The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

February 15, 2024

Chief Rick Allen
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON
P0L 1B0

Dear Chief Allen,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates it has been delivered to your community on February 1, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: How We Use Your IK in the EA.**

The livestreaming event is scheduled for **March 4th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

March 6, 2024

Chief Rick Allen
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON
P0L 1B0

Dear Chief Allen,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 6, 2024, the package status indicates it was delivered to your community on February 1, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Results of the Caribou Study.**

The livestreaming event is scheduled for **March 11th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Re: Preliminary draft Constance Lake First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Allen,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the Constance Lake First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;

- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;
- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Constance Lake First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

Information on existing conditions is used to provide a baseline understanding of the valued components of the community. Potential effects of the Project on valued components will be assessed by comparing baseline conditions to those expected to result from the construction and operation and maintenance of the Project. This information is preliminary at this time, and it has been prepared with information that is known specifically for Constance Lake First Nation. This is a living draft document that has yet to be reviewed and validated by the community.

Webequie First Nation is the proponent of the Project. The Project Team led by Webequie First Nation is striving to gather Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree), and Métis Indigenous Knowledge as it relates to the Project and to help inform the Socio-Economic Baseline. This document will be continuously updated when information from the Constance Lake First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources and capacities of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trust.

Webequie First Nation is an Anishinaabemowin Tawin (community) located in Treaty No. 9 territory, about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (the good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation, like many Indigenous Nations and communities across Turtle Island (North America), have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' Socio-Economic data because Webequie First Nation, the proponent for the Project has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

DISCLAIMER

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2.

Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the Land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC, officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern tip of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established the constitutional basis for future treaty negotiations and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	The *Indian Act*: Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claims staking procedures and prospectors' licenses providing exclusive rights to stake claims and work upon Crown lands.
Ontario Registered Trapline System, 1946	The Registered Trapline System imposed exclusive ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP was mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada (TRC), 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR Socio-Economic Baseline are Anishiniimowin, Anishinabe and Mushkeego First Nations, and Métis Peoples. First Nation traditional territories cover the lands in the study areas. A number of First Nations in the RSA are located north of the provincial highway system, and accessible only by air and winter roads. Other First Nations, and the Métis community, located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850.

Indigenous communities in the socio-economic environment baseline report are First Nations and Métis, Anishiniimowin, Anishinabe and Mushkeego peoples. First Nations traditional territories cover the lands within the Project study areas. Most First Nations located north of the provincial highway system are accessible only by air, water and winter road. First Nations predominantly located further south, are serviced by the provincial highway system. Constance Lake First Nation is located 260 km northeast of the City of Thunder Bay, 20 km west of Nakina, and 310 km south of Webequie First Nation in northern Ontario. It is situated near the southeastern shores of Wawong Lake along Highway 663, an all-season road which connects to the Trans-Canada Highway 11 to the south. The community is formally affiliated with Matawa First Nations Management non-profit Tribal Council (Matawa First Nations, 2020a), and the Nishnawbe Aski Nation provincial territorial organization.

Constance Lake First Nation is located in the census District of Thunder Bay.

Constance Lake First Nation has a Chief and six Councillors, with an *Indian Act* electoral system, and is expecting the next election on June 26, 2025 (CIRNAC, 2023j).

2.2 Community History

Constance Lake First Nation was originally known as English River First Nation and the village was located along the shores of the Pagwa River (Constance Lake, N.D). Constance Lake First Nation is an Oji-Cree community that also includes people from the Albany and Attawapiskat Bands (Daigle, 2010). The Commissioners who arrived in 1905 had decided that the First Nations at English River were part of the Albany Band, and that it was not necessary to have them sign Treaty No. 9. An area of 12 square miles was outlined in the schedule of reserves as part of Treaty No. 9 (Constance Lake, N.D). Between 1925-1940, many families relocated to Pagwa from the English River to follow employment opportunities. On March 16, 1945, an Order-in-Council was passed that set aside this land along the Pagwa River as a reserve for Constance Lake First Nation (Constance Lake, N.D).

2.3 Community Values and Aspirations

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP,

DRAFT

among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is an important aspect as it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

The Wakenagun Community Futures Development Corporation provides technical and professional advisory services and training to enhance the overall managements skills and opportunities within the Mushkegowuk Region. Included in the Mushkegowuk Region are Constance Lake First Nation, Fort Albany First Nation, Kashechewan First and Weenusk First Nation.

Constance Lake signed an exploration agreement with Noble Mineral Exploration in 2022 to work on mineral lands within the community's traditional territory (Northern Ontario Business Staff, 2022a). The agreement "establishes a framework for consultation and accommodation with the community, but also addresses potential benefits to the First Nation from early-stage exploration work" (Northern Ontario Business Staff, 2022a).

Constance Lake First Nation is one of 10 northern First Nations who have launched a lawsuit against the Ontario and federal government in April 2023 (McIntosh, 2023). They have requested that the Canadian government be barred from making any decisions about how land could be used without Indigenous consent. The lawsuit centres on Treaty No. 9 and the contrast between the verbal and written promises of Treaty No. 9 as recorded (McIntosh, 2023). The Nations are arguing that they did not cede or surrender their territories and that Treaty No. 9 did not give the Ontario government the right to allow resource extraction (McIntosh, 2023).

Constance Lake First Nation shared concerns about the Project, specifically regarding their current lack of resources for a thorough technical review, the prioritization of environmental protections, and the expectation that the Project Team upholds commitments in the ToR for meaningful engagement, transparency, and open discussions (Constance Lake First Nation, 2020).

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools to assess Socio-Economic conditions in communities, as these data can identify vulnerable groups, the effects on vulnerable population groups such as women, disabled persons, Elders and youth, segments of the population that will either benefit or be negatively impacted (directly or indirectly) by the Project, and barriers to participation for local under-represented groups. The existing conditions of population and demographics are described in this section using the following indicators:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

This information is to be used in the assessment of potential effects of the Project and to develop strategies to mitigate any negative effects.

The following section provides an overview of population and demographics at a district level.

3.1.1 Population Overview

The 2021 Census included, for the first time, a question on self-identified gender and added “at birth” to the gender question, which enabled cisgender, transgender and non-binary individuals to report their gender (Statistics Canada, 2023).

Table 3-1 presents the forecasted population of the Thunder Bay District for the period 2021 to 2043, broken down by self-identified gender. Population trends by self-identified gender in Thunder Bay District are summarized as follows:

- Over the projection period both the female and male population are forecast to increase;
- Between 2016 and 2043 the male population is forecast to increase from 72,325 to 76,553, a 5.8% increase;
- Between 2016 and 2043 the female population is forecast to increase from 73,725 to 73,995, a 0.4% increase; and
- Between 2016 and 2043, the distribution of the male population is forecasted to increase from 49.5% to 50.9% and the female population is forecast to decrease from 50.5% to 49.2%.

Table 3-1: Population Forecast by Self-Identified Gender, Thunder Bay District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	146,050	100%	72,325	49.5%	73,725	50.5%
2021	146,860	100%	73,090	49.8%	73,775	50.2%
2028	148,002	100%	74,175	50.1%	73,845	49.9%
2033	148,822	100%	74,959	50.4%	73,895	49.7%
2043	150,478	100%	76,553	50.9%	73,995	49.2%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-2 presents forecasted population for the Thunder Bay District over the projection period by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in the Thunder Bay District are summarized as follows:

- The 0 – 14 years and 15 – 64 years age groups are both forecast to decline over the projection period while 65 years and over are forecast to grow;
- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 21,845 to 20,709, a 5.2% decrease;
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 95,930 to 81,584, a 15% decrease; and
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 28,270 to 56,522, a 99.9% increase.

Table 3-2: Population Forecast by Age Group, Thunder Bay District (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	146,045	100%	21,845	15%	95,930	66%	28,270	19%
2021	146,865	100%	21,630	15%	93,095	63%	32,140	22%
2028	149,063	100%	21,333	14%	89,266	60%	38,464	26%
2033	151,480	100%	21,123	14%	86,628	57%	43,729	29%
2043	158,814	100%	20,709	13%	81,584	51%	56,522	36%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 3-3 presents the population of the Thunder Bay District by Indigenous identity in 2021. Indigenous identity of the Thunder Bay District population is summarized as follows:

- 84.1% of the population identifies as non-Indigenous; and
- The majority of the population that identifies as Indigenous identifies as First Nations at 12.6% of the population, followed by Métis (3.3%). No respondents identified themselves as Inuit.

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Thunder Bay District (2021)

Indigenous Identity	Count	Distribution
First Nations	18,115	12.6%
Métis	4,690	3.3%
Inuit	30	0%
Non-Indigenous	121,000	84.1%
Total	**143,835**	**100%**

Source: Statistics Canada, 2022a.

DRAFT

3.1.3 Languages

Table 3-4 presents the languages spoken most often in the home within the Thunder Bay District in 2021. Languages spoken by the Thunder Bay District population in 2021 are summarized as follows:

- The majority of homes in the Thunder Bay District speak English while at home at approximately 96%;
- Indigenous languages are spoken most often at home in 0.3% of homes; this category includes 39 Indigenous languages; and
- French and other non-official languages make up the remaining 3.8% of homes at 2.9% and 0.9%, respectively.

Table 3-4: Language Used Most Often at Home, Thunder Bay District (2021)

Language	Count	Distribution
English	137,220	95.9%
Other Non-Official Languages	4,130	2.9%
Indigenous Languages	1,350	0.9%
Total	**375**	**0.3%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of Thunder Bay District residents in 2020. Mobility status refers to the status of a person's place of residence on Census Day in relation to their place of residence on the same date 1 or 5 years earlier (Statistics Canada, 2022a).

Residents are categorized as "non-movers" or "movers". Persons who, on Census Day, lived in the same residence as they did on the same date 1 year or 5 years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did 1 year or 5 years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Thunder Bay District is summarized as follows:

- 89.2% of residents were identified as "non-movers", 49.8% (63,510) of which were male and 50.2% (64,125) female; and
- "Movers" accounted for 10.8% of the population, 50.1% (7,775) of which were male and 49.9% (7,750) female.

Table 3-5: Mobility Status of Residents, Thunder Bay District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	127,640	89.2%	63,510	89.1%	64,125	89.2%
Movers	15,525	10.8%	7,775	10.9%	7,750	10.8%
Total	**143,165**	**100%**	**71,285**	**100%**	**71,875**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2 Housing and Accommodations

Housing and accommodations is an important issue in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generations of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following section provides an overview of population and demographics at a district level.

In general, the Thunder Bay District has 72,510 dwellings, 89% of which are occupied by usual residents. A private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2022a). Across the District, approximately 72% of homes are owned, and the remainder are rented. Under 2% of dwellings are considered government or Band housing. Over 60% of the dwellings are occupied by 1 to 2 persons and 30% have 8 or more rooms. Less than 10% of dwellings have been constructed over the past two decades. Nearly all dwellings are considered suitable based on household size and less than 10% are in need of major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations at the District level, by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

3.2.1 Housing Characteristics

Figure 3-1 presents the total private dwellings and private dwellings occupied by usual residents in the Thunder Bay District for 2021. Private dwelling occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 72,510 total private dwellings in the Thunder Bay District as of 2021; and
- Of the 72,510 private dwellings, 64,601 (89.1%) are occupied by usual residents.

DRAFT

Figure 3-1: Thunder Bay District – Total Private Dwellings and Occupied Private Dwellings, 2021

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-7 below presents the total number of occupied dwellings for the Thunder Bay District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of occupied dwellings are classified as a single-detached home at 71.6%;
- Apartments make up 21% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.2%.

Table 3-7: Total Occupied Private Dwellings by Structural Type in Thunder Bay District (2021)

Structural Type	Count	Distribution
Single-detached house	46,220	71.6%
Semi-detached house	8,495	13.2%
Row house	2,575	4%
Apartment or flat in duplex	2,500	3.9%
Apartment in a building that has fewer than five storeys	2,290	3.5%
Apartment in a building that has five or more storeys	1,715	2.7%
Other single-attached house	660	1%
Moveable dwelling	140	0.2%
Total	**64,595**	**100%**

DRAFT

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Thunder Bay District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings in the Thunder Bay District are owned at 72% followed by rented at 26.7%; and
- 1.3% of private dwellings are considered to be provided by the local government or band housing.

Table 3-8: Private Dwellings by Tenure in Thunder Bay District (2021)

Tenure	Count	Distribution
Owner	46,135	72.0%
Renter	17,135	26.7%
Dwelling provided by the local government, First Nation or Indian band	805	1.3%
Total	**64,075**	**100%**

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Thunder Bay District. Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Thunder Bay District in 2021:

- The majority of households are occupied by two persons at 36%; and
- The least number of households are occupied by five or more persons at 6%.

Table 3-9: Number of Households by Household Size in Thunder Bay District (2021)

Household Size	Count	Distribution
1 person	21,265	33%
2 persons	23,555	36%
3 persons	8,885	14%
4 persons	7,185	11%
5 persons or more	3,715	6%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.3 Housing Conditions

The following subsections describe housing conditions including the number of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and condition of dwellings for Thunder Bay District.

Table 3-11 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Thunder Bay District:

- Dwellings constructed during the period of 1960 or before is the largest group with 35.3% of private dwellings being built during this period;
- The four periods covering 2001 to 2021 are nearly evenly distributed and comprise 9.7% of occupied private dwellings;
- 90.3% of the occupied private dwellings in the Thunder Bay District were constructed during or prior to 2000; and
- Over the last two decades, 6,290 dwellings were constructed which accounts for less than 10% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Thunder Bay District (2021)

Construction Period	Count	Distribution
1960 or before	22,790	35.3%
1961 to 1980	21,420	33.2%
1981 to 1990	7,930	12.3%
1991 to 2000	6,165	9.5%
2001 to 2005	1,625	2.5%
2006 to 2010	1,575	2.4%
2011 to 2015	1,570	2.4%
2016 to 2021	1,520	2.4%
Total	**64,595**	**100%**

Source: Statistics Canada, 2022a.

DRAFT

Table 3-12 below presents the suitability of occupied private dwellings in Thunder Bay District in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- In 2021, 3.2% of the occupied private dwellings in the Thunder Bay District were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Thunder Bay District (2021)

Suitability	Count	Distribution
Suitable	62,560	96.8%
Not suitable	2,040	3.2%
Total	**64,600**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-13 below, presents the condition of private dwellings in Thunder Bay District in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 8.7% of occupied private dwellings in the Thunder Bay District were categorized as requiring major repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Thunder Bay District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	58,965	91.3%
Major repairs needed	5,640	8.7%
Total	**64,605**	**100%**

3.3 Community Services

Community services are a significant issue in remote communities because many services that are required by community members need to be accessed outside the community or are only available intermittently within the community. Historically, remote Indigenous communities have been under-serviced, which has had detrimental effects on the health and well-being of community members. Some of the most vulnerable people in the community have difficulty accessing services outside the community due to health and financial factors. The community services in Constance Lake First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care). The existing conditions of community services in the Constance Lake First Nation are described in this section.

Community Services information for Constance Lake First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal on social, community, health, and government services in northern Ontario.

3.3.1 Family Services

Family Services

In 1989 Kunuwanimano Child & Family Services, funded by the Ministry of Community and Social Services, began operations as a child and family services agency serving the needs of children and families under Section 30 of the *Child, Youth and Family Services Act* (Kunuwanimano Child & Family Services, 2023). Kunuwanimano has a mandate to deliver child welfare services to 11 First Nation communities within their catchment area. This mandate comes from both the Chiefs of the 11 First Nations and the Province of Ontario under the *Child, Youth and Family Services Act*. It was formed to eliminate all forms of abuse by providing services that encourage and support the healthy development of families and individuals in a manner that is appropriate to First Nations.

The programs take into consideration the best interests and well-being of the child, specifically the programs that recognize the uniqueness of First Nation culture, heritage, and traditions of preserving a child's cultural identity.

Kunuwanimano Child & Family Services offers advocacy services in order to provide information and educate clients, Bands/ Communities about their rights and responsibilities under the *Child and Family Services Act* (Kunuwanimano Child & Family Services, 2023); provides culturally appropriate dispute resolution options to clients, bands, communities and Children's Aid Societies in the form of traditional mediation practices which include the "Circle"; as a method of practice; and provides information to clients communities and bands in regards to their rights to the legal system including referring to legal aid.

Kunuwanimano also provides Band Representative Function to receive and respond to notices of hearings in relation to child welfare matters ensuring the pertinent Band/ Community is notified according to the community services agreements; offers consultation and support to local Bands/ Communities concerning band representative roles and responsibilities including case planning and assessments; and where requested, acts directly on notices in consultation with the Band/ Community as outlined in service agreements.

Kunuwanimano offers Counselling and Referral services to provide individual or group counselling both individually or in groups for children, youth and adults; provides community presentations, self help groups, parenting and other support programs; provides referral services to local and outside service providers including treatment and healing centres, co dependency programs, physical and sexual abuse programs and other agencies that provide mental health services such as assessment, diagnosis and treatment of mental and mood disorders; provides follow up services such as after care counselling post treatment programming; and offers referral services for local children's aid societies as a means of assisting with plan of care requests (Kunuwanimano Child & Family Services, 2023).

Kunuwanimano offers Customary Care/Foster Care to its communities. This service's role is to recruit and retain Aboriginal Foster caregivers and homes in accordance to rules and regulations outline in the *Child, Youth and Family Services Act*; provide training and support to Aboriginal Foster caregivers; provide assistance with voluntary/ customary care placements within the catchment area; provide support and counselling services to children in care; provide consultation and advertising in areas relating to customary care and foster care procedures; provide preventative services at "grass roots level" including awareness on child welfare matters including roles and responsibilities of the customary care/foster care worker; provide workshops on traditional modes of care as defined by our First Nation Communities to prevent the removal of children from the First Nation/Communities; provide repatriation services where needed by offering assistance and guidance, consultation and referral services; encourage customary care arrangements where applicable as a least intrusive measure; and confirm the protection of children as is identified as the paramount purpose to the *Child, Youth and Family Services Act* (Kunuwanimano Child & Family Services, 2023).

DRAFT

Family Support and Prevention Services are also offered by Kunuwanimano. The role of this service is to provide training to new and existing prevention and family support workers as per community agreements; provide services and supports to First Nations on all child welfare and Band Representative issues; provide preventative programming to all First Nations members regardless of residency; promote awareness and encourage involvement at community level “grass roots” intervention regarding child and family services and other issues relating to family support; network with other service providers including the volunteer sector to enhance current working systems, exchange information and work collaboratively on community projects; develop and deliver programs at the community level in accordance to culture, tradition and heritage; and maintain overall responsibility for the financial management of the programs as outlined in the community service agreements (Kunuwanimano Child & Family Services, 2023).

Family Well-Being Program

The Family Well Being Program is a Nishnawbe Aski Nation initiative that aims to support each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improving the overall health of communities. Its activities and programs include revitalizing Native languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counselling and child/ youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events. The program works towards eliminating family violence, reducing the number of youths involved in the justice system, and decreasing the number of children in care (211 Ontario North, Constance Lake First Nation, 2023a).

Food Bank

Constance Lake First Nation operates a Food Bank that provides non-perishable food items to individuals and families in emergency situations. It also offers milk and dairy products dependent upon availability (211 Ontario North, Constance Lake First Nation, 2023b).

