[2] Community-based land use plans require provincial approval.

DRAFT

6.6.2 Northern Ontario Transportation Plan

The draft Northern Ontario Transportation Plan, 2020 was developed to serve as a guide to help build a modern and sustainable transportation system for people in Northern Ontario. It contains actions that will connect communities, provide safer and more reliable travel and unlock economic potential in the region. Goal 6 of this Plan outlines reliable travel options for remote and Far North communities This plan is a living document and will be updated with actions to reflect the evolving needs of the region.

The Project is aligned with the objectives of this Plan and will support the goal of achieving sustainable development for Northern Ontario.

6.6.3 Fisheries Management Plan

The Fisheries Management Plan as administered by Ministry of Natural Resources and Forestry (MNRF) is designed to highlight and protect the value of the diversity of lakes and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake in a holistic manner and includes a range of management options to secure a healthy lake environment that conserves the diversity of the fish community and provide opportunities to contribute to the social and economic well-being of the surrounding area. Each specific zone outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h).

6.7 Land Use Plans and Policies

A number of remote fly-in and winter road access First Nation communities, have been (or are currently) undertaking community land use planning, which considers the remote nature of these communities. Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning process. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the Socio-Economic Baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses on the land.

Little information is publicly available about this community's documented plans for land use (if any exist); however, as information becomes available through dialogue with the community, with permission from the community, information will be considered as part of the EA/IA.

6.8 Industrial Land Use

The economy of Northern Ontario relies heavily on resource extraction, with the mining, aggregate and forestry industries significant factors in land use planning in the region. The Ring of Fire, a significant mineral development region has long-term potential to contribute to the Ontario economy (Ministry of Mines, 2022). These contributions include creating more jobs, generating revenue, building infrastructure, and bringing prosperity to communities to the north, including First Nation communities. Minerals found in the Ring of Fire to-date include chromite, copper, zinc, gold, diamond, nickel and platinum group elements (Ministry of Mines, 2022).

In April 2023, leaders from 10 First Nations from Treaty No. 9 territory announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No.9 territory that would require consent of Indigenous Nations' way of life impacted by resource development. The draft statement of

DRAFT

claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including, trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino-Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim or manage an existing mining claim, this is done online through the Mining Lands Administrative System (MLAS). Applicants are required to create a MLAS user account, which allows them to view active unpatented mining claims, register new mining claims, manage user mining claims, and buy or renew a prospector's license. Non-registered users are only able to use the MLAS map viewer to view active unpatented mining claims.

Under Section 50 of the *Mining Act*, a mining claim provides exclusive rights for the claim holder to explore for minerals and rights to enter, use and occupy surface rights as necessary for exploration and development. A mining claim does not provide mining rights for the land to the holder of the claim. Someone that holds a prospector license may stake out a mining claim on land that is open for staking and prospect for minerals on any Crown land, including land traditionally used by Indigenous Peoples and communities (Natural Resources Canada, 2013).

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all-season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

DRAFT

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous Peoples and communities and provide Socio-Economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council. Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act*. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Kasabonika Lake First Nation.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities'. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct Gross Domestic Product (GDP), among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is an important aspect as it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Recreational activities in the Indigenous communities involve community-based sports and activities organized by the community administration or other groups such as schools. Recreation facilities typically include baseball diamonds, gym/community centres, hockey arenas, playgrounds, playing fields and other facilities. Youth and community events are hosted by communities.

Kasabonika Lake First Nation includes a community centre used for a variety of sports and social gatherings. There is a Northern Store that is operated by North West Company.

Kasabonika Hotel and Restaurant offers accommodation for tourists. Kasabonika Airport is located 1.9 km west of the community (Northwest Health Line, 2023b).

DRAFT

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Kasabonika Lake First Nation.

- Albany River Provincial Park

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/Anishinaabe/Mushkegowuk members and other communities. First Nation members have cabins and camps which they use for harvesting and hunting within their traditional territory.

- Winisk River Provincial Park

In 1966, the growing demand for tourism led to provincial government setting aside the “Winisk Wild River Indian Guide Territory” and established the Winisk River Provincial Park over Winisk Lake and Winisk River in 1968 (Ministry of the Environment Conservation and Parks, 2021a). This move, however, intersected with Indigenous Nations exercise of their inherent rights to traditional lands, water usage, and the pursuit of economic and community development goals. The Winisk River Provincial Park is located to the north of the Webequie First Nation Reserve, approximately 2.17 km from WSR. The parkland is approximately 141,000 ha in size and boasts unique landforms including a large moraine and drumlin fields. The only access to the park is by canoe, air or by float plane park (Ministry of Natural Resources, 1991). This park does not feature facilities for visitors but activities such as white-water paddling, canoe and kayaking, back country camping, fishing, hunting and snowmobiling are supported within the park (Ontario Parks, 2022). Five outpost camps are located along the Winisk River System to support fishing and hunting tourism. The Winisk River Provincial Park Interim Management Plan, 1991 provides direction for the management of the park (Ministry of Natural Resources, 1991). Additional tourism development will only be permitted once the management plan is complete (Ministry of Natural Resources, 1991).

The community is situated on the southwestern shores of Kasabonika Lake which is part of the Winisk River watershed.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Kasabonika Lake First Nation.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Kasabonika Lake First Nation.

Re: Preliminary draft Kasabonika Lake First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Semple,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for Kasabonika Lake First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;

- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;
- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for Kasabonika Lake First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead

Chief Tom Semple
Kasabonika Lake First Nation
P.O. Box 124
Kasabonika Lake, ON
P0V 1Y0

Dear Chief Semple,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates that a notice has been left at the mailing address on January 30, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to

	explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Semple,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 6, 2024, the package status indicates it has been delivered to your community as of February 29, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Results of the Caribou Study.**

The livestreaming event is scheduled for **March 11th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Chief Tom Semple
Kasabonika Lake First Nation
P.O. Box 124
Kasabonika Lake, ON
P0V 1Y0

Dear Chief Semple,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates it has been delivered to your community as of February 29, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation

	based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Chief Tom Semple
Kasabonika Lake First Nation
P.O. Box 124
Kasabonika Lake, ON
P0V 1Y0

Dear Chief Semple,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Groundwater Preliminary Findings**

The livestreaming event is scheduled for **April 15th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

WSR
WEBEQUIE
SUPPLY ROAD

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation

	based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Semple,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. May 22, 2024

Dear Chief Semple,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 3rd from 12:00-12:45pm EST** for Kasabonika Lake First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/83608568196?pwd=JWgMG0maHW9EVlYoluj5kWKuYCuzal.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 836 0856 8196 **Passcode:** 775636

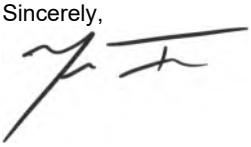
In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks

Activity Date: Sep 13, 2024 13:49
Activity Method: E-mail
File Name: WSR-Notice of Fall Geotechnical Drilling Program-2024-09-13.pdf
Date Published: Sep 13, 2024

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Semple,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Tom Joshua Semple
Kasabonika Lake First Nation
P.O. Box 124
Kasabonika Lake, ON P0V 1Y0

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Semple:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

December 5, 2024

Dear Chief Semple,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, December 16th from 12:00-12:45 PM EST for Kasabonika Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/86016461852?pwd=6oBKKYoZ07zbPGfmne28Z9TQ56bVm3.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

December 16, 2024

Chief Tom Semple
Kasabonika Lake First Nation
P.O. Box 124
Kasabonika Lake, ON
P0V 1Y0

Dear Chief Semple,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on December 5, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

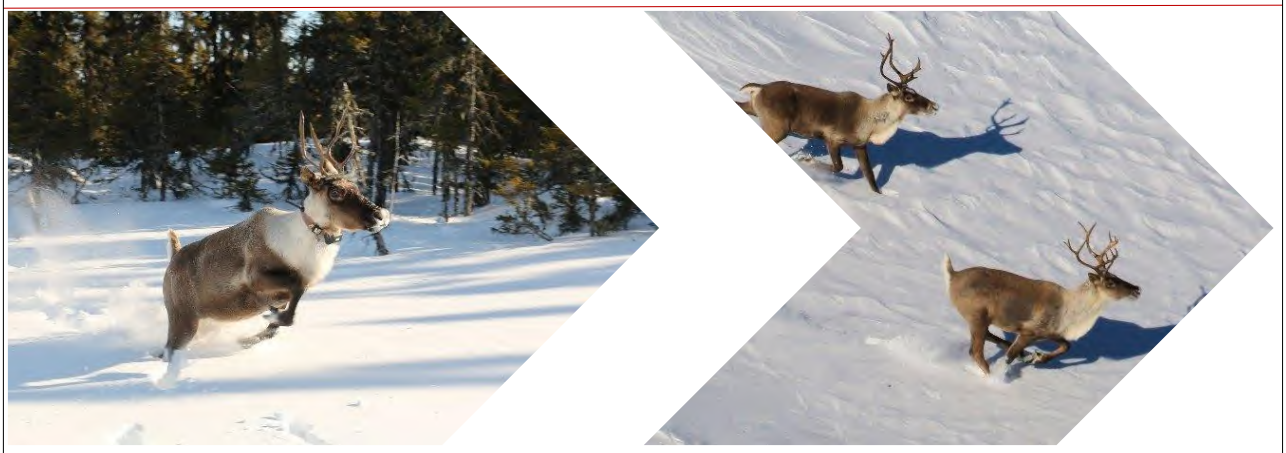
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

NOTES
DISCLAIMER

February 5, 2025

Dear Chief Semple,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, February 18th from 12:00-12:45 PM EST for Kasabonika Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87617587503?pwd=bV8zaRnXbuPg0vBElC8vW0K9xYoGxo.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Tom Semple
Kasabonika Lake First Nation
P.O. Box 124
Kasabonika Lake, ON P0V 1Y0

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Semple,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Michael Fox

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: **https://www.supplyroad.ca/draftea**.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Michael Fox
Regional Consultation Lead
Webequie First Nation
699 Mountain Road
Fort William First Nation,
ON P7J 1C1

Don Parkinson
Consultation Lead
AtkinsRéalis Inc.
191 The West Mall, Toronto,
ON M9C 5K8

We are available for meetings with your community to review sections of the Draft EAR/IS and technical reports of interest. Should you have any questions, or if you would like to schedule a meeting to discuss, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

Sincerely,

Michael Fox

c.c. Chief Cornelius Wabasse, Webequie First Nation
Marian Tibor-McMahon, Deputy Project Manager, Webequie Supply Road
Sasha McLeod and Dorothy Moszynski, Special Project Officers, Ministry of the Environment, Conservation and Parks
Jason Frechette, Indigenous Liaison Officer, Ministry of Energy and Mines
Sita Chinnadurai, A/Project Manager, Impact Assessment Agency of Canada
Craig Wallace, Project Manager, AtkinsRéalis Inc.

APPENDIX P2.I.9

Correspondence with Indigenous Communities and Groups – Kashechewan First Nation

Webequie Supply Road Project Consultation Log

Records Found: 1

Kashechewan First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Kashechewan First Nation's (KFN) Chief Gaius Wesley, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if KFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Kashechewan First Nation's (KFN) Chief Gaius Wesley, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether KFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked KFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if KFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Kashechewan First Nation's (KFN) Chief Gauis Wesley, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited KFN to participate in the WSR socio-economic primary data collection program. The letter asked KFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if KFN has any questions.

Topics to be Discussed: Virtual Information Session
Marian Tibor-McMahon of Indigenous and Community Engagement (ICE) and Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Kashechewan First Nation (KFN) on April 19, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Marian and Don discussed several questions that had been previously asked by Mushkegowuk Council, since the WSR Project Team has not yet received any comments from KFN. These questions were regarding community engagement and how input is considered in the EA process, the Regional Assessment, and the assessment of potential wetland impacts. The WSR Project Team had a platform which provided real time translation of the session in Cree to accommodate community members. There were no community members in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail, to Kashechewan First Nation's (KFN) Chief Gaius Wesley, which included a letter, map and fact sheet regarding the WSR Socio-Economic Primary Data Collection Program and Socio Economic Study Plan. The email was a follow up to the letter originally sent on December 21, 2021. Marian indicated that the WSR Project Team has not received a response from KFN regarding their interest in participating in the program and requested KFN let the team know if they are interested. Marian provided her email and cell phone contact information if KFN has any questions and a link to the WSR webpage about the socio-economic program for more information.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kashechewan First Nation (KFN)'s Chief Gaius Wesley, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of KFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KFN has any questions or comments.

The fax also included the English WSR Newsletter - Issue 20 which provided information about Consultation Round 2 Topics, the Socio-Economic Primary Data Collection Program, the Indigenous Knowledge and Land Resource Use Program, and the livestream and radio schedule for March 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if KFN has any questions or comments.

Topics to be Discussed: Virtual Community Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Kaschechewan First Nation (KFN) on April 3, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, the Project Team played a voiceover presentation which included a testimony by the Webequie First Nation Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don encouraged the KFN members to share their comments and concerns that had been previously raised by KFN. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

Topics to be Discussed: Radio, Livestreams and Engagement Options
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Kashechewan First Nation (KFN)'s Chief Gaius Wesley which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on June 6, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Gaius Wesley of Kashechewan First Nation (KFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding KFN's participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted that the community has an active funding agreement with the Province of Ontario to participate in the IKLRU program for the WSR Project, and that the community has initiated a community-led IKLRU study for the WSR Project. The letter explained that the Project team is writing to confirm the planning timelines for the Environmental Assessment / Impact Assessment process, with the goal to finalize the baseline conditions report. The letter requested the community to let the Project team know what they are planning for the program by the end of June 2023 and indicated that the Project team would like to receive the IKLRU studies by the end of September 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Kashechewan First Nation (KFN) on June 19, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 2 of Consultation Round 2 will discuss the Project team's work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from KFN were in attendance. Don reiterated that the Project Team would like to hear from KFN community members in-person and that a recording of the session would be available through YouTube and the WSR Website.

Topics to be Discussed: Engagement Options, Virtual Information Sessions 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Kashechewan First Nation (KFN)'s Chief Gaius Wesley which included a letter that offered various community engagement options to help create awareness of the Project. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KFN has any questions or comments.

Contact Date: Sep 06, 2023 11:00 Method: Chief & Council Meeting
Topics to be Discussed: Community Information Session
Michael Fox of Indigenous and Community Engagement (ICE), Don Parkinson of SNC-Lavalin, and the Webequie Supply Road (WSR) Project team with a community leadership group consisting of Kashechewan First Nation's (KFN) Deputy Chief Betsy Lazarus, Councillor Wayne Lazarus and Community Coordinator Enoch Williams at approximately 11 am on September 6, 2023 at the Kashechewan First Nation Band Office. The purpose of this meeting was to share information on the WSR Project regarding the Alternatives Assessment: Evaluation of Alternative Supporting Infrastructure and Road Design.

The informal format of the meeting included a project update/introduction by Michael Fox of ICE, followed by a presentation entitled: Consultation Round 2: Part 2 - Alternatives Assessment- Evaluation of Alternative Supporting Infrastructure and Road Design delivered by Don Parkinson of SNC-Lavalin.

No comments or questions about the Project were received from the leadership representatives attending the meeting. Information packages were supplied to the community leadership representatives in attendance. The remaining copies of the Assessments of Alternatives presentation in English along with WSR Newsletter in English were left at the Band Office for distribution to those interested.

After the meeting with community leadership representatives, a community information session was conducted at the community arena at approximately 1 pm. The format of the session was open house, with handouts provided and maps showing the Webequie Supply Road Project preferred corridor displayed on the walls. A total of 15 community members attended the session. Questions were answered regarding where the Webequie Supply Road sits in the context of the other two all-season road projects and potential opportunities for employment associated with the construction of the various projects.
Information packages were supplied to the community members attending the open house.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kashechewan First Nation's (KFN) Chief Gaius Wesley which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if KFN has any questions or comments.

Topics to be Discussed: Consultation Round 2 Report Follow Up, Livestream, Radio Show
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kashechewan First Nation's (KFN) Chief Gaius Wesley, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on April 8, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Surface Water Preliminary Findings, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Kashechewan First Nation (KFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 1 presentation that began with a review of the project to date, followed by a discussion of preliminary results for two valued components: surface water and fish and fish habitat. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from KFN were in attendance.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Gaius Wesley of Kashechewan First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Field Notice Fall Geo-Technical Drilling Program
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kashechewan First Nation's (KFN) Chief Gaius Wesley regarding a Field Notice for the Fall geo-technical drilling program. The email indicated that AtkinsRéalis is providing a notification to complete a drilling program for the WSR project to further engineering design and support the coordinated provincial Environmental Assessment and Federal Impact Assessment. The letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). The email indicated that all works will be conducted in accordance with the permit conditions issued by MNR. Attached to the email was the Field Notice explaining what is happening, the schedule and what to expect. For further questions, the contact information for Hayden Yip of AtkinsRéalis was provided.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Kashechewan First Nation's (KFN) Chief Hosea Wesley with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for KFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kashechewan First Nation’s (KFN) Chief Hosea Wesley which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if KFN has any questions or comments.

McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team called the Kashechewan First Nation (KFN) band office to follow up with Chief Hosea Wesley regarding the Consultation Progress Report for Round 3. There was no answer. McKenna left a voice message in the Chief's mailbox with the purpose of the call and her contact information.

Contact Date: Dec 09, 2024 13:00 Method: Indigenous Community Meeting
Topics to be Discussed: Virtual Information Session Round 4 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Kashechewan First Nation. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from KFN were in attendance.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Hosea Wesley of Kashechewan First Nation with links to?invitations for the Three Road Project Gathering & Expo hosted by Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Kashechewan First Nation's (KFN) Chief Hosea Wesley with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kashechewan First Nation's (KFN) Chief Hosea Wesley, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for Round 4 Part 2 for KFN on February 10, 2024, from 1:00-1:45pm EST with registration links for the session. The information session will include the second presentation on WSR's Cumulative Effects Assessment. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. The letter also attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KFN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Hosea Wesley of Kashechewan First Nation with links to?invitations for the Three Road Project Gathering & Expo hosted by Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Virtual Information Session Round 4 Part 2
The Webequie Supply Road (WSR) consultation team conducted a virtual community meeting on the Zoom platform with Kashechewan First Nation (KFN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 2 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment. After the effects assessment discussion, potential effects and associated mitigation measures were explained using examples from geology, terrain and soils and fish and fish habitat. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. There were no participants from KFN in attendance.

Topics to be Discussed: Three Road Projects Gathering & Expo June 2024 Report
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Cedar Meadows & Spa in Timmins on February 25-26, 2025.

The purpose of the Gathering was to provide an engaging and interactive consultation space to discuss the Webequie Supply Road (WSR) Draft Environmental Assessment Report / Impact Statement (EAR/IS), Marten Falls Community Access Road (MFCAR) Draft EAR/IS and Northern Road Link (NRL) Projects.

Day 1 of the event was set aside for Project overviews, consultation panels, individual community breakout sessions, and project expo including information to assist with review of the draft EAR/IS for MFCAR and WSR and cumulative effects assessment.

