistics Canada, 2022a).

4.1.1 Labour Force Characteristics

Table 4-1 presents the forecasted working age population in Kenora District over the projection period: 2016, 2021, 2028, 2033, and 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada, 2017, 2022a). The values for 2028, 2023, and 2043 were forecast based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64. Projected trends of working age population in Kenora District are summarized as follows:

- The working age population is decreasing over the projection period; and
- Based on current growth trends, the working age population is forecasted to decrease by 3,668 between 2016 and 2043, a decline of approximately 8.8%.

DRAFT

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the Land.

The Knowledge passed on from the ancestors sustain Kitchenuhmaykoosib Inninuwug identity and way of life.

Table 4-5 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Kenora District for 2021.

- The majority of the population has a postsecondary certificate, diploma, or degree at 40.1%, within this group females are more likely to have a degree in comparison to males; and
- 30.9% of the population was no certificate, diploma, or degree at 30.9%. Males account for 52.9% of this group and females 47.1%.

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

Table 4-5: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Kenora District (2021)

DRAFT

4.1.3 Labour Income

Table 4-7 presents the total individual income by group for the population aged 15 and over for 2020 in Kenora District by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999;
- The smallest individual income group for both male and female is $150,000 and over with 3% and 1.1%, respectively;
- In 2020, there were 95 more females than males with individual incomes; and
- In 2020, 74% of females were making under $60,000 while only 65% of males were within this group.

Table 4-7: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Kenora District (2020)

Income Group	Total		Male		Female

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in Kenora District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from Ministry of Natural Resources and Forestry (MNRF), Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product (GDP)

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Kenora District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 4-9 presents the GDP for the Kenora District for 2006 and 2016 (Northern Policy Institute, 2019a).

- Between 2006 and 2016 there was a decline in GDP of just over 10%;
- These trends reflect changes in the size and occupational distribution of employment in the district; and
- The Kenora District represents 0.2% of Ontario's GDP in 2016.

Table 4-9: GDP for Kenora District (2006 – 2016) (Expressed in millions of dollars)

Year	2006	2016	2006 – 2016 Growth	2006 – 2016 % Change
GDP	2,309	2,077	-232	-10.1%

Source: Northern Policy Institute, 2019b.

4.2.2 Cost of Living

The largest census subdivision within Kenora District is the City of Kenora, which accounts for approximately 23% of the population. Table 4-10 presents a comparison of shelter affordability between the City of Kenora and Ontario. Both shelter costs and the cost of purchasing a house in Kenora are significantly less than the provincial averages (Choose Kenora, 2023).

Table 4-10: Shelter Costs and Dwelling Values, City of Kenora vs Ontario, 2016

	Owned – Kenora	Rented Kenora	Owned – Ontario	Rented – Ontario
Median shelter cost	$1,002	$882	$1,299	$1,045
Average shelter cost	$1,155	$873	$1,463	$1,109
Median dwelling value	$225,210	-	$400,496	-
Average dwelling value	$260,789	-	$506,409	-

Source: Choose Kenora, 2023.

Table 4-11 presents the number of households spending 30% or more of income on shelter costs for Kenora District in 2021. According to the Canada Mortgage and Housing Corporation (CMHC) housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

Of the nearly 19,000 owner- or tenant-occupied dwellings in Kenora District, 13% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

Table 4-11 : Distribution of Households Spending 30% or More of Income on Shelter Costs for Kenora District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	16,490	87%
Spending 30% or more of income on shelter costs	2,455	13%
Total Owner and Tenant Households	**18,945**	**100%**

DRAFT

4.2.3 Economic Development

Kenora District is a census division in Northwestern Ontario. It is comprised of 57 census subdivisions, 47 of which are First Nation communities. Combined, the City of Kenora, the City of Dryden, and the Municipality of Sioux Lookout make up 43% of the District's population.

Kenora District's economy is supported by several key sectors, including manufacturing, health care, public administration, forestry, mining services, culture and recreation, construction, and tourism.

The City of Kenora 5-year Tourism and Economic Development Strategy sets out three goals, tourism development, economic development, and tourism and economic foundations, with nine accompanying objectives. Of the nine objectives listed in the Strategy, two pertain to economic development (City of Kenora, 2021):

- Activate development on Kenora's vacant and underutilized lands:
  - Improve the development readiness of publicly owned residential, commercial, and industrial lands.
  - Improve awareness of development opportunities, incentives, and partnerships available for vacant and underutilized lands through marketing efforts.
- Support the growth and retention of local businesses and emerging sections:
  - Establish a centralized business hub and resource centre to support local businesses.
  - Position Kenora to take advantage of specific strategic sector opportunities.
  - Provide supports and information to new and existing businesses through community partner and City led initiatives.
  - Prioritize support of COVID-19 response and relief efforts to assist the local business community.

The Municipality of Sioux Lookout 2020-2025 Strategic Plan states the following goals for community innovation and development (Municipality of Sioux Lookout, 2020):

- Provide infrastructure and housing to meet the needs of our community, now and as it grows:
  - Confirm that our assets are sustainable and that they will meet our long-term needs.
  - Use municipal best practices to identify innovative approaches to managing our infrastructure.
  - Verify that our transportation infrastructure allows people to get around safely and efficiently.
  - Encourage an increase in the housing available in Sioux Lookout to meet our current and future needs.
- Collaborate with community partners to foster growth and economic development:
  - Work proactively with local and regional economic development groups to advance our community's best interests;
  - Support local efforts to improve Sioux Lookout as a place to do business.
  - Work with local partners to promote and encourage tourism.
  - Support public transportation to make it available and useful to as many of our residents as possible.
- Enable community growth through innovative, proactive planning:
  - Confirm that the Municipality's planning policies and practices are appropriate to address current needs and accommodate future growth.
  - Work to secure sufficient commercial property to attract businesses to Sioux Lookout.
  - Minimize regulatory obstacles to development while ensuring appropriate processes are followed.
  - Develop programs and policies that encourage new businesses to move to Sioux Lookout and existing ones to stay here.

DRAFT

- Strengthen and enhance Sioux Lookout's status as "Hub of the North":
  - Assure that YXL remains the #1 airport in our area.
  - Collaborate with the hospital to maintain a strong working relationship.
  - Consider the implications for Indigenous people of any Municipal policies.
  - Recognize that addressing our social issues enhances Sioux Lookout's status as "Hub of the North".

4.3 Business Environment

4.3.1 Local Economy

TKG Group was established in 2018 and is owned equally by Kingfisher Lake, Kasabonika Lake, Kitchenuhmaykoosib Inninuwug, Wapekeka, Wawakapewin and Wunnumin Lake First Nations. In January 2023, TKG Group acquired Oshtugon Computers Inc. which includes a variety of retail stores in Sioux Lookout and Dryden (TKG Group, 2023).

Table 4-12 presents a breakdown of all 21 industries based on 2-digit North American Industry Classification System (NAICS[2]) codes and their presence within Kenora District in 2018 and 2022. Trends of industry presence in Kenora District between 2018 and 2022 are summarized as follows:

- The industries with the highest growth between 2018 and 2022 include professional, scientific, and technical services (24%) and wholesale trade (19%); and
- 9 of the 21 industries reported saw a decline in jobs between 2018 and 2022.

Table 4-12: All Industry Presence in Kenora District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Agriculture, forestry, fishing and hunting	493	425	(68)	(14%)

[2] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

DRAFT

Table 4-13 presents the industry supply chain, the purchases an industry makes from all other industries, in the Kenora District in 2020. This table displays the value and percentage of in-region purchases and imported purchases for 2020 that are summarized as follows:

- One fifth of supply chain purchases are made within the Kenora District;
- The industry with the highest percentage of in-region purchases is agriculture, forestry, fishing, and hunting at 71%;
- The industry with the lowest percentage of in-region purchases is management of companies and enterprises at 0%; and
- Total supply chain purchases amounted to approximately $2.7 billion in 2020.

Table 4-13: Industry Supply Chain in Kenora District (2020)

Industry	In-region Purchases	% In-region Purchases	Imported Purchases	% Imported Purchases	Total Purchases
Agriculture, forestry, fishing and hunting	$82,131,318	71%	$34,088,922	29%	$116,220,240
Mining, quarrying, and oil and gas extraction	$35,424,541	32%	$76,226,128	68%	$111,650,669
Utilities	$9,915,523	9%	$95,573,353	91%	$105,488,876
Construction	$16,117,848	28%	$41,884,472	72%	$58,002,319
Manufacturing	$93,763,686	12%	$660,321,136	88%	$754,084,823

DRAFT

Table 4-14 presents the regional requirements, the value of goods and services demanded of the Kenora District by industry in 2020. Regional Requirements show the value of goods/services purchased from an industry (either in or outside the area) in order to meet the needs of the area. The table presents the level of demand for each industry met in-region and the demand met by imports that are summarized as follows:

- The majority of demand for goods and services is met by imports (82.8%);
- The industry meeting the most demand in-region is agriculture, forestry, fishing, and hunting with 52.6% of demand met in-region;
- Seven industries meet less than 10% of demand within region; and
- The total demand in 2020 was approximately $7.26 billion.

Table 4-14: Regional Requirements to Meet Demand by Industry in Kenora District (2020)

Industry	Demand met In-region	% Demand met In-region	Demand met by Imports	% Demand met by Imports	Total Demand
Agriculture, forestry, fishing and hunting	$84,483,367	52.6%	$76,021,015	47.4%	$160,504,382
Mining, quarrying, and oil and gas extraction	$39,675,550	4.8%	$781,595,917	95.2%	$821,271,467

DRAFT

4.3.2 Mining, Aggregate and Forestry Activities

Table 4-15 presents industry data for the following 2-digit NAICS[3] industries in Kenora District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction;
- Agriculture, forestry, fishing, and hunting;
- Each industry includes a variety of occupations which include but are not limited to:
- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above 1 indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry grew by 222 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry exceeds the national average by more than 6 times in 2022;
- The agriculture, forestry, fishing, and hunting industry declined by 68 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is slightly higher than the national average with 1.37 in 2018 and 1.17 in 2022.

Table 4-15: Mining, Quarrying, and Oil and Gas Extraction Industry in Kenora District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	2,136	2,358	222	10%	5.9	6.5
Agriculture, forestry, fishing and hunting	493	425	-68	(14%)	1.4	1.2

[3] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to traditional practices which include lakes and rivers for fishing and trapping corridors and trails for hunting and trapping. Many Indigenous communities rely on traditional practices, such as fishing and hunting as a source of food and income. As such, it is important to identify areas where traditional practices are used, to determine potential effects of the Project on Indigenous communities and their traditional use of lands and resources.

Kitchenuhmaykoosib Inninuwug First Nation trapping and hunting areas encompasses a significant area including: Manitoba on the west side, to Attawapiskat on the east side. Lands within the Fort Severn homeland are used for trapping and to the south Weagomow, North Spirit Lake and Lansdowne House lands are also utilized (Kayahna Tribal Area Council 1985).

Traditionally, hunting in the areas north of the community was more popular. The areas around the Sachigo River and parts of the Fawn and Severn River are areas that are important for caribou hunting (Reading the maps of the Kayahna Region, 1985). Members typically fish in Big Trout Lake (Kayahna Tribal Area Council, 1985). Kitchenuhmaykoosib Inninuwug First Nation has passed a Watershed Declaration and proclaimed that “all water that flows into and out of Big Trout Lake and all lands whose waters flow into the lake, rivers and wetlands, to be completely protected through our continued care under Kitchenuhmaykoosib Inninuwug’s authority, laws and protocols” (CPAWS Wildlands League, 2013). The Kitchenuhmaykoosib Inninuwug First Nation’s watershed declaration protects Fawn River and Big Trout Lake which includes caribou, wolverine, moose and a variety of fish and birds (Talaga, 2019).

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas including travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

Kitchenuhmaykoosib Inninuwug summer travel routes historically focused on two segments of well-travelled routes. The first route is the western half of Big Trout Lake to the east to Wapekeka Lake and the second is from Severn Lake, west of Big Trout Lake to Bearskin Lake (Kayahna Tribal Area Council, 1985). Other summer travel routes exist to other communities, but the route is often more complicated with networks of rivers, lakes and portages (Kayahna Tribal Area Council, 1985). Winter travel routes include a route that is diagonal from Wapekeka Lake to Otter River, an area around Long Dog Lake and south of Big Trout Lake from Lake Nemeigusabins to the Bug River-Mishwamakan River area Kayahna Tribal Area Council, 1985). Kitchenuhmaykoosib Inninuwug has previously outlined that most burial grounds are unmarked and along the shores of waterways (Golder, 2018).

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the Project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinaabe/Mushkeego and Métis peoples. “The Anishiniimowin/ Anishinaabe/ Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinaabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2023). The Métis homelands are also present within the James Bay Treaty area. The Anishiniimowin/Anishinaabe/Mushkeego and Métis peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define ongoing rights and obligations on all sides. These agreements set out continuing Treaty Rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations;
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013).*

Treaty No. 9 was signed between the Anishiniimowin/Anishinaabe/Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

In April 2023, leaders from 10 Treaty No. 9 First Nations announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

At this time Kitchenuhmaykoosib Inninuwug First Nation does not have a Land Code under the *First Nations Land Management Act* and land use is governed under the *Indian Act*.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the Public Lands Act (Section 6.6.2).

As described in Section 5, traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to community based land use plans (CBLUPs) initiated by Indigenous communities.

6.5 Road/Transportation Studies

No Road/Transportation Studies were available for review for Kitchenuhmaykoosib Inninuwug First Nation at this time.

DRAFT

6.6 Provincial Plans and Policies

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations communities and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the Far North Act, 2010, the CBLUP process was developed by the province as a vehicle to explore with Indigenous communities and groups, among other land uses in First Nations areas, traditional and customary use, as well as the potential for permissible use of lands for forestry, tourism, recreation, mineral exploration and mining, renewable energy, access and infrastructure, fire management, and climate change management.

6.6.2 Public Lands Act

The Ontario *Public Lands Act* provides MNRF the authority to manage Crown land. Crown land occupies approximately 87% of all land and water in Ontario with 95% of northern Ontario considered Crown Land (MNRF, 2023). The *Public Lands Act* outlines the use, management, sale and disposition of public lands and forests (Ontario, 2022). The Act guides Ontario's public land use planning and development, regulating public and private roads on public lands.