3.3.2 Child Care and Youth Programs

Healthy Babies Healthy Children

The Healthy Babies Healthy Children program supports parenting and promotes healthy child development to members of Constance Lake First Nation with children under 6 years old, as well as Indigenous children at risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care, organizes prenatal classes, and operates a children’s library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre- and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child’s early years to offer development guidance and referrals to other programs and services (211 Ontario North, Constance Lake First Nation, 2023c).

Little Lambs Daycare Centre

Constance Lake First Nation operates a licensed daycare and an integrated program for children with special needs. The Centre offers age-appropriate structured activities including art, baking, circle time, dramatic play, field trips, music, story time and special events. It also provides supervised, unstructured indoor and outdoor playtime and daily lunch and morning and afternoon snacks. Childcare options include full day, half day, after school and summer care.

DRAFT

The Integrated Program for Special Needs provides individualized program planning geared to the specific needs of the child, promotes integration into all programs and provides one on one or group activities and support. Daycare enrollment is approximately 60 children. To enroll a child, there is a requirement for initial meeting/ registration with Daycare Administrator. Parents/ guardians who should also be members of Constance Lake First Nation must also present status card, birth certificate and immunization record of child/ children. Eligibility of children for admission is as follows (211 Ontario North, Constance Lake First Nation, 2023d):

- Infants: Birth to 18 months;
- Toddlers: 18 months-2.5 years;
- Pre-school: Children 3-5 years of age;
- Kindergarten and school-age: 5-12 years of age; and
- Summer care: birth to 12 years of age.

3.3.3 Elder Care

Elder Care

Indigenous Services Canada, through the FNIHCC program, provides funding and guidance for Elder care. This program aims to establish home and community care services for Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services.

The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services (Indigenous Services Canada, 2023).

Elder's Residence

Constance Lake First Nation operates a senior's complex offering nursing and personal support care in 10 individual apartments and coordinates monthly shopping trips and a weekend summer trip for residents. Further, it also provides basic and advanced practice foot care, blood sugar monitoring, checking of vital signs, congregate dining, emergency transmitter system (panic buttons), housekeeping duties, medication assistance, nursing care 5 days per week and personal care.

These services are offered to members of Constance Lake First Nation who require home services due to age or disabilities. The eligibility is determined upon review by Housing Manager and Home & Community Care Case Manager (211 Ontario North, Constance Lake First Nation, 2023e).

Home and Community Care

The Home and Community Care Program offers healthcare services to ill, injured, and Elder members of the Constance Lake First Nation community in the comfort of their own homes or at the Sunrise Elder's Complex. This service is provided by a Case Manager/ Nurse, Personal Support Workers, and Homemakers. The team assesses the health history of individuals and develops a personalized care plan, which is continuously monitored through case management to secure its effectiveness. The services offered include home care nursing, personal care assistance with tasks such as dressing and bathing, basic or advanced practice foot care, teaching individuals to care for themselves, home support with light housekeeping, laundry, and meal preparation, respite for family members and caregivers, and help with light outdoor/ yard work (211 Ontario North, Constance Lake First Nation, 2023f).

DRAFT

3.3.4 Health Services

3.3.4.1 Matawa Regional Crisis Intervention Program

The Matawa Regional Crisis Intervention Program provides free, confidential crisis support and follow-up for Matawa members regardless of residence on a 24 hour/7 day a week basis. Translation services are also provided. The program also provides the following (Matawa First Nation, 2023a):

- Crisis assessment/intervention;
- Crisis counselling/de-briefing;
- Outreach calls through Nodin counselling services;
- Support to family and friends;
- Referrals to professionals;
- Case management/review; and
- Community awareness/ healing plans.

3.3.4.2 Matawa Safe Sobering Site

The Matawa Safe Sobering Site provides intoxicated youth between the ages of 13 and 21, with a safe, home-like environment to become stabilized before being referred to further mental health or addictions programming.

The 4-bed site is available to Matawa students on a 24 hour/7 day a week basis. Transportation is available to and from the site if needed, through Matawa On-Call Student Services (8pm to 6am daily) (Matawa First Nation, 2023a).

Services provided include:

- Safe and Supervised detoxification and stabilization support;
- In-House Addictions Crisis Worker and Youth Residential Worker to provide immediate crisis assessment and intervention;
- Referrals to St. Josephs Care Group for addictions case-management and after-care planning; and
- After-care planning and referrals to other community- based programs as needed.

3.3.4.3 Health Services

Health Services are dedicated to promoting the physical and mental well-being of the Constance Lake First Nation community. The Health Centre provides health awareness and counseling, education and prevention workshops. The Centre also coordinates clinics in areas that may include blood pressure, immunization, sexual health and communicable diseases.

- Provides chronic disease management;
- Coordinates basic foot care sessions in individual's home or at clinic;
- Offers a diabetic clinic;
- Provides mental health counselling;
- Offers counselling services of a visiting trauma counsellor 3 days per month; and
- Provides addictions counselling/services through North Cochrane Addiction Services (NCAS from Hearst) every Friday of the month.

Addresses individual health care needs by providing:

- Locum clinic once per month;
- Nurse Practitioner clinics 3 times per month;
- Intake services to determine health care needs of individual; and
- Referrals to appropriate health care providers based on information in the intake assessment.

DRAFT

The Health Centre address individual health care needs by providing advocacy on behalf of individual with other health professionals, coordinating one-on-one pre-natal care with the community health nurse, home visits to the sick, Elders, new mothers and persons with health care needs. It also provides assistance with coordinating local and long-distance travel arrangements for medical appointments (211 Ontario North, Constance Lake First Nation, 2023g).

3.3.4.4 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program provides assistance and support to individuals and families in Constance Lake First Nation struggling with addiction issues. This program offers Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides transportation to all meetings and workshops upon request. It also offers a 20-day treatment program combined with a 12-day aftercare program from the Treatment and Support Services building.

To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counseling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to other services such as detoxification and medical assistance (211 Ontario North, Constance Lake First Nation, 2023h).

3.3.4.5 Extended Health Benefits

The Extended Health Benefits program provides a range of health benefits to individuals and families who experience high health costs. Eligibility for the program is determined based on need and is open to community members aged 16 to 65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Constance Lake First Nation, 2023i).

3.3.4.6 Medical Transportation Program

The Medical Transportation Program provides transportation to medical appointments within the community and from/to Constance Lake First Nation Reserve to any medical appointments (doctor, dentist, optometrist, specialist) in the towns of Calstock and Hearst. It also provides assistance with making arrangements for any medical appointments out of town such as booking appointments, hotels, and completing applications for mileage compensation.

This program also provides assistance with Non-Insured Health Benefits Service forms. Eligibility for this program is limited to members of Constance Lake First Nation who require assistance with transportation to medical appointments due to illness, age or disability or Non-Insured health benefits applications (211 Ontario North, Constance Lake First Nation, 2023j).

3.3.4.7 Traditional Healing Services

Traditional healing services are offered by Matawa First Nations. The Mental Wellness Team & Crisis Support Services provide a rapid response to Matawa First Nations communities, families or individuals when they experience crisis. The services include grief/trauma counseling, cultural support and care coordination. the program's approach is to provide service with a balance of clinical and traditional cultural practices (Matawa First Nation, 2023b).

DRAFT

3.3.4.8 Non-Insured Health Benefits (NIHB) program

The NIHB program is a national program which is designed to support First Nations people in reaching an overall health status that is comparable with Canadians. The program designed to help individuals maintain their health, prevent disease, assist in detecting and managing illnesses, injuries, and disabilities. It may cover the costs of some, or all of the following: Dental, Medical Supplies & Equipment, Medical Transportation, Eye & Vision Care, Short-term Crisis Intervention Mental Health Counselling, and Health Benefits outside of Canada.

The NIHB program may provide medically necessary goods and services when they are not covered by provincial or other third-party health plans. Third party health plans are ones usually provided by private insurance companies through a paid premium by the purchasing individual. The benefits and services of the NIHB Program are often coordinated with other insured health care programs offered in Ontario (Matawa First Nation, 2023c).

3.3.4.9 Matawa Non-Insured Health Benefits (NIHB) Client Navigator

The Matawa NIHB Client Navigator assists the 9 Matawa First Nations and its' members who are clients of NIHB services to provide support, advocacy and coordination of care and services. The program works in collaboration with First Nations health staff, other health care providers, organizations, and institutions to facilitate improved care. The program also assists members to access Jordan's Principle resources (Matawa First Nation, 2023c).

3.3.4.10 Matawa Health Cooperative (MHC)

Incorporated in 2017, the MHC is a Matawa First Nation owned and controlled health co-operative that provides health care services to enhance existing health services to achieve long-term health and well-being for all members within the 9 Matawa First Nations. It is overseen by a Board of Directors and is a member of the Health Care Co-operatives Federation of Canada. The MHC is community-driven with available services being tailored to individual community's needs. It is the first of its kind in Canada. The MHC works to incorporate traditional healing and medicines in addressing the holistic health needs of the Matawa First Nations focusing on the priorities of mental health and addictions, diabetes and chronic diseases. It oversees an Inter-Professional Primary Care Health Team providing direct services in the Matawa First Nations or through telemedicine (Matawa First Nation, 2023d).

3.3.4.11 Mental Health Program

The Mental Health Program supports the development of sound mental health and provides services to Constance Lake First Nation members experiencing mental health issues. The program provides information and awareness activities related to addictions, depression, family violence, and stress management. It also offers counseling services, cultural activities, feasts and ceremonies, group workshops, educational sessions that promote wellness, fitness activities coordination and referrals to psychologist, psychiatrist, other counselling services and treatment centres and coordination of aftercare services (211 Ontario North, Constance Lake First Nation, 2023k).

3.3.5 Recreational Services

The Constance Lake First Nation Recreation Department is responsible for planning, developing, and implementing all social, recreational and special events for members of the community. It offers Youth Programs that promote physical fitness and participation by providing gym and sports nights at the Youth Centre, offers game and tournament nights at the recreation centre and offers workshops and group discussion sessions on various topics such as bullying, sex, drugs, and alcohol; provides treats and refreshments. Further this program organized extra curricular activities outside the community such as bowling, skating, and sliding events and hosts movie nights with pizza and pop. It is offered to members who are 15 years of age and under.

The Youth Alternative program plans and supervises after school activities, gym nights, youth events and community projects on a weekly basis. It is offered to members who are 15 to 30 years of age (211 Ontario North, Constance Lake First Nation, 2023l).

DRAFT

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation were higher among non-Indigenous youths in Canada compared to Indigenous youths (Statistics Canada, 2023). However, when comparing First Nation youth living on-reserve to First Nation youth living off-reserve, those that live off- reserve are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

Constance Lake First Nation has two schools on-reserve. Students can either attend the Mamawmatawa Holistic Education Centre (from junior kindergarten to Grade 12) or Josie Bluff Memorial Christian School (from junior kindergarten to Grade 8) (211 Ontario North, Constance Lake First Nation, 2023m). Mamawmatawa Holistic Education Centre has approximately 200 students and promotes Native cultural and spiritual identity (Constance Lake Education Authority, N.D).

The Constance Lake Education Authority provides night classes for adults to obtain their Grade 12 diploma, and distance education courses through Contact North and Academic and Career Entrance Program through Northern College (211 Ontario North, Constance Lake First Nation, 2023m).

Constance Lake First Nation members can also take part in training and certification courses offered by KKETS (Kiikenomaga Kikenjigewen Employment & Training Services, 2023).

Constance Lake First Nation students have the opportunity to take part in Matawa's Education and Care Centre's Outdoor Education Program and Matawa's Education and Care Centre's Elders Program (Matawa Education, 2019a). The outdoor education program is made up of six Land-based and Outdoor Learning credits and allows students to connect with the land and water. Activities include (but not limited to) trapping, outdoor skills, camping, canoeing, and fishing (Matawa Education, 2019a). Students travel from one Matawa First Nation to another during this program. The Elder's program supports Elder's going into the community to provide support to students with traditional activities such as: smudging, big drum making, hand drum making, drumming, feasts beading, traditional teachings, storytelling, workshops, traditional medicines, hide tanning, hunting and trapping (Matawa Education, 2019b).

3.5 Emergency and Protective Services

The Socio-Economic Baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

Police services are provided by Nishnawbe Aski Police Service or the Anishinabek Police Service (APS) within the Indigenous communities, municipal police services and Ontario Provincial Police (OPP).

DRAFT

The NAPS is the largest First Nations police service in Canada, serving 34 communities in the Nishnawbe Aski Nation territory which covers two-thirds of Ontario (NAPS, 2023). NAPS is headquartered in Thunder Bay and divided into three regions – Northeast, Northwest and Central Region (NAPS Detachments, 2023). They currently employ 230 uniformed officers and 40 civilians (NAPS, 2023).

Police services in Constance Lake First Nation are provided by the NAPS, which have 4 constables and 1 sargeant stations in the community (NAPS, 2023).

The Constance Lake First Nation Fire Department is a volunteer fire department and is connected through 9-1-1. The services include education, emergency planning, fire investigation, fire suppression and home safety (211 Ontario North, 2024).

Constance Lake First Nation has an ambulance service available 24 hours per day providing pre-hospital care (North East Healthline, 2024).

Where information is available, community input indicates a general need for additional emergency and protective services to address Socio-Economic challenges experienced in the Indigenous communities.

3.6 Community Infrastructure

Socio-Economic Baseline includes a description of the following Community Infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in Constance Lake First Nation is described in Table 3-14.

Table 3-14: Description of Community Infrastructure in Attawapiskat

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 2 Water treatment facility built in 1986. Updated in 2016 (community website). ▪ Water Quality: Currently there is not a drinking water advisory. Previous long-term drinking water advisories included July 2010-July 2012 and April 2014-September 2016.	▪ Level 1 wastewater system. ▪ Constructed in 1997. ▪ Facultative Lagoon. ▪ Effluent Quality Unknown.	Hydro One Zone 6 – Calstock DS	Solid waste management occurs by drop-off in Hearst at the Waste and Recycling Transfer Station (Constance Lake First Nation, 2024a).

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2021; Hydro One, 2021; Hydro One 2018; Five Nations Energy Ince., 2021; Wataynikaneyap Power, 2021; Government of Ontario, 2021; 211 Ontario North, 2021.

DRAFT

3.7 Transportation

The Socio-Economic Baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the socio-economic baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, as well as municipalities that have well connected transportation systems.

Transportation has an array of multimodal transportation infrastructure including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd, 2016).

The majority of First Nations communities are reachable by remote airports or by winter roads. While Constance Lake First Nation, Ginoogaming First Nation, Long Lake #58 First Nation and Mishkeegogamang First Nation have all-season connection or direct access to the provincial highway network.

3.7.1 Winter Road Traffic Volumes in the Local Study Area

Constance Lake First Nation has all-season connection to the provincial highway system and does not rely on the winter road netwrok for supplies.

3.7.2 Air Transportation Network in Constance Lake First Nation

Information is not currently available/section not complete.

3.7.3 Waterways in Constance Lake First Nation

Waterways for transportation are also an integral part of community life. Waterways have been and continue to be an important socio-cultural and economic part of daily life of Indigenous communities. The waterways connect families and friends along traditional lines and provide an important part of the transportation network for Indigenous communities.

The Kenogami Watershed, also referred to as the artic watershed, flows north of Kenogami Lake. Onward it passes through Hwy 11 and drains into the Hudson Bay. The majority of this watershed the people of Constance Lake First Nation had made their territory for many years. Constance Lake First Nation members had gathered in an area called Mamawmatawa (where four rivers meet), also known as the English River Reserve to which Constance Lake First Nation had attained later in 1970.

Within in the watershed there is an abundance of lakes, rivers and creeks throughout the area with large stands of birch, poplar, jack pine, white and black spruce, tamarack and cedar, which continue to play a vital role in the daily lives of community members as part of their historical connection to their traditional land. (Constance Lake First Nation, 2023).

DRAFT

Our ancestors inhabited the Kenogami, Kabinakagami, Nagagami, Pagwachuan, Wakashi, Awagakama, Squirrel, Fox, Pitukupi, Little Ash, Big Ash, Little Current, Drowning, Ridge, Oba, Missinanabie, Albany and Shekak river systems and Pledger, Pitukupi, Constance, Trilsbeck, Serinack, Martison, Ridge, Melanson, Fushimi, Fox, Bannerman, Luhta (Medicine Creek) lake systems since time immemorial, as told by Elders in the late eighteen hundred, and nineteen hundred (Constance Lake First Nation, 2023).

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The Socio-Economic Baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key Socio-Economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four Socio-Economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that “well-being” means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people’s overall “well-being.”

The four socio economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

Table 3-15: CWB Index Scores for Constance Lake First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	58	40	69	54	71
First Nations in Ontario	59	38	72	53	70
Constance Lake First Nation	57	30	63	53	84

Source: Indigenous Services Canada, 2019b.

DRAFT

Constance Lake First Nation has a low CWB score for education (30), in comparison to Indigenous nations in Canada (40) and Indigenous nations in Ontario (38).

Constance Lake First Nation's income score is 53, which is comparable to, but slightly below First Nations in Canada (54) and First Nations in Ontario (53).

With a score of 63, Constance Lake First Nation score for labour is below those of First Nations in Canada (69) and First Nations in Ontario (72).

Constance Lake First Nation has a housing score of 84, which is much higher than scores for First Nations in Ontario (70) and First Nations in Canada (71).

Constance Lake First Nation with a score of 57, is comparable to the overall community well-being and safety of First Nations in Ontario (59) and First Nations in Canada (58).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments responsible for serving Indigenous communities in Canada (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-16 provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the OPP. The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (Ontario Provincial Police (OPP), 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-16: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total crime, rate, 2021*	Total violent crime, rate, 2021*	Total sexual assault, rate, Level 1, 2021*	Total drug violations, rate, 2021*
Nishnawbe-Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224

4. Economic Environment

4.1 Labour Force and Employment

Indigenous people are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live. The traditional economy is an important cultural and economic aspect of community life.

Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for Constance Lake First Nation.

The following section provides an overview of population and demographics at a district level.

Table 4-1 presents the forecasted working age population in the Thunder Bay District over the projection period, 2021 to 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada 2017, 2022). The values for 2028, 2023, and 2043 were forecast based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64:

- The working age population is decreasing over the projection period; and
- Based on current growth trends, the working age population is forecasted to decrease by 14,346 between 2016 and 2043, a decline of approximately 15%.

Table 4-1: Projected Working Age Population in Thunder Bay District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	95,930	100%	47,935	50.0%	47,990	50.0%
2021	93,095	100%	46,665	50.1%	46,430	49.9%
2028	89,266	100%	44,943	50.3%	44,331	49.7%
2033	86,628	100%	43,753	50.5%	42,890	49.5%
2043	81,584	100%	41,465	50.8%	40,147	49.2%

Source: Statistics Canada, 2017; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 4-2 presents the breakdown of the population in the labour force and those not in the labour force for Thunder Bay District in 2021.

Table 4-2: Labour Force Participation in in Thunder Bay District (2021)

Labour Force Participation	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
In the labour force	70,930	100%	36,660	51.7%	34,270	48.3%
Not in the labour force	51,825	100%	24,080	46.5%	27,740	53.5%

Table 4-3 presents the breakdown of the employment status for those classified as being in the labour force for Thunder Bay District in 2021.