Day 2 of the event covered the Aboriginal and/or Treaty Rights and Interests (ATRI) panel discussions, breakout sessions, and project expo including information to assist with review of the draft EAR/IS and MFCAR for WSR and cumulative effects assessment.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 7 individuals signed in for Day one of the gathering, A total of 16 individuals signed in for Day 2, but please note that not all participants opted to sign in. In total 1 participant from Kashechewan First Nation (KFN) attended the Gathering over the 2 days.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Hosea Wesley of Kashechewan First Nation (KFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

Web-Preliminary Study Areas for Indigenous Land Use and Interests-2021-12-13

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Kashechewan First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Kashechewan First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Kashechewan First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Kashechewan First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Kashechewan First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Kashechewan First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Kashechewan First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Gaius Wesley,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Kashechewan First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Kashechewan First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Kashechewan First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Gaius Wesley,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Kashechewan First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

Next Steps

In order to confirm that Kashechewan First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

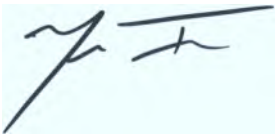
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

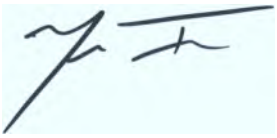
Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

April 1, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Socio-Economics. This upcoming week's session is: **WSR Presents: Socio-Economics.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 6th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to brianna.patrick@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

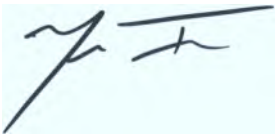
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 4, 2022

Dear Chief Wesley,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Tuesday, April 19 between 12pm and 1:30pm** for Kashechewan First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZUpdu2trjkjHdX51somQcicm_cQVUe0FZJX.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: supplyroad.ca/vropenhouse.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

CC: Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on human health. This upcoming week's session is: **WSR Presents: Human Health.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 20th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Gaius Wesley,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Kashechewan First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

Next Steps

In order to confirm that Kashechewan First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

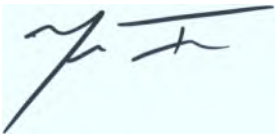
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

May 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on wildlife and species at risk. This upcoming week's session is: **WSR Presents: Wildlife and Species at Risk.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 18th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

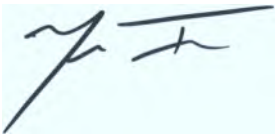
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

May 27, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on field studies related to water. This upcoming week's session is: **WSR Presents: Field Studies - Water.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 1st, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

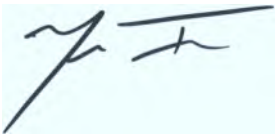
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Craig Wallace, Project Manager, SNC-Lavalin Inc.

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

October 19, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Wolverine.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 25th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

WEBEQUIE
SUPPLY ROAD

October 21, 2022

Chief Gaius Wesley
Kashechewan First Nation
P.O Box 240
Kashechewan, ON
P0L 1S0

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Wesley:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Other Ways to Stay Up To Date

You can also stay tuned with the WSR Project by following our social media channels:

December 14, 2022

Chief Gaius Wesley
Kashechewan First Nation
P.O. Box 240
Kashechewan, ON
P0L 1S0

Dear Chief Wesley:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status indicates that it has been successfully delivered to your community on November 7, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Radio Show and Livestream Series

The WSR Project team will be resuming the radio show and livestreaming series in the coming weeks. Stay tuned for more information.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and

WSR WEBEQUIE SUPPLY ROAD

we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Thank you very much and we look forward to hearing from you soon.

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Chief Gaius Wesley
Kashechewan First Nation
P.O Box 240
Kashechewan, ON
P0L 1S0

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Wesley,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 21, 2023

Dear Chief Wesley,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, April 3rd from 2:00pm-3:00pm EST** for Kashechewan First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/84095899209.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 840 9589 9209.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/kashechewan/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

May 3, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Analysis of Alternatives- Multiple Accounts Analysis - What is it?**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, May 9th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 6, 2023

Dear Chief Wesley,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

The Indigenous Knowledge / Land and Resource Use (IKLRU) Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Kashechewan First Nation currently has an active funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project, and that your community has initiated a community-led IKLRU study for the WSR Project.

Today, we are writing to confirm our planning timelines for the EA/IA process. Our goal this year is to finalize the baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you, to add your community's knowledge to the report.

Please let us know what your team is planning by the end of June 2023. We would like to receive IKLRU studies by the end of September 2023, to allow time for dialogue with your community on the information provided, and meaningful consideration of your Indigenous Knowledge in our understanding of the baseline conditions.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment

context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with you.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 6, 2023

Dear Chief Wesley,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 19th between 2:00pm-3:00pm EST** for Kashechewan First Nation, where there will be the second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/89710616165

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 897 1061 6165**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/kashechewanfn/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 28, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Construction Camps.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, July 5th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 12, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Road Foundation Design.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, July 18th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. WEBEQUIE SUPPLY ROAD
MEETING WITH LEADERSHIP AND
COMMUNITY INFORMATION SESSION

Kashechewan First Nation
September 6, 2023

MEETING WITH LEADERSHIP

The Webequie Supply Road Project Team met with a community leadership group consisting of Kashechewan FN Deputy Chief Betsy Lazarus, Councillor Wayne Lazarus and Community Coordinator Enoch Williams at approximately 11 am on September 6, 2023 at the Kashechewan First Nation Band Office. The purpose of this meeting was to share information on the Webequie Supply Road Project regarding the Alternatives Assessment: Evaluation of Alternative Supporting Infrastructure and Road Design.

The informal format of the meeting included a project update/introduction by Michael Fox of ICE, followed by a presentation entitled: *Consultation Round 2: Part 2 - Alternatives Assessment-Evaluation of Alternative Supporting Infrastructure and Road Design* delivered by Don Parkinson of SNC-Lavalin.

No comments or questions about the Project were received from the leadership representatives attending the meeting. Information packages were supplied to the community leadership representatives in attendance. The remaining copies of the Assessments of Alternatives presentation in English along with WSR Newsletter in English were left at the Band Office for distribution to those interested.

COMMUNITY INFORMATION SESSION

After the meeting with community leadership representatives, a community information session was conducted at the community arena at approximately 1 pm. The format of the session was open house, with handouts provided and maps showing the Webequie Supply Road Project preferred corridor displayed on the walls. A total of 15 community members attended the session. Questions were answered regarding where the Webequie Supply Road sits in the context of the other two all-season road projects and potential opportunities for employment associated with the construction of the various projects.

Information packages were supplied to the community members attending the open house.

ISSUES AND CONCERNS

- No issues and concerns were raised in either the leadership or community open house meetings.

NEXT STEPS

- Michael Fox indicated that the team would continue keep the community informed about the project and will return for further in-person meetings at the request of the community.

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

WSR
WEBEQUIE
SUPPLY ROAD

January 25, 2024

Chief Gaius Wesley
Kashechewan First Nation
P.O Box 240
Kashechewan, ON P0L 1S0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Wesley:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

February 15, 2024

Chief Gaius Wesley
Kashechewan First Nation
P.O. Box 240
Kashechewan, ON
P0L 1S0

Dear Chief Wesley,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates that it has been delivered to your community as of February 5, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: How We Use Your IK in the EA.**

The livestreaming event is scheduled for **March 4th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

March 6, 2024

Chief Gaius Wesley
Kashechewan First Nation
P.O. Box 240
Kashechewan, ON
P0L 1S0

Dear Chief Wesley,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 6, 2024, the package status indicates it was delivered to your community on February 5, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Results of the Caribou Study.**

The livestreaming event is scheduled for **March 11th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

Information on existing conditions is used to provide a baseline understanding of the valued components of the community. Potential effects of the Project on valued components will be assessed by comparing baseline conditions to those expected to result from the construction and operation and maintenance of the Project. The information provided in this document is preliminary at this time, and it has been prepared with information that is known specifically for Kashechewan First Nation. This is a living draft document that has yet to be reviewed and validated by the Community.

Webequie First Nation is the proponent of the Project. The Project Team led by Webequie First Nation is striving to gather as much Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree) and Métis Indigenous Knowledge as it relates to the Project and to help inform the Socio-Economic Baseline. This document will be continuously updated when information from theWebequie First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trust.

Webequie is an Anishinaabemowin Tawin (community) located in Treaty No. 9 territory, about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (the good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, and that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation, like many Indigenous Nations and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' socio-economic data because Webequie First Nation, the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2. Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands. (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC, officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern tip of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established the constitutional basis for future treaty negotiations and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	*The Indian Act*: Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claim staking procedures and prospectors' licenses providing exclusive rights to stake claims and work upon Crown lands.
Ontario Registered Trapline System, 1946	The Registered Trapline System imposed exclusive ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP was mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada (TRC), 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR Socio-Economic Baseline are Anishiniimowin, Anishinabe and Mushkeego First Nations, and Métis Peoples. First Nation traditional territories cover the lands in the study areas. A number of First Nations in the RSA are located north of the provincial highway system, and accessible only by air, water and winter roads. Other First Nations, and the Métis community, located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850.

Kashechewan First Nation is located 685 km northeast of the City of Thunder Bay and 390 km east of Webequie First Nation in northern Ontario. The community is situated immediately north of Fort Albany First Nation and south of Attawapiskat First Nation on the northern area of the delta of the Albany River, 15 km from where it empties into James Bay.

Kashechewan First Nation is currently located on the northern shoreline of the Albany River and is annually flood prone due ice dams that form during the Spring thaw. The community is equipped with a ring dyke around the community for protection, however, the community is regularly evacuated due to flood risk each Spring season. In 2019, the Together We Work for Hope Framework Agreement was signed by the community and the Government of Canada and the Government of Ontario, which promises for the community to be moved to a new location upstream within ten years (CBC News, 2019).

The community is formally affiliated with the Mushkegowuk Council, a registered not-for-profit Tribal Council (Mushkegowuk Council, 2023), and the Nishnawbe Aski Nation provincial territorial organization.

Kashechewan First Nation has a Chief, Deputy Chief, Head Councillor, and eight Councillors, with a custom electoral system, and is expecting the next election on October 1, 2024 (211 Ontario, 2023).

Kashechewan First Nation is within the census District of Cochrane.

2.2 Community History

The people of Kashechewan First Nation are Mushkegowuk people that have a long history with their homelands. Prior to the Hudson's Bay Company and the subsequent Treaty No. 9, traditional lands were used and settled generally along the Albany River and its various connecting river basins.

Kashechewan First Nation and Fort Albany First Nation share the history of its people. The original Hudson's Bay Company (HBC) Fort of this region was built in 1674 and located on the south shore near the mouth of the Albany River and present-day Fort Albany. It was captured by Pierre de Troyes in 1686 and temporarily named Fort Ste. Anne. Two years later, the HBC established a second post on Bayley's Island, now known as Albany Island, and subsequently dislodged the French (Long, 2010).

In 1905, Fort Albany First Nation was established as part of the signing of Treaty 9. During the 1950's, the Fort Albany 67 Reserve which was home to two groups divided largely along religious affiliation, separated into two distinct First Nation communities Kashechewan First Nation and Fort Albany First Nation. Kashechewan First Nation located on the northern shoreline of the river. The other group is known as Fort Albany First Nation, which is located on the southern shores of the Albany River, directly across from Kashechewan First Nation.

DRAFT

2.3 Community Values and Aspirations

Kashechewan First Nation has outlined that the "lands and waters are vital elements of the cultural and spiritual existence of our First Nation since time immemorial (KFN and MNRF, 2017). Kashechewan First Nation will pursue sustainable economic development opportunities and maintain their First Nation way of life with the land and water (KFN and MNRF, 2017).

Kashechewan First Nation signed an Impact Benefit Agreement with DeBeers Canada Inc. in February 2009 for the Victor Diamond Mine (DeBeers Group, 2023). The agreement came into effect in July 2009 and included provisions regarding implementation of the Agreement, education, training, employment and business opportunities related to the operation of the mine, protection of the environment, support of community and cultural practices and compensation for any loss of or impact on traditional lands or way of life during operation of the mine (Newswire, 2009).

Kashechewan First Nation has requested that Ontario retract the Webequie Supply Road Project draft Terms of Reference (ToR) and "restart the Ring of Fire consultation process to ensure it is mutually and equally co-developed, co-led and co-enforced by First Nations" (Raventrust, 2022).

Kashechewan is one of 10 northern First Nations which launched a lawsuit against the Ontario and federal governments in April 2023 (McIntosh, 2023). They have requested that the Canadian government be barred from making any decisions about how land is to be used without Indigenous consent. The lawsuit centres on Treaty No. 9 and the contrast between the verbal and written promises of Treaty No. 9 as recorded (McIntosh, 2023). The Nations are arguing that they did not cede or surrender their territories and that Treaty No. 9 did not give the Ontario government the right to allow resource extraction (McIntosh, 2023).

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools used to assess socio-economic conditions in communities, as these data can also be used to identify vulnerable groups such as women, disabled persons, Elders and youth. These are segments of the population that could either benefit or be negatively impacted (directly or indirectly) by the Project, and often experience barriers to participation as under-represented groups. Population and demographics are described in this section using the following indicators using Census data:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into existing socio-economic conditions where the Project is being considered. The information is to be used in the can assessment of potential effects of the Project and to develop strategies to mitigate any negative effects.

The following section provides an overview of population and demographics at a district level.

3.1.1 Population Overview

The 2021 Census included, for the first time, a question on self-identified gender and added “at birth” to the gender question, which enabled cisgender, transgender and non-binary individuals to report their gender (Statistics Canada, 2023).

Table 3-1 presents the forecasted population of the Cochrane District for the period (2021 to 2043), broken down by self-identified gender. Population trends by self-identified gender in Cochrane District are summarized as follows:

- Between 2016 and 2043, the male population is forecast to increase from 49.7% to 51.5% and the female population is forecast to decrease from 50.3% to 48.5%.
- Over the projection period both the female and male population are forecast to decrease;
- Between 2016 and 2043 the male population is forecast to decrease from 39,570 to 36,512, a 7.7% decrease;
- Between 2016 and 2043 the female population is forecast to decrease from 40,110 to 34,351, a 14.4% decrease; and
- Between 2016 and 2043, the distribution of the male population is forecast to increase from 49.7% to 51.5% and the female population is forecast to decrease from 50.3% to 48.5%.

DRAFT

Table 3-1: Population Forecast by Self-Identified Gender, Cochrane District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	79,680	100%	39,570	49.7%	40,110	50.3%
2021	77,965	100%	38,985	50.0%	38,975	50.0%
2028	75,626	100%	38,181	50.5%	37,440	49.5%
2033	73,998	100%	37,616	50.8%	36,380	49.2%
2043	70,847	100%	36,512	51.5%	34,351	48.5%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-2 presents the Cochrane District's forecasted population over the projection period by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in Cochrane District are summarized as follows:

- The 15 – 64 years age group represents the potential labour force.
- The 0 – 14 years and 15 – 64 years age groups are both is forecast to decline over the projection period while 65 years and over are forecast to grow.
- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 13,530 to 10,481, a 22.5% decrease.
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 52,460 to 39,245, a 25.2% decrease.
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 13,690 to 25,309, a 84.9% increase.

Table 3-2: Population Forecast by Age Group, Cochrane District (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	146,045	100%	21,845	15%	95,930	66%	28,270	19%
2021	146,865	100%	21,630	15%	93,095	63%	32,140	22%
2028	149,063	100%	21,333	14%	89,266	60%	38,464	26%
2033	151,480	100%	21,123	14%	86,628	57%	43,729	29%
2043	158,814	100%	20,709	13%	81,584	51%	56,522	36%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 3-3 presents the population of the Cochrane District by Indigenous identity in 2021. Indigenous identity of the Cochrane District population is summarized as follows:

- 81.3% of the population identifies as non-Indigenous; and
- The majority of the population that identifies as Indigenous identifies as First Nations at 11.6% of the population, followed by Métis (7%) and Inuk (0.1%).

DRAFT

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Cochrane District (2021)

Indigenous Identity	Count	Distribution
First Nations	8,835	11.6%
Métis	5,330	7.0%
Inuk	80	0.1%
Non-Indigenous	62,000	81.3%
Total	**76,245**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.3 Languages

Table 3-4 below presents the languages spoken most often in homes at Kashechewan Lake First Nation. Languages used by the nation is summarized as follows:

- The majority of homes in the Cochrane District favour English while at home at approximately 70%;
- Indigenous languages are spoken most often at home in 0.8% of homes, this category includes 39 Indigenous languages; and
- Other non-official languages and French make up the remaining 29.7% of homes at 1.8% and 27.9%, respectively.

Table 3-4: Language Used Most Often at Home, Cochrane District (2021)

Language	Count	Distribution
English	51,500	69.6%
French	20,605	27.9%
Other Non-Official Languages	1,325	1.8%
Indigenous Languages	555	0.8%
Total	**73,985**	**100%**

DRAFT

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of Cochrane District residents in 2020. Mobility status refers to the status of a person's place of residence on Census Day in relation to their place of residence on the same date one or five years earlier (Statistics Canada, 2022a).

Residents are categorized as "non-movers" or "movers". Persons who, on Census Day, lived in the same residence as they did on the same date one year or five years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did one year, or five years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Cochrane District in 2020 is summarized as follows:

- 88.1% of residents were identified as "non-movers", 50.2% (33,555) of which were male and 49.8% (33,285) female.
- "Movers" accounted for 11.9% of the population, 49.3% (4,470) of which were male and 50.7% (4,595) female.

Table 3-5: Mobility Status of Residents, Cochrane District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	66,840	88.1%	33,555	88.2%	33,285	87.9%
Movers	9,060	11.9%	4,470	11.8%	4,595	12.1%
Total	**75,900**	**100%**	**38,025**	**100%**	**37,880**	**100%**

DRAFT

3.2 Housing and Accommodations

Housing and accommodations is an important issue in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following section provides an overview of population and demographics at a District level.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

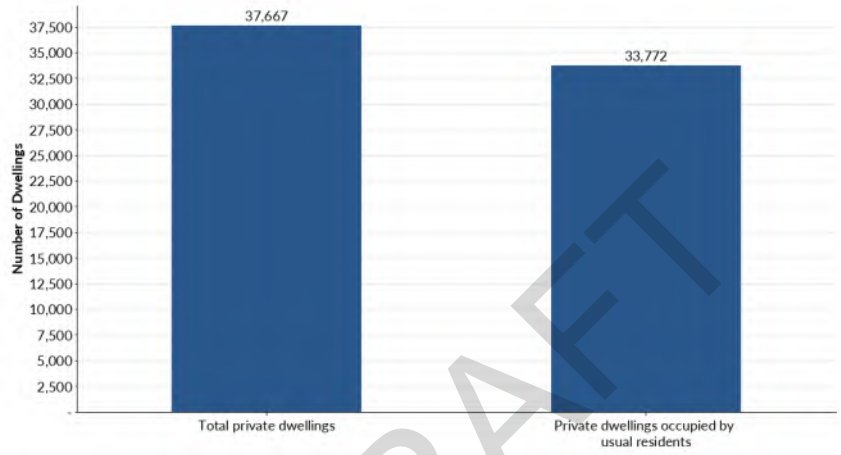
In general, the Cochrane District has 37,667 dwellings, 90% of which are occupied by usual residents. A private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2022a). Across the District, most dwellings are owned at nearly 70% with just under 2% falling withing government or Band housing. Nearly 70% of dwellings are occupied by 1 to 2 persons. Less than 10% of the housing stock was constructed over the past 20 years however nearly all are considered suitable and less than 10% require major repairs.