6.6.3 The Planning Act

The Ontario *Planning Act* is provincial legislation that sets out the ground rules for land use planning. The *Planning Act* outlines how land may be used and controlled and the purpose of this Act is to make sure that planning processes are fair, open, accessible, timely, efficient and promote the best economic and environmental interest within the provincial policy framework. The *Planning Act* allows the province to integrate matters of provincial interest into municipal and regional planning decisions by requiring that all decisions that are made are in conformance with provincial plans.

6.6.4 Fisheries Management Plans

The Fisheries Management Plans as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and rivers and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake and river in a holistic manner and includes a range of management options to secure a healthy lake and river environment that conserves the diversity of the fish community and provide opportunities to contribute to the social and economic well-being of the surrounding area. Ontario is divided into Fisheries Management Zones (FMZ). Each specific FMZ outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h).

Kitchenuhmaykoosib Inninuwug First Nation's reserve and majority of its traditional territory lies within FMZ 2 and parts of Zone 1.

DRAFT

6.7 Land Use Plans and Policies

Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the socio-economic baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses of the land.

Kitchenuhmaykoosib Inninuwug First Nation has a Watershed Declaration which addresses their land and water use: "We declare all waters that flow into and out of Big Trout Lake and all lands whose waters flow into the lake, rivers and wetlands, to be completely protected through our continued care under Kitchenuhmaykoosib Inninuwug's authority, laws and protocols. No industrial uses, or other uses which disrupt, poison, or otherwise harm our relationship to these lands and waters will be permitted. At all times the use of Kitchenuhmaykoosib Inninuwug lands and waters, and any related decision-making, will be subject to Kitchenuhmaykoosib Inninuwug's free, prior, and informed consent following Kitchenuhmaykoosib Inninuwug laws and processes" (CPAWS Wildlands League, 2013).

Limited information is publicly available about Kitchenuhmaykoosib Inninuwug First Nation's documented plans for land use (if any exist); however, as information becomes available through dialogue with the community, with permission from the community, information will be considered as part of the EA/IA.

6.8 Industrial Land Use

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 4). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, this is done online through the Mining Lands

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

DRAFT

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council. To enhance Indigenous community participation, the Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act*. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Kitchenuhmaykoosib Inninuwug First Nation available at this time.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities'. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for a millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is also important because as it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Kitchenuhmaykoosib Inninuwug First Nation includes a community centre used for a variety of sports and social gatherings. A variety of commercial businesses include Tasona Atawekamik Store, and Canawape Enterprise Store.

Big Trout Lake Hotel and Restaurant and Sunset Lodge as accommodations for visitors. Wasaya Airways flies to and from the community at Big Trout Lake Airport (Kitchenuhmaykoosib Inninuwug First Nation, N.D).

DRAFT

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

- Fawn River Provincial Park

Declared in 1989, the Fawn River Provincial Park is located in close proximity to Kitchenuhmaykoosib Inninuwug First Nation and borders the Wapekeka First Nation. It has existing recreational activities such as fishing, hunting, canoeing, camping and snowmobiling, and also has three Indigenous people operated traplines. Traditional activities such as harvesting are carried out in the park (Ministry of Natural Resources, 1989)

ANSIs

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Kitchenuhmaykoosib Inninuwug First Nation Reserve.

Conservation Reserves

The Severn River Conservation Reserve is located within the Severn River watershed and contains several important core natural heritage areas that are inventoried and protected by the Ministry of Natural Resources as Areas of Natural and Scientific Interest (ANSI) (Ministry of Environment, Conservation and Parks, 2023b). The Severn River watershed also holds cultural importance for First Nation communities, such as the Kitchenuhmaykoosib Inninuwug First Nation who use the historic canoe routes within the watershed and the lakes and rivers for fishing (Wildlands League, 2013).

Re: Preliminary draft Kitchenuhmaykoosib Inninuwug First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the Kitchenuhmaykoosib Inninuwug First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;

- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;
- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Kitchenuhmaykoosib Inninuwug First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead

Chief Donald Morris
Kitchenuhmaykoosib Inninuwug First Nation
P.O. Box 329
Big Trout Lake, ON
P0V 1G0

Dear Chief Morris,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates it was delivered to your community on January 31, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

WEBEQUIE
SUPPLY ROAD

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation

	based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Morris,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Groundwater Preliminary Findings**

The livestreaming event is scheduled for **April 15th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Dear Chief Morris,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.

May 29, 2024

Dear Chief Morris,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 10th from 12:00-12:45pm EST** for Kitchenuhmaykoosib Inninuwug First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/82855766630?pwd=rsBllVyeENh7l2CDvMsmCcUkCQi6v0.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 828 5576 6630 **Passcode:** 956591

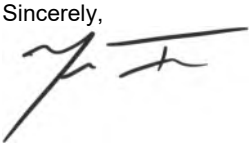
In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

December 16, 2024

Chief Donald Morris
Kitchenuhmaykoosib Inninuwug First Nation
P.O. Box 329
Big Trout Lake, ON
P0V 1G0

Dear Chief Morris,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on December 3, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Inc (formerly SNC-Lavalin Inc)

January 9, 2025

Dear Chief Morris,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, January 13th from 12:00-12:45 PM EST for Kitchenuhmaykoosib Inninuwug First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session can be found at the following link: https://us06web.zoom.us/j/87480632860

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

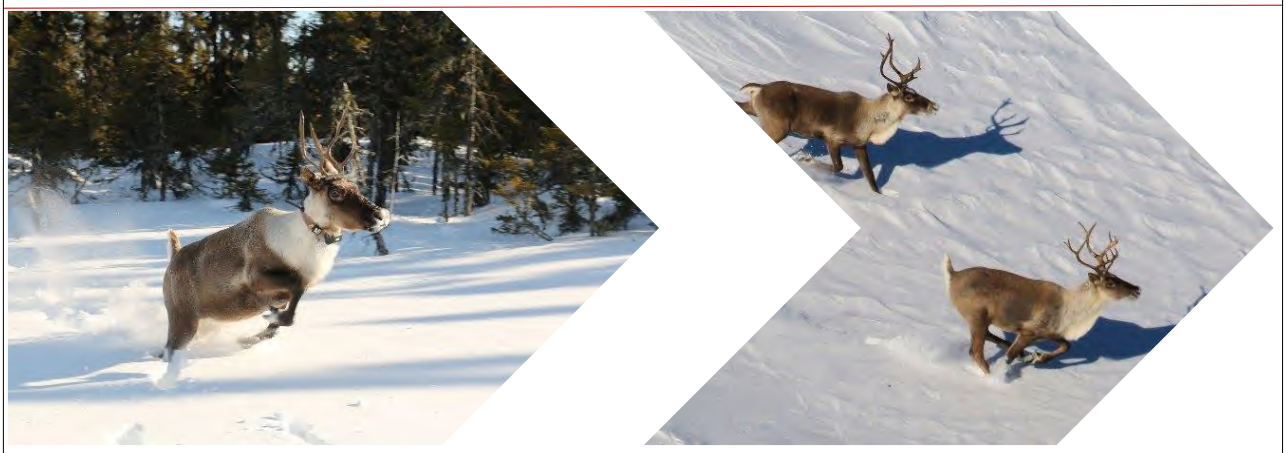
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

February 13, 2025

Dear Chief and Council,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, February 24th from 12:00-12:45 PM EST for Kitchenuhmaykoosib Inninuwug First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/83323136013?pwd=O50BaGw7Wi8ZdgolziF6jXbOtQj0nu.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Morris,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: **https://www.supplyroad.ca/draftea**.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Long Lake #58 First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if LL58FN has any questions or comments.

Contact Date: Nov 22, 2021 14:34 Method: Fax
Topics to be Discussed: Terms of Reference, Live stream: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team faxed a letter and poster, to Long Lake 58 First Nation's (LL58FN) Chief Judy Desmoulin, advising that the WSR Project Team is hosting a live stream show and Wawatay radio session on November 23, 2021 with a livestream from 4:00-4:30pm EST and Wawatay Radio call-in show from 2:00-3:00pm EST, with access links and the toll-free call-in phone number. The sessions will include a presentation on topics including: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds Work Plans along with question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations, Michael's email and cell phone contact information if LL58FN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether LL58FN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked LL58FN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if LL58FN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited LL58FN to participate in the WSR socio-economic primary data collection program. The letter asked LL58FN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if LL58FN has any questions.

Topics to be Discussed: Virtual Information Session
Don Parkinson and Mark Knell of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Long Lake #58 First Nation (LL58FN) on July 18, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Mark noted that no issues or questions had been raised by LL58FN regarding the WSR Project to date. Mark provided further information regarding the Indigenous Knowledge/Indigenous Land Use Program, potential jobs and employment which will be explored through the baseline socio-economic study, and the Cumulative Effects Analysis for the Project. Mark encouraged LL58FN members to connect with the Project Team via the Project website or social media to communicate feedback and/or ask questions about the Project. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community representatives in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin with a letter following up on the correspondence sent on December 13, 2021 regarding the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program, inviting LL58FN to participate in the program. The letter thanked LL58FN for expressing interest in participating in the program and reminded the community of the purpose of the IKLRU Program and that the WSR Project is currently in the Environmental Assessment / Impact Assessment (EA/IA) phase. The letter acknowledged that LL58FN has been determined ineligible to receive funding to participate in the IKLRU Program by the Province of Ontario, however, Ontario may reconsider if LL58FN can provide information as it relates to any Aboriginal and/or treaty rights that may be affected in the area near the proposed WSR Project. The letter welcomed the community to reach out to the Project Team for support throughout the process. The letter stated that if LL58FN is interested in learning more about the IKLRU Program, the Project Team is available to meet either in-person or virtually.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email, to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin, which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 11:00-12:00pm EST and livestream from 1:00-1:30pm EST on October 25, 2022. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on baseline field studies - preliminary observations related to wolverine, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments.

The email also included the English WSR Newsletter – Issue 15 which provided information about the Environmental Effects Assessment and highlighted the importance of the Baseline Field Studies in the Environmental Assessment / Impact Assessment. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their e-mail address and phone number if LL58FN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 1
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 1. The USB contained files supporting Record of Consultation. The letter explained that the Consultation Progress Report summarizes the documents from Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The report being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 2. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Long Lake #58 First Nation (LL58FN)'s Chief Judy Desmoulin, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of LL58FN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

Topics to be Discussed: Radio, Livestreams, Engagement Options, Newsletter 10
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Long Lake #58 First Nation (LL58FN)'s Chief Judy Desmoulin which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 28, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of Alternatives Routing in the Preferred Corridor, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments.

The email also included the English WSR Newsletter - Issue 20 which provided information about Consultation Round 2 Topics, the Socio-Economic Primary Data Collection Program, the Indigenous Knowledge and Land Resource Use Program, and the livestream and radio schedule for March 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if LL58FN has any questions or comments.

16:30
Michael Fox and McKenna Baxter of ICE sent another email to the Chief with an updated letter that had the correct date.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Long Lake 58 First Nation (LL58FN) on May 15, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. As the primary focus of the meeting, was to discuss the alternatives assessment process and the Analysis of Alternatives- Multiple Accounts Analysis. Don presented high-level information on how scores are tabulated and clarified the differences between alternative methods and alternatives to the project. During the presentation slides illustrating the various valued components, criteria, and indicators were shared. Don informed the listeners that after an evaluation of the factors and criteria, Alternative 3 has been identified as the recommended route and has the least anticipated impact. Don mentioned that the Part 2 Presentation will cover other facilities and infrastructure that will be part of building the road. Don recounted some of the concerns the community has expressed including their need for capacity funding to participate in the Environmental Assessment. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree to accommodate community members. The Project Team informed participants they would love to have feedback from the audience and that a recording of the session would be available through YouTube and the WSR Website. The team also informed the audience of the upcoming radio and live-streaming events the following day. There were no questions posed by any of the attendees.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Long Lake #58 First Nation (LL58FN)'s Chief Judy Desmoulin which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on May 24, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Evaluation of Alternatives for Supportive Infrastructure, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a fax to Chief Judy Desmoulin of Long Lake #58 First Nation (LL58FN) with an attached letter as a follow up regarding LL58FN's participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter thanked LL58FN for expressing interest on January 20, 2022 in participating in the IKLRU Program for the WSR Project. The letter provided an overview of the IKLRU Program and indicated that the community has been determined ineligible to receive participant funding to participate in the IKLRU Program by the Province of Ontario. However, Ontario remains open to reconsider their decision, if EFN can provide information available within the community as it related to any Aboriginal and/or Treaty Rights that may be affected in the area near the proposed WSR Project. The letter encouraged the community to contact Ontario if they wish to have their eligibility to receive participant funding reconsidered and the Project team offered their support throughout the process. The letter provided an overview of the IKLRU Program and its aim to complete the studies and draft a baseline conditions report as part of the Environmental Assessment / Impact Assessment. The letter requested an indication of the community's interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on Road Foundation Design, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments. Fax transmittal error: fax failed.

Topics to be Discussed: WSR Information Session
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a rescheduled virtual information session as part of the Consultation Round 2 for Long Lake #58 First Nation (LL58FN) on November 20, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don Parkinson explained that the Part 2 of Consultation Round 2 will discuss the Project team's work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from LL58FN were in attendance.

Topics to be Discussed: Aboriginal and/or Treaty Rights and Interests Forum #2
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Aboriginal and/or Treaty Rights and Interests Forum held at the Valhalla Inn in Thunder Bay on November 21-23, 2023.

The purpose of the Forum was to create a respectful, culturally-sensitive, and collaborative space to develop and/or confirm understanding of the Project areas (WSR, MFCAR, and NRL) as communities Aboriginal and / or Treaty Rights and Interests (ATRI) may be impacted by these Projects. The purpose of this event was to discuss ATRI and not to collect Indigenous Knowledge. Day 3 of the Forum was set aside for a half-day discussion on Cumulative Effects as they relate to the Projects. Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the Province of Ontario.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments.

The letter provided the status of delivery as of March 14, 2024. An overview of the Consultation Progress Report for Round 2 was provided and the letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on March 18, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on the Floating Road, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if LL58FN has any questions or comments.