- Of the population classified as in the labour force, 89.2% are employed; and
- The unemployment rate for the Thunder Bay District labour force is approximately 10.8%.

Table 4-3: Employment Status of Labour Force in Thunder Bay District (2021)

Labour Force Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Employed	63,235	89.2%	32,715	89.2%	30,515	89.1%
Unemployed	7,695	10.8%	3,945	10.8%	3,750	10.9%

Table 4-4 presents the number of jobs by 1-digit NOC1 code for 2018 and 2022 in Thunder Bay District.

- Sales and service occupations is the leading job category in the Thunder Bay District with 17,113 jobs in 2022 which accounts for 25.6% of the total jobs;
- The Thunder Bay District has seen an increase in 6 occupational categories between 2018 and 2022 with an overall increase in jobs of 2% over the 4 years; and
- The occupational category with the largest percentage increase over the period was health occupations with a 21% increase.

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

Table 4-4: Thunder Bay District – Occupations by Category (2018 – 2022)

Occupation Categories	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Business, finance and administration occupations	8,931	9,215	284	3%
Natural and applied sciences and related occupations	3,808	4,121	313	8%
Health occupations	6,066	7,320	1,254	21%

4.1.1 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the land. The knowledge passed on from the ancestors sustains Constance Lake identity and way of life.

Table 4-5 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Thunder Bay District for 2021.

- The majority of the population has a certificate, diploma, or degree at 54.2%; and
- 18% of the Thunder Bay District does not have a certificate, diploma, or degree, males make up 51.2% and females account for 48.8%.

Table 4-5: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
No certificate, diploma or degree	22,050	18.0%	11,360	18.7%	10,685	17.2%
High (secondary) school diploma or equivalency certificate	34,135	27.8%	17,035	28.0%	17,100	27.6%

DRAFT

Table 4-6 presents the major fields of study for the Thunder Bay District population aged 15 and over who had obtained a postsecondary education as of 2021.

- The major fields of study most commonly studied were architecture, engineering, and related trades which includes but is not limited to construction trades, precision production, mechanic and repair technology, engineering, and historic preservation and conservation;
- The most commonly pursued fields of study for males were architecture, engineering, and related trades; and
- The most commonly pursued fields of study for females were health and related fields.

Table 4-6: Major Field of Study for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2021)

DRAFT

4.1.2 Labour Income

Table 4-7 presents the total individual income by group for the population aged 15 and over for 2020 in the Thunder Bay District by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999 with 12.7% and 16.6%, respectively;
- The smallest individual income group for both male and female is $150,000 and over with 3.9% and 1.2%, respectively;
- In 2020, there were 1,615 more females than males with individual incomes; and
- In 2020, 74.8% of females were making under $60,000 while only 61.4% of males were within this group.

Table 4-7: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Thunder Bay District (2020)

Income Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Under $10,000 (including loss)	8,235	6.9%	3,645	6.2%	4,590	7.6%

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in the Thunder Bay District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from MNRF, Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product (GDP)

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Thunder Bay District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 4-9 presents the GDP for the Thunder Bay District between 2016 and 2021 (Statistics Canada, 2022a).

- Between 2016 and 2021 there was an approximate growth in GDP of 4% in the Thunder Bay District; and
- GDP is growing at a constant rate over the period between 2016 and 2021.

Table 4-9: Total Household Income Groups for Private Households in Thunder Bay District (2020)

Year	2016	2017	2018	2019	2020	2021	2016 – 2021 Change	2016 – 2021 % Change	Income Group
GDP	4,564	4,575	4,616	4,658	4,700	4,744	180	3.9%	Under $5,000

Source: Statistics Canada, 2022a.

4.2.2 Cost of Living

The cost of living in the Thunder Bay District is considerably lower than other major Canadian cities. The District of Thunder Bay was ranked number 1 out of 227 major urban international cities for affordable housing. According to the 2018 Rental Market Report, renting a two-bedroom in the District costs an average of $1,037 per month, approximately $600 less than Vancouver. A one-bedroom apartment averages $883, 58% less than Toronto (Webster, N.A.).

While Thunder Bay ranks well in comparison to other major Canadian cities, that does not make it affordable. The Market Basket Measure (MBM) threshold for Thunder Bay is $44,300 per year (Krysowaty, 2021). The MBM refers to Canada's official measure of poverty based on the cost of a specific basket of goods and services representing a modest, basic standard of living developed by ESDC. The MBM thresholds represent the costs of specified qualities and quantities of food, clothing, shelter, transportation, and other necessities for a reference family of two adults and two children (Krysowaty, 2021).

Table 4-10 presents the number of households spending 30% or more of income on shelter costs for Thunder Bay District in 2021. According to the CMHC housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

- Of the nearly 63,000 owner or tenant occupied dwellings in the Thunder Bay District, 14% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

DRAFT

Table 4-10: Distribution of Households Spending 30% or More of Income on Shelter Costs for Thunder Bay District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	53,940	86%
Spending 30% or more of income on shelter costs	9,045	14%
Total Owner and Tenant Households	**62,985**	**100%**

4.2.3 Economic Development

4.2.3.1 Nishnawbe Aski Nation

The Nishnawbe Aski Nation is the governing body of all Indigenous communities with the exception of Fort Albany First Nation, Kashechewan First Nation and Kitchenuhmaykoosib Inninuwug First Nation. Resource development (i.e., mining and forestry), small business, and employment and training are all files that fall under the Economic Development portfolio at Nishnawbe Aski Nation.

Due to the COVID-19 pandemic, the primary focus of the Nishnawbe Aski Nation during the 2020-2021 fiscal year was to verify that public health was at the forefront of any work or advances undertaken at the community level. The Economic Development portfolio also included food security/ food self-determination. As the COVID 19 pandemic progressed, monitoring food security throughout Nishnawbe Aski Nation territory became critical, as did intervening and assisting communities directly when issues arose.

Resources and services offered by Nishnawbe Aski Nation include the Nishnawbe Aski Development Fund which operates as a Client Services office which provides business and economic development services to First Nations communities and majority-owned Aboriginal businesses in Northern Ontario. The following services are offered (211 Ontario, 2021a):

- Appraisal Services;
- Bookkeeping Training;
- Business Support Services;
- Community Planning;
- Due Diligence Services;
- Financing (Loans and Grants); and
- Workshops.

4.2.3.2 Matawa First Nations

Mattawa First Nations works with Matawa First Nations to develop and promote and support business development, which includes encouraging a culture of entrepreneurship (Matawa First Nations, 2024). Matawa supports First Nations to advance priorities in infrastructure, businesses and human capital. Matawa First Nations is helping to lead the Rapid Lynx Telecommunications project, an infrastructure project that will see the 6 fly-in communities connect to high-speed fibre optic internet. Rapid Lynx Telecommunications will be wholly owned by Matawa First Nations in 5 years (Matawa First Nations, 2024).

Matawa First Nations also supports the Native Camp Operators Alliance/Moccasin Trail Adventures which includes several Indigenous-owned camps in northern Ontario (Matawa First Nations, 2024).

DRAFT

4.2.3.3 Constance Lake Development Corporation

Constance Lake Development Corporation is responsible for stimulating local economy and developing economic initiatives and opportunities for Constance Lake First Nation.

Economic initiatives that Constance Lake Development Corporation is involved with include (211 Ontario, 2021b):

- Neegan Naynowan Stantec LP, a 51% owned Constance Lake Aboriginal business which provides consulting, engineering and environmental services for infrastructure, industrial, urban planning, natural resources, and environmental projects;
- Advisory for local business such as the Northern Store and Warehouse; and
- Operates and manages the James Bay Winter Road through a jointly owned corporation with Fort Albany and Kashechewan First Nations.

4.3 Business Environment

4.3.1 Local Economy

Information specific to Constance Lake First Nation is not available, but information regarding the following industries within the geographical boarders of the Indigenous communities in the LSA are available:

- Manufacturing
- Administrative and support, waste management and remediation services
- Health care and social assistance
- Educational services
- Professional, scientific and technical services
- Information and cultural industries
- Other services (except public administration)
- Transportation and warehousing
- Utilities
- Wholesale trade
- Public administration
- Real estate and rental and leasing
- Accommodation and food services
- Finance and insurance
- Retail trade
- Construction
- Arts, entertainment and recreation
- Mining, quarrying, and oil and gas extraction
- Management of companies and enterprises
- Agriculture, forestry, fishing and hunting

The industries with the largest industry presence within the LSA communities in 2022 include - public administration, health care and social assistance and educational services The industries with the highest growth between 2018 and 2022 include retail trade (32%), public administration (28%), and health care and social assistance (25%).

The percentage of in-region purchases across all industries is low. Of the 20 identified industries, 11 made in-region purchases. This amounted to under $4 million of purchases which represents 3.9% of total purchases in 2020.

DRAFT

The majority of demand for goods and services within the LSA Indigenous communities is met by imports (92.3%). The industry meeting the most demand in-region is construction with 39.1% of demand met in-region. 13 industries do not meet any demand in-region and rely solely on imports.

4.3.2 Mining, Aggregate and Forestry Activities

Table 4-11 presents industry data for the following 2-digit NAICS[2] industries in Thunder Bay District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction; and
- Agriculture, forestry, fishing, and hunting.

Each industry includes a variety of occupations which include but are not limited to:

- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above 1 indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry declined by 108 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry is above the national average;
- The agriculture, forestry, fishing, and hunting industry declined by 40 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is below the nation average with 0.96 in 2018 and 0.93 in 2022.

Table 4-11: Mining, Quarrying, and Oil and Gas Extraction Industry in Thunder Bay District (2018 – 2022)
Mining, Quarrying, and Oil and Gas Extraction Industry in Thunder Bay District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	1,262	1,154	-108	(9%)	1.6	1.5
Agriculture, forestry, fishing and hunting	651	611	-40	(6%)	1.0	0.9

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to traditional practices which include lakes and rivers for fishing and trapping corridors and trails for hunting and trapping. Many Indigenous communities rely on traditional practices, such as fishing and hunting as a source of food and income. As such, it is important to identify areas where traditional practices are used, to determine potential effects of the Project on Indigenous communities and their traditional use of lands and resources.

Constance Lake First Nation settles in the Kenogami Watershed, and centres on the Mamawamatawa area where four major rivers converge, the Pagwa River, Nagagamisis River, Kabinakagami River, and Ridge River. These ancestral lands hold profound importance to the people of Constance Lake First Nation (Constance Lake First Nation, 2024b).

Traditional harvesting for Constance Lake First Nation includes northern pike, trout, whitefish, pickerel, perch, moose, rabbit, beaver, muskrat, mink, marten, and lynx (Stantec, 2017). Families continue to maintain yearly goose harvest, beaver trapping, deer and moose hunting, fishing of pike and pickerel, and making tea and medicines from the trees (Daigle, 2005).

The abundance of creeks, rivers, and lakes, and large stands of poplar, birch, white and black spruce, jack pine, cedar, and tamarack are part of a historical connection to the land and play a vital role in the daily lives of community members (Ministry of Natural Resources and Forestry, 2021a).

5.2 Culturally and Spiritually Important Sites and Areas

Culturally and spiritually important sites and areas include travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

Constance Lake First Nation have identified within the Terms of Reference (ToR) for their Community-Based Land Use Plan (CBLUP), an area of interest for planning which includes territory that has been used by Constance Lake First Nation members.

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinabe/ Mushkeego Peoples. “The Anishiniimowin/ Anishinabe/ Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022). The Anishiniimowin/ Anishinabe/ Mushkeego Peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and self-determination and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define on-going rights and obligations on all sides. These agreements set out continuing treaty rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations; and
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013)*

Treaty No. 9 was signed between the Anishiniimowin/ Anishinabe/ Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which the legal title is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

At this time, Constance Lake First Nation does not have a Land Code under the *First Nations Land Management Act* and land use is governed under the *Indian Act*.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the *Public Lands Act*.

Traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to CBLUPs initiated by Indigenous communities.

6.5 Road/Transportation Studies

No Road/Transportation Studies were available for review for Constance Lake First Nation.

6.6 Provincial Plans and Polices

6.6.1 The Planning Act

The Ontario *Planning Act* is provincial legislation that sets out the ground rules for land use planning. The *Planning Act* outlines how land may be used and controlled and the purpose of this Act is to make sure that planning processes are fair, open, accessible, timely, efficient and promote the best economic and environmental interest within the provincial policy framework. The *Planning Act* allows the province to integrate matters of provincial interest into municipal and regional planning decisions by requiring that all decisions that are made are in conformance with provincial plans.

6.6.2 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

DRAFT

Section 1 of the *Far North Act* outlines:

The purpose of this Act is to provide for community-based land use planning in the Far North that:

1. Sets out a joint planning process between the First Nations and Ontario[3];
2. Supports the environmental, social and economic objectives for land use planning for the peoples of Ontario that are set out in Section 5; and
3. Is done in a manner that is consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult. 2010, c. 18, s. 1.

The Far North is defined in the Act as:

1. The portion of Ontario that lies north of the land consisting of,
   a. Woodland Caribou Provincial Park,
   b. the following management units designated under Section 7 of the *Crown Forest Sustainability Act, 1994* as of May 1, 2009: Red Lake Forest, Trout Lake Forest, Lac Seul Forest and Caribou Forest,
   c. Wabakimi Provincial Park, and
   d. The following management units designated under Section 7 of the *Crown Forest Sustainability Act*, 1994 as of May 1, 2009: Ogoki Forest, Kenogami Forest, Hearst Forest, Gordon Cosens Forest and Cochrane-Moose River, or
2. The area, if any, that is set out in the regulations made under this Act and that describes the area described in clause (a) more specifically; ("Grand Nord").

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with First Nations communities and groups, among other land uses, the potential for permissible use of lands for forestry in First Nation's areas of interest. CBLUP Terms of Reference have noted in the objectives that plans would include consideration of the following (Eabametoong and Mishkeegogamang First Nations, 2013):

- Traditional and Customary Use;
- Conservation and Protection;
- Forest Management (commercial forestry);
- Forest Management (non-timber forest products);
- Tourism (and Eco-Tourism);
- Geoscience and the Mineral Sector (exploration and mining);
- Recreation;
- Water Conservation and Protection;
- Renewable Energy;
- Access and Infrastructure;
- Climate Change; and
- Fire Management.

[3] Community-based land use plans require provincial approval.

DRAFT

6.6.3 Northern Ontario Transportation Plan

The draft Northern Ontario Transportation Plan, 2020 was developed to serve as a guide to help build a modern and sustainable transportation system for people in northern Ontario. It contains actions that will connect communities, provide safer and more reliable travel and unlock economic potential in the region. Goal 6 of this Plan outlines reliable travel options for remote and Far North communities. This plan is a living document and will be updated with actions to reflect the evolving needs of the region.

The Project is aligned with the objectives of this Plan and will support the goal of achieving sustainable development for northern Ontario.

6.6.4 Fisheries Management Plan

The Fisheries Management Plan as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake in a holistic manner and includes a range of management options to secure a healthy lake environment that conserves the diversity of the fish community and provides opportunities to contribute to the social and economic well-being of the surrounding area. Each specific zone outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h).

6.7 Land Use Plans and Policies

A number of remote fly-in and winter road access First Nation communities have been (or are currently) undertaking community land use planning, which considers the remote nature of these communities. Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the Socio-Economic Baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses on the land.

The ToR for the Constance Lake First Nation CBLUP was signed in 2014 (Ministry of Natural Resources and Forestry, 2021b). It outlines the community's valued components, proposed planning process and their guiding principles. The Planning area covers the area where Constance Lake First Nation has past and present connection with the land and water of its traditional territory, as shown on Figure 6-1. The planning principles within the ToRfor the CBLUP consist of (Ministry of Natural Resources and Forestry, 2021b):

- Cultural and heritage values;
- Mineral Development;
- Protected areas;
- Aggregates;
- Waterways & waterbodies;
- Commercial forestry;
- Non-Timber forest products;
- Climate change adaption;
- Infrastructure;
- Tourism;
- Renewable energy; and
- Existing uses.

DRAFT

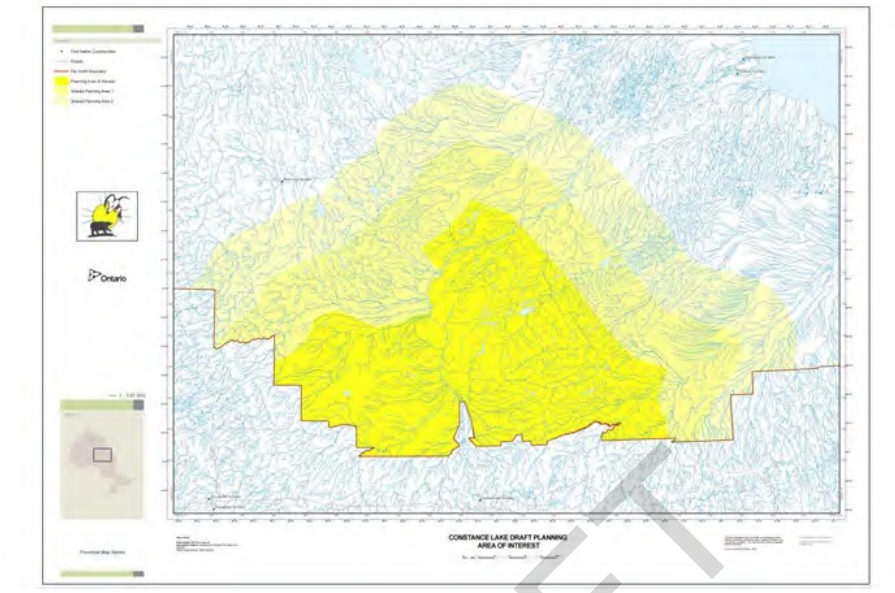

Figure 6-1: Constance Lake First Nation Area Draft AIP

Source: Ministry of Natural Resources and Forestry, 2021b.

To-date, the CBLUP has not been released publicly and information therein has not been reviewed.

6.8 Industrial Land Use

In April 2023, leaders from 10 Treaty No. 9 First Nations from announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

DRAFT

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, is done online through the Mining Lands Administrative System (MLAS). Applicants are required to create a MLAS user account, which allows them to view active unpatented mining claims, register new mining claims, manage user mining claims, and buy or renew a prospector's license. Non-registered users are only able to use the MLAS map viewer to view active unpatented mining claims.

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council. The Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the Aggregate Resources Act. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Constance Lake First Nation.

DRAFT

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is an important aspect as it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Constance Lake First Nation has a community hall, outdoor hockey rink, sports field and playground.

Eagle's Earth Cree and Ojibway Historical Centre was opened in 2007 and hosts a multimedia experience that focuses on the heritage of Indigenous people. The museum includes stories, exhibitions, crafts and a restaurant. It also includes various types of accommodation. It includes 20 cabins, 20 RV sites, 20 teepee sites, pow-wow ground, and archaeological tours. They also offer wilderness hiking trail and canoe expeditions (Government of Canada, 2007).

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no provincial parks which intersect the Project Footprint or Constance Lake First Nation.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Constance Lake First Nation.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Constance Lake First Nation.