3.2.1 Housing Characteristics

Figure 3-1 presents the total private dwellings and private dwellings occupied by usual residents in the Cochrane District for 2021. Private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 37,667 total private dwellings in the Cochrane District; and
- Of the 37,667 private dwellings, 33,772 (89.7%) are occupied by usual residents

Figure 3-1: Cochrane District – Total Private Dwellings and Occupied Private Dwellings, 2021



Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-7 below presents the total number of occupied dwellings for the Cochrane District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of occupied dwellings are classified as a single-detached home at 68.7%;
- Apartments make up 20.5% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.4%.

DRAFT

Table 3-7: Total Occupied Private Dwellings by Structural Type in Cochrane District (2021)

Structural Type	Count	Distribution
Single-detached house	23,225	68.7%
Semi-detached house	4,640	13.7%
Row house	1,970	5.8%
Apartment or flat in duplex	1,665	4.9%
Apartment in a building that has fewer than five storeys	980	2.9%
Apartment in a building that has five or more storeys	620	1.8%
Other single-attached house	565	1.7%
Moveable dwelling	120	0.4%
Total	**33,785**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Cochrane District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the occupied private dwellings in the Cochrane District are owned at 67.9% followed by rented at 30.3%; and
- 1.8% of occupied private dwellings are considered to be provided by the local government or band housing.

Table 3-8: Private Dwellings by Tenure in Cochrane District (2021)

Tenure	Count	Distribution
Owner	22,935	67.9%
Renter	10,225	30.3%
Dwelling provided by the local government, First Nation or Indian band	610	1.8%
Total	**33,770**	**100%**

DRAFT

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Cochrane District. Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Cochrane District in 2021:

- The majority of households are occupied by two persons at 37%.
- The least number of households are occupied by 5 or more persons at 6%.

Table 3-9: Number of Households by Household Size in Cochrane District (2021)

Household Size	Count	Distribution
1 person	10,680	32%
2 persons	12,585	37%
3 persons	4,605	14%
4 persons	3,840	11%
5 persons or more	2,070	6%
Total	**33,780**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-10 below presents the number of rooms per household in Cochrane District in 2021:

- The majority of households in the Cochrane District consist of 1 to 4 rooms at 26.8% followed by 8 or more rooms at 23.2%.
- The least number of households are comprised of 7 rooms at 13%.

Table 3-10: Number of Households by Number of Rooms per Household in Cochrane District (2021)

Household Size	Count	Distribution
1 to 4 rooms	9,065	26.8%
5 rooms	6,730	19.9%
6 rooms	5,725	17.0%
7 rooms	4,405	13.0%
8 or more rooms	7,840	23.2%
Total	**33,765**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.2.3 Housing Conditions

The following subsections describe housing conditions including the numbers of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and condition of dwellings for Cochrane District.

Table 3-11 presents the total occupied private dwellings by period of construction for the Cochrane District in 2021. Information on dwelling construction in Cochrane District from 1960 up to 2021 is summarized as follows:

- Dwellings constructed during the period from 1961 to 1980 is the largest group with 36.7% of private dwellings being built during this period.
- Dwellings constructed during the period from 2016 to 2021 is the smallest group with 1.8% of private dwellings being built during this period.
- 92.1% of the occupied private dwellings in the Cochrane District were constructed during or prior to 2000.
- Over the last two decades, 2,670 dwellings were constructed which accounts for approximately 8% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Cochrane District (2021)

Construction Period	Count	Distribution
1960 or before	11,555	34.2%
1961 to 1980	12,380	36.7%
1981 to 1990	4,425	13.1%
1991 to 2000	2,745	8.1%
2001 to 2005	670	2.0%
2006 to 2010	670	2.0%
2011 to 2015	725	2.1%
2016 to 2021	605	1.8%
Total	**33,775**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-12 presents the suitability of occupied private dwellings in Cochrane District for 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability asses the required number of bedrooms for a household based on the age, sex, and relationships among household members (Statistics Canada, 2017b).

- In 2021, 3.4% of the occupied private dwellings in the Cochrane District were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Cochrane District (2021)

Suitability	Count	Distribution
Suitable	32,615	96.6%
Not suitable	1,155	3.4%
Total	**33,770**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-13 below presents the conditions of occupied private dwellings in Cochrane District for 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desirable remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 9.7% of occupied private dwellings in the Cochrane District were categorized as requiring major repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Cochrane District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	30,515	90.3%
Major repairs needed	3,260	9.7%
Total	**33,775**	**100%**

Source: Statistics Canada, 2022a.

DRAFT

3.3 Community Services

Community services in Kashechewan First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care).

Community Services information for Kashechewan First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal which provides information on social, community, health and government services in northern Ontario.

3.3.1 Family Services

3.3.1.1 Child and Family Services

The Child and Family Services Department is responsible for delivering childcare and protection services as well as family support services to members of the Kashechewan First Nation community. Payukotayno Child and Family Services is mandated as a Native Child Welfare Agency. The prevention services provided by the department include teaching parenting skills, developing healthy social and recreational programs for families, hosting community forums to address various issues, organizing Elders' meetings that address traditional child rearing methods, and providing information sessions about understanding substance dependency and family violence. The Department also offers repatriation services, which involve processing requests to bring children in external foster care back to their homes within the community and providing advocacy on behalf of the child and family (211 Ontario North, Kashechewan First Nation, 2023a).

3.3.1.2 Mushkegowuk Council Victim Services

The Mushkegowuk Council Victim Services program provides immediate, short-term crisis intervention services to individuals affected by crime and tragedy (Mushkegowuk Council, 2023a). It also provides information and referrals to appropriate resources and services and confirms victims receive and continue to receive support and assistance. It advocates on behalf of victims and provides on-site or telephone assistance. It also offers the victim Quick Response Program (VQRP).

3.3.1.3 Mushkegowuk Council Victim Quick Response Program (VQRP)

The VQRP program provides assistance with emergency expenses related to eligible incidents (Mushkegowuk Council, 2023b).

3.3.2 Child Care and Youth Programs

3.3.2.1 Healthy Babies Healthy Children

The Healthy Babies Healthy Children program aims to support parenting and promote healthy child development for Kashechewan First Nation families with children under 6 years old, as well as Indigenous children at risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care, organizes prenatal classes, and operates a children's library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child's early years to offer development guidance and referrals to other programs and services (211 Ontario North, Kashechewan First Nation, 2023b).

DRAFT

3.3.2.2 Day Care Centre

Kashechewan First Nation operates a licensed daycare centre that offers a variety of activities to enhance the spiritual, intellectual, emotional, physical, and social development of children. It provides a variety of school readiness programs and 2 snacks and a hot lunch daily. It incorporates Native cultural programs with the daily community-based programming. It also offers full day programs for:

- Toddlers: 1.5 years - 2.5 years;
- Preschoolers: 2.5 years - 5 years; and
- School-aged: 6 years - 9 years.

The integrated Program for Special Needs individuals include (211 Ontario North, Fort Albany First Nation, 2023d):

- Providing individualized program planning geared to the specific needs of the child;
- Promoting integration into all programs with resource teacher assistance as needed; and
- Providing one on one or group activities and support.

3.3.2.3 Fetal Alcohol Spectrum Disorder (FASD) Program

The FASD Program provides education and information on the consequences of alcohol consumption during pregnancy, offers individual and group counselling sessions, offers parenting classes, and provides information sessions for teens (211 Ontario North, Kashechewan First Nation, 2023c). It also provides advise to members of Kashechewan First Nation and the families of children who have been diagnosed with or are suspected of having FASD on the following:

- Alcohol Related Birth Defects;
- Alcohol Related Neurodevelopmental Disorder;
- Fetal Alcohol Effects;
- Fetal Alcohol Syndrome; and
- Partial Fetal Alcohol Syndrome.

3.3.2.4 The Art of Healing Program

The Art of Healing Program hosts various youth-focused art-based workshops and presentations both virtually and in-person. The focus is how arts and crafts can be used as a coping and self-exploration tool, as well as the therapeutic value that creating holds. The workshops and presentations are created and curated based on response from community's needs and goals as well as collaborations with other service providers and therapeutic techniques (Mushkegowuk Council, 2023c).

3.3.3 Elder Care

Indigenous Services Canada, through the First Nations and Inuit Home and Community Care (FNIHCC) program, provides funding and guidance for Elder care. This program aims to establish home and community care services for Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services.

The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services (Indigenous Services Canada, 2023).

DRAFT

3.3.4 Health Services

3.3.4.1 Home and Community Care

The Home and Community Care Program offers healthcare services for ill, injured, or Elder members of the Kashechewan First Nation community in their homes. This service is provided by a Case Manager/ Nurse, Personal Support Workers, and Homemakers. The team assesses the health history of individuals and develops a personalized care plan, which is continuously monitored through case management to verify its effectiveness. The services offered include home care nursing, personal care assistance with tasks such as dressing and bathing, basic or advanced practice foot care, teaching individuals to care for themselves, home support with light housekeeping, laundry, and meal preparation, respite for family members and caregivers, and help with light outdoor/ yard work (211 Ontario North, Kashechewan First Nation, 2023d).

3.3.4.2 Crisis Intervention

The Crisis Intervention Program offers immediate assistance to members of Kashechewan First Nation impacted by family violence and suicide. This service provides on-site or telephone support and calls for police intervention when necessary. Crisis Intervention confirms that victims receive the necessary support and assistance to secure their safety. Additionally, they arrange meetings with family members to discuss possible crisis resolutions and offer advocacy on behalf of individuals and families dealing with various agencies. The service provides information and referrals to appropriate resources and services. Furthermore, Crisis Intervention assists families in crisis situations (211 Ontario North, Kashechewan First Nation, 2023e).

3.3.4.3 Aboriginal Diabetes Initiative

The Aboriginal Diabetes Initiative provides education, screening, and case management for the prevention, management, and treatment of diabetes. The program works to reduce the number of avoidable complications that can arise from uncontrolled diabetes. It advises individuals on developing and implementing an approach to care and management of diabetes, helping them find appropriate services and making referrals to other health care professionals when necessary. Eligibility for this service is limited to members of Kashechewan First Nation who are living with diabetes or at-risk of developing it (211 Ontario North, Kashechewan First Nation, 2023f).

3.3.4.4 Health Services

The Health Services program is dedicated to promoting the physical and mental well-being of the Kashechewan First Nation community. It collaborates with community partners to provide access to health care services and support. It also provides health awareness and counselling, education and prevention workshops. It also coordinates clinics in areas that may include Immunization, Sexual Health, smoking cessation and Communicable Diseases. Health Services addresses individual health care needs by providing:

- Intake services to determine health care needs of individual;
- Referrals to appropriate health care providers based on information in the intake assessment;
- Advocacy and support on behalf of individual with other health professionals;
- Home visits to the sick, Elders, new mothers and persons with health care needs; and
- Assistance with coordinating local and long distance travel arrangements for medical appointments.

Primary health care is provided through Kashechewan Nursing Station, Weeneebayko Area Health Authority (211 Ontario North, Kashechewan First Nation, 2023g).

DRAFT

3.3.4.5 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program aims to provide assistance and support to individuals and families who are struggling with addiction issues. This program offers Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides transportation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counseling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to other services such as detoxification and medical assistance (211 Ontario North, Kashechewan First Nation, 2023h).

3.3.4.6 Extended Health Benefits

The Extended Health Benefits Program provides a range of health benefits to individuals and families who experience high health costs. Eligibility for the program is determined based on need and is open to members of Kashechewan First Nation aged 16 to 65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies, and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Kashechewan First Nation, 2023i).

3.3.4.7 Medical Transportation Program

The Medical Transportation Program provides transportation to medical appointments within the community and from/to the Kashechewan First Nation community to any medical appointments (doctor, dentist, optometrist, and/or the specialist Fort Albany Wing of the James Bay General Hospital, operated by the Weeneebayko Health Authority, located in the Moose Cree First Nation in Moose Factory. It also provides assistance with making arrangements for any medical appointments out of town such as booking appointments, hotels, and completing applications for mileage compensation. This program is available to members of Kashechewan First Nation who require assistance with transportation for medical reasons (211 Ontario North, Kashechewan First Nation, 2023j).

3.3.4.8 Mushkegowuk Council Health Department

The Mushkegowuk Council Health Department currently provides dental hygiene, audiology, and optometric care to Mushkegowuk communities they serve, including. Attawapiskat First Nation, Taykwa Tagamou First Nation, Kashechewan First Nation, Moose Cree First Nation, Chapleau Cree First Nation, and Missanabie Cree First Nation.

3.3.5 Recreational Services

The Kashechewan First Nation Recreation Department is responsible for planning, developing, and implementing all social, recreational and special events for members of the community. Recreation services and facilities include a sportsplex consisting of arena, community hall and gymnasium (211 Ontario North, Kashechewan First Nation, 2023k). It offers outdoor field for sports at the community at sportsplex, including baseball, soccer and football. Further, it organizes social events such as dances and bingos at the community hall.

The Department coordinates and supervises a variety of programs and activities like:

- Ball hockey, badminton and volleyball;
- Coaches a basketball team;
- Game nights;
- Group fitness classes; and
- Youth workshops on topics of interest.

DRAFT

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation were higher among non-Indigenous youths in Canada compared to Indigenous youths (Statistics Canada, 2023). However, when comparing First Nation youth living on reserves to First Nation youth living off reserves, those that live off reserves are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities for the Kashechewan First Nation using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

Kashechewan First Nation has two schools on-reserve – St. Andrew's Elementary School which offers schooling from junior kindergarten to Grade 6, and Francine J. Wesley Secondary School which offers schooling from Grade 7 to Grade 12) (211 Ontario North, Kashechewan First Nation, 2023l). St. Andrew's Elementary School has 85 staff with 310 students and the school recently moved to a new building, as the elementary school was previously sharing a building with the high school (Hiskoonikun Education Authority, 2020a). Francine J. Wesley Secondary School has 37 staff with 214 registered students (Hiskoonikun Education Authority, 2020b).

Kashechewan First Nation is one of the First Nation communities that comprises the Mushkegowuk Council and members are eligible for Mushkegowuk Education and Training Services (METS) programs (Mushkegowuk Council, 2023e).

In 2020, six healing camps in Kashechewan were being built: a traditional cultural camp on Potato Island, a youth gathering site, a spiritual camp, a youth cultural and recreational camp, Young Eagles Trail and a detox/treatment and healing camp (Baiguzhiyeva, 2020).

In 2019, Omushkego Education Student Success hosted a Cree Language and Culture Teachers Gathering to create culturally relevant curriculum that utilized land based Omushkego culture (Omushkego Mushkegowuk Council, 2021). Omushkego Education Student Success supports Kashechewan First Nation community. The Omushkego Land-Based Camp Activities, Teacher's and Principal's Toolkit were developed from this gathering. This Toolkit provides educators with resources to integrate seasonality into their classroom programs. Land-based camp activities for children such as Spring Goose Camp Activities, Summer Celebrations, Fall or Winter Moose Camp Activities and Winter Fishing Camp include specific activities that can be undertaken during each camp (Omushkego Mushkegowuk Council, 2021).

3.5 Emergency and Protective Services

The socio-economic baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

DRAFT

Police services in most Indigenous communities in the Nishnawbe Aski territory are provided by Nishnawbe Aski Police Service (NAPS) or the Anishinabek Police Service (APS), municipal police services (where available), and the Ontario Provincial Police (OPP).

NAPS is the largest First Nations police service in Canada, serving 34 communities in the Nishnawbe Aski Nation territory which covers two-thirds of Ontario (NAPS, 2023). NAPS is headquartered in Thunder Bay and divided into three regions – Northeast, Northwest, and Central Region (NAPS Detachments, 2023). They currently employ 230 uniformed officers and 40 civilians (NAPS, 2023).

Police services in Kashechewan are provided by the NAPS and include six constables and one sergeant (NAPS, 2023).

Fire services typically include both volunteer, and community and municipal fire services and departments, depending on the community. The Kashechewan First Nation has a Kashechewan Fire Department.

Emergency medical services in fly-in First Nation communities are limited in nature and tend to be supported by regional service centres. If emergency care is required within the Indigenous communities, patients are typically transported by air ambulance to the larger regional service centres. The larger regional centres have Emergency Medical Services (EMS) teams available, and they are well connected with road access.

Where information is available, community input indicates a general need for additional emergency and protective services to address socio-economic challenges experienced in the Indigenous communities.

3.6 Community Infrastructure

The Socio-Economic Baseline includes a description of the following Community Infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in Kashechewan First Nation is described in Table 3-14.

Table 3-14: Description of Community Infrastructure in Kashechewan First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 3 Water Treatment System built in 1997. ▪ Water Quality: No current drinking water advisories.	▪ Level 1 Wastewater System. ▪ Constructed in 1997. ▪ Facultative Lagoon. ▪ Effluent Quality Unknown.	▪ Connected via transmission line to Moosonee. Backup diesel generator.	▪ Landfill site on reserve.

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2021; Government of Canada, 2019; Hydro One, 2021; Hydro One 2018; Five Nations Energy Ince., 2021; Wataynikaneyap Power, 2021; Government of Ontario, 2021; 211 Ontario North, 2021.

3.7 Transportation

The Socio-Economic Baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;

DRAFT

- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the Socio-Economic Baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure available in the region, including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd. 2016).

The majority of First Nations communities are reachable only by remote airports or by winter roads. While some other communities have access to the provincial highway network.

Kashechewan First Nation relies on the Moosonee/ James Bay Winter Road Corridor which runs north from Moose Factory along the James Bay coast and connects to a gravel road in Otter Rapids to the south via the Wetum winter road (MNDM, 2020).

Kashechewan Airport is located 1.3 km west of the community of the community. The airport handles turboprop aircraft only.

3.7.1 Winter Road Traffic Volumes

Information is not currently available at this time.

3.7.2 Air Transportation Network in Kashechewan First Nation

Kashechewan First Nation has flight access via Thunder Airlines (Thunder Airlines, 2023) and Air Creebec (AirCreebec, 2023).

3.7.3 Waterways in Kashechewan First Nation Traditional Territory

Kashechewan First Nation traditional territories are within the secondary watersheds of Lower Albany River Watershed, Upper Albany River Watershed and Attawapiskat River (Government of Ontario, 2023). The Albany River runs throughout the Lower Albany River Watershed and the Upper Albany River Watershed and has a 135,000 km^2 drainage basin, which is used by Anishinaabemowin, Anishnaabe and Mushkegowuk communities for hunting and fishing (Kudelik, 2015).

Members of the community chose the community's name Keeshechewan which has the meaning in Cree, where the water flows fast. The Albany River, also known in Cree as Kistachowan Sipi, is a vital part of the community's traditional territory and cultural identity. The Kashechewan First Nation Community-Based Land Use Plan (CBLUP) Terms of Reference (ToR) identifies a traditional area that stretches approximately 200 km along the James Bay coast on either side of the Albany River, which includes various river systems draining to James Bay and the Albany River.

DRAFT

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The Socio-Economic Baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key socio-economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four socio-economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that "well-being" means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people's overall "well-being."

The four socio economic factors used in the scoring of the CWB:

- Education – based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity – measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income – calculated based on a community's total income per capita; and
- Housing – based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

Table 3-15: CWB Index Scores for Kashechewan First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	58	40	69	54	71
First Nations in Ontario	59	38	72	53	70
Kashechewan First Nation	39	27	57	36	36

Source: Indigenous Services Canada, 2019b.

Kashechewan First Nation has a low CWB score for education (27), in comparison to First Nations in Canada (40) and First Nations in Ontario (38).