Topics to be Discussed: Draft Preliminary Existing Conditions Document
McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team phoned the Long Lake #58 First Nation band office to follow up with Chief Judy Desmoulin about the Draft Preliminary Socio-Economic Existing Conditions Document that was sent to the Chief via email on March 11, 2024. The purpose of the call was to see if the community had any feedback or questions on the report. There was no answer so McKenna left a message with her name, number, and purpose of the call.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 3 for Long Lake #58 First Nation First Nation (LL58FN) on May 13, 2024. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 1 of Consultation Round 3 will provide an overview of the Environmental Assessment/Impact Assessment (EA/IA), how the EA/IA will be carried out, and the preliminary results of effects assessment for select value components. Don provided an update on the engagement and consultation to date and provided an overview of the key themes of feedback from communities in Round 1 and 2. Don explained that the presentation provided in the session is a shorter version of the full presentation available on the WSR website. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from LL58FN were in attendance. Don reiterated that the Project Team would like to hear from LL58FN community members and that a recording of the session would be made available through YouTube and the WSR Website.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Judy Desmoulin of Long Lake #58 First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Superior Inn and Conference Centre in Thunder Bay on June 11-13, 2024.

The purpose of the Gathering was to create a respectful, and collaborative space for consultation to continue to build an understanding of the three road projects and their potential impacts by: 1) Providing a comfortable space for Elders to gather and discuss the Projects; 2) Creating opportunities to engage directly with the Project proponents and consulting teams sharing information about the Projects and; 3) Discussing the upcoming draft Environmental Assessment Report / Impact Statement (EAR/IS) Review Process for WSR and the Marten Falls Community Access Road (MFCAR) Project.

Day 1 was set aside exclusively as an Elders Gathering to gather and engage with the individual Project Teams for all three projects to share their perspectives. By design, there were no government representatives in attendance on Day 1; only Indigenous people and Indigenous consultants, to encourage a more open and comfortable discussion. This was a new and innovative approach to engaging with Indigenous communities by the creation of a sacred space that was authentic, comfortable and open.

Day 2 was open to all participants. The morning focused on a series of technical presentations on key issues identified in previous engagement and consultation opportunities (peatlands (and other terrain), building roads on peatlands, aspects of water and fish populations). The afternoon was an Expo where participants could visit a series of booths to have one-on-one conversations with Project Team members from each of the road projects, various technical aspects of the Projects, Ontario and the Impact Assessment Agency of Canada.

Day 3 was also open to all participants. This session was a half day workshop on a common approach to reviewing the upcoming circulation of draft EAR/ISs for two of the three road projects so that there would be sufficient time to review and provide feedback. Each project team wanted to share the common approach to reviewing the draft EAR/ISs with Indigenous Nations early so that there was a shared understanding of what to expect and when. This would allow Indigenous communities to prepare themselves in advance with respect to resources to assist in the review.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 44 individuals signed in for Day one of the gathering, A total of 62 individuals signed in for Day 2, and a total of 48 individuals signed in for Day 3, but please note that not all participants opted to sign in. In total 4 participants from Long Lake #58 First Nation attended the Gathering over the 3 days.

Topics to be Discussed: Virtual Information Session Round 3 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for LL58FN on June 24, 2024, from 1:00-1:45pm EST with registration links for the session. The information session will include the second part of the presentation on WSR's Environmental Assessment / Impact Assessment (EA/IA) activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if LL58FN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 2
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Long Lake First Nation (LL58FN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 2 presentation that began with a review of the project to date, followed by a discussion of preliminary results for the vegetation, wildlife, social environment, aboriginal and Treaty rights valued components. The presentation concluded with discussion on the cumulative effects assessment and the assessment of other aspects and effects. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from LL58FN were in attendance.

Topics to be Discussed: Field Notice Fall Geo-Technical Drilling Program
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin regarding a Field Notice for the Fall geo-technical drilling program. The email indicated that AtkinsRéalis is providing a notification to complete a drilling program for the WSR project to further engineering design and support the coordinated provincial Environmental Assessment and Federal Impact Assessment. The letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). The email indicated that all works will be conducted in accordance with the permit conditions issued by MNR. Attached to the email was the Field Notice explaining what is happening, the schedule and what to expect. For further questions, the contact information for Hayden Yip of AtkinsRéalis was provided.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for LL58FN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team called the Long Lake #58 First Nation (LL58FN) band office to follow up regarding the Consultation Progress Report for Round 3. There was no answer. McKenna left a voice message with the purpose of the call and her contact information.

Contact Date: Dec 16, 2024 16:53 Method: E-mail
Topics to be Discussed: Consultation Progress Report Round 3 Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) sent an email to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin with a letter attached regarding follow up for the Consultation Progress Report for Round 3. The letter indicated that on November 5, 2024, the Project team mailed a package via Canada Post to the community containing the Consultation Progress Report for Round 3, and as of today, December 16, 2024, the package status indicates it was delivered to the community on November 6, 2024. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. A list of key milestones and topics covered in the round of consultation was provided. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. Michael's email and cell phone contact information was provided if LL58FN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Judy Desmoulin and WSR Project Lead Ervin Waboose Jr. of Long Lake #58 First Nation with links to?invitations for the Three Road Project Gathering & Expo hosted by ?Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Virtual Information Session Round 4 Part 1
The Webequie Supply Road (WSR) consultation team conducted a virtual community meeting on the Zoom platform with Long Lake 58 First Nation (LL58FN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. There were no participants from LL58FN in attendance.

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Long Lake #58 First Nation's (LL58FN) Chief Judy Desmoulin with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Three Road Projects Gathering & Expo June 2024 Report
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Valhalla Inn in Thunder Bay on February 19-20, 2025.

The purpose of the Gathering was to provide an engaging and interactive consultation space to discuss the Webequie Supply Road (WSR) Draft Environmental Assessment Report / Impact Statement (EAR/IS), Marten Falls Community Access Road (MFCAR) Draft EAR/IS and Northern Road Link (NRL) Projects.

Day 1 of the event was set aside for Project overviews, consultation panels, individual community breakout sessions, and project expo including information to assist with review of the draft EAR/IS for MFCAR and WSR and cumulative effects assessment.

Day 2 of the event covered the Aboriginal and/or Treaty Rights and Interests (ATRI) panel discussions, breakout sessions, and project expo including information to assist with review of the draft EAR/IS and MFCAR for WSR and cumulative effects assessment.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 28 individuals signed in for Day one of the gathering, A total of 38 individuals signed in for Day 2, but please note that not all participants opted to sign in. In total 2 participants from Long Lake #58 First Nation (LL58FN) attended the Gathering over the 2 days.

Topics to be Discussed: LL58FN Request for Meeting
Ervin Jr. Waboose of Long Lake #58 First Nation (LL58FN) responded to the email from the Webequie Supply Road (WSR) Project team that was sent on March 17, 2025, regarding the rescheduled community virtual information session for round 4 part 2 for LL58FN. Ervin asked if he could meet with the team in person to get a better understanding of the WSR Project and to meet the team in person.

Contact Date: Mar 20, 2025 14:51 Method: E-mail
Topics to be Discussed: LL58FN Meeting Request
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team sent an email to Ervin Jr. Waboose of Long Lake #58 First Nation (LL58FN) to thank him for his email on the WSR virtual session. Don indicated that he worked for AtkinsRealis and that the firm is currently doing environmental assessment work on the project for Webequie First Nation. Don noted that he met Ervin in the breakout room for the Northern Road Link (NRL) Project at the Three Road Projects Gathering in Thunder Bay a few weeks prior and that Michael asked Don to respond to the email. Don indicated that the team could visit the community in person whenever it is convenient for the community and asked for Ervin to provide some possible dates. Don asked if the meeting would be with Chief and Council, the community, or with Ervin himself. Don thanked Ervin for this interest in the project and looks forward to meeting with Ervin in the upcoming weeks.

Contact Date: Mar 21, 2025 09:04 Method: E-mail
Topics to be Discussed: LL58FN Meeting Request
Ervin Jr. Waboose of Long Lake #58 First Nation (LL58FN) responded to the email from Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project team indicating that Don had met with his dad Ervin Waboose and he didn't meet Don. Ervin Jr. indicated that he would keep Don in his email list if he has any questions and thanked him.

09:08
Don thanked Ervin for letting him know and indicated that he is available anytime they would like to talk or meet.

Contact Date: Mar 24, 2025 13:00 Method: Indigenous Community Meeting
Topics to be Discussed: Virtual Information Session Round 4 Part 2
The Webequie Supply Road consultation team conducted a virtual community meeting on the Zoom platform with Long Lake #58 First Nation (LL58FN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 2 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment. After the effects assessment discussion, potential effects and associated mitigation measures were explained using examples from geology, terrain and soils and fish and fish habitat. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from LL58FN were in attendance.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Judy Desmoulin of Long Lake #58 First Nation (LL58FN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road
michael.fox@supplyroad.ca

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Don Parkinson, Consultation Lead, SNC-Lavalin Inc.

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Long Lake #58 IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Long Lake #58 and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Long Lake #58 land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Long Lake #58 First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Long Lake #58 First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Long Lake #58 First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Long Lake #58 First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Judy Desmoulin,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Long Lake #58 First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Long Lake #58 First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Long Lake #58 First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Judy Desmoulin,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Long Lake #58 First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

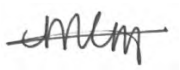
Next Steps

In order to confirm that Long Lake #58 First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

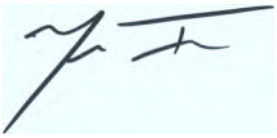
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

April 1, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Socio-Economics. This upcoming week's session is: **WSR Presents: Socio-Economics.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 6th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to brianna.patrick@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
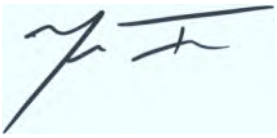
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

WEBEQUIE SUPPLY ROAD (WSR) PROJECT

Socio-Economic Study Plan
Fact Sheet

What is the primary purpose of the Socio-Economic Study Plan?

To characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) as a result of the construction and operation/maintenance of the WSR. Provide recommendations for minimizing negative socio-economic effects and enhancing beneficial effects of the Project.

What are socio-economics?

Studying socio-economics provides information about current jobs, income, education and housing conditions in a community.

What kind of information is going to be gathered?

- Community values;
- Community demographics (age, gender, marital status, education, labor force activity, health, etc.);
- The type of access each community has to education, jobs, or transportation; and
- Well being and safety.

Who is the information being gathered from?

- The 22 Indigenous communities that have been identified as the ones whose established or asserted Aboriginal and Treaty rights may be adversely affected by the Project and/or may have interests in the project.

WSR240-WEB-PR-FS-0016 Web-Socio Economic Fact Sheet-English-website-2022-04-26

*The Project Team will respect protocols and work with each community to understand how the information will be transferred, stored, and applied, and will be protected and kept confidential.

How is the information on community socio-economics being collected?

Primary information will be collected from Indigenous communities:

- A socio-economic survey using Survey Monkey, which will be sent by e-mail/letter;
- Key informant interviews with Chief and Councils, band administration staff, social service providers, healthcare providers, and knowledge keepers; and
- Collection of Indigenous knowledge through engagement activities.

Secondary information will be collected and reviewed:

- Published data from government websites, Indigenous community websites, municipal websites, and other open-source data. This information will be used to identify community demographics, community infrastructure, community social services, etc.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Judy Desmoulin,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Long Lake #58 First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

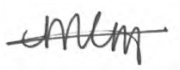
Next Steps

In order to confirm that Long Lake #58 First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist

Encl.
Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

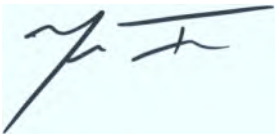
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks

Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

May 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on wildlife and species at risk. This upcoming week's session is: **WSR Presents: Wildlife and Species at Risk.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 18th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. June 24, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on cultural heritage This upcoming week's session is: **WSR Presents: Cultural Heritage.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 29th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

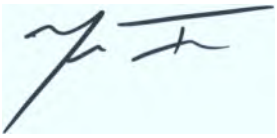
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

July 4, 2022

Dear Chief Desmoulin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 18 between 12pm and 1:30pm** for Long Lake #58 First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZUrfuyuqD4uGt2OD3KMUFa2PXJXo6FLau2z.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 816 9566 5409 & Passcode: 854109.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/longlake58/.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

CC: Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:

August 3, 2022

Dear Chief Desmoulin,

We hope that this letter finds you and your community well.

Thank you for expressing interest on January 20, 2022 in participating in the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project.

As you may know, Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Long Lake #58 First Nation has been determined ineligible to receive participant funding to participate in the IKLRU Program by the Province of Ontario. Ontario came to this decision based on their initial assessment that your community does not appear to have constitutionally protected Aboriginal and/or treaty rights that may be adversely affected by the proposed WSR Project. However, Ontario remains open to reconsider this decision, if Long Lake #58 First Nation can provide information available within the community as it relates to any Aboriginal and/or treaty rights that may be affected in the area near the proposed WSR Project. This information

could include: transcripts of oral history; values or other mapping; historical research; and secondary sources the community may have gathered that can help demonstrate whether your community exercises Aboriginal or treaty rights in the vicinity of either proposed project.

We encourage you to contact Ontario if you wish to have your eligibility to receive participant funding reconsidered. Please let us know if there is any way we can offer our support throughout this process.

If you are interested in learning about the IKLRU Program,we would like to meet with you and your team to discuss the scope of the IKLRU Program and how it will be carried out in terms of the study area, valued components, criteria and indicators, and community participation. We are available to meet and discuss the IKLRU Program in detail at your convenience, and in any method that you and your community prefers, either in-person or virtually. Please inform on how you wish to proceed at your earliest convenience.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project website also has various informational videos, communication materials and project updates. Please visit: https://www.supplyroad.ca/

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

P.O. Box 609
Longlac, ON
P0T 2A0

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

December 14, 2022

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON
P0T 2A0

Dear Chief Desmoulin:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status indicates that it has been successfully delivered to your community on November 3, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON
P0T 2A0

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

May 2, 2023

Dear Chief Desmoulin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 15th from 2:00pm-3:00pm EST** for Long Lake #58 First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/83305675945.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 833 0567 5945.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/longlake58/.**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

At any time, you can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

WSR240-WEB-PR-LT-0524 Web-WSR Letter Re Virtual Community Info Session LL58FN-2023-5-02

May 3, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Analysis of Alternatives- Multiple Accounts Analysis - What is it?**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, May 9th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

May 17, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, May 24th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 6, 2023

Dear Chief Desmoulin,

We hope that this letter finds you and your community well.

Thank you for expressing interest on January 20, 2022 in participating in the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project.

As you know from our previous correspondence, Webequie First Nation is the proponent of the WSR Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Long Lake #58 First Nation has been determined ineligible to receive participant funding to participate in the IKLRU Program by the Province of Ontario. Ontario came to this decision based on their initial assessment that your community does not appear to have constitutionally protected Aboriginal and/or treaty rights that may be adversely affected by the proposed WSR Project. However, Ontario remains open to reconsider this decision, if Long Lake #58 First Nation can provide information available within the community as it relates to any Aboriginal and/or treaty rights that may be affected in the area near the proposed WSR Project.