WSR WEBEQUIE SUPPLY ROAD

AtkinsRéalis - Confidential

March 14, 2024

Chief Rick Allen
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON
P0L 1B0

Dear Chief Allen,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates it was delivered to your community on February 1, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

WSR
WEBEQUIE
SUPPLY ROAD

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Chief Rick Allen
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON
P0L 1B0

Dear Chief Allen,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 27, 2024, the package status indicates it was delivered to your community on February 1, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Aquatic Habitat Preliminary Findings.**

The livestreaming event is scheduled for **April 1st, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Dear Chief Allen,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

April 24, 2024

Dear Chief Allen,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 6th from 1:00-1:45pm EST** for Constance Lake First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/82076141549?pwd=VNRhXb0IskprHYcbuapJs5LiarcAFm.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 820 7614 1549 **Passcode:** 035783

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

WSR
WEBEQUIE
SUPPLY ROAD

June 3, 2024

Dear Chief Allen,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 17th from 1:00-1:45pm EST** for Constance Lake First Nation, where there will be a second presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/85995133688?pwd=nnSguQnHQRWSTogFvATgALTlnVg2Kt.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 859 9513 3688 **Passcode:** 828449

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Web-WSR Letter re Virtual Community Info Session CLFN-2024-06-03

WEBEQUIE SUPPLY ROAD
Open House

Constance Lake First Nation
September 12, 2024

OVERVIEW

The Webequie Supply Road Project Team hosted an Open House from 11am to 3pm in Constance Lake First Nation on September 12, 2024, at the Anglican Church in Constance Lake First Nation. The information session advertising was handled in-house by community.

ICE team member Chris McKay gave a presentation on the Webequie Supply Road. The presentation was followed by a question-and-answer period. There was a total of eight participants.

Communication materials and comment forms were provided to attendees. Materials were also provided to a council member for distribution to community members. Available materials included the most recent WSR newsletter and a copy of the presentation that was being given along with feedback forms. Poster boards were also displayed for the Open House. All presentation and communication materials are included in the appendix.

QUESTIONS FROM ATTENDEES

This is going to Webequie? What about to Nikina?
Different Projects

Webequie supply road, where does it enter, to and from? Does it go to other communities?
No, Webequie Supply Road is an economic development road owned by Webequie First Nation therefore it doesn't enter other communities, it goes from Webequie Airport to McFaulds lake.

How many years have you been working on this?
7 years going on 8 years.

What happens when the Caribou cross? What does the government say about that?
We'll get back to you about potential impacts the road may have on caribou.

The mine that's being considered, is that an open pit mine or an underground mine?
We believe it's an underground mine, however, Wyloo Metals would be best to answer that question.

FEEDBACK/COMMENTS

We support Webequie in this because the road is in their traditional territory and the watershed doesn't affect us.

Three people filled out comment forms, however, only checked boxes for questions and did not provide feedback.

Questions on comment forms:

1. How did you hear about this Open House?
    a. Notice – 0
    b. Word of mouth – 3
    c. Radio – 0
    d. Website - 0
2. What was your main reason for attending?
    a. Have not heard of this Project – 1
    b. Interested in the Project – 2
    c. Want to ask questions or express my concerns – 1
    d. Want to know how this Project will impact me – 2
3. What are the good things about the Supply Road?
    a. Employment opportunities – 2
    b. Business opportunities – 1
    c. Training opportunities – 1
    d. Accessibility – 2
4. What are the bad things about the Supply Road?
    a. Outside access – 1
    b. Disruption to communities – 0
    c. Change in traditional land and resources – 1
    d. Potential environmental impacts – 0
    e. Changes to way of life – 0
5. Do you have any comments on the preferred route and the preliminary effects assessment for the Webequie Supply Road or supportive infrastructure? No comments
6. Did the meeting help with your understanding of the Project?
    a. Yes – 1
    b. Somewhat
    c. No

7. Is there any information that you would like to be provided that was not presented at the meeting?
    a. Yes – 0
    b. Somewhat – 0
    c. No – 1
8. Were you given the opportunity to participate in the meeting – ask questions or express interest/concern?
    a. Yes – 1
    b. Somewhat – 0
    c. No – 0
9. What would help the Webequie Project Team improve these community meetings in the future?
    a. Additional material (handouts, etc.) – 0
    b. One-on-one discussions with the Project Team – 0
    c. More time for questions and answers – 0
    d. Breakout sessions – 1
    e. Provide more information – 0
10. Additional comments – None

ISSUES AND CONCERNS

An Elder expressed concern over the impacts on the Land and animals. He stressed the importance of mitigations.

Concern over control and access: The Elder indicated his worry over an influx of people entering the territory and heavily impacting the resources that Webequie people use to sustain themselves.

ACTION ITEMS

Follow up with Constance Lake First Nation for another in person session to keep updated on project.

Follow up with answers for caribou question.

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Allen,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Allen:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 18, 2024

Dear Chief Allen,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, November 25th from 1:00-1:45 PM EST for Constance Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/83173528691?pwd=PKULFQCOMiHcuCEwObyFxgeEQ1ODJR.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

Method	Description
	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks

Craig Wallace, Project Manager, AtkinsRéalis

December 16, 2024

Chief Rick Allen
Constance Lake First Nation
P.O. Box 4000
Constance Lake, ON
P0L 1B0

Dear Chief Allen,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on November 13, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

January 17, 2025

Dear Chief Allen,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, January 27th from 1:00-1:45 PM EST for Constance Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/83423584288?pwd=3TJYugOibbERvdOfiGb1bUqlLz4Egs.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hard copies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions

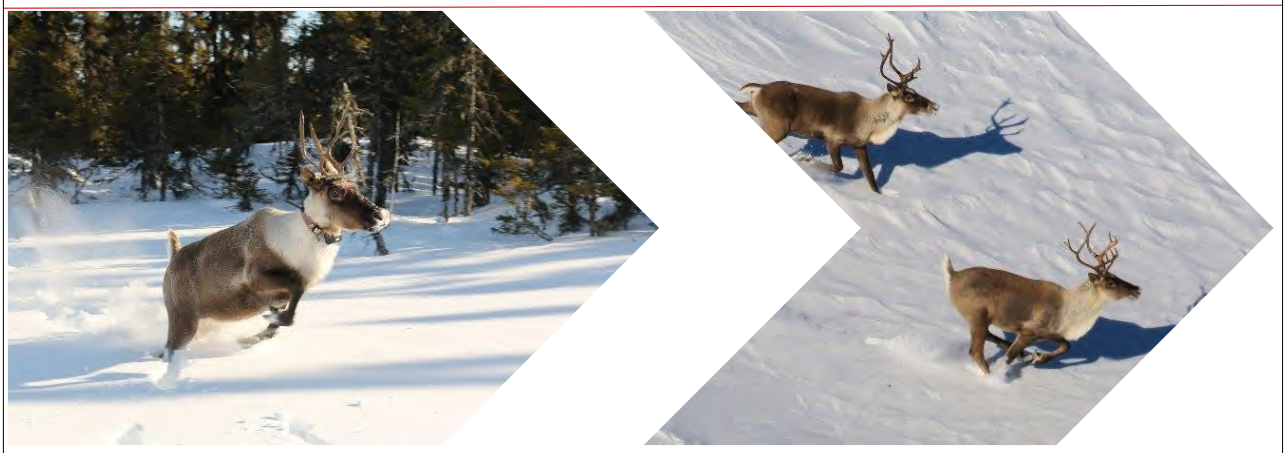
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

Comments and Feedback Received during Second Aboriginal and/or Treaty Rights and Interest Forum 2023: Constance Lake First Nation

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
1	Constance Lake First Nation asked if the Webequie Supply Road (WSR) project is currently looking for people to construct the road.	The proponent responded that Webequie Supply Road will be looking for people for construction if it moves forward.	The proponent welcomes any information that Constance Lake First Nation wishes to share, including suggestions for job creation opportunities through the ongoing consultation and engagement and Indigenous Knowledge programs.
2	Constance Lake First Nation asked how long the Webequie Supply Road is.	The proponent stated the road is 107 KM in its current proposal, but that it could change in length as it is still being defined.	The proponent will continue to share information regarding the Webequie Supply Road with the community as the design is finalized.
3	Constance Lake First Nation asked additional questions about the design of the Webequie Supply Road including: if it would be a gravel road, how many areas have been identified to go over muskeg and how wide the current design is. Constance Lake First Nation noted that for the Eagles Nest Mine Site, the Environmental Assessment showed that there were at least 500 different organisms within the muskeg.	The proponent outlined that the current design includes 21 culverts and 5 bridges to cross streams and muskeg. The road will be gravel, and the design criteria will comply with Provincial standards and guidelines	The proponent will continue to share information regarding the Webequie Supply Road with the community as the design is finalized.
4	Constance Lake First Nation indicated that Elders are interested in meeting with other Elders outside of their community to connect and discuss this project.	The comment was acknowledged. The proponent responded that these discussions are important to have as there are close kinship ties between First Nation communities.	Thank you for sharing this information.

1

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
5	Constance Lake First Nation noted that there were discussions with Fort Albany First Nation and Marten Falls First Nation along the river, before the pandemic. There is currently a plan to reunite to discuss values and relationships with each other. Constance Lake First Nation indicated that a typical meeting spot is the English River Reserve Land located within Constance Lake First Nation. This is known as Mamawmatawa. This was once an established HBC trading post. There are many connections with Marten Falls First Nation, Fort Albany First Nation and Kashechewan. English River Reserve has 4-5 permanent structures.	The proponent outlined we have identified English River Reserve Land as an area of significance.	Thank you for sharing this information. The proponent will ensure that the mapping is updated and will use the traditional location name of Mamawmatawa going forward.
6	Constance Lake First Nation noted that historically and politically, they were an Oji Cree community. The reserve was created with people travelling to areas around the historical HBC trading post. There was a hill that overlooked the water and is at the mouth of the river Mamawmatawa.	The proponent said they are open to learning more about Mamawmatawa	Thank you for sharing this information.
7	Constance Lake First Nation indicated that they would be considered the host community of Mamawmatawa. Constance Lake First Nation noted that there is a place called the "landing,' - 27 km north of the community and it connects to the Kabinakagami River. This is a natural water route that is still being utilized and there used to be tourism and outfitters in the area, but not recently. Hunters and fishers used to come to the area, but this is not as common	Proponent stated they were open to learning more about potential impacts and monitoring programs.	Thank you for sharing this information. The proponent recognizes the value and potential impacts to important places and water routes. The Environmental Assessment/ Impact Assessment (EA/IA) will identify ways to avoid and/or minimize these impacts.

2

WSR
WEBEQUIE
SUPPLY ROAD

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	anymore. Constance Lake First Nation noted that they would like to have monitoring along the river.		
8	Constance Lake First Nation indicated that it is important to them that the water is fresh and continues to flow, with Sturgeon in the waters. Constance Lake First Nation noted that every spring there is a harvest with the community, which also includes maintaining burial sites in the area. During this time, there is also data collection for water in the river. Constance Lake First Nation members also check fish for parasites and send the fish to labs to see what food is being eaten by the fish. Constance Lake First Nation indicated that there is a small bird hunt in the spring.	The comment was acknowledged.	Thank you for sharing this information.
9	Constance Lake First Nation noted that when Constance Lake First Nation was created, people came together from other settlements (e. Kabinakagami River, Hornepayne) and areas. Within Constance Lake First Nation there are different family trees within the reserve but with the same last name.	The comment was acknowledged.	Thank you for sharing this information. The proponent welcomes any information that Constance Lake First Nation wishes to share regarding Constance Lake First Nation's history and lineage.
10	Constance Lake First Nation agreed that there is a connection with Marten Falls First Nation as the river connects them.	The comment was acknowledged.	Thank you for sharing this information.
11	Constance Lake First Nation indicated that local businesses include a logging company - Lecours Lumber, gas bar and grocery store. Constance Lake First Nation has previously	The comment was acknowledged.	Thank you for sharing this information.

3

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	had the opportunity to partner with a drilling and construction company as they have partnered with construction companies in the past. Constance Lake First Nation has a local economic development corporation, but it is not active. The previous economic development officer passed away.		
12	The Proponent asked if there have been conversations with Greenstone Gold Mine	Constance Lake First Nation noted that they are not a signatory to the Greenstone Gold Mine Project Agreement.	Thank you for sharing this information.
13	Constance Lake First Nation noted that they have recently bought 10 tiny homes. There are training opportunities for people in construction. Constance Lake First Nation noted that they would like to train people in construction, but there is low capacity in the community. When members go off reserve and find employment, they usually stay off reserve.	The comment was acknowledged.	Thank you for sharing this information.
14	Constance Lake First Nation indicated that quarries in the area should be owned by First Nations. Previous discussions were had with Marten Falls First Nation about owning the quarries and being the construction crew.	The comment was acknowledged.	The proponent welcomes any information that Constance Lake First Nation wishes to share, including suggestions for economic participation in the project and job creation opportunities through ongoing consultation and engagement.
15	Constance Lake First Nation noted that the blastomycosis crisis shut down the community.	The comment was acknowledged.	Thank you for sharing this information.
16	Constance Lake First Nation noted that broadband is another big issue, and if a fibreline or transmission line were included	The comment was acknowledged.	Thank you for sharing this information.

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	along the Northern Road Link right-of-way, this would be a big economic opportunity.		
17	Constance Lake First Nation asked if a draft document with information about Constance Lake First Nation can be provided	The proponent stated that some socio-economic baseline work has been shared with Constance Lake First Nation for the EA/IA. Input from the community would help the proponent provide a more accurate description of the community. The proponent will be sharing a draft EAR/IS in 2024.	Thank you for sharing this information. The proponent will follow up with the EAR/IS for Constance Lake First Nation.
18	Constance Lake First Nation indicated that a draft Community Based Land Use Plan is almost complete. The mapping has been done internally as well as with the Ministry of Natural Resources and Forestry (MNRF) team. Constance Lake First Nation outlined that Elders do not want to share direct information. Areas of "no go" should be shown on the publicly available mining and land system.	The comment was acknowledged.	Thank you for sharing this information. The proponent looks forward to receiving any information from Constance Lake First Nation as it becomes available. Information that is publicly available will be included in the EA/IA. Documents and reports that are provided by Constance Lake First Nation would be very helpful to the proponent in assessing potential impacts and measures to mitigate those impacts.
19	The mining and land system should show an "alienation" layer where it shows the areas where people cannot prospect for minerals.	The comment was acknowledged.	Thank you for sharing this information. The proponent will review this layer on MLS and include this in the mapping as required.

Re: Summary of Aboriginal and/or Treaty Rights and Interest Forum, November 2023
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Allen,

We hope that this finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the draft Environmental Assessment / Impact Statement Report for early circulation with communities.

As a part of the Project's consultation and engagement, the Aboriginal and/or Treaty Rights and Interest forum took place on November 21 to 23 2023 at the Valhalla Inn in Thunder Bay and was a joint event between the Webequie Supply Road, Marten Falls Community Access Road and Northern Road Links projects. The Forum was an important opportunity to meet face to face, connect on how we can work together, better understand the roles we all play in assessing potential impacts on Aboriginal and/or Treaty Rights and Interests.

For your review and comment, please find attached a summary of comments your community provided in the individual Project-specific Breakout Sessions. The input provided by your community is being integrated into EA/IA process, and the Project Team will seek further feedback from your community at future EA/IA milestones.

The Project Team values your feedback and is always open to collaborating with you.

Sincerely,

Michael Fox
Webequie Supply Road

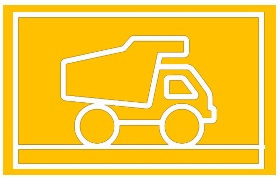
PURPOSE OF THE WEBEQUIE SUPPLY ROAD

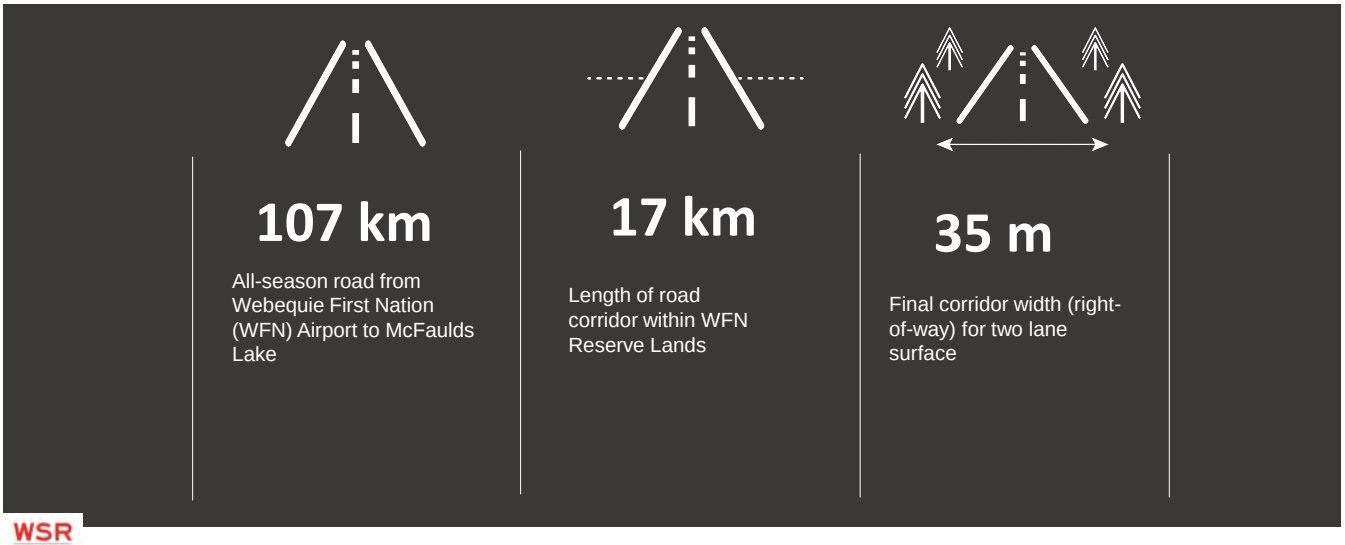


Move materials, supplies and people from the Webequie Airport to the McFaulds Lake area

Provide local employment and economic development opportunities to Webequie.