Kashechewan First Nation's income score is 36, which is below the scores of First Nations in Canada (54) and First Nations in Ontario (53).

DRAFT

With a score of 57, Kashechewan First Nation score for labour is also lower when compared with First Nations in Canada (69) and First Nations in Ontario (72).

Kashechewan First Nation has a housing score of 36, which is significantly lower than First Nations in Ontario (70) and First Nations in Canada (71).

Kashechewan First Nation with a score of 39 for overall community well-being and safety is well below that of First Nations in Ontario (59) and First Nations in Canada (58).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments responsible for serving Indigenous communities in Canada (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-16 provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the OPP. The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (Ontario Provincial Police (OPP), 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-16: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total Crime, Rate, 2021*	Total Violent Crime Rate, 2021*	Total Sexual Assault, Rate, Level 1, 2021*	Total Drug Violations, Rate, 2021*
Nishnawbe-Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224
James Bay, OPP, rural	10,911	3,948	202	348

Source: Statistics Canada, 2022b.

Note: *Data are reported as rates of 100,000 people.

DRAFT

ECONOMIC ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

4. Economic Environment

4.1 Labour Force and Employment

Indigenous people are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live.

The traditional economy is an important cultural and economic aspect of community life. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for Kashechewan First Nation.

The following section provides an overview of population and demographics at a district level.

4.1.1 Labour Force Characteristics

Table 4-1 present the forecasted working age population in the Cochrane District over the projection period. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada 2017, 2022). The values for 2028, 2023, and 2043 were forecasted based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64:

- The working age population is decreasing over the projection period; and
- Based off current growth trends, the working age population is forecasted to decrease by 13,215 between 2016 and 2043, a decline of approximately 25.2%.

Table 4-1: Projected Working Age Population in Cochrane District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	52,460	100%	26,355	50.2%	26,105	49.8%
2021	49,715	100%	25,130	50.5%	24,590	49.5%
2028	46,112	100%	23,510	51.0%	22,616	49.0%
2033	43,699	100%	22,417	51.3%	21,303	48.7%
2043	39,245	100%	20,382	51.9%	18,902	48.2%

Source: Statistics Canada, 2017; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-2 present the breakdown of the population in the labour force and those not in the labour force for Cochrane District in 2021.

DRAFT

Table 4-2: Labour Force Participation in in Cochrane District (2021)

Labour Force Participation	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
In the labour force	37,475	100%	19,745	52.7%	17,725	47.3%
Not in the labour force	26,180	100%	12,060	46.1%	14,125	54.0%

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-3 presents the breakdown of the employment status for those classified as being in the labour force for Cochrane District in 2021.

- Of the population classified as in the labour force, 90.8% are employed; and
- The unemployment rate for the Cochrane District labour force is approximately 9.2%.

Table 4-3: Employment Status of Labour Force in Cochrane District (2021)

Labour Force Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Employed	34,040	90.8%	18,010	91.2%	16,030	90.4%
Unemployed	3,430	9.2%	1,740	8.8%	1,695	9.6%
Total	**37,470**	**100%**	**19,750**	**100%**	**17,725**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-4 presents the number of jobs by 1-digit National Occupational Classification (NOC[1]) code for 2018 and 2022 in Cochrane District.

- Sales and service occupations is the leading job category in the Cochrane District with 8,097 jobs in 2022 which accounts for 21.2% of the total jobs;
- The Cochrane District has seen an increase in 7 occupational categories between 2018 and 2022 with an overall increase in jobs of 4% over the 4 years; and
- The occupational category with the largest percentage increase over the period was health occupations with a 17% increase.

DRAFT

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

Table 4-4: Cochrane District – Occupations by Category (2018 – 2022)

Occupation Categories	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Business, finance and administration occupations	4,959	5,377	418	8%
Natural and applied sciences and related occupations	1,873	2,134	261	14%
Health occupations	2,967	3,479	513	17%
Occupations in education, law and social, community and government services	4,953	4,870	(83)	(2%)
Occupations in art, culture, recreation and sport	409	419	10	2%
Sales and service occupations	8,155	8,097	(57)	(1%)

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and knowledge Keepers. These teachings take place in community and out on the Land. The knowledge passed on from the ancestors sustains Fort Albany identity and way of life.

Table 4-5 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Cochrane District for 2021.

- The majority of the population has a certificate, diploma, or degree at 47.3%; and
- 24.1% of the Cochrane District does not have a certificate, diploma, or degree, males make up 52.3% and females account for 47.7%.

Table 4-5: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Cochrane District (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
No certificate, diploma or degree	15,325	24.1%	8,015	25.2%	7,305	22.9%
High (secondary) school diploma or equivalency certificate	18,195	28.6%	9,295	29.2%	8,900	27.9%
Postsecondary certificate, diploma or degree	30,130	47.3%	14,490	45.6%	15,645	49.1%
Total	**63,650**	**100%**	**31,800**	**100%**	**31,850**	**100%**

DRAFT

Table 4-6 present the major fields of study for the Cochrane District's population aged 15 and over who had obtained a postsecondary education as of 2021.

- The fields most commonly studied were architecture, engineering, and related trades which includes but is not limited to construction trades, precision production, mechanic and repair technology, engineering, and historic preservation and conservation;
- The most commonly pursued fields of study for males were architecture, engineering, and related trades; and
- The most commonly pursued fields of study for females were health and related fields.

Table 4-6: Major Field of Study for the Population Aged 15 Years and Over in Private Households in Cochrane District (2021)

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

4.1.3 Labour Income

Table 4-7 presents the total individual income by group for the population aged 15 and over for 2020 in Cochrane District by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999 with 12.9% and 17.3%, respectively;
- The smallest individual income group for both male and female is $150,000 and over with 4% and 0.9%, respectively;
- In 2020, there were 130 more females than males with individual incomes; and
- In 2020, 75.7% of females were making under $60,000 while only 58.3% of males were within this group.

Table 4-7: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Cochrane District (2020)

Income Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Under $10,000 (including loss)	4,785	7.8%	1,965	6.4%	2,825	9.1%

Table 4-8 presents the total household income for private households in 2020 in the Cochrane District.

- The majority of households have an income level between $100,000 to $124,999 at 11.1%;
- The smallest household income group is $5,000 to $9,999 at 0.5%; and
- Approximately 50% of households bring in under $80,000 while the other half bring in over $80,000.

Table 4-8: Total Household Income Groups for Private Households in Cochrane District (2020)

Income Group	Count	Distribution
Under $5,000	280	0.8%
$5,000 to $9,999	170	0.5%
$10,000 to $14,999	550	1.6%
$15,000 to $19,999	850	2.5%
$20,000 to $24,999	1,615	4.8%

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in Kenora District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from Ministry of Natural Resources and Forestry (MNRF), Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product (GDP)

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Cochrane District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 4-9 presents the GDP for the Cochrane District between 2016 and 2021 (Statistics Canada, 2022a).

- GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. Between 2001 and 2016 GDP in the Cochrane District decreased by approximately 0.8%; and
- Between 2001 and 2016 GDP in the Cochrane District decreased by approximately 0.8%.

Table 4-9: Total Household Income Groups for Private Households in Cochrane District (2020)

Year	2001	2016	2001 – 2016 Growth	2001 – 2016 % Change
GDP	2,996.6	2,973.5	-23.1	-0.8%

Source: Northern Policy Institute, 2019b.

4.2.2 Cost of Living

Table 4-10 presents the number of households spending 30% or more of income on shelter costs for the Cochrane District in 2021. According to the CMHC, housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

- Of the 32,625 owner or tenant occupied dwellings in the Cochrane District, 14% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

Table 4-10: Distribution of Households Spending 30% or More of Income on Shelter Costs for Cochrane District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	27,975	86%
Spending 30% or more of income on shelter costs	4,650	14%
Total Owner and Tenant Households	**32,625**	**100%**

DRAFT

4.2.3 Economic Development

The Cochrane District is a census division in Northwestern Ontario and is comprised of 23 census subdivisions, seven of which are Indigenous communities.

The Cochrane District is a census division in Northeastern Ontario. It is comprised of 23 census subdivisions which include seven Indigenous communities. Approximately 60% of the Cochrane District population is in the City of Timmins and the Town of Cochrane.

The Ontario government is providing more than $6.3 million through the Northern Ontario Heritage Fund Corporation (NOHFC) to seven economic development projects in Cochrane District. Ontario is investing in Cochrane's prosperity and sustainability, while helping build a stronger Ontario by creating good-paying jobs, expanding business operations, supporting critical infrastructure, and improving quality of life in the North (Government of Ontario, 2022).

Examples of projects receiving NOHFC funding include (Government of Ontario, 2022):

- $3,585,603 for Rockshield Engineered Wood Products to renovate its facility and purchase equipment to improve mill productivity and efficiency.
- $1,000,000 for the Town of Cochrane to install municipal water and wastewater infrastructure along a section of Highway 11 South – a segment of the Trans-Canada Highway – to support further commercial development along the corridor.
- $42,500 for the Town of Cochrane to develop a feasibility study to establish a research isolation facility at the Cochrane Polar Bear Habitat to enhance polar bear care and support research on climate change and sustainability of the polar bear population.
- The NOHFC promotes economic prosperity across northern Ontario by providing financial assistance to projects – big and small, rural, and urban – that stimulate growth, job creation and skills development. Since June 2018, the NOHFC has invested more than $473 million in 4,244 projects in northern Ontario, leveraging more than $1.5 billion in investment and creating or sustaining over 6,600 jobs.

4.3 Business Environment

4.3.1 Local Economy

Table 4-11 presents a breakdown of all 21 industries based on 2-digit North American Industry Classification System (NAICS[2]) codes and their presence within the geographical boarders of the Cochrane District. Trends of industry presence in Cochrane District between 2018 and 2022 are summarized as follows:

- The industries with the highest growth between 2018 and 2022 include professional, scientific, and technical services (19%) and finance and insurance (15%);
- 7 of the 21 industries present in the Cochrane District saw a decline between 2018 and 2022;
- Approximately one third of supply chain purchases are made outside of the Cochrane District;
- The industry with the highest percentage of in-region purchases is agriculture, forestry, fishing, and hunting at 65%;
- The industry with the lowest percentage of in-region purchases is management of companies and enterprises at 0%; and
- Total supply chain purchases amounted to approximately $3.4 billion in 2020.

[2] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

DRAFT

DeBeers Canada's Victor Diamond Mine has closed its operations and is currently rehabilitating the mine site (DeBeers Group, 2023).

Commercial enterprise within Kashechewan First Nation includes local grocery goods at the Northern Store and ANH Market, and The Goose and Tim Horton's, and CC's Bed & Breakfast.

Table 4-11: All Industry Presence in Cochrane District (2018 – 2022)

DRAFT

Table 4-13 presents the regional requirements, the value of goods and services demanded of the Cochrane District by industry in 2020. Regional Requirements show the value of goods/services purchased from an industry (either in or outside the area) in order to meet the needs of the area. The table presents the level of demand for each industry met in-region and the demand met by imports that are summarized as follows:

- The majority of demand for goods and services is met by imports (76.5%);
- The industry meeting the most demand in-region is agriculture, forestry, fishing, and hunting with 52.2% of demand met in-region;
- 3 industries meet less than 10% of demand within region; and
- The total demand in 2020 was approximately $9.68 billion.

Table 4-13: Regional Requirements to Meet Demand by Industry in Cochrane District (2020)

Industry	In-region Purchases	% In-region Purchases	Imported Purchases	% Imported Purchases	Total Purchases
Agriculture, forestry, fishing and hunting	$150,857,137	52.2%	$138,325,310	47.8%	$289,182,447

DRAFT

4.3.2 Mining, Aggregate and Forestry Activities

Table 4-14 presents industry data for the following 2-digit NAICS[3] industries in Cochrane District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction; and
- Agriculture, forestry, fishing, and hunting.

Each industry includes a variety of occupations which include but are not limited to:

- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above 1 indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry grew by 599 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry exceeds the national average by more than 9 times in 2022;
- The agriculture, forestry, fishing, and hunting industry declined by 51 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is slightly higher than the national average with 1.42 in 2018 and 1.31 in 2022.

Table 4-14: Mining, Quarrying, and Oil and Gas Extraction Industry in Cochrane District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	3,513	4,112	599	0.2	8	9.4
Agriculture, forestry, fishing and hunting	623	571	-51	(8%)	1.4	1.3

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources within their traditional territories for various purposes related to achieving Mino Bimaadziwin (The Good Life) in Anishnawbek, or Pimaatisiium in Cree.

Kashechewan First Nation previously identified a traditional area of interest in its CBLUP terms of reference. The area extends approximately 200 km along the James Bay coast on either side of the Albany River, and inland to include the watersheds of many river systems draining to James Bay within this area, including the Albany River up to the confluence with the Kenagami River. Additionally, traditional harvesting areas that include the adjacent islands and the waters of western James Bay were identified, including areas that are within the jurisdiction of Nunavut (KFN and MNRF, 2017).

Kashechewan First Nation members engage in the traditional activities of hunting, fishing and trapping. Hunting focuses on moose, caribou and waterfowl (Victor Diamond Project, 2004).

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas including travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

Kashechewan First Nation have identified within their ToR for their CBLUP an area of interest for planning which includes territory that has been used by Kashechewan First Nation members. As provided in the CBLUP TOR, concepts and principles that will be implemented by the community as part of land use planning for the community and it's traditional territory, includes the following:

- "Kashechewan Crees have lived in these Lands and used the James Bay (Weenee-peg-kook) waters and surrounding rivers and lakes for generations.
- Our ancestors - We have been and continue to be custodians and stewards of the lands and waters and all their resources. We multiplied and spread across a vast territory.
- Our Cree origin taught us spirituality and everything we needed for our holistic wellbeing through kinship, language, culture, history, and traditional governance practices.
- Our relationship to the lands and waters are an integral part of our cultural and economic existence and we are a part of this land." ((KFN and MNRF, 2017).

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the Project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinabe/Mushkeego and Métis peoples. “The Anishiniimowin/Anishinabe/Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022). The Métis homelands are also present within the James Bay Treaty area. The Anishiniimowin/Anishinabe/Mushkeego and Métis peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define ongoing rights and obligations on all sides. These agreements set out continuing Treaty Rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations;
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two -thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013).*

Treaty No. 9 was signed between the Anishiniimowin/Anishinabe/Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

In April 2023, leaders from 10 Treaty No. 9 First Nations announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the *Public Lands Act* (Section 6.6.2).

As described in Section 5, traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to CBLUPs initiated by Indigenous communities.

6.5 Road/Transportation Studies

No Road/Transportation Studies were available for review for Kashechewan First Nation at this time.

DRAFT

6.6 Provincial Plans and Policies

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations communities and the province of Ontario. The *Far North Act, 2010* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with Indigenous communities and groups, among other land uses in First Nations areas, traditional and customary use, as well as the potential for permissible use of lands for forestry, tourism, recreation, mineral exploration and mining, renewable energy, access and infrastructure, fire management, and climate change management.

6.6.2 Public Lands Act

The Ontario *Public Lands Act* provides MNRF the authority to manage Crown land. Crown land occupies approximately 87% of all land and water in Ontario with 95% of northern Ontario considered Crown Land (MNRF, 2023a). The *Public Lands Act* outlines the use, management, sale and disposition of public lands and forests (Ontario, 2022). The Act guides Ontario's public land use planning and development, regulating public and private roads on public lands.

6.6.3 The Planning Act

The Ontario *Planning Act* is provincial legislation that sets out the ground rules for land use planning. The *Planning Act* outlines how land may be used and controlled and the purpose of this Act is to make sure that planning processes are fair, open, accessible, timely, efficient and promote the best economic and environmental interest within the provincial policy framework. The *Planning Act* allows the province to integrate matters of provincial interest into municipal and regional planning decisions by requiring that all decisions that are made are in conformance with provincial plans.

6.6.4 Northern Ontario Transportation Plan

The draft Northern Ontario Transportation Plan, 2020 was developed to serve as a guide to help build a modern and sustainable transportation system for people in northern Ontario. It contains actions that will connect communities, provide safer and more reliable travel and unlock economic potential in the region. Goal 6 of this Plan outlines reliable travel options for remote and Far North communities. This plan is a living document and will be updated with actions to reflect the evolving needs of the region.

The Project is aligned with the objectives of this Plan and will support the goal of achieving sustainable development for northern Ontario.

DRAFT

6.6.5 Fisheries Management Plans

The Fisheries Management Plans as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and rivers and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake and river in a holistic manner and includes a range of management options to secure a healthy lake and river environment that conserves the diversity of the fish community and provide opportunities to contribute to the social and economic well-being of the surrounding area. Ontario is divided into Fisheries Management Zones (FMZ). Each specific FMZ outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023b).

Kashechewan First Nation's reverse and majority of its traditional territory lies within FMZ 7, and limited parts of Zones 2 and 3.

6.7 Land Use Plans and Policies

Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the socio-economic baseline for the Project.

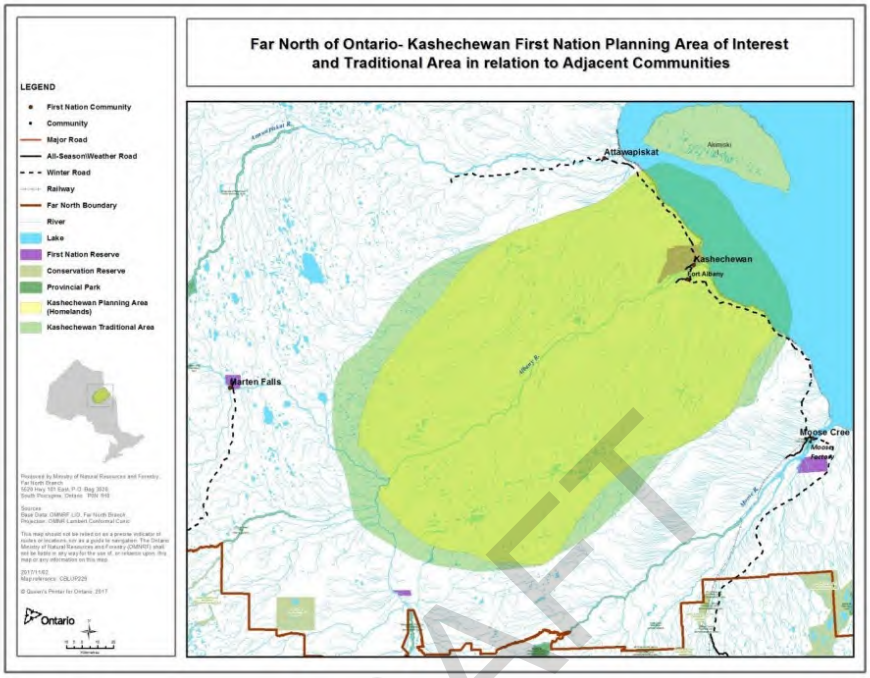
Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses of the land. Traditional land and resource use is described in Section 5.

The Terms of Reference (ToR) for Kashechewan First Nation CBLUP was signed in December 2017 (Ministry of Natural Resources and Forestry, 2021c). The ToR is intended to guide the CBLUP which outline the community's values and objectives for land use planning. Kashechewan First Nation identified an Area of Interest for Planning (AIP) that encompasses an area of 3,913,637 ha (see Figure 6-1) and is to the east of the project footprint of WSR. This AIP is defined by Kashechewan First Nation (Ministry of Natural Resources and Forestry, 2021c). The ToR outlines that the CBLUP will address the following land uses:

- Culture and Heritage Areas;
- Geoscience and Mineral Development;
- Protected Areas;
- Aggregates;
- Waterways;
- Forestry;
- Non-Timber Forest Products;
- Climate Change;
- Infrastructure;
- Tourism;
- Renewable Energy;
- Existing Uses;
- Oil and Gas;
- Peat/carbon sequestration;
- Horticulture; and
- Wildlife and Plants.