We encourage you to contact Ontario if you wish to have your eligibility to receive participant funding reconsidered. Please let us know if there is any way we can offer our support throughout this process.

We want to learn more about your community from your perspective on a range of topics, including:

- Community history
- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests in the area, and ensuring they are protected.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 19, 2023

Dear Chief Desmoulin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 31st between 12:00pm-1:00pm EST** for Long Lake #58 First Nation, where there will be a second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/83456317743.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 834 5631 7743**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/longlake58/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:

August 9, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

November 6, 2023

Dear Chief Desmoulin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We have re-scheduled and will be offering a community information session, via Zoom, on **Monday, November 20th from 12:00pm-1:00pm EST** for Long Lake #58 First Nation, where there will be the second part of a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87427209017.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: 862 5790 7952.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/longlake58/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca** Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

WSR240-WEB-PR-LT-0582 Web-WSR Letter Re Virtual Community Info Session LL58FN-2023-11-06

Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

January 25, 2024

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON P0T 2A0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Minimizing Project Impacts.**

The livestreaming event is scheduled for **February 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON
P0T 2A0

Dear Chief Desmoulin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates that it has been delivered to your community as of January 31, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

Information on existing conditions is used to provide a baseline understanding of the valued components of the community. Potential effects of the Project on valued components will be assessed by comparing baseline conditions to those expected to result from the construction and operation and maintenance of the Project. This information is preliminary at this time, and it has been prepared with information that is known specifically for Long Lake #58 First Nation. This is a living draft document that has yet to be reviewed and validated by the Community.

Webequie First Nation is the proponent of the Project. The Project Team led by Webequie First Nation is striving to gather Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree) and Métis Indigenous Knowledge as it relates to the Project and to help inform the socio-economic baseline. This document will be continuously updated when information from the Long Lake #58 First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources and capacities of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trust.

Webequie First Nation is an Anishinaabemowin Tawin (community) located in Treaty No. 9 territory, about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (the good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation, like many Indigenous Nations and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' socio-economic data because Webequie First Nation, the proponent for the Project has been striving for Mino Bimaadizwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

NOTES
DISCLAIMER

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2.

Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the Land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern tip of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established the constitutional basis for future treaty negotiations and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claims staking procedures and prospectors' licenses providing exclusive rights to stake claims and work upon Crown lands.
Ontario Registered Trapline System, 1946	The Registered Trapline System imposed exclusive ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP was mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada (TRC), 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR socio-economic baseline are Anishiniimowin, Anishinaabe and Mushkeego First Nations, and Métis Peoples. First Nation traditional territories cover the lands in the study areas. A number of First Nations in the RSA are located north of the provincial highway system, and accessible only by air and winter roads. Other First Nations, and the Métis community, located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850.

Long Lake #58 First Nation is located 250 km northeast of the City of Thunder Bay, 30 km east of Geraldton in the Municipality of Greenstone, and 370 km south of Webequie First Nation. It neighbours the community of Longlac, Ontario along Highway 11.

The community is politically affiliated with the Matawa First Nations Management Tribal Council and the Anishinabek Nation provincial territorial organization (Matawa First Nations, 2020a).

Long Lake #58 First Nation is situated within the census District of Thunder Bay.

Long Lake #58 First Nation has a Chief and twelve Councillors, with an *Indian Act* electoral system. The next election is scheduled for January 27, 2026 (CIRNAC, 2023).

2.2 Community History

Long Lake #58 First Nation traditional territory is situated along the northern shores of Long Lake. At the time of the treaties in the area, the community existed in the area known as the height of land and at the time, Long Lake drained to Kenagami River which flows into the Albany River. Unlike Ginoogaming First Nation also situated on Long Lake, Long Lake #58 was considered part of the Robinson Superior Treaty of 1850. The community maintains that it was never a signatory to this treaty (Matawa First Nations, 2024). In 1937, work began on the Long Lake diversion, where the upper watershed of the Kenagami River, which connects to the Albany River, was dammed, in order to direct flow, and a reliable source of pulp wood, from the area and through a cut channel south into Terrace Bay. This was a Great Depression era project that was developed to attract pulp mill jobs to the area.

Long Lake #58 First Nation has been located on a one square mile tract of land since 1905. Long Lake #58 First Nation never signed a treaty with the Crown (Long Lake #58, 2023a). Long Lake #58 First Nation members have been important contributors to the creation of Ginoogaming and Aroland First Nations (Long Lake #58, 2023a). Expropriation in favour of the railway and highway has significantly decreased the size of Long Lake #58's land. The development of hydroelectricity in the area led to flooding that eroded even more of their land (Long Lake #58, 2023a). In 2020, 1,690 ha were added to the reserve under the federal Additions to Reserves policy which includes mineral resources and mining potential (TbnewsWatch Staff, 2020).

DRAFT

2.3 Community Values and Aspirations

In 1990, members of Long Lake #58 First Nation blocked the Canadian National Railway line running through their reserve to bring attention to the Oka crisis and to the fact that the community's traditional lands have bever been the subject of treaty negotiations with the Crown (Hall, 1991). In 2016, Long Lake #58 First Nation initiated a revenue sharing study that includes an in-depth analysis of the revenue sharing market for the Ring of Fire and development revenue sharing models that will provide a basis for negotiating revenue sharing agreements with Ontario for mining initiatives (Long Lake #58, 2023b). In 2017, Long Lake #58 First Nation developed a Land Code that provides authority over land management to Long Lake #58 First Nation (Long Lake #58, 2023c).

In 2018, Long Lake #58 First Nation signed a Definitive Agreement with Premier and Centerra Gold Inc. in regard to the development and operation of the Hardrock Project (Premier Gold Mines Limited, 2018). The Agreement "establishes increased clarity regarding Greenstone Gold Mines' ability to develop and Long Lake #58 First Nation's opportunity to benefit from future mining opportunities in the region with the potential to extend the life of this Project beyond its current 15 year lifespan" (Premier Gold Mines Limited, 2018).

Long Lake #58 First Nation asserted their Aboriginal Title Claim to a large tract of land that was withdrawn by the Ontario government from prospecting and mining claim registrations in January 2023 (Northern Ontario Business, 2023).

Long Lake #58 First Nation firmly maintains their control over their traditional territories and emphasizes that approval for projects within their territories cannot be granted by external entities. They expressed concerns about the potential effects on their Aboriginal and Treaty Rights and Interests, particularly with the planned advancement of the Northern Road Link project that directly crosses their traditional territories (Long Lake #58 First Nation, 2020).

Long Lake #58 First Nation has expressed their disappointment and frustration regarding the Project, and their keenness to be engaged in the consultation process and their understanding of Webequie First Nation's transportation needs. However, their current lack of resources and capacity hinders their ability to participate fully in the EA/IA process (Long Lake #58 First Nation, 2020).

DRAFT

SOCIAL ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools to assess socio-economic conditions in communities, as these data can identify vulnerable groups, the effects on vulnerable population groups such as women, disabled persons, Elders and youth, segments of the population that will either benefit or be negatively impacted (directly or indirectly) by the Project, and barriers to participation for local under-represented groups. The existing conditions of population and demographics are described in this section using the following indicators using Census data:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into existing socio-economic conditions where the Project is being considered. The information is to be used in the assessment of potential effects of the Project and to develop strategies to mitigate any negative effects.

The Thunder Bay District has the largest population of communities the Regional Study Area (RSA) considered for the study and is projected to grow between 2021 to 2043, from 146,862 to 150,498. The Thunder Bay District population identifies primarily as non-Indigenous with just 16% of the population identifying as Indigenous. Most households in the Thunder Bay District speak English in their homes. The Thunder Bay District has the highest percentage of immigrant residents in the RSA at 8%.

Long Lake #58 First Nation is one of the 72 indigenous communities located within the census District of Thunder Bay.

The following section provides an overview of population and demographics at a District level.

3.1.1 Population Overview

The 2021 Census included, for the first time, a question on self-identified gender and added “at birth” to the gender question, which enabled cisgender, transgender and non-binary individuals to report their gender (Statistics Canada, 2023).

Table 3-1 presents the forecasted population of the Thunder Bay District for the period 2021 to 2043, broken down by self-identified gender. Population trends by self-identified gender in Thunder Bay District are summarized as follows:

- Over the projection period both the female and male population are forecast to increase;
- Between 2016 and 2043 the male population is forecast to increase from 72,325 to 76,553, a 5.8% increase;
- Between 2016 and 2043 the female population is forecast to increase from 73,725 to 73,995, a 0.4% increase; and
- Between 2016 and 2043, the distribution of the male population is forecast to increase from 49.5% to 50.9% and the female population is forecast to decrease from 50.5% to 49.2%.

DRAFT

Table 3-1: Population Forecast by Self-Identified Gender, Thunder Bay District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	146,050	100%	72,325	49.5%	73,725	50.5%
2021	146,860	100%	73,090	49.8%	73,775	50.2%
2028	148,002	100%	74,175	50.1%	73,845	49.9%
2033	148,822	100%	74,959	50.4%	73,895	49.7%
2043	150,478	100%	76,553	50.9%	73,995	49.2%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-2 presents forecasted population for the Thunder Bay District over the projection period by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in the Thunder Bay District are summarized as follows:

- The 0 – 14 years and 15 – 64 years age groups are both forecast to decline over the projecting period while 65 years and over are growing;
- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 21,845 to 20,709, a 5.2% decrease;
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 95,930 to 81,584, a 15% decrease; and
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 28,270 to 56,522, a 99.9% increase.

Table 3-2: Population Forecast by Age Group, Thunder Bay District (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	146,045	100%	21,845	15%	95,930	66%	28,270	19%
2021	146,865	100%	21,630	15%	93,095	63%	32,140	22%
2028	149,063	100%	21,333	14%	89,266	60%	38,464	26%
2033	151,480	100%	21,123	14%	86,628	57%	43,729	29%
2043	158,814	100%	20,709	13%	81,584	51%	56,522	36%

3.1.2 Indigenous Identity

Table 3-3 presents the population of the Thunder Bay District by Indigenous identity in 2021. Indigenous identity of the Thunder Bay District population is summarized as follows:

- 84.1% of the population identifies as non-Indigenous; and
- The majority of the population that identifies as Indigenous identifies as First Nations at 12.6% of the population, followed by Métis (3.3%). No respondents identified themselves as Inuit.

DRAFT

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Thunder Bay District (2021)

Indigenous Identity	Count	Distribution
First Nations	18,115	12.6%
Métis	4,690	3.3%
Inuk	30	0%
Non-Indigenous	121,000	84.1%
Total	**143,835**	**100%**

3.1.3 Languages

Table 3-4 presents the languages spoken most often in the home within the Thunder Bay District in 2021. Languages spoken by the Thunder Bay District population in 2021 are summarized as follows:

- The majority of homes in the Thunder Bay District speak English while at home at approximately 96%;
- Indigenous languages are spoken most often at home in 0.3% of homes; this category includes 39 Indigenous languages; and
- French and other non-official languages make up the remaining 3.8% of homes at 2.9% and 0.9%, respectively.

Table 3-4: Language Used Most Often at Home, Thunder Bay District (2021)

Language	Count	Distribution
English	137,220	95.9%
Other Non-Official Languages	4,130	2.9%
Indigenous Languages	1,350	0.9%
Total	**375**	**0.3%**

DRAFT

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of Thunder Bay District residents in 2020. Mobility status refers to the status of a person's place of residence on Census Day in relation to their place of residence on the same date one or five years earlier (Statistics Canada, 2022a).

Residents are categorized as "non-movers" or "movers". Persons who, on Census Day, lived in the same residence as they did on the same date one year or five years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did one year, or five years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Thunder Bay District is summarized as follows:

- 89.2% of residents were identified as "non-movers"; 49.8% (63,510) of which were male and 50.2% (64,125) female; and
- "Movers" accounted for 10.8% of the population, 50.1% (7,775) of which were male and 49.9% (7,750) female.

Table 3-5: Mobility Status of Residents, Thunder Bay District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	127,640	89.2%	63,510	89.1%	64,125	89.2%
Movers	15,525	10.8%	7,775	10.9%	7,750	10.8%

DRAFT

3.2 Housing and Accommodations

Housing and accommodations is an important issue in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following section provides an overview of population and demographics at a District level.

In general, the Thunder Bay District has 72,510 dwellings, 89% of which are occupied by usual residents. A private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2022a). Across the District approximately 75% of homes are owned, and the remainder are rented. Under 2% of dwellings are considered government or band housing. Over 60% of the dwellings are occupied by 1 to 2 persons and 30% have 8 or more rooms. Less than 10% of dwellings have been constructed over the past two decades. Nearly all dwellings are considered suitable based on household size and less than 10% are in need of major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

3.2.1 Housing Characteristics

Figure 3-1 presents the total private dwellings and private dwellings occupied by usual residents in the Thunder Bay District for 2021. Private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 72,510 total private dwellings in the Thunder Bay District as of 2021; and
- Of the 72,510 private dwellings, 64,601 (89.1%) are occupied by usual residents.

Figure 3-1: Thunder Bay District – Total Private Dwellings and Occupied Private Dwellings, 2021

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-7 below presents the total number of occupied dwellings for the Thunder Bay District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of occupied dwellings are classified as single-detached home at 71.6%;
- Apartments make up 21% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.2%.

DRAFT

Table 3-7: Total Occupied Private Dwellings by Structural Type in Thunder Bay District (2021)

Structural Type	Count	Distribution
Single-detached house	46,220	71.6%
Semi-detached house	8,495	13.2%
Row house	2,575	4%
Apartment or flat in duplex	2,500	3.9%
Apartment in a building that has fewer than five storeys	2,290	3.5%
Apartment in a building that has five or more storeys	1,715	2.7%
Other single-attached house	660	1%
Moveable dwelling	140	0.2%
Total	**64,595**	**100%**

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Thunder Bay District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings in the Thunder Bay District are owned at 72% followed by rented at 26.7%; and
- 1.3% of private dwellings are considered to be provided by the local government or band housing.

Table 3-8: Private Dwellings by Tenure in Thunder Bay District (2021)

Tenure	Count	Distribution
Owner	46,135	72.0%
Renter	17,135	26.7%
Dwelling provided by the local government, First Nation or Indian band	805	1.3%
Total	**64,075**	**100%**

DRAFT

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Thunder Bay District. Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Thunder Bay District in 2021:

- The majority of households are occupied by two persons at 36%; and
- The least number of households are occupied by five or more persons at 6%.