Provide experience/training opportunities for youth to help encourage the pursuit of additional skills through post-secondary education

PROJECT DESCRIPTION



PROJECT DESCRIPTION

6

Major waterbody crossings with bridges (and 25 other waterbody crossings) requiring culverts

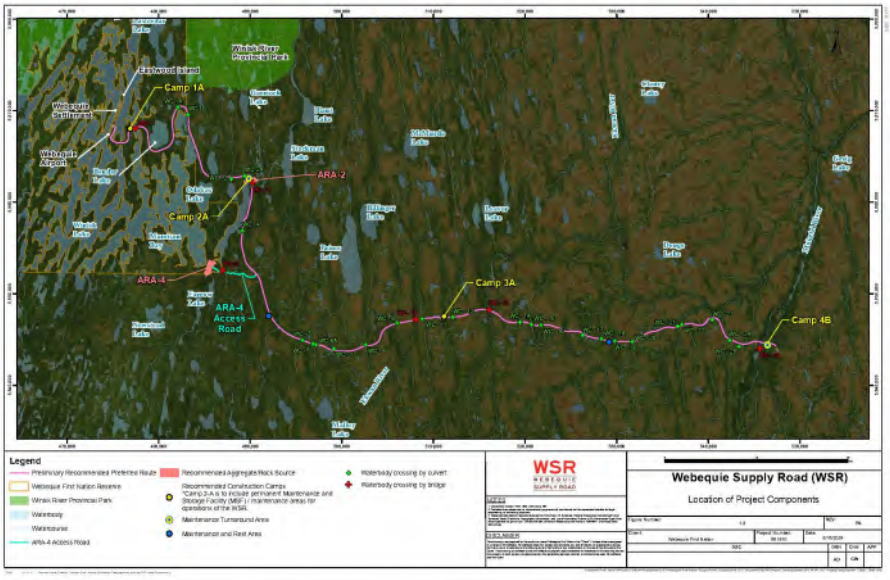
Includes temporary and permanent aggregate pit/rock quarry areas with equipment for processing, as well as access roads to these areas

4

Construction camps (temporary) to accommodate construction crews, with 1 site being repurposed to act as permanent operation/ maintenance facility

Storage and laydown yards (temporary) for equipment and materials

WSR PREFERRED CORRIDOR SHOWING CAMP AND PIT/QUARRY LOCATIONS



OTHER ROAD PROJECTS IN THE AREA

HOW IS THE WSR EA/IA RELATED TO THE FEDERAL REGIONAL ASSESSMENT?

In November 2020, the Minister of Environment and Climate Change mandated this assessment to guide sustainable development and informed decision-making. The process involves collaboration with Indigenous communities, stakeholders, and the public to ensure that diverse perspectives are considered.

Regional Assessment is a planning tool used to assess the positive and negative effects of multiple existing and future developments and activities in a specific geographic region.

A draft Terms of Reference for the assessment was released in September 2024, outlining the framework and objectives of the evaluation. This document is available for public review and comment, emphasizing transparency and community involvement.

Currently, there are over 200 comments on the draft Terms of Reference from the public, governments, and Indigenous communities, which can be seen on the IAAC website.

The WSR EA/IA final report will inform the Regional Assessment.

ENGAGEMENT & CONSULTATION

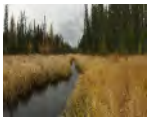
WHERE ARE WE NOW IN THE PROJECT?

- We are now getting ready to release the Draft Environmental Assessment Report / Impact Statement
- This will be provided to Indigenous communities first in January/February 2025, then the general public
- This report will identify and discuss the potential effects of the Project on various valued components

LOOKING AT PROJECT EFFECTS - WHAT DO WE THINK ABOUT?



The Surface Water (lakes, rivers)

Fish and Fish Habitat (where the fish live)

The Land- Soils and Terrain

The Plants and Wetlands

The Groundwater / Springwater

Wildlife and Terrestrial (out of water) Habitat

The Air

Species at Risk

LOOKING AT PROJECT EFFECTS - WHAT DO WE THINK ABOUT?

The People (the Social Environment)

The Environment that We See (Visual Environment)

The Economy

Aboriginal and/or Treaty Rights and Interests

The Lands and Resources

Culture

The Health of Community Members

The Effects of All Projects (Past, Present and Future) Together

LOOKING AT PROJECT EFFECTS- WHAT DO WE THINK ABOUT?

Accidents and Things that Go Wrong

Climate Change

DISCUSSING THE DRAFT ENVIRONMENT ASSESSMENT REPORT / IMPACT STATEMENT WITH YOU

We want to know which of these types of project effects are most important to you so we can focus on the information you want to see when we visit you again. After this presentation, please vote for the topics most important to you by placing a sticky note under the topic on the wall posters.

The Surface Water (lakes, rivers)

The Land- Soils and Terrain

The Groundwater / Springwater

The Air

Fish and Fish Habitat (where the fish live)

The Lands and Resources

The Plants and Wetlands

Wildlife and Terrestrial (out of water) Habitat

Species at Risk

The People (the Social Environment)

The Economy

The Health of Community Members

The Environment that We See (Visual Environment)

Aboriginal and Treaty Rights and Interests

Culture

The Effects of All Projects (Past, Present and Future) Together

Accidents and Things that Go Wrong

Climate Change

THE DECISION-MAKING PROCESS

For Government:

Ontario:

The Ministry (MECP) reviews the Environmental Assessment Report, taking into account comments from the public, the Government Review Team and Indigenous communities. A recommendation is prepared for the Minister to assist in deciding to: (1) approve; (2) approve the Project with conditions; or (3) refuse to approve the Project.

Canada:

The Impact Assessment Report (prepared after review of the Impact Statement) and Crown consultation informs the Minister or Governor in Council decision on whether a project's adverse impacts are in the public interest. If yes, the Minister must establish conditions for the proponent.

For Webequie:

Internal discussions about topics such as: project effects, how these effects can be controlled and the opportunities the Project will offer the community.

WHAT HAPPENS AFTER ENVIRONMENT / IMPACT ASSESSMENT APPROVAL?

- Environmental assessment / Impact Assessment approval means the project can go ahead, but there are many more permits that must be obtained to build the project- these permits could be for developing a pit or quarry, working in or near a lake or river to build a bridge and many other project activities
- Beyond the permits required after the project is approved, there is monitoring of the project that must be done by the project proponent (Webequie First Nation)- the EA/IA proponent develops a monitoring plan during the environmental / impact assessment
- During construction and operation of the road there is monitoring that goes on to make sure the road is being built according to the commitments or promises made in the environmental or impact assessment and conditions that the provincial and federal governments require to be met as part of their approval

WHAT HAPPENS AFTER ENVIRONMENT / IMPACT ASSESSMENT APPROVAL (CONT'D)?

- There are two types of monitoring that is done: compliance monitoring and effects monitoring
  - **Compliance monitoring** looks at whether the Project is being built and/or operated according to the commitments made during the environmental/impact assessment process and conditions of the federal and provincial project approvals
  - **Effects monitoring** is done to check the effectiveness of the predictions of projects effects and to make sure the mitigation measures are effective at eliminating or reducing project effects

TIMELINES / SCHEDULE

FALL/WINTER 2024

- **January 2025**- Early circulation of Draft Environmental Assessment Report / Impact Statement (EAR/IS) for 60-day review by Indigenous communities- ***Plain language version will be provided***
- *We will visit to explain the results of the environmental/ impact assessment*

WINTER 24/25 SUMMER 2025

- Submission of Draft and Final EAR/IS for review by the public, stakeholders and Indigenous communities

2026

- Federal / Provincial decisions on Impact Assessment / Environmental Assessment

WEBEQUIE SUPPLY ROAD
Community presentation

Constance Lake First Nation
January 28th, 2025

OVERVIEW

The Webequie Supply Road Project Team attended a community meeting in Constance Lake First Nation on January 28th, 2025 to share a project update regarding the Webequie Supply Road (WSR) Environmental/Impact Assessment (EA/IA).

The format of the meeting was a presentation by the Project Team followed by a question and answer period. The presentation consisted of a brief project description, followed by an explanation of how the WSR EA/IA is related to the federal regional assessment, themes of what has been so far from consultation efforts to date, potential project effects, the EA/IA decision-making process and post EA/IA decision activities. In an effort to seek feedback on Valued Components and potential project effects in preparation for the Draft chapters of the Environmental/Impact Assessment, an engagement exercise to select the top three most important valued components was provided to community members. All present participated in the exercise.

Communication materials were provided to community members for their information and reference including: a copy of the presentation, WSR Environmental/Impact Assessment Project update Webequie First Nation December 18, 2024.

A total of 18 community members attended the session, with 10 completing the sign-in sheet.

QUESTIONS FROM COMMUNITY MEMBERS

No questions were asked following the presentation.

FEEDBACK FROM COMMUNITY MEMBERS

The following Valued Components (VCs)were proposed and rated by community members present at the meeting. Indicated beside each VC is the number of votes received by community members.

The Surface Water (lakes, rivers) – 1
The Land – Soils and Terrain – 1
Fish and Fish Habitat (where fish live) – 1
The Plants and Wetlands – 0
The Groundwater/Springwater – 2
The Air – 0
The People (the Social Environment) 0
The Economy – 3
The Lands and Resources – 2
The Health of Community Members – 7
The Environment that We See (Visual Environment) – 0
Aboriginal and Treaty Rights and Interests – 1
Wildlife and Terrestrial (out of water) Habitat – 6
Species at Risk – 5
Accidents and Things that go Wrong – 0
Climate Change – 3
Culture – 2
The Effects of All Projects (Past, Present and Future) Together - 1

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Allen,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Allen,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: **https://www.supplyroad.ca/draftea**.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

APPENDIX P2.I.5

Correspondence with Indigenous Communities and Groups – Eabametoong First Nation

Webequie Supply Road Project Consultation Log

Records Found: 1

Eabametoong First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Eabametoong First Nation's (EFN) Chief Solomon Atlookan, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if EFN has any questions or comments.

Contact Date: Nov 22, 2021 14:22 Method: Fax
Topics to be Discussed: Terms of Reference, Live stream: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team faxed a letter and poster, to Eabametoong First Nation's (EFN) Chief Solomon Atlookan, advising that the WSR Project Team is hosting a live stream show and Wawatay radio session on November 23, 2021 with a livestream from 4:00-4:30pm EST and Wawatay Radio call-in show from 2:00-3:00pm EST, with access links and the toll-free call-in phone number. The sessions will include a presentation on topics including: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds Work Plans along with question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations, Michael's email and cell phone contact information if EFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Eabametoong First Nation's (EFN) Chief Solomon Atlookan, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether EFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked EFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if EFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Eabametoong First Nation's (EFN) Chief Solomon Atlookan, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited EFN to participate in the WSR socio-economic primary data collection program. The letter asked EFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if EFN has any questions.

Topics to be Discussed: Virtual Information Session
Michael Fox of Indigenous and Community Engagement and Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Eabametoong First Nation (EFN) on May 30, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Don and Michael discussed several questions that had been previously asked by EFN. These questions were regarding how consultation efforts are utilized and how these efforts influence Project outcomes. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community members in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team emailed Chief Soloman Atlookan of Eabametoong First Nation (EFN) to follow up regarding the previous email sent on April 26, 2022 regarding the Socio-Economic Primary Data Collection Program. Marian indicated that the WSR Project team has reached out via fax, letter, and phone and has not received a response from EFN. Marian requested the community to let the WSR Project team know if they are interested in participating in the program and provided a link to the WSR Project website with more information on the program. Marian indicated that the WSR Project team would be happy to meet with EFN to discuss the program by phone or virtual meeting and provided EFN with her phone number and email to further discuss the program.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Eabametoong First Nation's (EFN) Chief Solomon Atlookan with a letter following up on the correspondence sent on December 13, 2021 regarding the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program, inviting EFN to participate in the program. The letter noted that the Project Team also followed up on January 17, 2022, February 24, 2022 and April 13, 2022 to advise that the IKLRU Program has commenced and confirm if the community is interested in participating. The letter reminded EFN of the purpose of the IKLRU Program and that the WSR Project is currently in the Environmental Assessment / Impact Assessment (EA/IA) phase. The letter acknowledged that EFN has been determined ineligible to receive funding to participate in the IKLRU Program by the Province of Ontario, however, Ontario may reconsider if EFN can provide information as it relates to any Aboriginal and/or treaty rights that may be affected in the area near the proposed WSR Project. The letter welcomed the community to reach out to the Project Team for support throughout the process. The letter stated that if EFN is interested in learning more about the IKLRU Program, the Project Team is available to meet either in-person or virtually.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Eabametoong First Nation's (EFN) Chief Soloman Atlookan, which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 11:00-12:00pm EST and livestream from 1:00-1:30pm EST on October 25, 2022. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on baseline field studies - preliminary observations related to wolverine, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

The fax also included the English WSR Newsletter – Issue 15 which provided information about the Environmental Effects Assessment and highlighted the importance of the Baseline Field Studies in the Environmental Assessment / Impact Assessment. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their e-mail address and phone number if EFN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 1
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Eabametoong First Nation's (EFN) Chief Soloman Atlookan which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 1. The USB contained files supporting Record of Consultation. The letter explained that the Consultation Progress Report summarizes the documents from Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The report being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 2. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

Contact Date: Feb 06, 2023 16:07 Method: E-mail
Topics to be Discussed: ATRI Forum
Peter Siebenmorgen, resource stewardship advisor for Eabametoong First Nation (EFN) sent an email with a letter addressed from Chief Soloman Atlookan of EFN to Chief Bruce Achneepineskum of Marten Falls First Nation (MFFN), Chief Cornelius Wabasse of Webequie First Nation (WFN), Sasha McLeod of the Ministry of the Environment, Conservation, and Parks (MECP), and Kim Valentine of the Impact Assessment Agency of Canada (IAAC). Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team was copied on the email. The letter provided an explanation to why EFN will not attend the Aboriginal Treaty Rights and Interests (ATRI) Forum as related to the WSR, Northern Road Link (NRL), and the Marten Falls Community Access Road (MFCAR).

The letter indicated that EFN has provided the Proponents with guidance for a reasonable approach to moving forward with engagement on the road projects, specifically through establishing nation to nation protocols. The letter noted that an engagement protocol has not been reached despite EFN being willing and able to meet with the project teams over a period of more than a year since the expectation was first communicated. The letter noted that it is the Proponent's role to ensure that the next step for engagement is taken.

The letter also noted that a respectful protocol, based on shared history, lineage, inherent Indigenous rights and Treaty rights must be established as a priority, which has been discussed with the Project teams. EFN noted that they have not received a response from WFN Council and EFN requested a response and a proposal to move forward with this approach. The letter noted that the discussions proposed in the notice for the ATRI Forum engage legal rights of constitutional status and that the Forum has potential to be prejudicial to EFN. EFN noted that they are concerned by the misleading description of the Forum in the invitation since it claims to not be collecting Indigenous Knowledge but is asking participants to "speak to the Rights and Interests of their community" which are integrally linked to Indigenous Knowledge. The letter also noted that it is unclear if the forum is part of the Proponent's consultation process or the Crown in right of Ontario. EFN also noted that the IAAC is listed as an attendee, who they have been engaging with at separate tables with respect to IAAC's role in the Road assessment process. EFN noted that all parties have different legal duties and the case law is clear that EFN is entitled to a clear consultation process. In this context, EFN noted that it is highly improper that such a public event is being conducted with an explicit focus on project-based consultation, identification of ATRI, and recording of membership views without any clear or mutually agreed upon methodology. EFN also noted the unacceptability that the forum claims to include three separate and distinct projects, each with its own set of complex potential impacts, a wide range of consulting parties, and a number of diverse and distinct First Nations and their community members who may attend without legal advice and the support of their governments to understand the prejudicial effects of sharing sensitive information related to Indigenous Knowledge and ATRI in a process with significant legal and constitutional implications.

EFN noted that they have already outlined the proper manner for understanding ATRI and that they consider the forum to be the opposite. The letter stated that it is unacceptable to the honour of the Crown, and to the proper conduct of the Road proponents to the extent that the Crown has delegated it's legal duty. The letter noted that there is no clarity regarding who will be recording the meeting and how the records will be used, and its predictable that the words of EFN's members will be misused, incorrectly translated, and/or manipulated, which is why an engagement process and information sharing protocol must be agreed upon bilaterally with the EFN government for each of the road projects, with clear understanding of what the process is and the roles of each party. This would ensure that EFN is treated fairly in a manner that accords with the significant obligations set out in the common law with respect to the duty to consult and accommodate, and in accordance with the Crown's duty to seek reconciliation and comply with UNDRIP.

The letter noted that EFN has made clear to the Proponents, Ontario, and the IAAC, that the roads have the high potential to impact EFN's ATRI and they have the potential to lead to profound changes that will irreversibly impact EFN's relationship to their lands and way of life as Indigenous people. EFN stated that they fully intend to participate and share information about the ATRI of their membership throughout the region, to the proper parties in relation to the Road projects in a manner that reflects their shared and collective interests throughout the north and according to current best practices in working with sensitive community information and in processes that impact their constitutional legal rights. EFN explained that the matter is more serious to the current and future generations than convenience for regulators and proponents. Additionally, EFN noted that they were told by Ontario that their trained staff members are not to observe or attend, but only members who are prepared to share information. The letter noted that the inequity in Crown-led decision making processes continues to impact the ways EFN is equipped to fairly participate, and EFN expects that their appointed members are respected, especially when matters of ATRI are being discussed.

The letter noted that EFN Chief and Council extends their invitation to meet to discuss a proper protocol for engaging in a fair and honourable way that is required of both the Crown and its delegates. The letter explained that EFN will travel or host the Project teams in the community, which would be a more constructive approach to dialogue with respect to EFN's rights and interests.

Topics to be Discussed: Radio, Livestreams, Engagement Options
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Eabametoong First Nation (EFN)'s Chief Soloman Atlookan which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 14, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of the Alternatives Assessment Process, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team will begin Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent a fax to Eabametoong First Nation (EFN)'s Chief Soloman Atlookan which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 14, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of the Alternatives Assessment Process, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team will begin Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send each community a link to the session and to the Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Eabametoong First Nation (EFN)'s Chief Soloman Atlookan, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of EFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Eabametoong First Nation (EFN)’s Chief Soloman Atlookan as a follow up to the email sent on March 17, 2023 regarding the invitation to participate in the Socio-Economic Primary Data Collection Program as part of the Environmental Assessment / Impact Assessment. Heather asked the Chief if they had any questions regarding the original email and letter and indicated that the WSR Project team would like to hear back by April 17, 2023 as to EFN’s interest in participating in the program. The letter detailed the purpose of the socio-economic study, the type of information that the WSR Project team is seeking, the study area, how information will be collected, schedule, and next steps. Heather requested the Chief to let the WSR Project team know if they prefer a call to discuss the request in the letter.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Eabametoong First Nation (EFN) on April 24, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, the Project Team played a voiceover presentation which included a testimony by the Webequie First Nation Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don discussed several concerns that had been previously raised by EFN. Don mentioned that the concerns raised so far are regarding consultation during COVID-19 and the need for regional assessments. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

Michael Fox, McKenna Baxter and Brianna Patrick of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Eabametoong First Nation's (EFN) Chief Solomon Atlookan of the English WSR Newsletter – Issue 22. The newsletter provided information about the Socio-Economic Primary Data Collection Program, the Indigenous Knowledge and Land Resource Use Program, and the livestream and radio schedule for May 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if EFN has any questions or comments.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Eabametoong First Nation (EFN)'s Chief Solomon Atlookan which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on May 24, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Evaluation of Alternatives for Supportive Infrastructure, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

Topics to be Discussed: WSR Response to EFN Letter regarding ATRI Forum
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Chief Soloman Atlookan of Eabametoong First Nation (EFN) with a letter attached in response to the correspondence sent on February 6, 2023. In the letter, the WSR Project team expressed understanding for EFN's request to develop an engagement protocol with Webequie First Nation (WFN) before proceeding with consultation on the WSR Project. The Project team indicated that they are committed to planning a council-to-council meeting between EFN and WFN to develop an agreed upon and respectful engagement protocol.

The letter outlined WFN's attempts to create an approach for engagement on the WSR Project and noted that to date, the WSR Project team has been unsuccessful in scheduling a meeting with EFN. The letter noted that the team is eager to work with EFN to develop a respectful protocol based on shared history, lineage, inherent Aboriginal and Treaty rights, and requested dates for July and August 2023 that would work for EFN to meet in person or virtually.