DRAFT

Figure 6-1: Kashechewan First Nation Draft AIP



Source: Ministry of Natural Resources and Forestry, 2021c

6.8 Industrial Land Use

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022b). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 4). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, this is done online through the Mining Lands

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through Environmental Assessment (EA)/ Impact Assessment (IA), and maximizing benefits and opportunities for First Nations communities.

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council. To enhance Indigenous community participation, the Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act*. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Kashechewan First Nation available at this time.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for a millennium, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation, and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is also important because it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Recreational activities in the Indigenous communities involve community-based sports and activities organized by the community administration or other groups such as schools. Recreation facilities typically include baseball diamonds, gym/community centres, hockey arenas, playgrounds, playing fields and other facilities. Youth and community events are hosted by communities.

Kashechewan First Nation has a community hall, gym and arena which hosts sports and social gatherings (211 Ontario North, 2023). There is a Northern Store and Air A.N.H Market which provides members with general goods (A.N.H Market, N.D and North Mart, N.D). Kashechewan Airport is located within the community and airCreebec flies in and out of the community (airCreebec, 2023).

DRAFT

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Kashechewan First Nation settlement.

In the region, provincial parks include:

- Albany River Provincial Park

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/ Anishinaabe/ Mushkegowuk communities. First Nation members have cabins and camps which they use for harvesting and hunting.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Kashechewan First Nation Reserve.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Kashechewan First Nation Reserve.

March 11, 2024

Chief Gaius Wesley
Kashechewan First Nation
P.O. Box 240
Kashechewan, O
P0L 1S0

Re: Preliminary draft Kashechewan First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Wesley,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the Kashechewan First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;

- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;
- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Kashechewan First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

March 14, 2024

Chief Gaius Wesley
Kashechewan First Nation
P.O. Box 240
Kashechewan, ON
P0L 1S0

Dear Chief Wesley,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates it was delivered to your community on February 5, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions

Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

March 27, 2024

Chief Gaius Wesley
Kashechewan First Nation
P.O. Box 240
Kashechewan, ON
P0L 1S0

Dear Chief Wesley,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 27, 2024, the package status indicates it was delivered to your community on February 5, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Aquatic Habitat Preliminary Findings.**

The livestreaming event is scheduled for **April 1st, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

May 14, 2024

Dear Chief Wesley,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 27th from 1:00-1:45pm EST** for Kashechewan First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87615564318?pwd=88ybeMfUg4HFwvBFgNOenHupjX6KeY.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 876 1556 4318 **Passcode**: 835005

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

WSR240-WEB-PR-LT-0865

Web-WSR Letter re Virtual Community Info Session KFN-2024-05-14

June 25, 2024

Dear Chief Wesley,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 8th from 1:00-1:45pm EST** for Kashechewan First Nation, where there will be a second presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/84915794089?pwd=2cULQbbJJ7UiU3bDkoOdjJCuEP36sB.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 849 1579 4089 **Passcode:** 213611

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, AtkinsRéalis

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Wesley,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Wesley:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

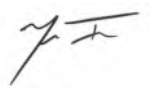
Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Michael Fox

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4

The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 27, 2024

Dear Chief Wesley,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, December 9th from 1:00-1:45 PM EST for Kashechewan First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/82568359584?pwd=moyNHBHZwpWTxawMsUhu3NY8dWXEVz.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

December 16, 2024

Chief Hosea Wesley
Kashechewan First Nation
P.O Box 240
Kashechewan, ON
P0L 1S0

Dear Chief Wesley,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on November 12, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

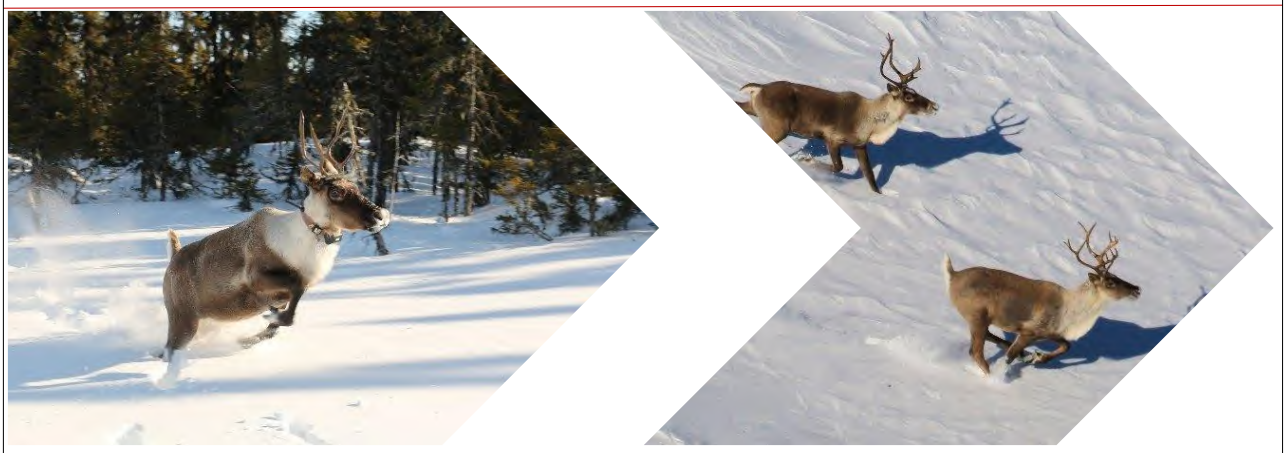
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

NOTES
DISCLAIMER

January 27, 2025

Dear Chief Wesley,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, February 10th from 1:00-1:45 PM EST for Kashechewan First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/88695994673?pwd=pigWPmYwa5hqvW3qXAruseOUNrmSXm.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Wesley,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Kingfisher Lake First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail

Topics to be Discussed: Notice of Commencement of Environmental Assessment

Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.

Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail

Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process

Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Kingfisher Lake First Nation's (KFLFN) Chief Lott Sainnawap, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if KFLFN has any questions or comments.

Attached File: Web-Newsletter Issue 5-English-2021-10-21-Rev0.pdf

Attached File: Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01.pdf

Contact Date: Nov 22, 2021 14:31 Method: Fax

Topics to be Discussed: Terms of Reference, Live stream: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds

Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team faxed a letter and poster, to Kingfisher Lake First Nation's (KFLFN) Chief Lott Sainnawap, advising that the WSR Project Team is hosting a live stream show and Wawatay radio session on November 23, 2021 with a livestream from 4:00-4:30pm EST and Wawatay Radio call-in show from 2:00-3:00pm EST, with access links and the toll-free call-in phone number. The sessions will include a presentation on topics including: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds Work Plans along with question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations, Michael's email and cell phone contact information if KFLFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program

Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Kingfisher Lake First Nation's (KFLFN) Chief Lott Sainnawap, which included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether KFLFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked KFLFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if KFLFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Kingfisher Lake First Nation's (KFLFN) Chief Lott Sainnawap, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited KFLFN to participate in the WSR socio-economic primary data collection program. The letter asked KFLFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if KFLFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail, to Kingfisher Lake First Nation's (KFLFN) Chief Lott Sainnawap, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited KFLFN to participate in the WSR socio-economic primary data collection program. The letter asked KFLFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if KFLFN has any questions.

Topics to be Discussed: WSR Newsletter - Wrap-Up of 2021 and What to Expect in 2022
Michael Fox and Brianna Patrick of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Kingfisher Lake First Nation's (KFLFN) Chief Lott Sainnawap, of the WSR Newsletter Issue 6. The newsletter provided an overview of 2021 project activities, including the approval of the Terms of Reference (ToR), the Study Plans that were developed, the Field Studies that were conducted, and information about what to expect in 2022. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael and Don Parkinson of SNC Lavalin provided their e-mail address and phone number if KFLFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team called the Kingfisher Lake First Nation (KFLFN) band office and spoke with Chief Lott Sainnawap as a follow up on the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program letter that was sent on December 13, 2021, inviting KFLFN to participate in the program. Brianna noted that the IKLRU Program has started and would like to know if KFLFN is interested in participating in the program by January 27, 2022. Brianna reminded KFLFN of the purpose of the IKLRU Program, and stated that if the community needs more time to discuss it with their Council or Team or would like to meet with the Project Team for a detailed overview of the program, then to please let us know. Chief Lott Sainnawap indicated that KFLFN is interested in participating in the program.

Topics to be Discussed: Virtual Information Session
Don Parkinson and Mark Knell of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Kingfisher Lake First Nation (KFLFN) on July 11, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Mark noted that no issues or questions had been raised by KFLFN regarding the WSR Project to date. Mark provided further information regarding the Indigenous Knowledge/Indigenous Land Use Program, the Regional Assessment that is underway by the Impact Assessment Agency of Canada, and the Cumulative Effects Analysis for the Project. Mark encouraged KFLFN members to connect with the Project Team via the Project website or social media to communicate feedback and/or ask questions about the Project. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community representatives in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: WSR Newsletter 17 and 18
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kingfisher Lake First Nation's (KFLFN) Chief Lott Sainnawap which included 50 copies of the English WSR Newsletter – Issue 17 and 50 copies of the English WSR Newsletter - Issue 18. Newsletter 17 provided information about the Surface Water baseline study findings and Cumulative Effects. Newsletter 18 provided information about Consultation Round 2 topics as well as fish and fish habitat baseline study findings. Both of the newsletters provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their e-mail address and phone number if KFLFN has any questions or comments.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Kingfisher Lake First Nation (KFLFN)'s Chief Eddie Mamakwa which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 14, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of the Alternatives Assessment Process, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team will begin Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KFLFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kingfisher Lake First Nation (KFLFN)'s Chief Eddie Mamakwa, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of KFLFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Kingfisher Lake First Nation (KFLFN)'s Chief Eddie Mamakwa as a follow up to the email sent on March 17, 2023 regarding the invitation to participate in the Socio-Economic Primary Data Collection Program as part of the Environmental Assessment / Impact Assessment. Heather asked the Chief if they had any questions regarding the original email and letter and indicated that the WSR Project team would like to hear back by April 17, 2023 as to KFLFN's interest in participating in the program. The letter detailed the purpose of the socio-economic study, the type of information that the WSR Project team is seeking, the study area, how information will be collected, schedule, and next steps. Heather requested the Chief to let the WSR Project team know if they prefer a call to discuss the request in the letter.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Kingfisher Lake First Nation (KFLFN) on April 17, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, the Project Team played a voiceover presentation which included a testimony by the Webequie First Nation Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don discussed several concerns that had been previously raised by KFLFN. Don mentioned that the concerns are regarding baseline studies on birds, caribou and moose, employment opportunities, project impacts, integration of Indigenous Knowledge, impact on traditional land use and way of life, vegetation studies and impact on waterbodies. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if KFLFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Eddie Mamakwa of Kingfisher Lake First Nation (KFLFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding KFLFN's participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted that the Project team has also phoned the band office on January 17, 2022, to follow up and advise that the IKLRU Program has started and to confirm the community's interest in participating, to which Chief Lott Sainnawap expressed interest for KFLFN's participation in the IKLRU Program. The letter explained that the Project team followed up by sending an email to Chief Lott Sainnawap on August 3, 2022, and the Project team has not received any further response. The letter provided an overview of the IKLRU Program as part of the Environmental Assessment / Impact Assessment and indicated that the community is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. The Project team encouraged the community to contact Ontario to determine how to proceed with submission of an application to receive funding for the community and offered support throughout the process. The letter requested an indication of the community's interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

Topics to be Discussed: Virtual Information Session
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a package via Canada Post to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for KFLFN on July 4, 2023, between 2:00-3:00pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KFLFN has any questions or comments.

McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team phoned the Kingfisher Lake First Nation (KFLFN) band office as a follow up to the phone call on June 29, 2023, regarding the email correspondence sent on June 6, 2023 inviting KFLFN’s participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. There was no answer, so McKenna left a voice message with the purpose of the call and her contact information.

Contact Date: Jul 04, 2023 14:00 Method: Indigenous Community Meeting
Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Kingfisher Lake First Nation (KFLFN) on July 4, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 2 of Consultation Round 2 will discuss the Project team’s work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from KFLFN were in attendance. Don reiterated that the Project Team would like to hear from KFLFN community members in-person and that a recording of the session would be available through YouTube and the WSR Website.

Topics to be Discussed: ATRI Forum Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Eddie Mamakwa of Kingfisher Lake First Nation (KFLFN) as a reminder to confirm if the community will be attending the Aboriginal and Treaty Rights and Interests (ATRI) Forum. The email reminded the community that the Province of Ontario is funding to cover travel expenses for up to 3 participants from the community and provided the email address to contact. The original invitation was also attached to the email which indicated that the ATRI Forum is being hosted by the Province of Ontario in Thunder Bay on November 21-23, 2023. The poster explained that Webequie First Nation and Marten Falls First Nation encourage the community to participate in the follow-up Forum to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link (NRL), and Marten Falls Community Access Road (MFCAR) Projects. The poster provided more information on how community representatives can attend, the purpose of the forum, who should attend from each community, and an email address for the community to RSVP. The Province of Ontario, Michael Fox of WSR, Andrea Nokleby of MFCAR, and Mishal Neesar of NRL provided their emails for further information if KFLFN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if KFLFN has any questions or comments.

Topics to be Discussed: Draft Community-Specific Preliminary Existing Conditions Document
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa with a letter and report attached regarding the Community-Specific Existing Conditions Summary Document. The letter requested the community's review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for KFLFN. The letter provided a list of the community-specific baseline information provided in the document and indicated that the Project Team would appreciate hearing feedback from the community on the document as the team is always open to working with the community for further improvement on the content.

Topics to be Discussed: Consultation Round 2 Report Follow Up, Livestream, Radio Show
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter provided the status of delivery as of March 14, 2024. An overview of the Consultation Progress Report for Round 2 was provided and the letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on March 18, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on the Floating Road, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KFLFN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Eddie Mamakwa of Kingfisher Lake First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Kingfisher Lake First Nation (KFLFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 1 presentation that began with a review of the project to date, followed by a discussion of preliminary results for two valued components: surface water and fish and fish habitat. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants form KFLFN were in attendance.

Topics to be Discussed: Indigenous Knowledge Program
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Eddie Mamakwa of Kingfisher Lake First Nation (KFLFN) to follow up about the Indigenous Knowledge and/or Land Resource Use Program (IKLRU). Michael asked the Chief if he would like to discuss the WSR Project at the 3 Project Gathering and Expo for which Ontario is supporting travel and accommodations. Michael attached the invitation to the email and directed the Chief to contact Ontario at the email address indicated in the invitation.

Topics to be Discussed: Virtual Reality Information Session Round 3 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for KFLFN on July 15, 2024, from 1:00-1:45pm EST with registration links for the session. The information session will include the second part of the presentation on WSR's Environmental Assessment / Impact Assessment (EA/IA) activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KFLFN has any questions or comments.

Topics to be Discussed: Field Notice Fall Geo-Technical Drilling Program
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa regarding a Field Notice for the Fall geo-technical drilling program. The email indicated that AtkinsRéalis is providing a notification to complete a drilling program for the WSR project to further engineering design and support the coordinated provincial Environmental Assessment and Federal Impact Assessment. The letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). The email indicated that all works will be conducted in accordance with the permit conditions issued by MNR. Attached to the email was the Field Notice explaining what is happening, the schedule and what to expect. For further questions, the contact information for Hayden Yip of AtkinsRéalis was provided.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for KFLFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Kingfisher Lake First Nation’s (KFLFN) Chief Eddie Mamakwa which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if KFLFN has any questions or comments.

Topics to be Discussed: Assessment of Effects on Surface Water Resources
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa with a letter and poster attached. The letter advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on November 18, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on the Assessment of Effects on Surface Water Resources, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if KFLFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 4 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Kingfisher Lake First Nation. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from KFLFN were in attendance.

Topics to be Discussed: Consultation Progress Report Round 3 Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) sent an email to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa with a letter attached regarding follow up for the Consultation Progress Report for Round 3. The letter indicated that on November 5, 2024, the Project team mailed a package via Canada Post to the community containing the Consultation Progress Report for Round 3, and as of today, December 16, 2024, the package status indicates it was delivered to the community on November 7, 2024. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. A list of key milestones and topics covered in the round of consultation was provided. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. Michael's email and cell phone contact information was provided if KFLFN has any questions or comments.

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Kingfisher Lake First Nation's (KFLFN) Chief Eddie Mamakwa with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Eddie Mamakwa of Kingfisher Lake First Nation (KFLFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting, Michael also provided his email and phone number.
Attached File: Web-WSR Letter to KFLFN Re Early Circulation of Draft EAR IS for Review-2025-06-09RevB.pdf

Contact Date: Jun 09, 2025 11:55 Method: Phone
Topics to be Discussed: Coordination of Hand Delivery of Draft EAR/IS
McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team called the band office of Kingfisher Lake First Nation (KFLFN) and spoke with the receptionist who transferred the call to a councilor. McKenna introduced herself and indicated she is part of the WSR Project team and is trying to coordinate a ride for the Project team from the airport for the delivery of the hard copy of the Draft Environmental Assessment / Impact Statement (EAR/IS) for the following day. The councilor indicated that he would not be in the community but he provided the names of two councilors who would be in the community at the time.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Kingfisher Lake First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Kingfisher Lake First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Kingfisher Lake First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Kingfisher Lake First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Kingfisher Lake First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Kingfisher Lake First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Kingfisher Lake First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Lott Sainnawap,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Kingfisher Lake First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Kingfisher Lake First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Kingfisher Lake First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022 Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Lott Sainnawap,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Kingfisher Lake First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

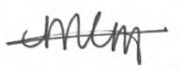
Next Steps

In order to confirm that Kingfisher Lake First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

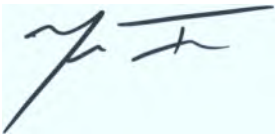
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

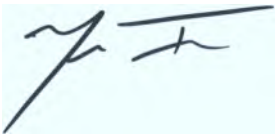
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.

April 1, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Socio-Economics. This upcoming week's session is: **WSR Presents: Socio-Economics.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 6th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to brianna.patrick@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.

April 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on human health. This upcoming week's session is: **WSR Presents: Human Health.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 20th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Lott Sainnawap,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Kingfisher Lake First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

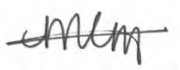
Next Steps

In order to confirm that Kingfisher Lake First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

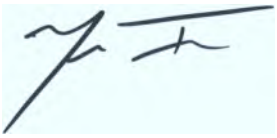
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

May 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on wildlife and species at risk. This upcoming week's session is: **WSR Presents: Wildlife and Species at Risk.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 18th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

June 27, 2022

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 11 between 12pm and 1:30pm** for Kingfisher Lake First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZYud-qqrT4uE91qahNqcnv55vhfAOY4FPBE.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 823 0323 5499 & Passcode: 780816.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/kingfisher/.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

July 26, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:
https://www.youtube.com/channel/UCh_heAjQoY2hPBPMr68MCzw

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

August 3, 2022

Dear Chief Sainnawap,

We hope that this letter finds you and your community well.