Table 3-9: Number of Households by Household Size in Thunder Bay District (2021)

Household Size	Count	Distribution
1 person	21,265	33%
2 persons	23,555	36%
3 persons	8,885	14%
4 persons	7,185	11%
5 persons or more	3,715	6%
Total	**64,605**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-10 below presents the number of rooms per household in Thunder Bay District in 2021:

- The majority of households in the Thunder Bay District consist of 8 or more rooms at 29.1% followed by 1 to 4 rooms at 23%; and
- The least number of households are comprised of 7 rooms at 14.1%.

Table 3-10: Number of Households by Number of Rooms per Household in Thunder Bay District (2021)

Household Size	Count	Distribution
1 to 4 rooms	14,860	23.0%
5 rooms	10,945	16.9%
6 rooms	10,835	16.8%
7 rooms	9,135	14.1%
8 or more rooms	18,825	29.1%
Total	**64,600**	**100%**

DRAFT

3.2.3 Housing Conditions

The following subsections describe housing conditions including the number of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and conditions of dwellings for Thunder Bay District.

Table 3-11 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Thunder Bay District:

- Dwellings constructed during the period of 1960 or before is the largest group with 35.3% of private dwellings being built during this period;
- The four periods covering 2001 to 2021 are nearly evenly distributed and comprise 9.7% of occupied private dwellings;
- 90.3% of the occupied private dwellings in the Thunder Bay District were constructed during or prior to 2000; and
- Over the last two decades, 6,290 dwellings were constructed which accounts for less than 10% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Thunder Bay District (2021)

Construction Period	Count	Distribution
1960 or before	22,790	35.3%
1961 to 1980	21,420	33.2%
1981 to 1990	7,930	12.3%
1991 to 2000	6,165	9.5%
2001 to 2005	1,625	2.5%
2006 to 2010	1,575	2.4%
2011 to 2015	1,570	2.4%
2016 to 2021	1,520	2.4%
Total	**64,595**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-12 below presents the suitability of occupied private dwellings in Thunder Bay District in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- In 2021, 3.2% of the occupied private dwellings in the Thunder Bay District were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Thunder Bay District (2021)

Suitability	Count	Distribution
Suitable	62,560	96.8%
Not suitable	2,040	3.2%
Total	**64,600**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-13 below presents the condition of the private dwellings in Thunder Bay District in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 8.7% of occupied private dwellings in the Thunder Bay District were categorized as requiring major repairs.

DRAFT

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Thunder Bay District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	58,965	91.3%
Major repairs needed	5,640	8.7%
Total	**64,605**	**100%**

3.3 Community Services

Community services in Long Lake #58 First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care).

Community Services information for Long Lake #58 First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal on social, community, health and government services in northern Ontario.

3.3.1 Family Services

3.3.1.1 Family Services

Long Lake #58 has a health centre that provides medical care, as well as health awareness education workshops. It coordinates clinics for diabetes, immunization, sexual health and communicable diseases. The centre also partners with Dilico Anishinabek Family Care and Matawa First Nations Management to offer local health programs.

As a partner with the community, Dilico Anishinabek Family Care's goal is to find better pathways to healing and well-being by caring for children and families, and the communities where they live. It was designated under the Children and Family Services Act as a Native Children's Aid Society. The Dilico Integrated Model of Care brings together a wide range of services and programs to support children, youth, and families to live their good life – physically, emotionally, mentally and spiritually. It offers services, rooted in culture, that address diverse issues related to child welfare, mental health & addictions, and primary health.

Child Welfare Services at Dilico work to promote and enhance family strengths to verify that the health, safety and well-being of Anishinabek children and families are upheld and protected. With a focus on prevention, early intervention and protection, and in partnership with families and communities, children are cared for with respect for their cultural background and overall quality of life. Since designation on April 1, 1995, Dilico's child welfare program has used traditional teachings, wisdom and practices of customary care.

In 2011 – 2012, several Elders gathered from the Robinson-Superior Treaty area and named the customary care model Mikinaak, which means turtle in Ojibway. The teachings and strength of the turtle pushed the use of customary care services at Dilico to the next level of cultural competency and relevancy for Indigenous children, families and communities. In 2012, with the support of the Elders and the First Nation community's knowledge and skills, a defined approach was taken to address child protection matters. Frequent case conferencing and providing supports to the entire family led to more children staying at home with their caregivers. The overall concept focused on healing instead of apprehension.

Dilico continues to follow the Mikinaak Model of Care, utilizing the wisdom and strength and a guided culturally-appropriate response to child protection matters (Dilico, 2021a).

DRAFT

3.3.1.2 Family Well-Being Program

The Family Well Being Program is an Anishinabek Nation/ Union of Ontario Indians (UOI) initiative that aims to support each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improve the overall health of communities. Its activities and programs include revitalizing Native languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counselling and child/ youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events (211 Ontario North, Long Lake 58 First Nation, 2023a).

3.3.1.3 Social Services

The Social Services program provides similar services to Indigenous peoples as those provided by Service Ontario/ Service Canada to non-Indigenous peoples. It also provides assistance and advisory services with issues relating to Canada Pension Plan (CPP), Old Age Security (OAS), Workplace Safety and Insurance Board (WSIB) and Employment Insurance. Members of Long Lake #58 First Nation that are 16 to 65 years of age can access these services (211 Ontario North, Long Lake 58 First Nation, 2023b).

Other services and programs offered include:

- Community Liaison and Development;
- Digital skills and Internet café;
- Employment and Training;
- Homemakers;
- Ontario Works; and
- Work placement.

3.3.1.4 Home for Good Program

The Home for Good Program identifies individuals experiencing homelessness, or at risk of becoming homeless, assesses their needs, and places them into housing with culturally appropriate supports and critical time intervention that addresses many aspects of vulnerability (i.e., mental health crises, housing instability and justice system involvement), while fostering resilience and connection with resources in employment, education and training domains (Dilico, 2021b).

3.3.2 Child Care and Youth Programs

3.3.2.1 Child and Family Support Program

In partnership with Dilico Anishinabek Family Care, the Child Care and Family Support Program delivers childcare and protection services and family support services to community members (211 Ontario North, Long Lake 58 First Nation, 2023c).

Prevention Services offered as part of the Program include:

- Provides one-on-one counselling in areas such as bullying;
- Educates children, families and community about rights and responsibilities under the Child and Family Services Act;
- Advocates on behalf of clients and their rights in regard to the legal system;
- Offers a variety of parenting programs;
- Teaches parenting skills and assisting children through difficult times;
- Develops and administers healthy social and recreational programs for families;

DRAFT

- Hosts community forums to address issues such as youth struggling with problematic substance use, inadequate housing, schooling problems and after school activities;
- Organizes traditional healing circles with Elders for women and youth;
- Provides information sessions about understanding substance dependency and resulting family violence, and overcoming oppression by understanding cultural realities; and
- Provides referral services to local and outside service providers including treatment and healing centres.

Customary Care/Foster Care is also offered as part of the program and it:

- Provides assistance with voluntary/customary care placements;
- Provides support and counselling services to children in care;
- Provides consultation and advertising in areas relating to customary care and foster care procedures; and
- Provides preventative services including awareness on child welfare matters including roles and responsibilities of the customary care/ foster care worker.

3.3.2.2 Youth Outreach Program

The Youth Outreach Program provides community-based intervention to assist youth 12 to 24 years of age living in at-risk neighbourhoods. The Program supports youth in their capacity to make healthy life choices and promotes the development of skills and civic participation, including community and peer leadership (Dilico, 2021b).

Service Overview:

- Direct engagement with youth 12-21 years of age that are living on the streets;
- Youth Outreach Workers work in partnership with families, educators and community programs;
- Not intended to be the primary source of engagement; and do not provide crisis intervention or transportation; and
- Intended to reduce risk factors; lack of school engagement, anti-social peer group associations, low community attachment, lack of positive relationships with supportive adults, lack of services.

3.3.2.3 Healthy Babies Healthy Children

The Healthy Babies Healthy Children Program aims to support parenting and promote healthy child development for Long Lake #58 First Nation families with children under 6 years old, as well as Indigenous children at risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care, organizes prenatal classes, and operates a children's library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre- and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child's early years to offer development guidance and referrals to other programs and services (211 Ontario North, Long Lake #58 First Nation, 2023c).

3.3.2.4 School-Based Intensive Treatment Services

The Dilico administered School-Based Intensive Treatment Service provides a strength-focused approach to mental health support and prevention services that address the needs of youth identified as experiencing difficulty functioning in a regular classroom environment due to social, emotional or behavioural concerns (Dilico, 2021b).

Service Overview:

- Program runs from September to June of each year; youth attend daily;
- Use of effective, evidence-based practices;
- Assessment /treatment/ behavioural programming/consultation and follow-up;
- Partnership with the Thunder Bay Catholic District School Board for academic programming; and
- Support of transition back to community school.

DRAFT

3.3.2.5 Family Preservation Services

The Family Preservation Services Program provides supportive, intensive, short-term home-based services to families with children/youth up to 18 years old, who are experiencing difficulties functioning as a family unit and/ or children experiencing serious behavioural issues. The entire family must be willing to participate in the program to enhance the family's strength (Dilico, 2021b).

Service Overview:

- Services for approximately 4-6 months with direct access to workers;
- Provides effective, evidence-based practices;
- Assessment;
- Culturally based parenting strategies;
- Helps families develop skills in effective parenting, behaviour and anger management, problem solving and communication; and
- Assists with accessing other support services.

3.3.2.6 Housing Outreach Program-Collaboration (HOP-C)

The HOP-C Program provides wrap around housing and mental health supports for youth who are exiting homelessness or are at risk of being homeless (Dilico, 2021b).

- Case management;
- Cultural wellness supports;
- Counselling; and
- Peer mentorship.

3.3.2.7 Infant Child Development Services

The Infant Child Development Services Program provides an integrated approach to infant and young child development in a family-centred intervention that is responsive to parent/ caregivers' strengths, competencies and priorities (Dilico, 2021b).

Service Overview:

- Home Visits;
- Screenings and Assessments (i.e., Fair Start);
- Individual Treatment Plans based on the family's vision;
- Therapeutic Play Sessions with children;
- Triple-P Positive Parenting Program;
- Advocacy/work with other professionals to provide support needed; and
- Circle of Security Programming.

3.3.2.8 Native Child & Family Services

Native Child and Family Services provides in-school based, client family or community setting services to assist youth who are experiencing issues related to historical trauma, addictions, suicide, sexual and physical abuse to strengthen the ability of youth to function effectively in their homes, school and community. The Native Child & Family Worker is based at the Dennis Franklin Cromarty High School (Dilico, 2021b).

DRAFT

3.3.2.9 Osh-ki-niig Mash-ka-zii-win

Osh-ki-niig Mash-ka-zii-win is a voluntary, intensive, residential treatment program lasting up to 8 weeks for youth from 5-17 years of age with longstanding mental health and behavioural problems and who have been assessed as high risk (Dilico, 2021b).

Service Overview:

- Service is guided by the 7 Sacred Teachings; Wisdom, Love, Respect, Bravery, Honesty, Humility and Truth;
- Strength-Based Approach;
- Parental, caregiver involvement required;
- Land-based and treatment-focused activities that promote physical, social and cultural benefits;
- In partnership with the Thunder Bay Catholic District School Board, 3 hours of educational instruction are provided each day; and
- Planned discharge from an out-of-home service to support successful transitions.

3.3.2.10 Stop Now and Plan (SNAP®) Services

SNAP is a proven program that teaches children with behavioural problems and their parent/caregiver(s) how to make better choices “in the moment”. The primary goal of SNAP® is to help children to stop and think before they act and keep them in school and out of trouble (Dilico, 2021b).

Service Overview:

- For youth ages 6 to 11 who are experiencing serious behavioural problems at home, at school, and/or with persons in authority;
- Suitable for children with multiple risk factors and challenges (e.g., lower grades, dropping out of high school, mental or physical health issues) and that are at a greater risk of criminal/ violent behaviour;
- Evidence-based model; and
- Supports the improvement of parent/caregiver-child relationships by teaching effective parenting/ caregiving skills.

3.3.2.11 Day Care Centre

Long Lake #58 First Nation operates a licensed daycare centre that offers a variety of activities to enhance the spiritual, intellectual, emotional, physical and social development of children. It also provides a variety of school readiness programs and 2 snacks and a hot lunch daily. It also incorporates Native cultural programs with the daily community-based programming and offers full day and part-time programs for toddlers and preschoolers, as well as before/ after school and lunch program.

The eligibility for admission for the Day Care Centre is as follows:

- Toddlers: children 18-30 months of age;
- Preschool: children 30 months - 6 years of age; and
- Before/after school and lunch program: children up to 12 years of age.

It also administers the Indigenous Head Start Program at this location (211 Ontario North, Long Lake 58 First Nation, 2023d).

3.3.3 Elder Care

Indigenous Services Canada, through the First Nations and Inuit Home and Community Care (FNIHCC) program, provides funding and guidance for Elder care. This program aims to establish home and community care services for

DRAFT

Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services.

The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services (Indigenous Services Canada, 2023).

3.3.4 Health Services

3.3.4.1 Community and Personal Support Services (CPSS)

The CPSS Program, administered by Dilico Anishinabek Family Care provides assistance to Anishinabek people with essential daily activities at home, in the community or in long-term care facilities and hospitals (Dilico, 2021c). Community and Personal Support Workers support seniors, individuals with critical or long-term illness, and persons with disabilities or other personal health barriers with activities such as:

- Homemaking including shopping, meal preparation and cleaning;
- Personal care including bathing, washing, and dressing;
- Speech and language support to on-reserve schools;
- Transportation for medical appointments or errands;
- Palliative care;
- Basic foot care; and
- Respite care.

Individuals who meet the following criteria are eligible for this service:

- Members living in the communities of Fort William, Red Rock (Lake Helen), Biingitiwaabik Zaaging Anishinaabek (Rocky Bay), Pays Plat, Whitesand, Long Lake #58, Ginoogaming, Pic Mobert or Michipicoten First Nations; and
- Members with a child in the care of Dilico who is residing outside of the First Nation but requires additional support services. (Eligibility must be determined through an assessment with a HCC manager).

3.3.4.2 Immunization clinic

This clinic provides inoculations or other measures to members of Ginoogaming First Nation from contracting specific controllable diseases (Northwest Healthline, 2024a).