The letter thanked EFN for providing an explanation to their absence from the Aboriginal Treaty Rights and Interests (ATRI) Forum held in Thunder Bay on February 8 and 9, 2023, and expressed appreciation for providing the Project team with a better understanding of EFN's perspective of the Forum and why the community declined to attend. The letter provided more information about the ATRI Forum and explained that it was an initial step in working towards developing a shared understanding of ATRI within each distinct Project area for the WSR, Marten Falls First Nation Community Access Road, and Northern Road Link Projects. The letter expressed understanding that communities will need time to think, reflect, and discuss with leadership and other community members on what they want to share with the Project team regarding ATRI, and the Project team wants to offer to meet individually with all Indigenous communities, including EFN, to further discuss potential impacts to ATRI.

The letter noted WFN's understanding that the Province of Ontario, the Federal Government, and the Proponent all have different consultation duties/roles. The Project team noted that the intent of the Forum was to discuss the different roles/duties as it related to assessing potential impacts to ATRI. The letter noted that constitutionally protected rights are of the utmost importance and significance and explained that the Forum was an opportunity to: build relationships, connect on how to work together, and create a collaborative and confidential space.

The letter noted WFN's understanding that sensitive information must be protected and held in the strictest of confidence, and that it was never the intent to collect or solicit Indigenous Knowledge (IK) or specific information on Indigenous Land and Resource Use. The letter noted that the team has been reaching out to EFN to discuss IK Sharing Agreements over the past several years and will continue to work to develop an agreement that meets the needs of the community.

Lastly, the letter addressed the miscommunication on the role of the Indigenous Community Advisors / consultants at the Forum which was not part of any communication that the Proponents had sent out. The letter explained that Indigenous Community Advisors and consultants will be invited to participate in engagement activities at the request of the communities in the future. The letter noted WFN's understanding that EFN did not feel comfortable attending the Forum and extended another offer to meet with EFN individually once the engagement protocol is in place to discuss how to collaborate with EFN on better understanding and assessing potential impacts to EFN's ATRI in the Project area(s).

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a fax to Chief Soloman Atlookan of Eabametoong First Nation (EFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding EFN’s participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted that the Project team has also phoned the band office on January 17, 2022, February 24, 2022, April 13, 2022, and sent an email on January 20, 2022, and August 3, 2022 to follow up and advise that the IKLRU Program has started and to confirm if the community is interested in participating. The letter provided an overview of the IKLRU Program and indicated that the community has been determined ineligible to receive participant funding to participate in the IKLRU Program by the Province of Ontario. However, Ontario remains open to reconsider their decision, if EFN can provide information available within the community as it related to any Aboriginal and/or Treaty Rights that may be affected in the area near the proposed WSR Project. The letter encouraged the community to contact Ontario if they wish to have their eligibility to receive participant funding reconsidered and the Project team offered their support throughout the process. The letter provided an overview of the IKLRU Program and its aim to complete the studies and draft a baseline conditions report as part of the Environmental Assessment / Impact Assessment. The letter requested an indication of the community’s interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

Topics to be Discussed: Radio, Livestreams and Engagement Options
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Eabametoong First Nation (EFN)'s Chief Soloman Atlookan which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on July 5, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on construction camps, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

Topics to be Discussed: Virtual Information Session
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Eabametoong First Nation's (EFN) Chief Soloman Atlookan, with a letter and poster advising that the WSR Project Team has rescheduled and is hosting a virtual information session for EFN on November 6, 2023, between 12:00-1:00pm EST with registration links for the session. The information session will include a presentation on WSR's Environmental Assessment / Impact Assessment activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if EFN has any questions or comments.

Topics to be Discussed: WSR Information Session
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a rescheduled virtual information session as part of the Consultation Round 2 for Eabametoong First Nation (EFN) on November 6, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don Parkinson explained that the Part 2 of Consultation Round 2 will discuss the Project team's work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from EFN were in attendance.

Topics to be Discussed: ATRI Forum Question
Martha Papah of Eabametoong First Nation (EFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team to ask about accommodation coverage for council members to attend the Aboriginal Treaty Rights and Interests (ATRI) Forum. She asked how the hotel rooms will be covered to organize travel for council members.

16:06
Michael Fox of ICE responded to Martha Papah of EFN directing her to Paul MacInnis and Jason Frechette at the Ministry of Mines to answer her question.

Contact Date: Nov 15, 2023 15:38 Method: E-mail
Topics to be Discussed: ATRI Forum Question
Chief Soloman Atlookan of Eabametoong First Nation (EFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team to ask on behalf of a councilor, if travel and accommodations are involved for the Aboriginal Treaty Rights and Interests Forum.

16:05
Michael Fox of ICE responded to Chief Atlookan of EFN to indicate that the Province of Ontario is paying for three community representatives from each community that is invited. Michael indicated that he could get the Province to contact the Chief if they let him know.

Topics to be Discussed: ATRI Forum Question
Paul MacInnis of the Ministry of Mines (MINES) responded to Martha Papah of Eabametoong First Nation (EFN) regarding her question about attending the Aboriginal Treaty Rights and Interests (ATRI) Forum. Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was copied on the email. Paul noted that they only require the names for registration of the event. Paul provided more detailed information regarding hotel accommodations, meals, travel, funding, and honorariums which have been provided through the Northern Road Link and Marten Falls Community Access Road Projects Participant Funding Initiatives.

08:55
Paul MacInnis sent another email to Martha Papah indicating that MINES could not put a hold on hotel rooms at the Valhalla Inn Hotel without paying for them directly and that Martha would need to call the hotel directly to book the rooms with a purchase order or credit card.

Topics to be Discussed: Aboriginal and/or Treaty Rights and Interests Forum #2
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Aboriginal and/or Treaty Rights and Interests Forum held at the Valhalla Inn in Thunder Bay on November 21-23, 2023.

The purpose of the Forum was to create a respectful, culturally-sensitive, and collaborative space to develop and/or confirm understanding of the Project areas (WSR, MFCAR, and NRL) as communities Aboriginal and / or Treaty Rights and Interests (ATRI) may be impacted by these Projects. The purpose of this event was to discuss ATRI and not to collect Indigenous Knowledge. Day 3 of the Forum was set aside for a half-day discussion on Cumulative Effects as they relate to the Projects. Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the Province of Ontario.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Eabametoong First Nation’s (EFN) Chief Soloman Atlookan which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

Topics to be Discussed: Consultation Round 2 Report Follow Up, Livestream, Radio Show
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent fax to Eabametoong First Nation's (EFN) Chief Soloman Atlookan, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter provided the status of delivery as of February 22, 2024. An overview of the Consultation Progress Report for Round 2 was provided and the letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on February 26, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Bridges and Water Crossings, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if EFN has any questions or comments.

Topics to be Discussed: Draft Preliminary Existing Conditions Document and Consultation Round 2 Report Follow Up
McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team phoned the Eabametoong First Nation band office to follow up with Chief Solomon Atlookan about the Draft Preliminary Socio-Economic Existing Conditions Document that was sent to the Chief via email on February 9, 2024 and the Consultation Round 2 Report that was mailed to EFN on January 29, 2024. The purpose of the call was to see if the community had any feedback or questions on the report. There was no answer so McKenna left a message with her name, number, and purpose of the call.

Topics to be Discussed: WSR Newsletter - Issue 33, Consultation Progress Report Round 2 Follow Up, Virtual Community Information Sessions, Livestream, Radio Show

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Eabametoong First Nation's (EFN) Chief Soloman Atlookan, with a letter, poster, and English WSR Newsletter - Issue 33 attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on April 22, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Geology, Terrains, and Soils Preliminary Findings along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if EFN has any questions or comments.

The English WSR Newsletter – Issue 33 was also attached and provided information about the Aquatic Habitat Preliminary Findings and the upcoming community Virtual Information Sessions for Round 3 of consultation. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael and Don Parkinson of AtkinsRéalis provided their email address and phone number if EFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 3 for Eabametoong First Nation (EFN) on May 13, 2024. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 1 of Consultation Round 3 will provide an overview of the Environmental Assessment/Impact Assessment (EA/IA), how the EA/IA will be carried out, and the preliminary results of effects assessment for select value components. Don provided an update on the engagement and consultation to date and provided an overview of the key themes of feedback from communities in Round 1 and 2. Don explained that the presentation provided in the session is a shorter version of the full presentation available on the WSR website. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from EFN were in attendance. Don reiterated that the Project Team would like to hear from EFN community members and that a recording of the session would be made available through YouTube and the WSR Website.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Solomon Atlookan of Eabametoong First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Superior Inn and Conference Centre in Thunder Bay on June 11-13, 2024.

The purpose of the Gathering was to create a respectful, and collaborative space for consultation to continue to build an understanding of the three road projects and their potential impacts by: 1) Providing a comfortable space for Elders to gather and discuss the Projects; 2) Creating opportunities to engage directly with the Project proponents and consulting teams sharing information about the Projects and; 3) Discussing the upcoming draft Environmental Assessment Report / Impact Statement (EAR/IS) Review Process for WSR and the Marten Falls Community Access Road (MFCAR) Project.

Day 1 was set aside exclusively as an Elders Gathering to gather and engage with the individual Project Teams for all three projects to share their perspectives. By design, there were no government representatives in attendance on Day 1; only Indigenous people and Indigenous consultants, to encourage a more open and comfortable discussion. This was a new and innovative approach to engaging with Indigenous communities by the creation of a sacred space that was authentic, comfortable and open.

Day 2 was open to all participants. The morning focused on a series of technical presentations on key issues identified in previous engagement and consultation opportunities (peatlands (and other terrain), building roads on peatlands, aspects of water and fish populations). The afternoon was an Expo where participants could visit a series of booths to have one-on-one conversations with Project Team members from each of the road projects, various technical aspects of the Projects, Ontario and the Impact Assessment Agency of Canada.

Day 3 was also open to all participants. This session was a half day workshop on a common approach to reviewing the upcoming circulation of draft EAR/ISs for two of the three road projects so that there would be sufficient time to review and provide feedback. Each project team wanted to share the common approach to reviewing the draft EAR/ISs with Indigenous Nations early so that there was a shared understanding of what to expect and when. This would allow Indigenous communities to prepare themselves in advance with respect to resources to assist in the review.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 44 individuals signed in for Day one of the gathering, A total of 62 individuals signed in for Day 2, and a total of 48 individuals signed in for Day 3, but please note that not all participants opted to sign in. In total 3 participants from Eabametoong First Nation (EFN) attended the Gathering over the 3 days.

Topics to be Discussed: Virtual Information Session Round 3 Part 2
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Eabametoong First Nation (EFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 2 presentation that began with a review of the project to date, followed by a discussion of preliminary results for the vegetation, wildlife, social environment, aboriginal and Treaty rights valued components. The presentation concluded with discussion on the cumulative effects assessment and the assessment of other aspects and effects. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No participants from EFN were in attendance.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Eabametoong First Nation's (EFN) Chief Solomon Atlookan with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for EFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Eabametoong First Nation's (EFN) Chief Solomon Atlookan which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if EFN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Solomon Atlookan of Eabametoong First Nation with links to?invitations for the Three Road Project Gathering & Expo hosted by Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Virtual Information Session Round 4 Part 1
The Webequie Supply Road (WSR) consultation team conducted a virtual community meeting on the Zoom platform with Eabametoong First Nation (EFN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. There was no participants from EFN in attendance.

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Eabametoong First Nation's (EFN) Chief Solomon Atlookan with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Eabametoong First Nation's (EFN) Chief Solomon Atlookan, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for Round 4 Part 2 for EFN on March 24, 2025, from 11:00-11:45am EST with registration links for the session. The information session will include the second presentation on WSR's Cumulative Effects Assessment. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. The letter also attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if EFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
The Webequie Supply Road consultation team conducted a virtual community meeting on the Zoom platform with Eabametoong First Nation (EFN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 2 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment. After the effects assessment discussion, potential effects and associated mitigation measures were explained using examples from geology, terrain and soils and fish and fish habitat. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from EFN were in attendance.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Solomon Atlookan of Eabametoong First Nation (EFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road
michael.fox@supplyroad.ca

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

December 13, 2021

Chief Solomon Atlookan
Eabametoong First Nation
PO Box 298
Eabamet Lake, ON P0T 1L0

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Solomon Atlookan,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Eabametoong First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Eabametoong First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Eabametoong First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Draft Indigenous Knowledge Sharing Agreement

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Eabametoong First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Eabametoong First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Eabametoong First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Eabametoong First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Eabametoong First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Eabametoong First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Eabametoong First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Solomon Atlookan,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Eabametoong First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

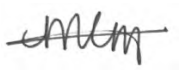
Next Steps

In order to confirm that Eabametoong First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

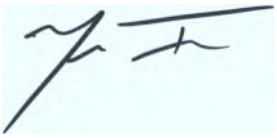
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. April 1, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Socio-Economics. This upcoming week's session is: **WSR Presents: Socio-Economics.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 6th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to brianna.patrick@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

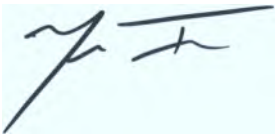
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on human health. This upcoming week's session is: **WSR Presents: Human Health.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 20th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

WEBEQUIE SUPPLY ROAD (WSR) PROJECT

Socio-Economic Study Plan
Fact Sheet

What is the primary purpose of the Socio-Economic Study Plan?

To characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) as a result of the construction and operation/maintenance of the WSR. Provide recommendations for minimizing negative socio-economic effects and enhancing beneficial effects of the Project.

What are socio-economics?

Studying socio-economics provides information about current jobs, income, education and housing conditions in a community.

What kind of information is going to be gathered?

- Community values;
- Community demographics (age, gender, marital status, education, labor force activity, health, etc.);
- The type of access each community has to education, jobs, or transportation; and
- Well being and safety.

Who is the information being gathered from?

- The 22 Indigenous communities that have been identified as the ones whose established or asserted Aboriginal and Treaty rights may be adversely affected by the Project and/or may have interests in the project.

WSR240-WEB-PR-FS-0016 Web-Socio Economic Fact Sheet-English-website-2022-04-26

*The Project Team will respect protocols and work with each community to understand how the information will be transferred, stored, and applied, and will be protected and kept confidential.

How is the information on community socio-economics being collected?

Primary information will be collected from Indigenous communities:

- A socio-economic survey using Survey Monkey, which will be sent by e-mail/letter;
- Key informant interviews with Chief and Councils, band administration staff, social service providers, healthcare providers, and knowledge keepers; and
- Collection of Indigenous knowledge through engagement activities.

Secondary information will be collected and reviewed:

- Published data from government websites, Indigenous community websites, municipal websites, and other open-source data. This information will be used to identify community demographics, community infrastructure, community social services, etc.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Solomon Atlookan,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Eabametoong First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

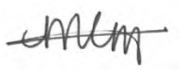
Next Steps

In order to confirm that Eabametoong First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Encl.
Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

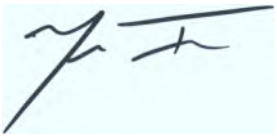
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

May 16, 2022

Dear Chief Atlookan,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 30 between 12pm and 1:30pm** for Eabametoong First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZIpd-uvpjooHNR3qydIxdbF3VUh9QaigDmf.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 864 0278 1260 & Passcode: 605581.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/eabametoong.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

May 27, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on field studies related to water. This upcoming week's session is: **WSR Presents: Field Studies - Water.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 1st, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

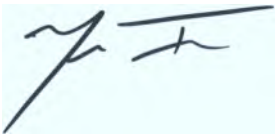
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 10, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on field studies related to fish and fish habitat. This upcoming week's session is: **WSR Presents: Field Studies - Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 15th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

August 3, 2022

Dear Chief Atlookan,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to you on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022, February 24, 2022 and April 13, 2022 to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating. To date, we have not received a response regarding your interest in participating in the Program.

As you may know, Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Eabametoong First Nation has been determined ineligible to receive participant funding to participate in the IKLRU Program by the Province of Ontario. Ontario came to this decision based on their initial assessment that your community does not appear to have constitutionally protected Aboriginal and/or treaty rights that may be adversely affected by the proposed WSR Project. However, Ontario

remains open to reconsider this decision, if Eabametoong First Nation can provide information available within the community as it relates to any Aboriginal and/or treaty rights that may be affected in the area near the proposed WSR Project. This information could include: transcripts of oral history; values or other mapping; historical research; and secondary sources the community may have gathered that can help demonstrate whether your community exercises Aboriginal or treaty rights in the vicinity of the proposed project.

We encourage you contact Ontario if you wish to have your eligibility to receive participant funding reconsidered. Please let us know if there is any way we can offer our support throughout this process.

If you are interested in learning about the IKLRU Program, we would like to meet with you and your team to discuss the scope of the IKLRU Program and how it will be carried out in terms of the study area, valued components, criteria and indicators, and community participation. We are available to meet and discuss the IKLRU Program in detail at your convenience, and in any method that you and your community prefers, either in-person or virtually. Please inform on how you wish to proceed at your earliest convenience.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project website also has various informational videos, communication materials and project updates. Please visit: https://www.supplyroad.ca/

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**
You can also stay tuned with the WSR Project by following our social media channels:

October 19, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Wolverine.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 25th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Chief Solomon Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON
P0T 1L0

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Other Ways to Stay Up To Date

You can also stay tuned with the WSR Project by following our social media channels:

December 14, 2022

Chief Soloman Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON
P0T 1L0

Dear Chief Atlookan:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status indicates that it has been successfully delivered to your community on November 17, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

WEBEQUIE
SUPPLY ROAD

January 27, 2023

Chief Soloman Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON
P0T 1L0

Dear Chief Atlookan:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, January 27, 2023, the package status indicates that it has been successfully delivered to your community on November 17, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Radio Show and Livestream Series

The WSR Project team will be resuming the radio show and livestreaming series in the coming weeks. Stay tuned for more information.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and 1

WSR WEBEQUIE SUPPLY ROAD

we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Thank you very much and we look forward to hearing from you soon.

RE: EFN Comments on Proposed Aboriginal and Treaty Rights and Interests Forum ("the Forum")

Dear Chiefs Wabasse and Achneepineskum:

EFN writes to you today to provide an explanation why we will not be participating in the Forum next week as set out in the appended invitation. The invitation invites several First Nations to "discuss potential impacts to Aboriginal and/or Treaty Rights and interests" as they relate to three separate road projects ("the Roads").

First, I remind you that EFN has provided you with guidance for a reasonable approach to moving forward with engagement on the Roads, specifically through establishing respectful Nation to Nation protocols. An engagement protocol has not been reached, despite EFN being willing and able to meet with your teams over a period of more than a year since this expectation was first communicated. This is the required next step for engagement on the Roads with EFN, and it is your onus as the Road proponent to ensure this fundamental step occurs.

A respectful protocol based on our shared history, lineage, inherent Indigenous rights and Treaty rights must be established as a priority. We have discussed this concept with you and your teams, and look forward to spending time together to identify shared principles and mutual understanding that will guide any official engagement regarding the Roads as well as

Eabametoong First Nation

Fax: (807) 242-1440

future initiatives that we may collaborate on in our shared territory. EFN has not yet received any response from WFN Council and by this letter we ask again for a response and a proposal to move forward with this approach.