Thank you for expressing interest on January 17, 2022 in participating in the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project.

As you may know, Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Kingfisher Lake First Nation is eligible to receive participant funding by the Province of Ontario to participate in the IKLRU Program for the WSR Project. We encourage you to contact Ontario to determine how to proceed with your community’s funding agreement. Please let us know if there is any way we can offer our support throughout this process.

We would then like to meet with you and your team to discuss the scope of the IKLRU Program and how it will be carried out in terms of the study area, valued components,

criteria and indicators, and community participation. We are available to meet and discuss the IKLRU Program in detail at your convenience, and in any method that you and your community prefers, either in-person or virtually. Please inform on how you wish to proceed at your earliest convenience.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project website also has various informational videos, communication materials and project updates. Please visit: https://www.supplyroad.ca/

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

October 21, 2022

Chief Lott Sainnawap
Kingfisher Lake First Nation
PO Box 57
Kingfisher Lake, ON P0V 1Z0

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

2

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Other Ways to Stay Up To Date

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 30, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Cumulative Effects – An Explanation and Illustration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, December 6th, 2022 at 11:00am – 12:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. December 14, 2022

Chief Lott Sainnawap
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON
P0V 1Z0

Dear Chief Sainnawap:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status is delayed and is currently in transit to your community.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

3

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Chief Eddie Mamakwa
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON
P0V 1Z0

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Mamakwa,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

2

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 4, 2023

Dear Chief Mamakwa,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, April 17th from 2:00pm-3:00pm EST** for Kingfisher Lake First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/83981061662

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 839 8106 1662**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/kingfisher/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 6, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternative Road Corridors.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, April 12th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to serene.spence@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

June 6, 2023

Dear Chief Mamakwa,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to former Chief Lott Sainnawap on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022, to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating, to which Chief Lott Sainnawap expressed interest for Kingfisher Lake First Nation's participation in the IKLRU Program. The Project Team followed up by sending an email to Chief Lott Sainnawap on August 3, 2022. To date, we have not received any further response.

As you know from our previous correspondence, Webequie First Nation is the proponent of the WSR Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Kingfisher Lake First Nation is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. We encourage you to contact Ontario to determine how to proceed with submission of an application to receive funding for your community. Please let us know if there is any way we can offer our support throughout this process.

Our Project Team is available to discuss how your community can participate with capacity funding provided to lead a study that will help to document your community's

historical and current presence in your homelands, and how your way of life could be impacted by an all-season road.

We want to learn more about your community from your perspective on a range of topics, including:

- Community history
- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests, and ensuring they are protected.

We have a timeframe for the EA/IA process, to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you, to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 22, 2023

Dear Chief Mamakwa,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 4th between 2:00pm-3:00pm EST** for Kingfisher Lake First Nation, where there will be the second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87037362552

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 870 3736 2552**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/kingfisher/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

June 28, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Construction Camps.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, July 5th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. WSR
WEBEQUIE
SUPPLY ROAD

August 9, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

January 25, 2024

Chief Eddie Mamakwa
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON P0V 1Z0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Mamakwa:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

February 15, 2024

Chief Eddie Mamakwa
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON
P0V 1Z0

Dear Chief Mamakwa,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status is delayed and is currently in transit to your community.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Bridges and Water Crossings.**

The livestreaming event is scheduled for **February 26th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

February 28, 2024

Chief Eddie Mamakwa
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON
P0V 1Z0

Dear Chief Mamakwa,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 28, 2024, the package status indicates it has been delayed and is currently in transit to your community.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: How We Use Your IK in the EA.**

The livestreaming event is scheduled for **March 4th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

Information on existing conditions is used to provide a baseline understanding of the valued components of the community. Potential effects of the Project on valued components will be assessed by comparing baseline conditions to those expected to result from the construction and operation and maintenance of the Project. The information provided in this document is preliminary at this time, and it has been prepared with information that is known specifically for Kingfisher Lake First Nation. This is a living draft document that has yet to be reviewed and validated by the community.

Webequie First Nation is the proponent for the Project. The Project Team led by Webequie First Nation is striving to gather as much Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree) and Métis Indigenous Knowledge as it relates to the Project and to help inform the Socio-Economic Baseline. This document will be continuously updated when information from the Kingfisher Lake First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources and capacities of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trust.

Webequie is an Anishinaabemowin Tawin (community) located in Treaty No. 9 territory, about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (the good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation, like many Indigenous Nations and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' socio-economic data because Webequie First Nation, the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2. Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC, officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern tip of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established constitutional basis for future treaty negotiations and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	The *Indian Act:* Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claim staking procedures and prospectors' licenses providing exclusive rights to stake claims and work upon Crown lands.
Ontario Registered Trapline System, 1946	The Registered Trapline System imposed exclusive ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP was mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada (TRC), 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR Socio-Economic Baseline are Anishiniimowin, Anishinabe and Mushkeego First Nations, and Métis Peoples. First Nation traditional territories cover the lands in the study areas. A number of First Nations in the RSA are located north of the provincial highway system, and accessible only by air, water and winter roads. Other First Nations, and the Métis community, located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850.

Kingfisher Lake First Nation is located approximately 520 km north of the City of Thunder Bay and 165 km west of Webequie First Nation in northern Ontario. The community is situated on the western shore of Kingfisher Lake.

The community is formally affiliated with Shibogama First Nations Council, a registered not-for-profit Tribal Council, and the Nishnawbe Aski Nation provincial territorial organization.

Kingfisher Lake First Nation has a Chief, a Deputy Chief and four Councillors, with a custom electoral system and is expecting the next election scheduled on September 15, 2025 (CIRNAC, 2023n).

Kingfisher Lake First Nation is located in the census District of Kenora.

2.2 Community History

In 1808, HBC created an outpost at Big Beaver House, which is 12 km southwest of the present Kingfisher Lake reserve. From 1929-1930, leaders of Kingfisher Lake First Nation participated in the signing of Treaty No. 9 and as a result of this signing, they were considered part of Big Trout Lake Band (Kingfisher Lake, N.D). In 1964, the leaders of Kingfisher Lake first Nation decided to move and establish a permanent community at the current community location. Kingfisher Lake First Nation gained Band status in 1975 (Kingfisher Lake, N.D).

Historically, the Kingfisher Lake First Nation utilized their land for hunting, trapping, fishing, and gathering plants (Kayahna Area Tribal Council, 1985). There was heavy dependence on rivers as a resource, especially the Ashweig River, Pipestone River, and connecting rivers between Maria Lake and Wunnummin Lake. Although some residents of Kingfisher Lake First Nation were once residents of Big Trout Lake First Nation, the land within Big Trout Lake homeland was rarely utilized. Summer and winter travel routes were historically used to connect with neighbouring communities, such as Kitchenuhmaykoosib Inninuwug First Nation and Wunnummin Lake First Nation (Kayahna Tribal Area Council, 1985).

2.3 Community Values and Aspirations

The collective vision statement of Shibogama First Nations Council, which Kingfisher Lake is part of, is a collective vision of “Payahtakenemowin” (peace of mind) for the Shibogama communities. “We are strong, healthy people who respect and support all creation according to the teachings of our Elders.” (Shibogama First Nations Council, 2023).

Thawikayhigan LP (TKG Group), was established in 2018 and is owned equally by Kingfisher Lake, Kasabonika Lake, Kitchenuhmaykoosib Inninuwug, Wapekeka, Wawakapewin and Wunnumin Lake First Nations. The Group, based in Thunder Bay, works to generate new economic opportunities for its communities. “This is our first business acquisition that will directly service our First Nations,” said Jonathon Mamakwa, President of the TKG Group. “This is key in our overall plan in contributing to the development of healthy First Nation communities with vibrant economies that support future generations” (Dryden Now, 2023).

DRAFT

Wataynikaneyap Power announced that Kingfisher Lake First Nation was energized by the Wataynikaneyap Power Project transmission line from Pickle Lake on November 8, 2022. The Chief of Kingfisher Lake First Nation at that time stated that “Access to reliable energy will lead to many improvements for our people and the community. Schools, households, and businesses have been negatively impacted by frequent power outages. Improvements in healthcare, education, food security, and technology will no longer be constrained by the limited capacity of the diesel generators” (Wataynikaneyap Power, 2022).

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools used to assess socio-economic conditions in communities, as these data can also be used to identify vulnerable groups such as women, disabled persons, Elders and youth. These are segments of the population that could either benefit or be negatively impacted (directly or indirectly) by the Project, and often experience barriers to participation as under-represented groups. Population and demographics are described in this section using the following indicators using Census data:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into existing socio-economic conditions where the Project is being considered. The information is to be used in the assessment of potential effects of the Project and to develop strategies to mitigate any negative effects.

The following section provides an overview of population and demographics at a district level.

3.1.1 Population Overview

The Kenora District has a substantial population projected to have slight growth over the projection period, increasing from 66,000 in 2021 to 68,095 by 2043. Nearly half of the Kenora District population identifies as either First Nation, Métis, or Inuk. English is spoken in nearly all homes and there is a small percentage of in-migration to the District.

Table 1-2 present the forecasted population in the Kenora District for the period (2021 to 2043), broken down by self-identified gender. Population trends by self-identified gender in Kenora District are summarized as follows:

- Over the projection period there is a slight decline in the female population and accompanying increase in the male population.
- Between 2016 and 2043 the male population is forecast to increase from 32,895 to 35,716, an 8.6% increase.
- Between 2016 and 2043 the female population is forecast to decrease from 32,640 to 32,425, a 0.7% decrease.
- Between 2016 and 2043, the distribution of the male population is forecast to increase from 50.2% to 52.5% and the female population decreases from 49.8% to 47.6%.

Table 1-2: Kenora District – Population Forecast by Self-Identified Gender (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	32,895	50.2%	32,640	49.8%
2021	66,000	100%	33,400	50.6%	32,600	49.4%
2028	66,657	100%	34,120	51.2%	32,544	48.8%
2033	67,130	100%	34,644	51.6%	32,504	48.4%
2043	68,086	100%	35,716	52.5%	32,425	47.6%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 1-3 presents the forecasted population for the Kenora District over the projection period by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in Kenora District are summarized as follows:

- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 14,440 to 12,527, a 13.2% decrease;
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 41,820 to 38,152, an 8.8% decrease; and
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 9,275 to 21,313, a 129.8% increase.

Table 1-3: Kenora District – Population Forecast by Age Group (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	14,440	22%	41,820	64%	9,275	14%
2021	66,000	100%	14,065	21%	41,115	62%	10,820	16%
2028	67,129	100%	13,556	20%	40,148	60%	13,425	20%
2033	68,336	100%	13,204	19%	39,471	58%	15,661	23%
2043	71,992	100%	12,527	17%	38,152	53%	21,313	30%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 1-4 presents the population of the Kenora District by Indigenous identity for 2021. Indigenous identity of the Kenora District population is summarized as follows:

- 50.6% of the population identifies as non-Indigenous.
- The majority of the population that identifies as Indigenous identifies as First Nations at 43.1% of the population, followed by Métis (6.3%). No respondents identified as Inuit.

Table 1-4: Population Forecast by Self-Identified Indigenous Population, Kenora District (2021)

Indigenous Identity	Count	Distribution
First Nations	27,815	43.1%
Métis	4,070	6.3%
Inuit	30	0.1%
Non-Indigenous	32,680	50.6%
Total	**64,595**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.1.3 Languages

Table 1-5 present the languages spoken most often in the home within the Kenora District in 2021. Languages used by the Kenora District population in 2021 are summarized as follows:

- The majority of homes in the Kenora District speak English while at home at approximately 94%;
- Indigenous languages are the second most spoken within the home at 5.5%, this category includes 39 Indigenous languages; and
- French and other non-official languages make up the remaining 1.1% of homes at 0.7% and 0.4%, respectively.

Table 1-5: Language Used Most Often at Home, Kenora District (2021)

Language	Count	Distribution
English	59,670	93.5%
Indigenous Languages	3,510	5.5%
Other Non-Official Languages	430	0.7%
French	225	0.4%
Total	**63,835**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.4 Mobility and Migration

Table 1-6 below presents the mobility status of Kenora District residents in 2020. Mobility status refers to the status of a person's place of residence on Census Day in relation to their place of residence on the same date 1 or 5 years earlier (Statistics Canada, 2022a).

Residents are categorized as "non-movers" or "movers". Persons who, on Census Day, lived in the same residence as they did on the same date 1 year or 5 years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did 1 year, or 5 years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Kenora District is summarized as follows:

- 90.6% of residents were identified as "non-movers", 50.6% (29,440) of which were male and 49.4% (28,705) female; and
- "Movers" accounted for 9.4% of the population, 48.9% (2,950) of which were male and 51.2 % (3,090) female.

Table 1-6: Mobility Status of Residents, Kenora District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	58,140	90.6%	29,440	90.9%	28,705	90.3%
Movers	6,035	9.4%	2,950	9.1%	3,090	9.7%
Total	**64,175**	**100%**	**32,390**	**100%**	**31,795**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 1-7 present the immigration status of Kenora District residents for 2021.

- 4% of the population were classified as immigrants; and
- The distribution of immigrants between genders was equivalent in 2021.

Table 1-7: Immigration Status of Population in Kenora District (2021)

Immigration Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-immigrants	62,160	96%	31,465	96%	30,700	96%
Immigrants	2,490	4%	1,185	4%	1,305	4%
Total	**64,650**	**100%**	**32,650**	**100%**	**32,005**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2 Housing and Accommodations

Housing and accommodations are an important issue, in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

The following section provides an overview of population and demographics at a district level.

3.2.1 Housing Characteristics

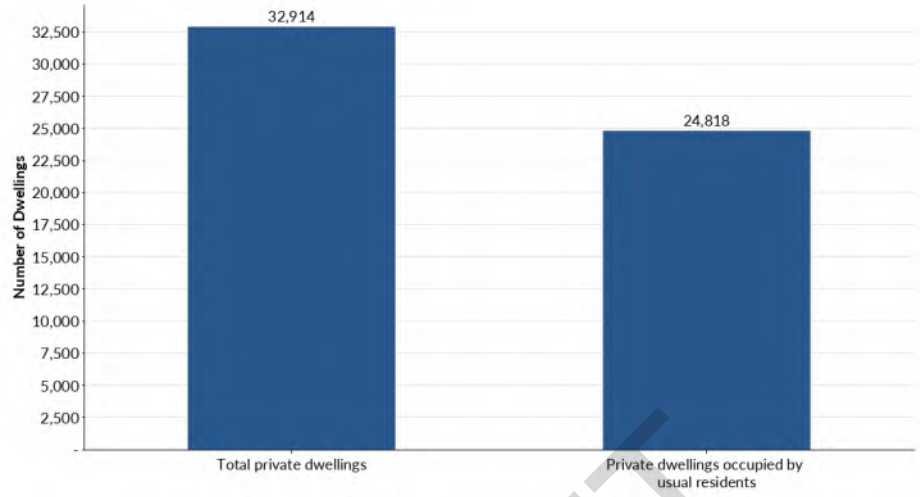
The Kenora District has 32,914 dwellings, 75% of which are occupied by usual residents.. A private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2022a). The Kenora District has the highest number of dwellings occupied by non-usual residents in the RSA. This is likely due to the high number of cottagers within the region. The majority of the dwellings in the District are owned however the Kenora District has the largest percentage of government or Band housing with just over 20% of occupied dwellings falling within this category. Over 60% of dwellings are occupied by 1 to 2 persons. Most of the dwellings in the Kenora District were constructed over 20 years ago, 50% of which were built prior to 1980. Most occupied dwellings are considered suitable for the household size and less than 20% require major repairs.

Figure 1-3 below presents the total private dwellings and private dwellings occupied by usual residents in the Kenora District. Private dwellings occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 32,914 total private dwellings in the Kenora District as of 2021.
- Of the 32,914 private dwellings, 24,818 (75.4%) are occupied by usual residents.

DRAFT

Figure 1-3: Total Private Dwellings and Occupied Private Dwellings in Kenora District, 2021



Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 1-8 below presents the total number of occupied dwellings for Kenora District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of dwellings are classified as a single-detached home at 81%;
- Apartments make up 10.1% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.3%.

Table 1-8: Kenora District – Occupied Private Dwellings by Structure Type, 2021

Structural Type	Count	Distribution
Single-detached house	20,100	81%
Semi-detached house	1,745	7%
Row house	915	3.7%
Apartment or flat in duplex	700	2.8%
Apartment in a building that has fewer than five storeys	550	2.2%
Apartment in a building that has five or more storeys	535	2.2%
Other single-attached house	200	0.8%
Moveable dwelling	75	0.3%
Total	**24,820**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 1-9 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Kenora District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings in the Kenora District are owned at 59.8%; and
- Occupied private dwellings which are rented or considered to be provided by the local government or band housing are nearly equal at 19.5% and 20.7% respectively.

Table 1-9: Private Dwellings by Tenure in Kenora District (2021)

Tenure	Count	Distribution
Owner	14,835	59.8%
Renter	4,840	19.5%
Dwelling provided by the local government, First Nation or Indian band	5,140	20.7%
Total	**24,815**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Kenora District. Table 1-10 below presents the total number of households by household size (i.e., the number of people per household) in Kenora District in 2021:

- The majority of households are occupied by two persons at 34%.
- The least number of households are occupied by four persons at 12%.

Table 1-10: Number of Households by Household Size in Kenora District (2021)

Household Size	Count	Distribution
1 person	6,835	28%
2 persons	8,385	34%
3 persons	3,470	14%
4 persons	3,005	12%
5 persons or more	3.130	13%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 1-11 below presents the number of rooms per household in Kenora District in 2021:

- The majority of households in the Kenora District consist of 1 to 4 rooms at 25% followed by 8 or more rooms at 22.6%; and
- The least number of households are comprised of 7 rooms at 14.1%.

DRAFT

Table 1-11: Number of Households by Number of Rooms per Household in Kenora District (2021)

Household Size	Count	Distribution
1 to 4 rooms	6,210	25.0%
5 rooms	5,155	20.8%
6 rooms	4,350	17.5%
7 rooms	3,500	14.1%
8 or more rooms	5,605	22.6%
Total	**24,820**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.3 Housing Conditions

The following subsections describe housing conditions including the numbers of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and condition of dwellings for Kenora District.

Table 1-12 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Kenora District:

- Dwellings constructed during the period from 1961 to 1980 is the largest group with 29% of private dwellings being built during this period;
- Dwellings constructed during the period from 2011 to 2015 is the smallest group with 4.3% of private dwellings being built during this period;
- 80.8% of the occupied private dwellings in the Kenora District were constructed during or prior to 2000.
- Over the last two decades, 4,760 dwellings were constructed which comprises less than 20% of the occupied housing stock.

Table 1-12: Occupied Private Dwellings by Period of Construction in Kenora District (2021)

Construction Period	Count	Distribution
1960 or before	5,300	21.4%
1961 to 1980	7,200	29.0%
1981 to 1990	3,770	15.2%
1991 to 2000	3,790	15.3%
2001 to 2005	1,290	5.2%
2006 to 2010	1,170	4.7%
2011 to 2015	1,055	4.3%
2016 to 2021	1,245	5.0%
Total	**24,820**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 1-13 below presents the suitability of occupied private dwellings in Kenora District in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- In 2021, 9.2% of the occupied private dwellings in the Kenora District were categorized as unsuitable.