3.3.4.3 Matawa Regional Crisis Intervention Program

The Matawa Regional Crisis Intervention Program provides free, confidential crisis support and follow-up for Matawa members regardless of residence on a 24 hour / 7 day a week basis. Translation services are also provided. The program also provides the following (Matawa First Nation, 2023a):

- Crisis assessment/ intervention;
- Crisis counselling/ de-briefing;
- Outreach calls through Nodin counselling services;
- Support to family and friends;
- Referrals to professionals;
- Case management/ review; and
- Community awareness/ healing plans.

DRAFT

3.3.4.4 Matawa Safe Sobering Site

The Matawa Safe Sobering Site provides intoxicated youth between the ages of 13 and 21, with a safe, home-like environment to become stabilized before being referred to further mental health or addictions programming (Matawa First Nation, 2023a). The 4-bed site is available to Matawa students on a 24 hour/7 day a week basis. Transportation is available to and from the site if needed, through Matawa On-Call Student Services (8 pm to 6 am daily). Services provided include:

- Safe and supervised detoxification and stabilization support;
- In-House addictions crisis worker and youth residential worker to provide immediate crisis assessment and intervention;
- Referrals to St. Josephs Care Group for addictions case-management and after-care planning; and
- After-care planning and referrals to other community- based programs as needed.

3.3.4.5 Health Centre

Health Services are dedicated to promoting the physical and mental well-being of the community. The Health Centre provides health awareness and counselling, education and prevention workshops. It also coordinates clinics in areas that may include Immunization, Sexual Health and Communicable Diseases. Services also include prenatal and postpartum health care, smoking cessation counselling and First Aid/ CPR courses. It also partners with Dilico Anishinabek Family Care and Matawa Tribal Council to offer local health programs.

Health Services address individual health care needs by providing advocacy on behalf of individual with other health professionals, coordinating one-on-one pre-natal care with the community health nurse, home visits to the sick, Elders, new mothers and persons with health care needs. It also provides assistance with coordinating local and long-distance travel arrangements for medical appointments. Health Centre also provides intake services to determine health care needs of individual, referrals to appropriate health care providers based on information in the intake assessment and education and information about Fetal Alcohol Syndrome and Fetal Alcohol Effects (211 Ontario North, Long Lake 58 First Nation, 2023f).

3.3.4.6 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program aims to provide assistance and support to individuals and families in Long Lake #58 First Nation who are struggling with alcohol and substance use, and gambling issues. This program offers Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides transportation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counselling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to other services such as detoxification and medical assistance (211 Ontario North, Long Lake 58 First Nation, 2023g).

3.3.4.7 Extended Health Benefits

The Extended Health Benefits Program provides a range of health benefits to individuals and families who experience high health costs. The program is open to members of Long Lake #58 First Nation aged 16 to 65 years. Benefits are based on need and may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986 1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Long Lake 58 First Nation, 2023h).

DRAFT

3.3.4.8 Medical Transportation Program

The Medical Transportation Program provides transportation services from/ to Long Lake #58 First Nation Reserve to any medical appointments (doctor, dentist, optometrist, specialist) in Longlac, Geraldton and Thunder Bay. It also provides transportation to medical appointments within the community and provides assistance with making arrangements for any medical appointments out of town such as booking appointments, hotels, and completing applications for mileage compensation. Eligibility for this program is limited to members of Long Lake #58 First Nation who require assistance with transportation to medical appointments due to age or disability (211 Ontario North, Long Lake 58 First Nation, 2023i).

3.3.4.9 Traditional Healing Services

Traditional healing services are offered by Matawa First Nations Management. Mental Wellness Team & Crisis Support Services provide a rapid response to Matawa First Nations communities, families or individuals when they experience crisis. The services include grief/ trauma counselling, cultural support and care coordination. The program's approach is to provide service with a balance of clinical and traditional cultural practices (Matawa First Nation, 2023b).

3.3.4.10 Non-Insured Health Benefits (NIHB) program

The NIHB program is a national program which is designed to support First Nations people in reaching an overall health status that is comparable with Canadians. The program designed to help individuals maintain their health, prevent disease, assist in detecting and managing illnesses, injuries, and disabilities (Matawa First Nation, 2023c). It may cover the costs of some, or all of the following: Dental, Medical Supplies & Equipment, Medical Transportation, Eye & Vision Care, Short-term Crisis Intervention Mental Health Counselling, and Health Benefits outside of Canada.

The NIHB program may provide medically necessary goods and services when they are not covered by provincial or other third-party health plans. Third party health plans are usually provided by private insurance companies through a paid premium by the purchasing individual. The benefits and services of the NIHB Program are often coordinated with other insured health care programs offered in Ontario.

3.3.4.11 Matawa Non-Insured Health Benefits (NIHB) Client Navigator

The Matawa NIHB Client Navigator assists the nine Matawa First Nations and its' members who are clients of NIHB services to provide support, advocacy and coordination of care and services. The program works in collaboration with First Nations health staff, other health care providers, organizations, and institutions to facilitate improved care. The program also assists members to access Jordan's Principle resources (Matawa First Nation, 2023c).

3.3.4.12 Matawa Health Cooperative (MHC)

Incorporated in 2017, the MHC is a Matawa First Nation Management-owned and controlled health co-operative that provides health care services to enhance existing health services to achieve long-term health and wellbeing for all members of the nine Matawa First Nations Management members. It is overseen by a Board of Directors and is a member of the Health Care Co-operatives Federation of Canada. The MHC is community-driven with available services being tailored to individual community's needs. It is the first of its kind in Canada.

The MHC works to incorporate traditional healing and medicines in addressing the holistic health needs of Matawa First Nations community members focusing on the priorities of mental health and addictions, diabetes and chronic diseases. It oversees an Inter-Professional Primary Care Health Team providing direct services in the Matawa First Nations or through telemedicine (Matawa First Nation, 2023d).

DRAFT

3.3.4.13 Children's Oral Health (COHI)

COHI is an early childhood tooth decay prevention program for children 0 to 7 years, their parents/ caregivers and pregnant woman funded by Health Canada. COHI Services include annual screening, fluoride varnish applications, sealants and temporary fillings. A dental hygienist and COHI Aides deliver the program (First Nations Health Authority, 2023).

3.3.4.14 Health Clinic

The Long Lake #58 First Nation health clinic provides inoculations or other measures that prevent community members from contracting specific controllable communicable diseases (211 Ontario North, Long Lake 58 First Nation, 2023e).

Community Health Programs administered by Dilico include:

- Healthy sexuality;
- Prenatal and maternal health;
- Infant and preschool health; and
- School health.

Home and Community Care Services include:

- Nursing (acute and chronic care);
- Discharge planning;
- Physiotherapy;
- Occupational therapy;
- Social work;
- Speech and language pathology;
- Nutritional and dietary counselling;
- School health support;
- Personal support; and
- Care coordination.

This service is available based on following eligibility conditions:

- Individuals are eligible for this service if it is determined that they require professional health services, personal care, adult life enrichment, school health support services or any other community services; and
- Individuals from any of the following First Nations may be eligible for Dilico's Home and Community Care Services: Fort William, Lake Helen, Whitesand, Long Lake #58, Ginoogaming, Pays Plat, Pic Mobert, Michipicoten and Biinjitiwaabik Zaaging Anishinaabek.

3.3.5 Cultural Services

Cultural Services offered by Dilico Anishinabek Family care include (Dilico, 2023f):

- Home Visits: An Elder, along with cultural staff, visit a family at their home for cultural support and traditional counselling.
- Sacred Circles: An Elder facilitates a sacred healing circle to deal with family issues, letting go, grief support, conflict resolution and more.
- Spirit Naming Ceremony: An Elder with the gift of retrieving names gives a spirit name to an individual in ceremony.

DRAFT

- Regalia-Making (Project Funded): Learn to use a sewing machine and the art of creating traditional regalia. The new regalia is feasted in ceremony before the Dilico annual pow-wow from April to June.
- Traditional Healing/ Counselling: One-on-one appointment with an Elder and cultural employee. The Traditional Healer may provide counselling, direction and provision of traditional medicines and use of sacred items; specific gifts are given to the Elder.
- Traditional Parenting: An 8-module program based on Anishinabek teachings, history and parenting practices.

3.3.6 Recreation Department

The Long Lake #58 First Nation Recreation Department is responsible for planning, developing and implementing all social, recreational and special events for members of the community (211 Ontario North, Long Lake 58 First Nation, 2023j). Recreation services and facilities in the community includes community beach, community hall, community sports field, outdoor skating rink, and secondary school gymnasium. It also coordinates and supervises a variety of programs including:

- Annual Christmas party;
- Baseball and soccer games;
- Outdoor skating events;
- Bingo games and community meetings;
- Feasts and community fish fries;
- Annual Pow Wow;
- Little NHL;
- Annual summer fishing derby (Granny Francis Memorial Fish Derby); and
- Annual golf tournament.

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation rates were higher among non-Indigenous youth in Canada compared to Indigenous youth (Statistics Canada, 2021b). However, when comparing First Nation youth living on-reserve to First Nation youth living off-reserve, those that live off- reserve are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

Long Lake #58 First Nation has two schools on-reserve - Migizi Wazisin Elementary School which offers schooling from junior kindergarten to Grade 8 and Migizi Miigwanan Secondary School which offers schooling from Grade 9 to12. Migizi Wazisin Elementary School has approximately 125 students and Migizi Miigwanan Secondary School has approximately 65 students (Long Lake #58 First Nation, 2023). Schools on-reserve provide cultural programs for children which includes outdoor education, land-based activities and seasonal camps (Long Lake #58, 2023). There is a teaching lodge located on school grounds where classes and ceremonies are held through the year.

DRAFT

Matawa Post Secondary provides financial, academic and tutoring support for students to assist in meeting their educational goals (Matawa Education, 2019c).

Long Lake #58 First Nation members can also take part in training and certification courses offered by KKETS (Kiikenomaga Kikenjigewen Employment & Training Services, 2023).

Long Lake #58 First Nation students have the opportunity to take part in Matawa's Education and Care Centre's Outdoor Education Program and Matawa's Education and Care Centre's Elders Program (Matawa Education, 2019a). The outdoor education program is made up of 6 Land-based and Outdoor Learning credits and allows students to connect with the land and water. Activities include (but not limited to) trapping, outdoor skills, camping, canoeing, and fishing (Matawa Education, 2019a). Students travel from one Matawa First Nation to another during this program. The Elder's program supports Elders going into the community to provide support to students with traditional activities such as: smudging, big drum making, hand drum making, drumming, feasts, beading, traditional teachings, storytelling, workshops, traditional medicines, hide tanning, hunting and trapping (Matawa Education, 2019b).

3.5 Emergency and Protective Services

The socio-economic baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

Police services in most Indigenous communities in the Nishnawbe Aski are provided by Nishnawbe Aski Police Services (NAPS), the Anishinabek Police Service (APS) within the Indigenous communities, municipal police services, or the Ontario Provincial Police (OPP). Fire services typically include both volunteer, and community and municipal fire services and departments.

Long Lake #58 First Nation is served via the OPP Greenstone detachment (Northwest Healthline, 2024b).

Long Lake #58 First Nation has a fire department made with members from the community, and fire protection is provided by Longlac Fire Department (211ontario, 2024k).

3.6 Community Infrastructure

The socio-economic baseline includes a description of the following Community Infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in Long Lake #58 First Nation is described in Table 3-14.

DRAFT

Table 3-14: Description of Community Infrastructure in Long Lake #58 First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Town of Long Lac Water Treatment System. ▪ Water Quality: meets health and aesthetic guidelines.	▪ Town of Long Lac. ▪ Municipal Type Agreement.	Connected to Hydro One Zone 7 – Longlac East DS.	Waste disposed of in Longlac landfill.

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2021; Hydro One, 2021; Hydro One 2018; Five Nations Energy Inc., 2021; Wataynikaneyap Power, 2021; Government of Ontario, 2021; 211 Ontario North, 2021.

3.7 Transportation

The socio-economic baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the socio-economic baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, including Long Lake #58 First Nation, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd, 2016).

Many First Nations communities in the Project study areas are reachable only by air, water or winter roads, while other communities, located further to the south, including Long Lake #58 First Nation, have access to the provincial highway network.

3.7.1 Winter Road Traffic Volumes

Long Lake #58 First Nation is connected to the provincial highway system and does not rely on a winter road for accessibility.

3.7.2 Air Transportation Network in Long Lake #58 First Nation

Information is not currently available/section not complete.

3.7.3 Waterways in Long Lake #58 First Nation Traditional Territory

Waterways are an integral part of community life. Waterways have been and continue to be an important socio-cultural and economic part of daily life of Indigenous communities. They connect families and friends and provide an important part of the transportation network.

Long Lake #58 First Nation territories fall within the secondary watershed of Kenogami River and Northeastern Lake Superior (Government of Ontario, 2023). This is understood to include the Kenogamisis/Kenogami/Albany River watersheds, and the Long Lake watershed (Energy East Pipeline Ltd., 2016).

DRAFT

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The socio-economic baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key socio-economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four socio-economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that "well-being" means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people's overall "well-being."

The four socio economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

CWB scores in Long Lake #58 First Nation are described in Table 3-15.

Table 3-15: CWB Index Scores for Long Lake #58 First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	**58**	**40**	**69**	**54**	**71**
First Nations in Ontario	**59**	**38**	**72**	**53**	**70**
Long Lake #58 First Nation	49	24	52	40	79

Source: Indigenous Services Canada, 2019b.

Long Lake #58 First Nation has a low CWB score for education (24), in comparison to First Nations in Canada (40) and First Nations in Ontario (38).

Long Lake #58 First Nation's income score is 40, which is comparable to but below those of First Nations in Canada (54) and First Nations in Ontario (53).

DRAFT

With a score of 52, the Long Lake #58 First Nation score for labour is below those of First Nations in Canada (69) and First Nations in Ontario (72).

Long Lake #58 First Nation has a housing score of 79, which is higher than First Nations in Ontario (70) and First Nations in Canada (71).

With a score of 49, the Long Lake #58 First Nation, overall community well-being and safety score is below that of First Nations in Ontario (59) and First Nations in Canada (58).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments responsible for serving Indigenous communities in Canada (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-16 provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the OPP. The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (Ontario Provincial Police (OPP), 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs.

The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-16: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total crime, rate, 2021*	Total violent crime, rate, 2021*	Total sexual assault, rate, Level 1, 2021*	Total drug violations, rate, 2021*
Nishnawbe-Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224
James Bay, OPP, rural	10,911	3,948	202	348

Note: *Data are reported as rates of 100,000 people.