The discussions you propose in the notice for the Forum engage legal rights of a constitutional status, of the highest importance and significance to EFN. The Forum as proposed has high potential to be prejudicial to EFN and to our ability to protect our Aboriginal and Treaty rights that would be impacted by the Roads. EFN is alarmed and concerned by the misleading description of the Forum in the invitation. For example, it purports to not be collecting indigenous knowledge, but is asking participants to "speak to the Rights and Interests of your community" which are integrally linked to Indigenous Knowledge. Moreover, it is not clear if the Forum is purported to be the Road proponents' consultation process (who appear to be leading the Forum), or the Crown in right of Ontario (who is identified as the host of the Forum). Moreover, the Impact Assessment Agency is listed as and attendee, whom EFN has been engaging at separate tables with respect to its role in the Road assessment process. These parties all have different legal duties and the case law is clear the EFN is entitled to a clear consultation process. In this context, it is highly improper that such a public event is being conducted with an explicit focus on project-based consultation, identification of Aboriginal rights and interests, and recording of membership views without any clear or mutually agreed-upon methodology. Worse, it purports to include three separate and distinct projects, each with its own set of complex potential impacts, a wide gamut of consulting parties, and a number of diverse and distinct First Nations and their community members who may attend without legal advice and the support of their governments to understand the prejudicial effects of sharing sensitive information related to Indigenous Knowledge and s. 35 Aboriginal and Treaty Rights in a process with significant legal and constitutional implications.

The stated purpose of the Forum is to create a "respectful, culturally-sensitive, and collaborative space to develop an understanding of Aboriginal and/or Treaty Rights and Interests in any of the Project areas…" EFN has already outlined the proper manner for doing this with our community, and **we consider the Forum to be the precise opposite**. It is repugnant to the honour of the Crown, and to the proper conduct of the Road proponents to the extent the Crown has delegated its legal duty. With no clarity regarding who will be recording the meeting and how the records will be used, it is predictable that the words of our members will be mis-used, incorrectly translated, and/or manipulated. That is why an engagement process and information sharing protocol must be agreed upon bilaterally with the EFN government for each of the road projects, with clear understanding of what the process is and the roles of each party, so that EFN -- as the party whose s. 35 rights are at stake -- is treated fairly and in a manner that accords with the significant obligations set out in the common law with respect to the duty to consult and accommodate, and in accordance with the Crown's duty to seek reconciliation and comply with UNDRIP.

Eabametoong First Nation

Fort Hope Indian Reserve #64
P.O. Box 298
Eabamet Lake, Ontario
P0T 1L0

Telephone: (807) 242-7221
Fax: (807) 242-1440

As EFN has made clear on numerous occasions to the Road proponents, Ontario and the Impact Assessment Agency of Canada, the Roads have the high potential to impact EFN's Aboriginal and Treaty Rights, and that they have the potential to lead to profound changes that will irreversibly impact our relationship to our lands and to our way of life as an Indigenous people.

To be clear, EFN fully intends to participate and share information about the rights and interests of our membership throughout the region, to the proper parties in relation to the Roads. This will be done in a manner that reflects our shared and collective interests throughout the north and according to current best practices in working with sensitive community information and in processes that impact our constitutional legal rights. We understand that it is far more *convenient* for Ontario, MFFN, WFN, and Canada to demonstrate that consultation may be occurring if events like this are being hosted, but these matters are far more serious to the current and future generations than simple convenience for regulators and proponents. Additionally, EFN was told by Ontario that our trained staff members are not to observe or attend, but only members who are prepared to share information. The inequity in Crown-led decision processes continues to impact the ways our people are equipped to fairly participate, and EFN expects that whomever we appoint to participate to be respected, especially if matters of Aboriginal and Treaty Rights are being discussed. It should be obvious that we may want to involve legal or technical staff in such sensitive matters.

Finally, EFN Chief and Council extends again our invitation to meet together and discuss a proper protocol for engaging in a fair and honourable way that is required of both the Crown and its delegates. We will travel to you, or host you here in Eabametoong, just name the date. This would be a far more constructive approach to dialogue with respect to our rights and interests.

Sincerely,

Chief Solomon Atlookan

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 18, 2023

Dear Chief Atlookan,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 1st from 12:00pm-1:00pm EST** for Eabametoong First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/82101269301.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 821 0126 9301.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/eabametoong/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 19, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Road Corridor Alternatives.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, April 25th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 5, 2023

Chief Soloman Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON
P0T 1L0
Sent via email

Re: Eabametoong First Nation's Letter February 6, 2023

Dear Chief Soloman Atlookan and Eabametoong First Nation Council,

The Webequie Supply Road (WSR) Project Team understands and respects Eabametoong First Nation's (EFN) request to develop an engagement protocol with Webequie First Nation (WFN) before proceeding with consultation on the WSR Project. The WSR Project team is committed to planning a Council-to-Council meeting between EFN and WFN to develop an agreed upon and respectful engagement protocol.

Over the past several years, WFN has been trying to create an approach for engaging on the WSR Project. In August 2019 we sent a letter to the EFN Chief and Council requesting time to meet and discuss the project. During the Terms of Reference phase in August 2020, our Project team spoke with Chief Harvey Yesno who expressed interest in working to develop a protocol to guide the relationship. Since then, we have not received much response from EFN on correspondence sent to the community. On April 13, 2021, Chief Harvey Yesno expressed concern for WSR Project engagement and consultation activities being conducted during COVID-19. From our engagement management tracking we have reached out multiple times to coordinate a meeting. The WSR Project team was hoping to schedule a teleconference in place of an in-person meeting but was unsuccessful in doing so.

We are eager to work with EFN to develop a respectful protocol based on our shared history, lineage, inherent Aboriginal and Treaty rights. Our goal is to schedule this meeting as soon as possible. Can you please provide some dates for July and August 2023 that would work for a meeting (in-person or virtual).

Thank you for providing an explanation for EFN's absence from the Aboriginal Treaty Right and Interests Forum held in Thunder Bay on February 8 and 9, 2023. We appreciate having a better understanding of EFN's perspective of this Forum and why you declined to attend. As a First Nation Proponent we understand the concerns that you raise and appreciate the opportunity to clarify several points.

The ATRI Forum was not a public event, it was a closed Forum with invitations extended to those Indigenous communities who are scoped into the WSR, Marten Falls First Nation Community Access Road (MFFN CAR), and Northern Road Link (NRL) Project assessments. As described in the invitation, the Forum was set up with a large meeting area and six private, individual breakout meeting rooms (one for each Project, the Province of Ontario (the Province), the Impact Assessment Agency of Canada (IAAC), and the MFFN CAR Cultural Heritage and Archaeology Team). Participants met together as a group in the morning of Day One for presentations. Following that, Participants had an opportunity to meet one-on-one with representatives from each of the Projects (MFFN CAR, WSR, NRL), the Province and IAAC. All meetings were confidential and as is standard practice, any information shared by Participants during those one-on-one breakout sessions will be provided back to those Participants for review and comment.

The Forum was an initial step in working towards developing a shared understanding of ATRI within each distinct Project area. By developing an understanding of Rights and Interests we will be better positioned to

engage with Indigenous communities about potential Project(s) impacts. Together, we can then look at ways of avoiding, mitigating or reducing potential negative impacts while enhancing potential positive impacts related to ATRI. As a First Nation Proponent, we understand that the conversations at the Forum were preliminary in nature and that communities need time to think, reflect and discuss with leadership and other community members on what they want to share with us regarding ATRI. We continue to offer to meet individually with all Indigenous communities, including EFN, to further discuss potential impacts to ATRI and we will continue to do so throughout the assessment processes.

We agree that the Province of Ontario, the Federal Government, and us as a Proponent, all have different consultation duties / roles. As noted in the invitation under the Preliminary Agenda, our intent was to discuss these different duties / roles as it relates to assessing potential impacts to ATRI. A significant portion of the agenda for Day One was dedicated to this topic. Representatives from the Project Teams, the Province and IAAC were also available for one-one-one meetings to discuss these distinct duties / roles.

As a First Nation Proponent, constitutionally protected rights are of the utmost importance and significance to our community as well. We understand the difficulties in starting these conversations on rights and we felt that the Forum was also an opportunity to:

- **Build relationships** – We wanted to create an occasion to meet face-to-face, offer Indigenous Communities an opportunity to ask questions and engage in conversations about the Projects, and provide a space to listen and learn from each other.
- **Connect on how we can work together** – As noted previously, we felt it was important to highlight the roles of the Province, IAAC, Proponents and Indigenous Communities in assessing the potential impacts to ATRI.
- **Create a collaborative and confidential space** – We were clear that discussions on ATRI were initial conversations and would not be the only opportunity or avenue to have these discussions. It was also of our utmost concern that we provided a confidential space for these conversations to happen. The agenda clearly highlighted that Indigenous community-specific conversations on ATRI would be done through individual breakout sessions.

As a First Nation we know that sensitive information must be protected and held in the strictest of confidence. As noted in the invitation, it was never our intent to collect or solicit Indigenous Knowledge (IK) or specific information on Indigenous Land and Resource Use (ILRU). Rather the focus was to have higher-level conversations on ATRI with the intent that these initial conversations would lead to more community-specific dialogue and collaboration with Indigenous communities on understanding and assessing potential impacts to ATRI in subsequent meetings and collaboration sessions. We take very seriously that any IK or information on ILRU shared by Indigenous Communities be governed under a community-specific IK Sharing Agreement. We have been reaching out to EFN to discuss IK Sharing Agreements over the past several years and will continue to work with you to develop an agreement that meets the needs of your community.

Finally, we regret that there was a miscommunication on the role of Indigenous Community advisors / consultants at the Forum. This was not part of any communication that the Proponents had sent out. Indigenous Community advisors / consultants will be invited to participate in engagement activities at the request of the communities in the future.

We appreciate EFN Council's willingness to develop an engagement protocol and your further participation in the Project. We also understand that EFN did not feel comfortable attending the Forum. We would like to extend another offer to meet with you individually once the engagement protocol is in place to discuss how we can collaborate with EFN on better understanding and assessing potential impacts to your ATRI in the Project area(s).

We look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.
Michael Fox, Regional Consultation Lead, Indigenous and Community Engagement

June 6, 2023

Dear Chief Atlookan,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to you on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022, February 24, 2022 and April 13, 2022 and sent an email on January 20, 2022 and August 3, 2022 to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating.

As you know from our previous correspondence, Webequie First Nation is the proponent of the WSR Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Eabametoong First Nation has been determined ineligible to receive participant funding to participate in the IKLRU Program by the Province of Ontario. Ontario came to this decision based on their initial assessment that your community does not appear to have constitutionally protected Aboriginal and/or treaty rights that may be adversely affected by the proposed WSR Project. However, Ontario remains open to reconsider this decision, if Eabametoong First Nation can provide information available within the community as it relates to any Aboriginal and/or treaty rights that may be affected in the area near the proposed WSR Project.

We encourage you to contact Ontario if you wish to have your eligibility to receive participant funding reconsidered. Please let us know if there is any way we can offer our support throughout this process.

WSR
WEBEQUIE
SUPPLY ROAD

We want to learn more about your community from your perspective on a range of topics, including:

- Community history
- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests, and ensuring they are protected.

We have a timeframe for the EA/IA process, to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 28, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Construction Camps.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, July 5th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

WSR
WEBEQUIE
SUPPLY ROAD

July 6, 2023

Dear Chief Atlookan,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 17th between 12:00pm-1:00pm EST** for Eabametoong First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85103270970

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 851 0327 0970**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/eabametoong/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

October 27, 2023

Dear Chief Atlookan,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We have re-scheduled and will be offering a community information session, via Zoom, on **Monday, November 6th from 12:00pm-1:00pm EST** for Eabametoong First Nation, where there will be the second part of a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/86257907952.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 862 5790 7952.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/forthope/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca** Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

January 25, 2024

Chief Solomon Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON P0T 1L0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

The information provided in this document is preliminary at this time, and it has been prepared with information that is known specifically for Eabametoong First Nation. This is a living draft document that has yet to be reviewed and validated by the Community.

Webequie First Nation is the proponent for the Project. The Project Team led by Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk (Cree) Indigenous Knowledge as it relates to the Project and to help inform the Socio-Economic Baseline. This document will be continuously updated when information from the Eabametoong First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources of communities as well as following culturally relevant protocols, which require relationship building and consistency to establish trust.

Webequie is an Anishinaabemowin (Oji-Cree) Tawin (community) in Treaty No. 9 territory, located about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe (Ojibway) and Mushkegowuk (James Bay Cree).

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (The good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, and that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie like many Indigenous Nations and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' Socio-Economic data because Webequie, the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

DRAFT

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2. Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan-System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) established itself and exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation mode for the people living in their homelands. (SNC-Lavalin, 2022). Before that time, Anishinaabemowin had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC, officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern hub of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).

DRAFT

Timeline	Effects
Royal Proclamation, 1763	Established constitutional basis for future negotiations of treaties and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	Signed treaties with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	Established staking and prospectors' licenses for exclusive rights to stake and work upon Crown lands.
Ontario Registered Trapline System, 1946	Imposed sole ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples, 1996	Mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada, 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand how they have arrived at their current Socio-Economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

The Eabametoong First Nation is an Anishinaabemowin (Oji-Cree) Nation in Treaty No. 9 territory located in Northwestern Ontario. Eabametoong First Nation is located 365 km north of Thunder Bay and 165 km south of Webequie First Nation in Northern Ontario. It is situated on the northern shores of Eabamet Lake which flows into the Albany River within the Unorganized Kenora District.

The traditional language spoken in Eabametoong is Ojibway. The name 'Eabametoong' means 'the reversing of the water place' in the Ojibway language, which refers to the reversing of the water flow at Eabamet Narrows in the spring. Eabametoong First Nation is also known as 'Fort Hope', a name that was established for the HBC Trading Post at this location in 1894, that was accessed by canoe (Long, 2010).

Eabametoong First Nation is a Nishnawbe Aski Nation (Treaty No. 9) community. In 1905, at the time of the signing of the Treaty, the government community member list for the Fort Hope Indian Band included people living in the nearby communities of Neskantaga, Nibinamik, and Webequie (Driben and Trudeau, 1983). These people remained members of the Fort Hope Band on the government list until 1985, when it declared the three communities as separate Bands (Driben and Trudeau, 1983).

Eabametoong First Nation has a Registered Population of 2,841 with 1,641 members living on-reserve (CIRNAC, 2023c). Eabametoong First Nation is only accessible by air or by winter road which connect the community to the Northern Ontario Resource Trail (NORT). The airport is an all-season Visual Flight Rules (VFR) facility.

The community has a mix of residential lots, and commercial and community buildings that provide a range of services generally seen in remote Indigenous communities of Northern Ontario, including police, fire, nursing station, grocery, school, community services and utilities.

Eabametoong First Nation has a Custom Electoral System, with one Chief, one Head Councillor and five Councillors elected every two years. The next election will be in June 2023.

The community is formally affiliated with the following political territorial organizations:

- Nishnawbe Aski Nation;
- Matawa First Nations; and
- Chiefs of Ontario.

2.2 Community History

Eabametoong First Nation is located along the shores of Eabamet Lake on the Albany River System. Eabametoong means "the reversing of the water place" (Long, 2010). The Albany River is an ancient east-west "highway" that allows the Anishinaabeg to travel and continue their traditional customs of harvesting, hunting, fishing and trapping (Teach for Canada, 2017a). Prior to the fur trade, people of Eabemetoong lived along Eabamet Lake in seasonal locations. Once the fur trading post on Eabamet Lake was built in 1894, and HBC established Fort Hope, a fur trade post located on Attawapiskat Lake in 1891, many families moved to be closer to the Fort Hope site (Driben and Trudeau, 1983). Two missions were established by the Fort Hope Post – a Catholic mission and the Church of England (Anglican) mission (Teach for Canada, 2017a).

DRAFT

During the 1960's, Fort Hope Indian Band Members came together to establish a new community as the people had previously been divided over religious lines. In 1962, a new town was built up with houses and infrastructure (Driben and Trudeau, 1983). In 1985, the Treaty name of Fort Hope Indian Reserve was changed to the traditional name of Eabametoong First Nation (The Firelight Group, 2017a). Gold was discovered at the Fort Hope mine in 1927 and the gold rush in the region followed in the 1940's (The Firelight Group, 2017a).

2.3 Community Values and Aspirations

The Firelight report for the Greenstone Gold Mine outlined the following valued components that were identified as critical conditions that must be present for the continued practice of Eabametoong First Nation culture: water and fishing, hunting and cultural continuity. These were seen as community values and important to Eabametoong First Nation members (The Firelight Group, 2017b).

Eabametoong First Nation is one of 10 northern First Nations who have launched a lawsuit against the Ontario and federal government in April 2023 (McIntosh, 2023). The other communities included in the lawsuit are Eabametoong First Nation (Fort Hope 64), Apitipi Anicinapek Nation, Aroland First Nation, Constance Lake First Nation, Fort Albany First Nation, Ginoogaming First Nation, Kashechewan First Nation, Kitchenuhmaykoosib Inninuwug First Nation and Neskantaga First Nation.

These communities have requested that the Canadian government be barred from making any decisions about how land could be used without Indigenous consent. The lawsuit centres on Treaty No. 9 and the contrast between the verbal and written promises of Treaty No. 9 as recorded (McIntosh, 2023). The Nations are arguing that they did not cede or surrender their territories and that Treaty No. 9 did not give the Ontario government the right to allow resource extraction (McIntosh, 2023).

DRAFT

SOCIAL ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools used to assess Socio-Economic conditions in communities, as these data can also be used to identify vulnerable groups such as women, disabled persons, Elders and youth. These are segments of the population that could either benefit or be negatively impacted (directly or indirectly) by the Project, and often experience barriers to participation as under-represented groups. Population and demographics are described in this section using the following indicators:

- Population overview, including gender and age;
- Indigenous identity/Nationhood; (First Nation, Métis, Inuit or non-Indigenous)
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into the Socio-Economic existing conditions where the Project is being considered. They can help assess the potential effects of the Project and develop strategies to mitigate any negative effects.

3.1.1 Population Overview

The 2021 Census included, for the first time, a question on self-identified gender and added “at birth” to the gender question, which enabled cisgender, transgender and non-binary individuals to report their gender (Statistics Canada, 2023).

Table 3-1 below presents the forecasted population over the projection period broken down by self-identified gender. Population trends by self-identified gender are summarized as follows for Eabametoong First Nation:

- Over the projection period there is a decrease in both the male and female populations;
- Between 2016 and 2043 the male population decreases from 1,015 to 830, an 19% decrease;
- Between 2016 and 2043 the female population decreases from 520 to 421, a 11% decrease; and
- The gap of the male and female population distribution is declining over the projection period, however in 2043 the female population is higher than the male population.

Table 3-1: Population Forecast by Self-Identified Gender, Eabametoong (2016, 2021, 2028, 2033, 2043)

Year	Total	Male	Female
2016	1,015	520	490
2021	975	500	480
2028	927	473	466
2033	894	455	457
2043	830	421	438

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-2 presents forecasted population growth to 2043, broken down by age group. The age groups represented are 0 – 14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group are summarized as follows:

- All age groups, except 65 years and over, are forecast to decline over the projection period;
- Between 2016 and 2043, the 0 – 14 years age group is projected to decrease from 385 to 311, a 19% decline;
- Between 2016 and 2043, the 15 – 64 years age group is estimated to decrease from 585 to 462, a 21% decline; and
- Between 2016 and 2043, the 65 years and over age group is projected to increase exponentially; from 35 to 240 which is a 586% increase. The population distribution of this age group increases over time as well, in comparison to other age groups which are all at a decline.