Table 1-13: Occupied Private Dwellings by Suitability in Kenora District (2021)

Suitability	Count	Distribution
Suitable	22,540	90.8%
Not suitable	2,285	9.2%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 1-14 below presents the conditions of the private dwellings in Kenora District in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 17.3% of the occupied private dwellings in the Kenora District were categorized as requiring major repairs.

Table 1-14: Occupied Private Dwellings by Dwelling Condition in Kenora District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	20,535	82.7%
Major repairs needed	4,290	17.3%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.3 Community Services

Community services in Kingfisher Lake First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care).

Community Services information for Kingfisher Lake First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal which provides information on social, community, health and government services in northern Ontario.

3.3.1 Family Services

Child and Family Services (Tikanagan)

Tikinagan is a social services organization that provides child and family services for Kingfisher Lake First Nation. It is the largest provider of residential services in Ontario, with a service area that is approximately one third of the province of Ontario, servicing 30 First Nations communities (Tikinagan Child & Family Services, 2023a). In January 2020, Tikinagan was designated by the Ministry of Community and Social Services and the Band Council to provide child protection services to the families of who reside in the District of Kenora (Tikinagan Child & Family Services, 2023a).

Tikinagan was created to provide culturally specific child and family services, that emphasize Indigenous culture as part of its child welfare support work. This recognizes that previously support services for children and families were generally provided from outside First Nations communities. There are reports of harms inflicted from this approach (Tikinagan Child & Family Services, 2023b).

Services are culturally responsive and supportive of traditional values and customs. The model of “Mamow Obiki-ahwahsoowin” mandates that in all aspects of service delivery, workers are expected to consult with Elders of the community for wisdom, guidance, and teachings, and to receive direction on service delivery (Tikinagan Child & Family Services, 2023c). This specifically includes the requirement to consult with First Nations leadership on case management decisions.

An overall goal of the support work by Tikinagan is to keep children at home, and in their home communities. When necessary, foster homes for children in need are located in the child’s community or a nearby community, in order to reduce the distance from home and familiarity.

The Mamow Obiki-ahwahsoowin model mandates that authority rests the Chief and Council to declare that children be placed in Tikinagan care (Tikinagan Child & Family Services, 2023c).

Family Well-Being Program

The Family Well-Being Program is a Nishnawbe Aski Nation initiative that aims to support each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improving the overall health of communities. Its activities and programs include revitalizing Native languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counselling, and child/ youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events. The program works towards eliminating family violence, reducing the number of youths involved in the justice system, and decreasing the number of children in care (211 Ontario North, Kingfisher Lake First Nation, 2023a).

3.3.2 Child Care and Youth Programs

Healthy Babies Healthy Children

The Healthy Babies Healthy Children Program aims to support parenting and promote healthy child development for Kingfisher Lake First Nation families with children under 6 years old, as well as Indigenous children at risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care, organizes prenatal classes, and operates a children’s library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre- and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child’s early years to offer development guidance and referrals to other programs and services (211 Ontario North, Kingfisher Lake First Nation, 2023a).

DRAFT

3.3.3 Elder Care

Indigenous Services Canada, through the First Nations and Inuit Home and Community Care (FNIHCC) program, provides funding and guidance for Elder care. This program aims to establish home and community care services for Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services.

The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services (Indigenous Services Canada, 2023).

3.3.4 Health Services

Home Support Program

The Home Support Program is designed to assist Elders and/ or families that have members with disabilities in their residence, with routine household activities such as light housekeeping, laundry, shopping, meal preparation and personal care. This program provides household support for heavy and seasonal house cleaning, heavy outdoor work during the winter months (such as shovelling and firewood) and short-term loan of mobility aids such as walkers and raised toilet seats. It acts as respite for caregivers. This program is for members of Kingfisher Lake First Nation who require homemaking/home support assistance due to age (60 years and older) or living with a disability (211 Ontario North, Kingfisher Lake First Nation, 2023b).

Diabetes Program

The Diabetes Program provides education, prevention, management and treatment services for Kingfisher Lake First Nation members living with diabetes or at risk of developing diabetes. It provides case management and screening services, basic foot care services and referrals to other health care professionals. It works to reduce the number of avoidable complications that can arise from uncontrolled diabetes and helps patients develop and implement an approach to care and management of diabetes. It further assists individuals in finding appropriate services (211 Ontario North, Kingfisher Lake First Nation, 2023d).

Nursing Station

The King Fisher Lake Nursing Station is dedicated to promoting the physical and mental well-being of the community. It coordinates health care services through visiting community health nurses, visiting Physicians and Home Care workers. It provides health awareness and counselling, education and prevention workshops in areas that may include Child Care, Diabetes, Elders & Chronic Disease Immunization, Sexual Health and Communicable Diseases.

The Nursing Station addresses individual health care needs by providing treatment of on-going health problems, emergency services, advocacy on behalf of individual with other health professionals, coordinating one-on-one pre-natal care with the community health nurse, home visits to the sick, Elders, new mothers, and persons with health care needs. It also provides assistance with coordinating local and long-distance travel arrangements for medical appointments (211 Ontario North, Kingfisher Lake First Nation, 2023e).

National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program provides assistance and support to individuals and families in Kingfisher Lake First Nation who are struggling with addiction issues. This program offers AA and NA meetings and provides transportation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural

DRAFT

and spiritual gatherings. Aftercare is also provided through counseling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to other services such as detoxification and medical assistance (211 Ontario North, Kingfisher Lake First Nation, 2023f).

Extended Health Benefits

The Extended Health Benefits Program provides a range of health benefits to individuals and families who experience high health costs. Eligibility for the program is determined based on need and is open to members of Kingfisher Lake First Nation aged 16 to 65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies, and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Kingfisher Lake First Nation, 2023c).

Suboxone Treatment Program

The Suboxone Treatment Program provides a detoxification program for members of Kingfisher Lake First Nation who are struggling with prescription drug abuse and addiction. Operating as a day program, the initiative offers suboxone as a substitute for methadone to minimize the effects of opioid withdrawal. The program includes intake, withdrawal treatment, counselling, and aftercare services. Additionally, the program provides mental health and addiction counselling, as well as referrals to other treatment centres and programs such as Nodin Child & Family Intervention Services in Sioux Lookout (211 Ontario North, Kingfisher Lake First Nation, 2023g).

Community Mental Wellness Team

The Shibogama First Nations Council Community Mental Wellness Team provides mental health supports and services in its communities including counselling, crisis support, clinical consultation, case management and workshops to support mental wellness. It aims to improve access to needed specialized services where gaps exist and coordinate training for community frontline workers (Shibogama First Nations Council, 2023a).

Crisis Response Team

The Shibogama First Nations Council Crisis Response Team promotes the safety of each community through emergency response plans coordinated by area resource teams. It facilitates intervention, counselling and support group services for community members who are experiencing some form of crisis. It offers service coordination service to mobilize local resources and support communities in the preparing of resources for the COVID-19 pandemic (Shibogama First Nations Council, 2023b).

3.3.5 Recreational Services

Youth Well-Being Team

The Shibogama First Nations Council Youth Well-Being Team is a mental wellness program that provides support to Shibogama youth while they are away from their home communities attending Sioux North and Pelican Falls First Nation high school, as well as youth receiving specialized services/ treatment while in Sioux Lookout. Some of the services offered include counselling, expressive arts therapy, land-based and cultural activities, and referrals for specialized services. This program also offers a variety of youth activities at the "Shib Crib" on Front Street in Sioux Lookout as a comfortable and safe environment where youth can claim the space as their own to socialize with their friends, while participating in positive lifestyle programming (Shibogama First Nations Council, 2023c).

DRAFT

3.3.6 Communications Services

Ontario Telemedicine Network (OTN)

The OTN offers specialized medical care through videoconferencing and other tele-diagnostic equipment, enabling specialists to remotely examine and prescribe treatments to patients in their home communities. This reduces the need for patients to travel to receive care, providing greater convenience and accessibility for those living in remote or underserved areas. It also provides opportunity for workshops and education sessions for staff and patients (211 Ontario North, Kingfisher Lake First Nation, 2023e).

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation were higher among non-Indigenous youths in Canada compared to Indigenous youths (Statistics Canada, 2023). However, when comparing First Nation youth living on reserves to First Nation youth living off reserves, those that live off reserves are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities for the Kingfisher First Nation using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

Kingfisher Lake First Nation has one school on reserve – Mary Ann Aganash Memorial School which offers schooling from junior kindergarten to Grade 8 (211 Ontario North, Kingfisher Lake First Nation, 2023h). There is no secondary school within the reserve and students can attend Pelican Falls First Nation High School in Sioux Lookout (211 Ontario North, Kingfisher Lake, 2023h) with the assistance of Northern Nishnawbe Education Centre (NNEC). Wahsa Distance Education provides classroom instruction from Sioux Lookout for students who remain on reserve (211 Ontario North, Kingfisher Lake, 2023). A new elementary school is currently being built in Kingfisher Lake First Nation. Construction started in June 2022 and once completed, it will accommodate two additional grades – grades 9 and 10. This school will replace the old school that was constructed in 1971 (Shibogama First Nations Council, 2023d). The new school can accommodate 153 students along with a teacherage across the school with four duplexes and two bungalows (Shibogama First Nation, 2023d). Completion date for the school is estimated to be Summer 2023. The school will include a fusion of traditional cultural teaching and a classroom setting (Shibogama First Nation, 2023d).

3.5 Emergency and Protective Services

The Socio-Economic Baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

DRAFT

Police services in most Indigenous communities in the Nishnawbe Aski territory are provided by Nishnawbe Aski Police Services (NAPS), the Anishinabek Police Service (APS), municipal police services or the Ontario Provincial Police (OPP). Fire services typically include both volunteer, and community and municipal fire services and departments.

NAPS is the largest First Nations police service in Canada, serving 34 communities in the Nishnawbe Aski Nation territory which covers two-thirds of Ontario (NAPS, 2023). NAPS is headquartered in Thunder Bay and divided into three regions – Northeast, Northwest and Central Region (NAPS Detachments, 2023). They currently employ 230 uniformed officers and 40 civilians (NAPS, 2023).

Police services in Kingfisher Lake First Nation are provided by the NAPS (NAPS, 2023). There is a NAPS Kingfisher Lake Detachment located within the community that includes three constables (NAPS, 2023).

Emergency medical services in fly-in First Nation communities are limited in nature and tend to be supported by regional service centres. If emergency care is required within the Indigenous communities, patients are typically transported by air ambulance to the larger regional service centres. The larger regional centres have Emergency Medical Services (EMS) teams available, and they are well connected with road access.

Where information is available, community input indicates a general need for additional emergency and protective services to address socio-economic challenges experienced in the Indigenous communities.

3.6 Community Infrastructure

Socio-Economic Baseline includes a description of the following community infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community infrastructure in Kingfisher Lake First Nation is described in Table 1-15.

Table 1-15: Description of community infrastructure in Kingfisher Lake First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 2 Water Treatment System built in 2008. ▪ Water Quality: No current drinking water advisory. Dates of previous drinking water advisories, October 22, 2004, to September 8, 2009.	▪ Level 1 Wastewater System. ▪ Constructed in 1996. ▪ Facultative Lagoon. ▪ Effluent Quality Unknown.	▪ As part of Watay Power Project, Kingfisher Lake First Nation was energized on November 8, 2022. ▪ Hydro One Remotes Communities Inc. continues to provide distribution service within the community.	▪ Landfill site close to the airport.

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2021; Government of Canada, 2019; Hydro One, 2021; Hydro One 2018; Five Nations Energy Ince., 2021; Wataynikaneyap Power, 2021; Government of Ontario, 2021; 211 Ontario North, 2021.

DRAFT

3.7 Transportation

The socio-economic baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the Socio-Economic Baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure available in the region, including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd. 2016).

The majority of First Nations communities are reachable by remote airports or by winter roads. While some other communities have access to the provincial highway network.

Kingfisher Lake First Nation is accessible via Pickle Lake/ Kingfisher Winter Road Corridor, which is an all-season road that runs north from Pickle Lake. The Kingfisher corridor is one of three winter road systems connecting communities from the Northern Ontario Resource Trail (NORT). The Kingfisher Winter Road Corridor connects six First Nation communities (MNDM, 2020).

3.7.1 Winter Road Traffic Volumes

Information is not currently available/section not complete at this time.

3.7.2 Air Transportation Network in Kingfisher Lake First Nation

Kingfisher Lake First Nation has flight access via Wasaya Airways Limited Partnership (LP) (Wasaya Airways Limited Partnership, 2023).

3.7.3 Waterways in Kingfisher Lake First Nation Traditional Territory

Kingfisher Lake First Nation traditional territories are within the secondary watershed of the Severn River (Government of Ontario, 2023).

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The Socio-Economic Baseline provides information that will enable the assessment of effects on community well-being and safety.

DRAFT

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key socio-economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four socio-economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that "well-being" means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people's overall "well-being."

The four socio-economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

Table 1-16: CWB Index Scores for Kingfisher Lake First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	**58**	**40**	**69**	**54**	**71**
First Nations in Ontario	**59**	**38**	**72**	**53**	**70**
Kingfisher Lake First Nation	55	18	81	53	68

Source: Indigenous Services Canada, 2019b.

Kingfisher Lake First Nation has a low CWB score for education (18), in comparison to First Nations in Canada (40) and First Nations in Ontario (38).

Kingfisher Lake First Nation's income score is 53, which is on comparable to First Nations in Canada (54) and First Nations in Ontario (53).

With a score of 81, the Kingfisher Lake First Nation score for labour is significantly higher when compared with First Nations in Canada (69) and First Nations in Ontario (72).

Kingfisher Lake First Nation has a housing score of 68, which is comparable to First Nations in Ontario (70) and First Nations in Canada (71).

Kingfisher Lake First Nation with an , for overall community well-being and safety score of 55, is comparable to, but slightly below that of First Nations in Ontario (59) and First Nations in Canada (58).

DRAFT

3.8.2 Safety

According to Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments serving populations where over half the residents were Indigenous communities in Canada in (Allen, 2020). The majority of these detachments are Royal Canadian Mounted Police (139), with the remaining OPP (7) and 36 First Nation administered police services. In general, these 182 police detachments had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non--Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia), with rates of crime of 16,593 per 100,000 population compared to 30,033 for Canada (Allen, 2020).

Table 1-17 provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are served by the (Ontario Provincial Police (OPP). The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (OPP, 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across reported categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 1-17: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total Crime, Rate, 2021*	Total Violent Crime Rate, 2021*	Total Sexual Assault, Rate, Level 1, 2021*	Total Drug Violations, Rate, 2021*
Nishnawbe-Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224
James Bay, OPP, rural	10,911	3,948	202	348

Source: Statistics Canada, 2022b.

Note: *Data are reported as rates of 100,000 people.

DRAFT

ECONOMIC ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

4. Economic Environment

4.1 Labour Force and Employment

Indigenouspeople are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live.

The traditional economy is an important cultural and economic aspect of community life. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for Kingfisher First Nation.

The working age population in the Kenora District is projected to decline over the projection period from 41,115 in 2021 to 38,152 by 2043 (Statistics Canada, 2017; 2022a). The unemployment rate within the District is lower than Ontario at just under 9%, however, the participation rate is 57% in comparison to 63% for Ontario (Statistics Canada, 2022a).

The Kenora District population has the lowest percentage of population with postsecondary certificate, diploma or degree in the RSA at 40% (Statistics Canada, 2022a).

Over half of the population who pursued postsecondary education studied either architecture, engineering, and related trades; health and related fields; or business, management, and public administration (Statistics Canada, 2022a).

The following section provides an overview of population and demographics at a district level.

4.1.1 Labour Force Characteristics

Table 1-18 presents the forecasted working age population in Kenora District over the projection period: 2016, 2021, 2028, 2033, and 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada, 2017, 2022a). The values for 2028, 2023, and 2043 were forecasted based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64. Projected trends of working age population in Kenora District are summarized as follows:

- The working age population is decreasing over the projection period; and
- Based off current growth trends, the working age population is forecasted to decrease by 3,668 between 2016 and 2043, a decline of approximately 8.8%.

DRAFT

Table 1-18: Projected Working Age Population in Kenora District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	41,820	100%	21,040	50.3%	20,775	49.7%
2021	41,115	100%	20,860	50.7%	20,255	49.3%
2028	40,148	100%	20,611	51.3%	19,549	48.7%
2033	39,471	100%	20,434	51.8%	19,059	48.3%

DRAFT

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the Land. The Knowledge passed on from the ancestors sustains Kingfisher Lake identity and way of life.

Table 1-22 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Kenora District for 2021.

- The majority of the population has a postsecondary certificate, diploma, or degree at 40.1%, within this group females are more likely to have a degree in comparison to males; and
- 30.9% of the population was no certificate, diploma, or degree at 30.9%. Males account for 52.9% of this group and females 47.1%.

Table 1-22: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Kenora District (2021)

DRAFT

4.1.3 Labour Income

Table 1-24 presents the total individual income by group for the population aged 15 and over for 2020 in Kenora District by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999;
- The smallest individual income group for both male and female is $150,000 and over with 3% and 1.1%, respectively;
- In 2020, there were 95 more females than males with individual incomes; and
- In 2020, 74% of females were making under $60,000 while only 65% of males were within this group.

Table 1-24: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Kenora District (2020)

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in the Kenora District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from Ministry of Natural Resources and Forestry (MNRF), Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product (GDP)

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Kenora District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 1-26 presents the GDP for the Kenora District for 2006 and 2016 (Northern Policy Institute, 2019a).

- Between 2006 and 2016 there was a decline in GDP of just over 10%;
- These trends reflect changes in the size and occupational distribution of employment in the district; and
- The Kenora District represents 0.2% of Ontario's GDP in 2016.

Table 1-26: GDP for Kenora District (2006 – 2016) (Expressed in millions of dollars)

Year	2006	2016	2006 – 2016 Growth	2006 – 2016 % Change
GDP	2,309	2,077	-232	-10.1%

Source: Northern Policy Institute, 2019b.

4.2.2 Cost of Living

The largest census subdivision within the Kenora District is the City of Kenora, which accounts for approximately 23% of the population. Table 1-27 presents a comparison of shelter affordability between the City of Kenora and Ontario. Both shelter costs and the cost of purchasing a house in Kenora are significantly less than the provincial averages (Choose Kenora, 2023).

Table 1-27: Shelter Costs and Dwelling Values, City of Kenora vs Ontario, 2016

	Owned – Kenora	Rented Kenora	Owned – Ontario	Rented – Ontario
Median shelter cost	$1,002	$882	$1,299	$1,045
Average shelter cost	$1,155	$873	$1,463	$1,109
Median dwelling value	$225,210	-	$400,496	-
Average dwelling value	$260,789	-	$506,409	-

Source: Choose Kenora, 2023.

Table 1-28 present the number of households spending 30% or more of income on shelter costs for Kenora District in 2021. According to the Canada Mortgage and Housing Corporation (CMHC) housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

Of the nearly 19,000 owner or tenant occupied dwellings in the Kenora District, 13% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

Table 1-28: Distribution of Households Spending 30% or More of Income on Shelter Costs for Kenora District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	16,490	87%
Spending 30% or more of income on shelter costs	2,455	13%
Total Owner and Tenant Households	**18,945**	**100%**

Services and may end up having to stay in urban centres longer than planned (Nishnawbe Aski Nation, 2022).