DRAFT

ECONOMIC ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

4. Economic Environment

4.1 Labour Force and Employment

Indigenous people are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live.

The traditional economy is an important cultural and economic aspect of community life. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for Long Lake # 58 First Nation.

The following section provides an overview of population and demographics at a district level.

4.1.1 Labour Force Characteristics

Table 4-1 presents the forecasted working age population in the Thunder Bay District over the projection period, 2021 to 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada 2017, 2022). The values for 2028, 2023, and 2043 were forecast based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64:

- The working age population is decreasing over the projection period; and
- Based on current growth trends, the working age population is forecasted to decrease by 14,346 between 2016 and 2043, a decline of approximately 15%.

Table 4-1: Projected Working Age Population in Thunder Bay District (2016, 2021, 2028, 2033, 2043)

Year	Total		Total		Total	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	95,930	100%	47,935	50.0%	47,990	50.0%
2021	93,095	100%	46,665	50.1%	46,430	49.9%
2028	89,266	100%	44,943	50.3%	44,331	49.7%
2033	86,628	100%	43,753	50.5%	42,890	49.5%
2043	81,584	100%	41,465	50.8%	40,147	49.2%

Source: Statistics Canada, 2017; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-2 presents the breakdown of the population in the labour force and those not in the labour force for Thunder Bay District in 2021.

DRAFT

Table 4-2: Labour Force Participation in in Thunder Bay District (2021)

Labour Force Participation	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
In the labour force	70,930	100%	36,660	51.7%	34,270	48.3%
Not in the labour force	51,825	100%	24,080	46.5%	27,740	53.5%

Source: Statistics Canada, 2022a.

Table 4-4 presents the number of jobs by 1-digit the National Occupational Classification (NOC[1]) code for 2018 and 2022 in Thunder Bay District.

- Sales and service occupations is the leading job category in the Thunder Bay District with 17,113 jobs in 2022 which accounts for 25.6% of the total jobs;
- The Thunder Bay District has seen an increase in 6 occupational categories between 2018 and 2022 with an overall increase in jobs of 2% over the 4 years; and
- The occupational category with the largest percentage increase over the period was health occupations with a 21% increase.

DRAFT

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

Table 4-4: Thunder Bay District – Occupations by Category (2018 – 2022)

Occupation Categories	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Business, finance and administration occupations	8,931	9,215	284	3%
Natural and applied sciences and related occupations	3,808	4,121	313	8%
Health occupations	6,066	7,320	1,254	21%

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the Land. The knowledge passed on from the ancestors sustain Long Lake #58 identity and way of life.

Table 4-5 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Thunder Bay District for 2021.

- The majority of the population has a certificate, diploma, or degree at 54.2%; and
- 18% of the Thunder Bay District does not have a certificate, diploma, or degree, males make up 51.2% and females account for 48.8%.

Table 4-5: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
No certificate, diploma or degree	22,050	18.0%	11,360	18.7%	10,685	17.2%
High (secondary) school diploma or equivalency certificate	34,135	27.8%	17,035	28.0%	17,100	27.6%
Postsecondary certificate, diploma or degree	66,565	54.2%	32,340	53.2%	34,220	55.2%

4.1.3 Labour Income

Table 4-7 presents the total individual income by group for the population aged 15 and over for 2020 in the Thunder Bay District by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999 with 12.7% and 16.6%, respectively;
- The smallest individual income group for both male and female is $150,000 and over with 3.9% and 1.2%, respectively;
- In 2020, there were 1,615 more females than males with individual incomes; and
- In 2020, 74.8% of females were making under $60,000 while only 61.4% of males were within this group.

Table 4-7: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2020)

Income Group	Total		Male		Female

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in the Thunder Bay District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from the Ministry of Natural Resources and Forestry (MNRF), Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product (GDP)

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Thunder Bay District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 4-10 presents the GDP for the Thunder Bay District between 2016 and 2021 (Statistics Canada, 2022a).

- Between 2016 and 2021 there was an approximate growth in GDP of 4% in the Thunder Bay District; and
- GDP is growing at a constant rate over the period between 2016 and 2021

Table 4-9: Total Household Income Groups for Private Households in Thunder Bay District (2020)

Year	2016	2017	2018	2019	2020	2021	2016 – 2021 Change	2016 – 2021 % Change	Income Group
GDP	4,564	4,575	4,616	4,658	4,700	4,744	180	3.9%	Under $5,000

Source: Statistics Canada, 2022a.

4.2.2 Cost of Living

The cost of living in the Thunder Bay District is considerably lower than other major Canadian cities. The District of Thunder Bay was ranked number 1 out of 227 major urban international cities for affordable housing. According to the 2018 Rental Market Report, renting a two-bedroom in the District costs and average of $1,037 per month, approximately $600 less than Vancouver. A one-bedroom apartment averages $883, 58% less than Toronto (Webster, N.D.).

While Thunder Bay ranks well in comparison to other major Canadian cities, that does not make it affordable. The Market Basket Measure (MBM) threshold for Thunder Bay is $44,300 per year (Krysowaty, 2021). The MBM refers to Canada's official measure of poverty based on the cost of a specific basket of goods and services representing a modest, basic standard of living developed by Employment and Social Development Canada (ESDC). The MBM thresholds represent the costs of specified qualities and quantities of food, clothing, shelter, transportation, and other necessities for a reference family of two adults and two children (Krysowaty, 2021).

Table 4-10 present the number of households spending 30% or more of income on shelter costs for Thunder Bay District in 2021. According to the Canada Mortgage and Housing Corporation (CMHC) housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

- Of the nearly 63,000 owner or tenant occupied dwellings in the Thunder Bay District, 14% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

DRAFT

Table 4-10: Distribution of Households Spending 30% or More of Income on Shelter Costs for Thunder Bay District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	53,940	86%
Spending 30% or more of income on shelter costs	9,045	14%
Total Owner and Tenant Households	**62,985**	**100%**

4.2.3 Economic Development

The Thunder Bay District is a census division in Northwestern Ontario. It is comprised of 34 census subdivisions which includes 18 Indigenous communities. The City of Thunder Bay represents nearly 75% of the Thunder Bay District population. Due to its size, the City of Thunder Bay drives a lot of the economic activity and growth within the District.

The City of Thunder Bay Community Economic Development Commission 2023-2025 Strategic Action Plan states the following action items and economic development activities as well as steps to be taken to achieve them (Thunder Bay Community Economic Development Commission, 2022):

- Grow, expand, and promote the City of Thunder Bay as the regional centre and world leader for mining and forest products services, supply, and manufacturing:
  - Position and market the City of Thunder Bay as the regional hub for services and supplies for northwestern Ontario exploration and mining projects.
  - Attract investment ready projects in manufacturing, mining, commodity processing, agriculture, and energy, promoting the added values of Indigenous partnerships.
  - Support research, innovation and the commercialization of natural resource-based commodities, products, and energy.
- Attract, integrate, and retain a highly skilled workforce focusing on our youth, national and global immigrants, and regional Indigenous communities:
  - Develop a labour attraction and growth plan to meet the current and future needs of employers.
  - Expand immigration attraction and integration services.
  - Work with partners to support Indigenous employment agencies and training organizations.
  - Through City of Thunder Bay's education system attract and retain local and Indigenous youth to enhance our future's workforce.
- Becoming Canada's premier outdoor city, weaving our connectivity to our natural environment to our signature urban culinary and cultural attractions to create memorable leisure, corporate and sport event experiences for visitors:
  - Expand and improve year-round visitor experiences through an increased focus on destination development.
  - Increase the economic impact of tourism through enhanced visitor attraction and retention strategies.
  - Support Indigenous tourism development and promotion.
  - Improve visitor movement through improved wayfinding.
  - Support tourism industry with the tools they needed to start-up, diversify, and expand.
- Drive the growth and progression of the City of Thunder Bay into a safe, welcoming community where people work, live, and play while having access to comprehensive health care, education, and employment opportunities with an affordable, high-quality lifestyle:
  - Make the City of Thunder Bay a place all people want to live and do business.

DRAFT

- Promote the quality of City of Thunder Bay's lifestyle to outside markets to attract new residents, workers, and business.
- Support infrastructure needs of the community through building partnerships and seeking funding assistance for critical projects.
- Using community and Indigenous partnerships, identify initiatives to create welcoming neighbourhoods and public places for business.
- Maximize the City of Thunder Bay's position as the regional centre for health services in northwestern Ontario.

- Be a cornerstone and catalyst for local and regional entrepreneur support to help drive the creation of new business, and higher quality employment opportunities that offer new services and products to markets everywhere:
  - Strengthen succession planning services to address challenges and needs for small business owners.
  - Provide supports to generate new business start-ups and encourage entrepreneurship.
  - Through Indigenous partnerships, expand program development to address Indigenous small business challenges and needs.
  - Build a welcoming community for new and expanding businesses.
  - Enhance newcomer to Canada support systems.

4.3 Business Environment

4.3.1 Local Economy

Long Lake #58 has several small private businesses, including a general store, gas station and restaurant. It is also adjacent to Longlac which provides access to goods and services.

Table 4-11 presents a breakdown of all 21 industries based on 2-digit North American Industry Classification System (NAICS[2]) codes and their presence within the geographical boarders of the Thunder Bay District in 2018 and 2020. Trends of industry presence in Thunder Bay District between 2018 and 2022 are summarized as follows:

- Thunder Bay District is heavily reliant on imports to meet supply chain needs with 40% of purchases being imported.
- For Thunder Bay District, the industry providing the largest number of jobs is public administration;
- As of 2022, there are nearly 4,000 jobs in the construction industry in the Thunder Bay District;
- The Thunder Bay District had the highest total supply chain purchases (approximately $4.9 billion in 2020), while the Kenora District had the lowest (approximately $2.7 billion in 2020);
- The Thunder Bay District had the highest total demand in 2020 (approximately $13.85 billion), while the Kenora District had the lowest (approximately $7.26 billion);
- The industries with the highest growth between 2018 and 2022 include management of companies and enterprises (93%) and professional, scientific, and technical services (24%); and
- 11 of the 21 reported industries saw a decline in jobs between 2018 and 2022.

[2] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

DRAFT

Table 4-12 presents the industry supply chain, the purchases an industry makes from all other industries, in the Thunder Bay District in 2020. This table displays the value and percentage of in-region purchases and imported purchases for 2020 that are summarized as follows:

- 40% of supply chain purchases are made within the Thunder Bay District;
- The industry with the highest percentage of in-region purchases is health care and social assistance at 65%;
- The industry with the lowest percentage of in-region purchases is management of companies and enterprises at 10%; and
- Total supply chain purchases amounted to approximately $4.9 billion in 2020.

Table 4-12: Industry Supply Chain, Thunder Bay District (2020)

Table 4-13 presents the regional requirements, the value of goods and services demanded of the Thunder Bay District by industry in 2020. Regional Requirements show the value of goods/services purchased from an industry (either in or outside the area) in order to meet the needs of the area. The table presents the level of demand for each industry met in-region and the demand met by imports that are summarized as follows:

- Approximately one third of demand for goods and services is met in-region (30.5%);

DRAFT

- There are 4 industries meeting over 60% of demand within region: Other services (except public administration) (64.6%), accommodation and food services (63.7%), utilities (62.3%), and retail trade (62%);
- Only one industry (management of companies and enterprises) meet less than 10% of demand within region; and
- The total demand in 2020 was approximately $13.85 billion.

Table 4-13: Regional Requirements to Meet Demand by Industry in Thunder Bay District (2020)

Industry	In-region Purchases	% In-region Purchases	Imported Purchases	% Imported Purchases	Total Purchases
Agriculture, forestry, fishing and hunting	$93,114,000	50%	$94,071,633	50%	$187,185,633
Mining, quarrying, and oil and gas extraction	$50,631,705	36%	$91,009,263	64%	$141,640,968
Utilities	$72,084,469	59%	$51,040,387	42%	$123,124,856
Construction	$71,960,414	56%	$55,990,777	44%	$127,951,191
Manufacturing	$351,712,883	24%	$1,120,676,153	76%	$1,472,389,035
Wholesale trade	$76,614,421	34%	$148,493,450	66%	$225,107,871
Retail trade	$51,631,093	57%	$38,892,765	43%	$90,523,858
Transportation and warehousing	$174,211,101	49%	$179,560,667	51%	$353,771,768
Information and cultural industries	$64,265,908	40%	$94,714,173	60%	$158,980,081
Finance and insurance	$225,496,277	28.9%	$555,164,399	71.1%	$780,660,676
Real estate and rental and leasing	$178,316,198	28.3%	$452,380,953	71.7%	$630,697,150
Professional, scientific and technical services	$246,697,116	37.8%	$405,923,917	62.2%	$652,621,033
Management of companies and enterprises	$3,141,515	9.4%	$30,325,426	90.6%	$33,466,941
Administrative and support, waste management and remediation services	$127,068,485	36.2%	$223,899,325	63.8%	$350,967,810

DRAFT

Members of Long Lake #58 First Nation conduct their grocery shopping and business affairs in Longlac, which is 5 minutes from the reserve. Long Lake #58 includes a general store within their community (211 Ontario North, 2023l).

4.3.2 Mining, Aggregate and Forestry Activities

Table 4-14 presents industry data for the following 2-digit NAICS[3] industries in Thunder Bay District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction; and
- Agriculture, forestry, fishing, and hunting.

Each industry includes a variety of occupations which include but are not limited to:

- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above 1 indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry declined by 108 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry is above the national average;
- The agriculture, forestry, fishing, and hunting industry declined by 40 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is below the nation average with 0.96 in 2018 and 0.93 in 2022.

Table 4-14: Mining, Quarrying, and Oil and Gas Extraction Industry in Thunder Bay District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	1,262	1,154	-108	(9%)	1.6	1.5
Agriculture, forestry, fishing and hunting	651	611	-40	(6%)	1.0	0.9

DRAFT

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to traditional practices which include lakes and rivers for fishing and trapping corridors and trails for hunting and trapping. Many Indigenous communities rely on traditional practices, such as fishing and hunting as a source of food and income. As such, it is important to identify areas where traditional practices are used, to determine potential effects of the Project on Indigenous communities and their traditional use of lands and resources.

Long Lake #58 First Nation identified the following plants and species as culturally significant in their traditional harvest: cedar, sage, raspberries, sweetgrass, mountain ash, white willow, red willow, yarrow, birch, and balsam fir. Medicinal plants are often gathered along the shoreline of Kenogamisis Lake and the surrounding waterbodies including Nakina and MacLeod Lakes (Stantec, 2017).

Mammals, including moose and birds are hunted along the shores of Long Lake, Kenogamisis Lake and Kenogamisis River (Stantec, 2017). Traditional lands are also reported to include the Kenogamisis/Kenogami/Albany watersheds, as well as the Long Lake watershed. Long Lake #58 First Nation members use watersheds for travel, and support of livelihoods, including hunting, fishing and harvesting berries and medicines.

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas including travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

Travel routes that have been previously identified include a route on the north end of Wildgoose Lake, through the Southwest Arm of Kenogamisis Lake and continuing through Kenogamisis Lake and a route through Long Lake (Stantec, 2017). Members of Long Lake #58 First Nation have also identified cabins near the railway between the Ward of Geraldton and the community of Long Lake, and along the shores of Long Lake. The location of cabins is typically an appropriate distance from sacred sites and near the natural resources being harvested (Stantec, 2017).

Sacred sites are located near the railway, east of Geraldton, along the shores of Long Lake and surrounding the community of Long Lake. Narrows Lake is described as a sacred area. MacLeod Provincial Park and the shores of Kenogamisis Lake were additionally recognized as ceremonial areas (Stantec, 2017).

The Kenogamisis/Kenogami/Albany watersheds, and Long Lake watersheds more generally are considered traditional territory and used for livelihood and cultural activities, trade, ceremonies and leisure (Energy East Ltd., 2016).

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the Project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinabe/ Mushkeego and Métis peoples. “The Anishiniimowin/ Anishinabe/ Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2023). The Métis homelands are also present within the James Bay Treaty area.

The Anishiniimowin/ Anishinabe/ Mushkeego and Métis peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and self-determination and autonomy.

In April 2023, leaders from 10 Treaty No. 9 First Nations announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations’ way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended “to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life” (APTN News, 2023). Mino-Bimaadiziwin translates to “into living a complete, healthy, and good life” which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define on-going rights and obligations on all sides. These agreements set out continuing treaty rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations;
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

DRAFT

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario's total landmass and includes:

> *"that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3." (Crown-Indigenous Relations and Northern Affairs, 2013)*

Treaty No. 9 was signed between the Anishiniimowin/ Anishinabe/ Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and "exceptions for settlement, mining, lumbering, trading or other purposes." (Ministry of Public and Business Service Delivery, 2023).

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which the legal title is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

Long Lake #58 First Nation has a Land Code under the *First Nations Land Management Act* that came into effect in November 2017 (Section 6.7) (Long Lake #58 First Nation, 2023).

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the Public Lands Act (Section 6.6.2).

As described in Section 5, traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to community based land use plans (CBLUPs) initiated by Indigenous communities.

6.5 Road/Transportation Studies

No Road/Transportation Studies were available for review for Long Lake #58 First Nation at this time.

DRAFT

6.6 Provincial Plans and Policies

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with First Nations communities and groups, among other land uses in First Nations areas, traditional and customary use, as well as the potential for permissible use of lands for forestry, tourism, recreation, mineral exploration and mining, renewable energy, access and infrastructure, fire management, and climate change management.

6.6.2 Public Lands Act

The Ontario *Public Lands Act* provides MNRF the authority to manage Crown land. Crown land occupies approximately 87% of all land and water in Ontario with 95% of northern Ontario considered Crown Land (MNRF, 2023). The *Public Lands Act* outlines the use, management, sale and disposition of public lands and forests (Ontario, 2022). The Act guides Ontario's public land use planning and development, regulating public and private roads on public lands.

6.6.3 The Planning Act

The Ontario *Planning Act* is provincial legislation that sets out the ground rules for land use planning. The *Planning Act* outlines how land may be used and controlled and the purpose of this Act is to make sure that planning processes are fair, open, accessible, timely, efficient and promote the best economic and environmental interest within the provincial policy framework. The *Planning Act* allows the province to integrate matters of provincial interest into municipal and regional planning decisions by requiring that all decisions that are made are in conformance with provincial plans.

6.6.4 Fisheries Management Plan

Fisheries Management Planning as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and rivers and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake and river system in a holistic manner and includes a range of management options to secure a healthy lake and river environment that conserves the diversity of the fish community and provides opportunities to contribute to the social and economic well-being of the surrounding area. Ontario is divided into Fisheries Management Zones (FMZ). Each specific FMZ outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h). Long Lake #58 First Nation is within FMZ 7.

DRAFT

6.7 Land Use Plans and Policies

Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the socio-economic baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses of the land. Traditional land and resource use is described in Section 5.

Long Lake #58 First Nation ratified a Land Code in November 2017 under the First Nation Land Management Act. The Land Code provides Long Lake #58 First Nation members more decision-making power over reserve land and Chief and Council can review "zoning, by-laws, land management, revenue responsibility, amendments, who can make laws, how new laws can be enacted and published, conflict of interest rules, community approvals, and dispute resolution processes (Long Lake #58 First Nation, 2023). No CBLUP terms of reference has been reviewed for Long Lake #58 First Nation to date.

Limited information is publicly available about Long Lake # 58 First Nation's documented plans for land use (if any exist); however, as information becomes available through dialogue with the community, with permission from the community, information will be considered as part of the EA/IA.

6.8 Industrial Land Use

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, is done online through the Mining Lands Administrative System (MLAS).

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

DRAFT

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council.

To enhance Indigenous community participation, the Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act*. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Long Lake #58 First Nation available at this time.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is also important because it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Long Lake #58 includes a community hall where social, recreational and special events are held (211 Ontario North, 2023j).

DRAFT

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Long Lake #58 First Nation.

In the region, provincial parks include:

- Albany River Provincial Park.

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/Anishinaabe/Mushkegowuk communities. First Nation members have cabins and camps which they use for harvesting and hunting within their traditional territory.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Long Lake #58 First Nation.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Long Lake #58 First Nation.

Re: Preliminary draft Long Lake #58 First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the Long Lake #58 First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;

- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;
- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Long Lake #58 First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON
P0T 2A0

Dear Chief Desmoulin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates it was delivered to your community on January 31, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON
P0T 2A0

Dear Chief Desmoulin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 20, 2024, the package status indicates it was delivered to your community on January 31, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: What are the Protections After the EA?**

The livestreaming event is scheduled for **March 25th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet

WSR

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

WSR
WEBEQUIE
SUPPLY ROAD

April 30, 2024

Dear Chief Desmoulin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 13th from 1:00-1:45pm EST** for Long Lake #58 First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/89751486286?pwd=FB8JEK7u0azg1wXYGxaQ9OUa0wU1R9.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 897 5148 6286 **Passcode:** 423772

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

WSR240-WEB-PR-LT-0858

Web-WSR Letter re Virtual Community Info Session LL58FN-2024-04-30

June 11, 2024

Dear Chief Desmoulin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 24th from 1:00-1:45pm EST** for Long Lake #58 First Nation, where there will be a second presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/89010645974?pwd=xDXWtVfQYAJkpcEcHCk5nKNC5sJ2Jp.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 890 1064 5974 **Passcode:** 909001

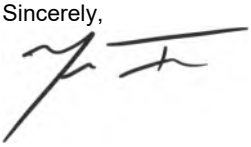
In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON
P0T 2A0

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

WSR
WEBEQUIE
SUPPLY ROAD

November 1, 2024

Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON P0T 2A0

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Chief Judy Desmoulin
Long Lake #58 First Nation
P.O. Box 609
Longlac, ON
P0T 2A0

Dear Chief Desmoulin,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on November 6, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead

4

January 10, 2025

Dear Chief Desmoulin,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, January 20th from 1:00-1:45 PM EST for Long Lake #58 First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/89902493660

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

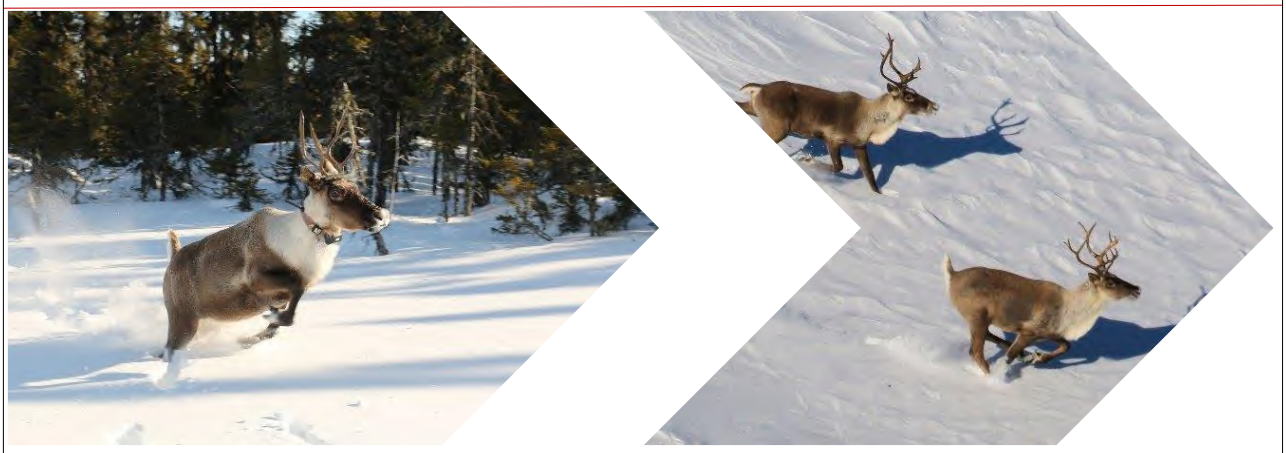
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

Re: Summary of Aboriginal and/or Treaty Rights and Interest Forum, November 2023
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin,

We hope that this finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the draft Environmental Assessment / Impact Statement Report for early circulation with communities.

As a part of the Project's consultation and engagement, the Aboriginal and/or Treaty Rights and Interest forum took place on November 21 to 23 2023 at the Valhalla Inn in Thunder Bay and was a joint event between the Webequie Supply Road, Marten Falls Community Access Road and Northern Road Links projects. The Forum was an important opportunity to meet face to face, connect on how we can work together, better understand the roles we all play in assessing potential impacts on Aboriginal and/or Treaty Rights and Interests.

For your review and comment, please find attached a summary of comments your community provided in the individual Project-specific Breakout Sessions. The input provided by your community is being integrated into EA/IA process, and the Project Team will seek further feedback from your community at future EA/IA milestones.

The Project Team values your feedback and is always open to collaborating with you.

Sincerely,

Michael Fox
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation

February 18, 2025

Dear Chief and Council,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, March 3rd from 1:00-1:45 PM EST for Long Lake #58 First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/83056117835?pwd=K05BYh7gEeMVjDRvTz5k46aEym4dyM.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Desmoulin,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Webequie Supply Road Project Consultation Log

Records Found: 1

Marten Falls First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Marten Falls First Nation's (MFFN) Chief Bruce Achneepineskum, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if MFFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Marten Falls First Nation's (MFFN) Chief Bruce Achneepineskum, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether MFFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked MFFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if MFFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Marten Falls First Nation's (MFFN) Chief Bruce Achneepineskum, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited MFFN to participate in the WSR socio-economic primary data collection program. The letter asked MFFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if MFFN has any questions.

Topics to be Discussed: Virtual Information Session
Michael Fox of Indigenous and Community Engagement and Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Marten Falls First Nation (MFFN) on May 9, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Michael and Don discussed several questions that had been previously asked by MFFN. These questions were regarding blasting activities, emissions and greenhouse gases. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community members in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: WSR Consultation Progress Report Round 1
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Marten Falls First Nation's (MFFN) Chief Bruce Achneepineskum which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 1. The USB contained files supporting Record of Consultation. The letter explained that the Consultation Progress Report summarizes the documents from Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The report being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 2. Michael's email and cell phone contact information was provided if MFFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon of Indigenous and Community Engagement (ICE) on behalf of the Webequie Supply Road (WSR) Project team sent an email to Chief Bruce Achneepineskum of Marten Falls First Nation (MFFN) to thank him for taking the time to meet with the WSR project team in Thunder Bay the previous week to discuss the Socio-Economic Primary Data Collection Program for the WSR Project. Attached to the email were Community Survey Questions, Focus Group Questions, Key Informant questions, and a tentative schedule of focus group sessions and key informant interviews to conduct in the community to help in identifying and selecting participants. Marian requested MFFN to provide tentative dates for the community visit to take place.

Marian also mentioned that the WSR Project team is planning a Socio-Economic Survey Session with Thunder Bay members on November 29, 2022 at the Prince Arthur Hotel in Thunder Bay between 9:00-5:00pm EST. Marian indicated that the team is creating a poster with additional details for social media channels and it would be provided to MFFN once it is complete. Marian stated that the WSR Project team would be happy to discuss details further with MFFN for any project-related activities or concerns. The email closed explaining that the WSR Project team looks forward to working with MFFN.

Topics to be Discussed: MFFN Community Visit
Members of the Webequie Supply Road (WSR) Project team, Michael Fox of Indigenous and Community Engagement (ICE) and Don Parkinson of SNC Lavalin, visited Marten Falls First Nation for the purposes of providing the community with a project update and encouraging their participation in the upcoming WSR Socio-Economic survey session in the community. The WSR team had 15 printed copies of the study plan summary and 20 printed copies of the Socio-Economic fact sheet to distribute. A total of 18 community members, including Chief and Council, attended the meeting. After the presentation, a community elder expressed concern that they had received little information about the project and that the east end of the planned WSR overlapped with her family's traditional area, where many family members had been born and had conducted trapping activities over a number of generations. The elder also asked why a Webequie First Nation (WFN) community member was not present at the meeting. Don Parkinson stated that the project team would endeavor to provide more detailed mapping information on their next community visit, tentatively scheduled for late November, to better understand any possible conflicts between the terminus of the road and the family's traditional territory. Also, Don pledged that the project team would make better efforts to distribute project material (i.e., project updates) through the community and stated that he would try to ensure that WFN members accompany the team on their next visit to the community.

Topics to be Discussed: Virtual Information Session
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Marten Falls First Nation's (MFFN) Chief Bruce Achneepineskum, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for MFFN on March 20, 2023, from 12:00-1:00pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if MFFN has any questions or comments.

Topics to be Discussed: Radio, Livestreams, Engagement Options
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Marten Falls First Nation (MFFN)'s Chief Bruce Achneepineskum which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 14, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of the Alternatives Assessment Process, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team will begin Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if MFFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Marten Falls First Nation (MFFN)'s Chief Bruce Achneepineskum, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of MFFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.