DRAFT

4.2.3 Economic Development

The Kenora District is a census division in Northwestern Ontario. It is comprised of 57 census subdivisions, 47 of which are First Nation communities. Combined, the City of Kenora, the City of Dryden, and the Municipality of Sioux Lookout make up 43% of the District's population.

Kenora District's economy is supported by several key sectors, including manufacturing, health care, public administration, forestry, mining services, culture and recreation, construction, and tourism.

The City of Kenora 5-year Tourism and Economic Development Strategy sets out 3 goals, tourism development, economic development, and tourism and economic foundations, with 9 accompanying objectives. Of the 9 objectives listed in the Strategy, 2 pertain to economic development (City of Kenora, 2021):

- Activate development on Kenora's vacant and underutilized lands:
  - Improve the development readiness of publicly owned residential, commercial, and industrial lands.
  - Improve awareness of development opportunities, incentives, and partnerships available for vacant and underutilized lands through marketing efforts.
- Support the growth and retention of local businesses and emerging sections:
  - Establish a centralized business hub and resource centre to support local businesses.
  - Position Kenora to take advantage of specific strategic sector opportunities.
  - Provide supports and information to new and existing businesses through community partner and City led initiatives.
  - Prioritize support of COVID-19 response and relief efforts to assist the local business community.

The Municipality of Sioux Lookout 2020-2025 Strategic Plan states the following goals for community innovation and development (Municipality of Sioux Lookout, 2020):

- Provide infrastructure and housing to meet the needs of our community, now and as it grows:
  - Confirm that our assets are sustainable and that they will meet our long-term needs.
  - Use municipal best practices to identify innovative approaches to managing our infrastructure.
  - Verify that our transportation infrastructure allows people to get around safely and efficiently.
  - Encourage an increase in the housing available in Sioux Lookout to meet our current and future needs.
- Collaborate with community partners to foster growth and economic development:
  - Work proactively with local and regional economic development groups to advance our community's best interests;
  - Support local efforts to improve Sioux Lookout as a place to do business.
  - Work with local partners to promote and encourage tourism.
  - Support public transportation to make it available and useful to as many of our residents as possible.
- Enable community growth through innovative, proactive planning:
  - Confirm that the Municipality's planning policies and practices are appropriate to address current needs and accommodate future growth.
  - Work to secure sufficient commercial property to attract businesses to Sioux Lookout.
  - Minimize regulatory obstacles to development while ensuring appropriate processes are followed.
  - Develop programs and policies that encourage new businesses to move to Sioux Lookout and existing ones to stay here.

DRAFT

- Strengthen and enhance Sioux Lookout's status as "Hub of the North":
  - Assure that YXL remains the #1 airport in our area.
  - Collaborate with the hospital to maintain a strong working relationship.
  - Consider the implications for Indigenous people of any Municipal policies.
  - Recognize that addressing our social issues enhances Sioux Lookout's status as "Hub of the North".

4.3 Business Environment

4.3.1 Local Economy

TKG Group was established in 2018 and is owned equally by Kingfisher Lake, Kasabonika Lake, Kitchenuhmaykoosib Inninuwug, Wapekeka, Wawakapewin and Wunnumin Lake First Nations. In January 2023, TKG Group acquired Oshtugon Computers Inc. which includes a variety of retail stores in Sioux Lookout and Dryden (TKG Group, 2023).

Table 1-29 presents a breakdown of all 21 industries based on 2-digit North American Industry Classification System (NAICS)[2] codes and their presence within the geographical boarders of the Kenora District in 2018 and 2022. Trends of industry presence in Kenora District between 2018 and 2022 are summarized as follows:

- The industries with the highest growth between 2018 and 2022 include professional, scientific, and technical services (24%) and wholesale trade (19%); and
- 9 of the 21 industries reported saw a decline in jobs between 2018 and 2022.

Table 1-29: All Industry Presence in Kenora District (2018 – 2022)

[2] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

DRAFT

Table 1-30 presents the industry supply chain, the purchases an industry makes from all other industries, in the Kenora District in 2020. This table displays the value and percentage of in-region purchases and imported purchases for 2020 that are summarized as follows:

- One fifth of supply chain purchases are made within the Kenora District;
- The industry with the highest percentage of in-region purchases is agriculture, forestry, fishing, and hunting at 71%;
- The industry with the lowest percentage of in-region purchases is management of companies and enterprises at 0%; and
- Total supply chain purchases amounted to approximately $2.7 billion in 2020.

Table 1-30: Industry Supply Chain in Kenora District (2020)

Industry	In-region Purchases	% In-region Purchases	Imported Purchases	% Imported Purchases	Total Purchases
Agriculture, forestry, fishing and hunting	$82,131,318	71%	$34,088,922	29%	$116,220,240

DRAFT

Table 1-31 presents the regional requirements, the value of goods and services demanded of the Kenora District by industry in 2020. Regional Requirements show the value of goods/services purchased from an industry (either in or outside the area) in order to meet the needs of the area. The table presents the level of demand for each industry met in-region and the demand met by imports that are summarized as follows:

- The majority of demand for goods and services is met by imports (82.8%);
- The industry meeting the most demand in-region is agriculture, forestry, fishing, and hunting with 52.6% of demand met in-region;
- Seven industries meet less than 10% of demand within region; and
- The total demand in 2020 was approximately $7.26 billion.

Table 1-31: Regional Requirements to Meet Demand by Industry in Kenora District (2020)

Industry	Demand met In-region	% Demand met In-region	Demand met by Imports	% Demand met by Imports	Total Demand
Agriculture, forestry, fishing and hunting	$84,483,367	52.6%	$76,021,015	47.4%	$160,504,382
Mining, quarrying, and oil and gas extraction	$39,675,550	4.8%	$781,595,917	95.2%	$821,271,467
Utilities	$21,477,418	14.1%	$131,307,986	85.9%	$152,785,404
Construction	$202,953,204	36.4%	$354,216,245	63.6%	$557,169,449
Manufacturing	$128,558,292	8.3%	$1,422,504,777	91.7%	$1,551,063,068

DRAFT

4.3.2 Mining, Aggregate and Forestry Activities

Table 1-32 presents industry data for the following 2-digit NAICS[3] industries in Kenora District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction;
- Agriculture, forestry, fishing, and hunting;
- Each industry includes a variety of occupations which include but are not limited to:
- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above 1 indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry grew by 222 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry exceeds the national average by more than 6 times in 2022;
- The agriculture, forestry, fishing, and hunting industry declined by 68 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is slightly higher than the national average with 1.37 in 2018 and 1.17 in 2022.

Table 1-32: Mining, Quarrying, and Oil and Gas Extraction Industry in Kenora District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	2,136	2,358	222	10%	5.9	6.5
Agriculture, forestry, fishing and hunting	493	425	-68	(14%)	1.4	1.2

Source: Lightcast, 2023b.

[3] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to traditional practices which include lakes and rivers for fishing and trapping corridors and trails for hunting and trapping. Many Indigenous communities rely on traditional practices, such as fishing and hunting as a source of food and income. As such, it is important to identify areas where traditional practices are used, to determine potential effects of the Project on Indigenous communities and their traditional use of lands and resources.

Historically, Kingfisher Lake First Nation and Wunnummin Lake first Nation had very close integration of territorial use between Maria Lake and Wunnummin Lake (Kayahna Tribal Area Council, 1985). The hunting territory has historically been larger in area than the trapping area (Kayahna Tribal Area Council, 1985). Areas south of Maria Lake and west and south of Big Beaver House were traditionally heavily utilized for hunting (Kayahna Tribal Area Council, 1985). The larger lakes in the Kingfisher Lake Area were historically used for both domestic and commercial fishing. The smaller lakes, creeks and rivers were solely fished for domestic use (Kayahna Tribal Area Council, 1985). Sturgeon were historically fished commercially within the Ashweig and Pipestone Rivers. This stopped in 1948 when the threat of extinction was high. Kingfisher Lake First Nation identified the following species that are harvested: ducks, geese, moose, caribou, sturgeon, fish and plants (Golder, 2018).

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas including travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

The original community – Big Beaver House Lake is a culturally important site for Kingfisher Lake First Nation (Golder, 2018). Kingfisher Lake members have expressed a strong reliance on the rivers, specifically the Ashweig, and Pipestone (this connects Maria Lake and Wunnummin Lake) (Kayahna Tribal Area Council, 1985). Kingfisher Lake community members have a number of traditionally important meeting places along the Pipestone-Pineimuta River route (Kayahna Tribal Area Council, 1985). During the summer, groups from Windigo Lake, North Caribou Lake and Weagomow Lake will gather along this summer travel route (Reading the maps of the Kayahna Region, 1985). There are many summer routes that Kingfisher Lake community members utilize which include a northerly route to Big Trout Lake along the Ashweig River and a route south of Kingfisher Lake through Big Beaver House and then to Menako Lake and Obustiga Lake region (Kayahna Tribal Area Council, 1985). During the winter, there is significant movement between Kingfisher Lake, Big Beaver House and Wunnummin Lake (Kayahna Tribal Area Council, 1985).

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the Project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinabe/Mushkeego and Métis peoples. “The Anishiniimowin/Anishinabe/Mushkeego peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022). The Métis homelands are also present within the James Bay Treaty area. The Anishiniimowin/ Anishinabe/ Mushkeego and Métis peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define ongoing rights and obligations on all sides. These agreements set out continuing Treaty Rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations;
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013).*

Treaty No. 9 was signed between the Anishiniimowin/Anishinabe/Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

In April 2023, leaders from 10 Treaty No. 9 First Nations announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

At this time, Kingfisher Lake First Nation does not have a Land Code under the *First Nations Land Management Act* and land use is governed under the *Indian Act*.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the *Public Lands Act* (Section 6.6.2).

As described in Section 5, traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to CBLUPs initiated by Indigenous communities. There is no available information on a Community-Based Land Use Plan (CBLUP) by Kingfisher Lake First Nation.

6.5 Road/Transportation Studies

No Road/ Transportation Studies were available for review for Kingfisher Lake First Nation at this time.

DRAFT

6.6 Provincial Plans and Policies

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations communities and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the *Far North Act*, 2010, the CBLUP process was developed by the province as a vehicle to explore with Indigenous communities and groups, among other land uses in First Nations areas, traditional and customary use, as well as the potential for permissible use of lands for forestry, tourism, recreation, mineral exploration and mining, renewable energy, access and infrastructure, fire management, and climate change management.

6.6.2 Public Lands Act

The Ontario *Public Lands Act* provides MNRF the authority to manage Crown land. Crown land occupies approximately 87% of all land and water in Ontario with 95% of northern Ontario considered Crown Land (MNRF, 2023). The *Public Lands Act* outlines the use, management, sale and disposition of public lands and forests (Ontario, 2022). The Act guides Ontario's public land use planning and development, regulating public and private roads on public lands.

6.6.3 The Planning Act

The Ontario *Planning Act* is provincial legislation that sets out the ground rules for land use planning. The *Planning Act* outlines how land may be used and controlled and the purpose of this Act is to make sure that planning processes are fair, open, accessible, timely, efficient and promote the best economic and environmental interest within the provincial policy framework. The *Planning Act* allows the province to integrate matters of provincial interest into municipal and regional planning decisions by requiring that all decisions that are made are in conformance with provincial plans.

6.6.4 Northern Ontario Transportation Plan

The draft Northern Ontario Transportation Plan, 2020 was developed to serve as a guide to help build a modern and sustainable transportation system for people in northern Ontario. It contains actions that will connect communities, provide safer and more reliable travel and unlock economic potential in the region. Goal 6 of this Plan outlines reliable travel options for remote and Far North communities. This plan is a living document and will be updated with actions to reflect the evolving needs of the region.

The Project is aligned with the objectives of this Plan and will support the goal of achieving sustainable development for northern Ontario.

DRAFT

6.6.5 Fisheries Management Plans

Fisheries Management Planning as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and rivers and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake and rivers in a holistic manner and includes a range of management options to secure a healthy lake and river environment that conserves the diversity of the fish community and provide opportunities to contribute to the social and economic well-being of the surrounding area. Ontario is divided into Fisheries Management Zones (FMZ). Each specific zone FMZ outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h).

Kingfisher Lake First Nation's reverse and majority of its traditional territory lies within FMZ 2.

6.7 Land Use Plans and Policies

Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the Socio-Economic Baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses on the land. Traditional land and resource use is described in Section 5.

Limited information is publicly available about Kingfisher First Nation's documented plans for land use (if any exist); however, as information becomes available through dialogue with the community, with permission from the community, information will be considered as part of the Environmental Assessment (EA)/ Impact Assessment (IA).

6.8 Industrial Land Use

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 4). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, this is done online through the Mining Lands Administrative System (MLAS).

DRAFT

Under Section 50 of the *Mining Act*, a Mining Claim provides exclusive rights for the claim holder to explore for minerals and rights to enter, use and occupy surface rights as necessary for exploration and development. A mining claim does not provide mining rights for the land to the holder of the claim. Someone that holds a prospector license may stake out a mining claim on land that is open for staking and prospect for minerals on any Crown land, including land traditionally used by Indigenous Peoples and communities (Natural Resources Canada, 2013).

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council.

To enhance Indigenous community participation, the Aboriginal Participation Fund provides $4.7 M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act*. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Kingfisher Lake First Nation available at this time.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities'. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for a millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is also important because as it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Kingfisher Lake First Nation has a business centre that includes the Omahamo Store has been operating within Kingfisher Lake First Nation for over 40 years. This also includes the Omahamo Hotel Complex and restaurant (Northwest Health Line, 2023c).

DRAFT

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Kingfisher Lake First Nation community.

- Albany River Provincial Park

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/Anishinaabe/Mushkegowuk communities. Severn River Conservation Reserve

The Severn River Conservation Reserve is located within the Severn River watershed and contains several important core natural heritage areas that are inventoried and protected by the Ministry of Natural Resources as Areas of Natural and Scientific Interest (ANSI) (Ministry of Environment, Conservation and Parks, 2023b). The Severn River watershed also holds cultural importance for First Nation communities, such as the Kitchenuhmaykoosib Inninuwug First Nation who use the historic canoe routes within the watershed and the lakes and rivers for fishing (Wildlands League, 2013).

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Kingfisher Lake First Nation Reserve.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Kingfisher Lake First Nation Reserve.

WSR
WEBEQUIE
SUPPLY ROAD

March 11, 2024

Chief Eddie Mamakwa
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON
P0V 1Z0

Re: Preliminary draft Kingfisher Lake First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Mamakwa,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the Kingfisher Lake First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;

- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;
- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Kingfisher Lake First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

Dear Chief Mamakwa,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates it has been delayed and is currently in transit to your community.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

March 20, 2024

Chief Eddie Mamakwa
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON
P0V 1Z0

Dear Chief Mamakwa,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 20, 2024, the package status indicates it has been delayed and is currently in transit to your community.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: What are the Protections After the EA?**

The livestreaming event is scheduled for **March 25th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet

WSR

Dear Chief Mamakwa,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Inc (formerly SNC-Lavalin Inc)

May 22, 2024

Dear Chief Mamakwa,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 3rd from 1:00-1:45pm EST** for Kingfisher Lake First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/89486391722?pwd=RmApSzaRx9A4nlXHkEDmsdcCeudUT0.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 894 8639 1722 **Passcode:** 026473

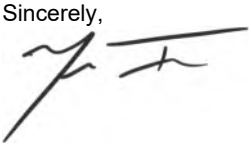
In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Mamakwa,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Mamakwa:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

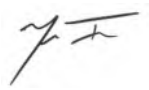
Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Michael Fox

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

December 5, 2024

Dear Chief Mamakwa,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, December 16th from 1:00-1:45 PM EST for Kingfisher Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/89478451436?pwd=0Nis8EmLIScoq809RxAAiK9iVpo27Y.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

December 16, 2024

Chief Eddie Mamakwa
Kingfisher Lake First Nation
P.O. Box 57
Kingfisher Lake, ON
P0V 1Z0

Dear Chief Mamakwa,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on November 7, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

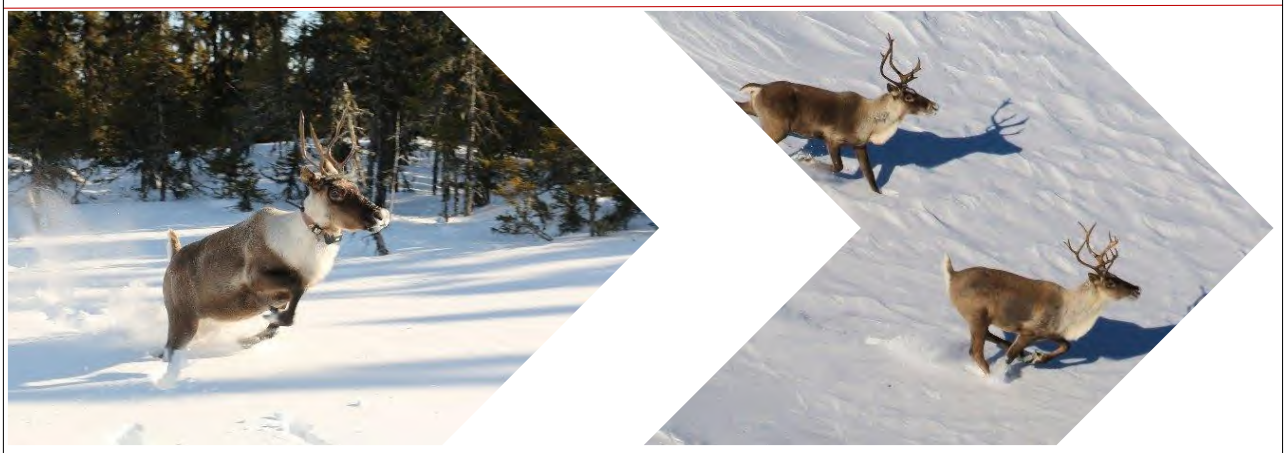
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

WEBEQUIE SUPPLY ROAD
NOTES
DISCLAIMER

February 5, 2025

Dear Chief Mamakwa,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, February 18th from 1:00-1:45 PM EST for Kingfisher Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/85103067978?pwd=h9ayqIkBfUT3sa2LF6EVd2DBU2Nnz3.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Mamakwa,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

APPENDIX P2.I.11

Correspondence with Indigenous Communities and Groups – Kitchenuhmaykoosib Inniuwug First Nation

Webequie Supply Road Project Consultation Log

Records Found: 1

Kitchenuhmaykoosib Inninuwug (KI) First Nation First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if KIFN has any questions or comments.

Attached File: Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01.pdf

Contact Date: Nov 22, 2021 14:33 Method: Fax
Topics to be Discussed: Terms of Reference, Live stream: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team faxed a letter and poster, to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris, advising that the WSR Project Team is hosting a live stream show and Wawatay radio session on November 23, 2021 with a livestream from 4:00-4:30pm EST and Wawatay Radio call-in show from 2:00-3:00pm EST, with access links and the toll-free call-in phone number. The sessions will include a presentation on topics including: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds Work Plans along with question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations, Michael's email and cell phone contact information if KIFN has any questions or comments.

Contact Date: Dec 13, 2021 17:12 Method: E-mail
Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Kitchenuhmaykoosib Inninuwug First Nation's (KIFN) Chief Donald Morris, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether KIFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked KIFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if KIFN has any questions.