Table 3-2: Population Forecast by Age Group, Eabametoong (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	1,005	100%	385	38%	585	58%	35	3%
2021	980	100%	370	38%	560	57%	50	5%
2028	959	100%	350	36%	527	55%	82	9%
2033	958	100%	336	35%	504	53%	118	12%
2043	1,013	100%	311	31%	462	46%	240	24%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 3-3 below presents the population by Indigenous identity for 2021. Indigenous identity for Eabametoong First Nation (Fort Hope 64) is summarized as follows:

- 99% identify as First Nation; and
- The remaining population identifies as non-Indigenous (1%).

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Eabametoong (2021)

Indigenous Identity	Count	Distribution
First Nations	970	99%
Métis	0	0%
Inuk	0	0%
Non-Indigenous	10	1%
Total	**980**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.3 Languages

Table 3-4 below presents the languages spoken most often in homes at Eabametoong First Nation (Fort Hope 64). Languages used by the nation is summarized as follows:

- The majority of households speak English while at home at approximately 93.2%; and
- Indigenous languages are the second most spoken within the home at 6.8%.

DRAFT

Table 3-4: Language Used Most Often at Home, Eabametoong (2021)

Language	Count	Distribution
English	890	93.2%
Other Non-Official Languages	0	0%
Indigenous Languages	65	6.8%
Total	**955**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of residents of Eabametoong First Nation (Fort Hope 64) in 2020. Mobility status refers to the status of a person with regard to their place of residence on Census Day in relation to their place of residence on the same date 1 or 5 years earlier (Statistics Canada, 2022a).

Residents are categorized as “non-movers” or “movers”. Persons who, on Census Day, lived in the same residence as they did on the same date 1 year or 5 years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did 1 year, or 5 years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Eabametoong First Nation is summarized as follows:

- 93% of residents were in the “non-movers” category, with a relatively equal distribution between the male and female population.
- 7% of residents were in the “movers” category, with a relatively equal distribution between the male and female population.

Table 3-5: Mobility Status of Residents, Eabametoong (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	885	92%	445	92%	435	93%
Movers	75	8%	40	8%	35	7%
Total	**960**	**100%**	**485**	**100%**	**470**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.2 Housing and Accommodations

Housing and accommodations are an important factor among First Nations people living on reserves. In 2021, it was recorded that 224,280 First Nations people reported that they consider the household they live in as being crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing Socio-Economic conditions of the community and predict potential effects of the Project on the community's quality of life.

3.2.1 Housing Characteristics

Table 3-6 below presents the total private dwellings and private dwellings occupied by usual residents in the Eabametoong First Nation (Fort Hope 64). Private dwellings occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are a total of 607 dwellings in community in 2021;
- Of the total private dwellings, 349 (57.5%) are occupied by usual residents; and
- The highest percentage of dwellings are total private dwellings at 258 (42.5%).

Table 3-6: Total Private Dwellings and Occupied Private Dwellings in Eabametoong First Nation (2021)

Dwelling	Count	Distribution
Total private dwellings	349	57.5%
Private dwellings occupied by usual residents	258	42.5%
Total	**607**	**100.0%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-7 below presents the total number of occupied dwellings for Eabametoong First Nation (Fort Hope 64) by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of dwellings are classified as single-detached at 92% of total dwellings;
- Following single-detached homes, the second most common structure for dwellings in semi-detached at 6%; and
- The remaining structural types make up 2% of the dwellings.

Table 3-7: Total Occupied Private Dwellings by Structural Type in Eabametoong (2021)

Structural Type	Count	Distribution
Single-detached house	230	92.0%
Semi-detached house	15	6.0%
Row house	5	2.0%
Apartment or flat in duplex	0	0.0%
Apartment in a building that has fewer than five storeys	0	0.0%
Apartment in a building that has five or more storeys	0	0.0%
Other single-attached house	0	0.0%
Moveable dwelling	0	0.0%
Total	**250**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Eabametoong First Nation (Fort Hope 64) in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings are considered government or band housing, accounting for 92.6% of dwellings; and
- Owner-occupied dwellings and rented properties are both equally present at 3.7%.

DRAFT

Table 3-8: Private Dwellings by Tenure in Eabametoong (2021)

Tenure	Count	Distribution
Owner	10	3.7%
Renter	10	3.7%
Dwelling provided by the local government, First Nation or Indian band	250	92.6%
Total	**270**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Eabametoong First Nation (Fort Hope 64). Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Eabametoong First Nation in 2021:

- The majority of households are occupied by five or more persons (36.5%);
- Households occupied by four persons and households occupied by two persons are second highest in the community, at 17.3%; and
- The remaining 28.9% are households occupied by one person (15.4%) and households occupied by three persons (13.5%).

Table 3-9: Number of Households by Household Size in Eabametoong (2021)

Household Size	Count	Distribution
1 person	40	15.4%
2 persons	45	17.3%
3 persons	35	13.5%
4 persons	45	17.3%
5 persons or more	95	36.5%
Total	**260**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-10 below presents the number of rooms per household in Eabametoong First Nation (Fort Hope 64) in 2021:

- The majority of private households consist of one to four rooms at 34.8% followed by six rooms at 30.4%; and
- The least number of private households are comprised of eight or more rooms at 5.8%.

Table 3-10: Number of Households by Number of Rooms per Household in Eabametoong (2021)

Household Size	Count	Distribution
1 to 4 rooms	65	25.0%
5 rooms	95	36.5%
6 rooms	75	28.8%
7 rooms	15	5.8%
8 or more rooms	10	3.8%
Total	**260**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.2.3 Housing Conditions

The following subsections describe housing conditions which include the numbers of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as suitability and conditions of dwellings for Eabametoong First Nation (Fort Hope 64).

Table 3-11 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Eabametoong First Nation:

- Dwellings constructed during the period from 1991 to 2000 is the largest group with 34% of private dwellings constructed during this period;
- The fewestnumber of constructed dwelling was from 2006 to 2010;
- There were no houses constructed in periods 1960 or before and 2011 to 2015;
- 68% of the occupied private dwellings in Eabametoong First Nation (Fort Hope 64) were constructed during or prior to 2000; and
- Over the last two decades, 80 dwellings were constructed which comprises of 32% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Eabametoong (2021)

Construction Period	Count	Distribution
1960 or before	-	0.0%
1961 to 1980	55	22.0%
1981 to 1990	30	12.0%
1991 to 2000	85	34.0%
2001 to 2005	25	10.0%
2006 to 2010	20	8.0%
2011 to 2015	-	0.0%
2016 to 2021	35	14.0%
Total	**250**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-12 below presents the suitability of occupied private dwellings in Eabametoong First Nation (Fort Hope 64) in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- The majority of dwellings (68.6%) in Eabametoong First Nation (Fort Hope 64) were categorized as suitable; and
- 31.4% of the occupied private dwellings were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Eabametoong (2021)

Suitability	Count	Distribution
Suitable	175	68.6%
Not suitable	80	31.4%
Total	**255**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-13 below presents the conditions of the private dwellings in Eabametoong First Nation (Fort Hope 64) in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, the majority of the private dwellings at 60.8% in Eabametoong First Nation were categorized as requiring major repairs.; and
- The remainder of dwellings (39.2%) conditions only required regular maintenance and minor repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Eabametoong (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	100	39.2%
Major repairs needed	155	60.8%
Total	**255**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.3 Community Services

Community services are a significant issue in remote communities because many services that are required by community members need to be accessed outside the community or are only available intermittently within the community. Historically, remote Indigenous communities have been under-serviced, which has had detrimental effects on the health and well-being of community members. Some of the most vulnerable people in the community have difficulty accessing services outside the community due to health and financial factors. The community services in Eabametoong First Nation (Fort Hope 64) are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care). The existing conditions of community services in the Eabametoong First Nation (Fort Hope 64) are described in this section.

Community Services information for Eabametoong First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal on social, community, health and government services in Northern Ontario. To-date, Eabametoong First Nation (Fort Hope 64) has not confirmed that it wishes to undertake Socio-Economic primary data collection.

DRAFT

3.3.1 Family Services

Tikinagan is a social services organization that provides child and family services for Eabametoong First Nation. It is the largest provider of residential services in Ontario, with a service area that is approximately one third of the province of Ontario, servicing 30 First Nations communities (Tikinagan Child & Family Services, 2023a). In January 2020, Tikinagan was designated by the Ministry of Community and Social Services and the Band Council to provide child protection services to the families from our communities who reside in the district of Thunder Bay (Tikinagan Child & Family Services, 2023a).

Tikinagan was created to provide culturally specific child and family services, that emphasize Indigenous culture as part of its child welfare support work. This recognizes that previously support services for children and families were generally provided from outside First Nations communities, and there were harms inflicted from this approach (Tikinagan Child & Family Services, 2023b).

The services provided by Tikinagan are culturally responsive and supportive of traditional values and customs. The model of “Mamow Obiki-ahwahsoowin” mandates that in all aspects of service delivery, workers are expected to consult with Elders of the community for wisdom, guidance and teachings, and to receive direction on service delivery (Tikinagan Child & Family Services, 2023c). This specifically includes the requirement to consult with First Nations leadership on case management decisions.

An overall goal of the support work by Tikinagan is to keep children at home, and in their home communities. When necessary, foster homes for children in need are located in the child’s community or a nearby community, in order to reduce the distance from home and family.

The Mamow Obiki-ahwahsoowin model mandates that the authority to declare that children be placed in Tikinagan care rests with Chief and Council (Tikinagan Child & Family Services, 2023c).

3.3.2 Child Care and Youth Programs

3.3.2.1 Healthy Babies Healthy Children

The Healthy Babies Healthy Children program aims to support parenting and promote healthy child development among members of Eabametoong First Nation with children under 6 years old, as well as Indigenous children at-risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care, organizes prenatal classes, and operates a children’s library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre- and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child’s early years to offer development guidance and referrals to other programs and services (211north.ca, Eabametoong First Nation, 2023a).

3.3.2.2 Early Childhood Development

The Early Childhood Development program is designed to enhance school readiness for preschool children who are members of Eabametoong First Nation and six years of age and younger. The program offers a variety of school readiness programs, such as learning shapes and numbers, building vocabulary, and reading, to address the emotional, physical, cognitive, and spiritual development of children. The program also aims to culturally connect and spiritually root children in the traditional language and history of their family, community, and Nation. The program provides supervised indoor and outdoor playtime and gym activities, as well as afternoon snacks to confirm that the children’s needs are met (211 Ontario North, Eabametoong First Nation, 2023b).

DRAFT

3.3.3 Elder Care

3.3.3.1 Home Care and Community Care

Home and Community Care offers healthcare services for ill, injured, and Elder members of the Eabametoong First Nation community in the comfort of their own homes. This service is provided by Case Managers/Nurses, Personal Support Workers, and Homemakers. The team assesses the health history of individuals and develops a personalized care plan, which is continuously monitored through case management to confirm its effectiveness. The services offered include home care nursing, personal care assistance with tasks such as dressing and bathing, basic or advanced practice foot care, teaching individuals to care for themselves, home support with light housekeeping, laundry, and meal preparation, respite for family members and caregivers, and help with light outdoor/yard work (211 Ontario North, Eabametoong First Nation, 2023c).

3.3.3.2 Falls Prevention and Community Elder Exercise Program

The Falls Prevention and Community Elder Exercise Program offers classes to older adults and individuals with mobility issues or chronic conditions to prevent falls and injuries. The program is designed to improve strength and balance through classes run by a physiotherapist or other regulated healthcare provider. The aim is to promote safety and independence among participants. Eligibility for the program is open to Elders or others with chronic conditions who may benefit from these exercise classes (211 Ontario North, Eabametoong First Nation, 2023d).

3.3.4 Health Services

3.3.4.1 Home and Community Care – Physiotherapy Services

The Home and Community Care program provides in-home rehabilitative care to members of Eabametoong First Nation who need assistance in preserving or regaining their independence. The physiotherapy services offered may be provided either in the client's home or at the nursing station, depending on their needs. The services provided may include physiotherapy, occupational therapy, speech-language pathology, and case management. Eligibility for these services is determined based on the individual's specific needs and requirements (211 Ontario North, Eabametoong First Nation, 2023e).

3.3.4.2 Crisis Intervention

The Crisis Intervention Program offers immediate assistance to individuals of Eabametoong First Nation affected by family violence and suicide. This service provides on-site or telephone support and calls for police intervention when necessary. The Crisis Intervention Program confirms that victims receive the necessary support and assistance to secure their safety. Additionally, they arrange meetings with family members to discuss possible crisis resolutions and offer advocacy on behalf of individuals and families dealing with various agencies. The service provides information and referrals to appropriate resources and services. Furthermore, Crisis Intervention assists families in crisis situations, such as the suicide of a youth, with meal preparation, transportation, homemaking, and other areas requiring support (211 Ontario North, Eabametoong First Nation, 2023f).

3.3.4.3 Health Services

The Health Services program is dedicated to promoting the physical and mental well-being of the Eabametoong First Nation community. The program provides education on health awareness and prevention to help individuals maintain good health. Health Services also coordinate with clinics that cover a range of services, including Blood Pressure, Immunization, Sexual Health, and Communicable Diseases. Moreover, they offer several programs such as the Aboriginal Diabetes Initiative, Crisis Intervention, Detox Centre, Early Childhood Development, Family Well-Being Program, Healthy Babies Healthy Children, Home, and Community Care, and Medical Transportation Program. Through these programs, Health Services verifies that community members receive the necessary support and care they need to maintain a healthy lifestyle (211 Ontario North, Eabametoong First Nation, 2023g).

DRAFT

3.3.4.4 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program provides assistance and support to individuals and families in Eabametoong First Nation struggling with addiction issues. This program offers Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides trantation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counselling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to other services such as detoxification and medical assistance (211 Ontario North, Eabametoong First Nation, 2023h).

3.3.4.5 Aboriginal Diabetes Initiative

The Aboriginal Diabetes Initiative provides education, screening, and case management for the prevention, management, and treatment of diabetes. The program works to reduce the number of avoidable complications that can arise from uncontrolled diabetes. It advises individuals on developing and implementing an approach to care and management of diabetes, helping them find appropriate services and making referrals to other health care professionals when necessary. Eligibility for this service is limited to members of Eabametoong First Nation who are living with diabetes or at-risk of developing it (211 Ontario North, Eabametoong First Nation, 2023i).

3.3.4.6 Extended Health Benefits

The Extended Health Benefits program provides a range of health benefits to individuals and families experiencing high health care costs. Eligibility for the program is determined based on need and is open to members of Eabametoong First Nation aged 16-65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies, and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Eabametoong First Nation, 2023j).

3.3.4.7 Nursing Station

The nursing station provides essential medical and health care services to members of Eabametoong First Nation. The station offers primary health care services, including treatment and emergency services, to individuals in need. In addition, the nursing station provides the services of a Physician, Optometrist, and Dentist on a monthly basis. The station also conducts health awareness, education, and prevention workshops and seminars to promote healthy lifestyles. The facility houses an X-ray room and a small pharmacy, ensuring that community members have access to necessary medical equipment and medications (211 Ontario North, Eabametoong First Nation, 2023k).

3.3.4.8 Immunization Clinic

The Immunization Clinic offers inoculations or other preventive measures to help individuals avoid specific controllable diseases. This clinic is designed to serve members of Eabametoong First Nation, ensuring that they receive the necessary vaccinations to protect against common illnesses (211 Ontario North, Eabametoong First Nation, 2023l).

3.3.4.9 Suboxone Treatment Centre

The Suboxone Treatment Centre operates as a detoxification facility for Eabametoong First Nation community members who are struggling with Oxycontin use. This facility functions as a day program and provides a 4-bedroom house that has been renovated into a detoxification centre, with the capacity to treat 10 people at one time. Additionally, the property includes a sauna. The program offers suboxone, a drug that minimizes the effects of withdrawal, in place of methadone. The services offered by the program include intake, withdrawal treatment, counselling, and aftercare. The Suboxone Treatment Centre also provides mental health and addictions counselling

DRAFT

and makes referrals to other treatment centres and programs, such as Nodin Child & Family Intervention Services in Sioux Lookout (211 Ontario North, Eabametoong First Nation, 2023m).

3.3.4.10 Medical Transportation Program

The Medical Transportation Program provides crucial transportation services to members of Eabametoong First Nation who require assistance in making medical appointments. This program offers transportation to medical appointments within the community and to the airport for health-related flights. It also arranges for air transportation from/to Eabametoong First Nation to any medical appointments in Sioux Lookout or Thunder Bay, including appointments with doctors, dentists, optometrists, and specialists. Eligibility for this program is limited to members of Eabametoong First Nation who require medical transportation assistance due to age, illness, or disability (211 Ontario North, Eabametoong First Nation, 2023n).

3.3.4.11 Mental Health Program

The Mental Health Program aims to promote the development of good mental health by providing various services to Eabametoong First Nation community members. It offers mental health screening and assessments, as well as counselling for individuals, couples, and families. In addition, the program conducts information and awareness activities on different topics such as addictions, depression, family violence, health promotion, and stress management (Northwest Health Line, Eabametoong First Nation, 2023a).

3.3.5 Cultural Services

3.3.5.1 Family Well-Being Program

The Family Well-Being Program is a Nishnawbe Aski Nation initiative that aims to support each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improving the overall health of communities. Its activities and programs include revitalizing Native languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counselling and child/youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events. The program works towards eliminating family violence, reducing the number of youths involved in the justice system, and decreasing the number of children in care (211 Ontario North, Eabametoong First Nation, 2023o).

3.3.6 Recreational Services

The Eabametoong First Nation Recreation Department is responsible for planning and implementing social, recreational and special events for community members. The department provides a variety of activities including arts and crafts, baking nights, movie nights and outdoor sports events. During the summer months, the department organizes and supervises outdoor activities for youth, such as baseball, football and soccer. The Joseph Jacob Memorial Arena hosts an 8-team hockey league, and the department coordinates a hockey program during the winter months. In addition, the department offers boys' and men's hockey tournaments and men's/women's broomball tournaments. Summertime concerts are organized at the natural ice arena. Recreational facilities and services include a beach, gymnasium, indoor hockey arena, playground at John C. Yesno School, pow wow grounds, recreation trails along the shoreline, sports field for basketball and baseball, and Winter Carnival (211 Ontario North, Eabametoong First Nation, 2023p).

DRAFT

3.3.7 Communication Services

3.3.7.1 KO Telehealth

The KO Telehealth partnered with member First Nations, the Ontario Telemedicine Network (OTN), the Ministry of Health and Long-Term Care (MOHLTC), and First Nations and Inuit Health (FNIH) to provide high-quality and cost-effective telehealth/ telemedicine service that meets the health and wellness priorities of Ontario's most isolated communities, with a focus on First Nations requirements and community leadership. The use of information and communication technology supports various health, social, and economic development needs and anticipates the development of complementary health initiatives. The telehealth/telemedicine service has significantly improved health outcomes for on-reserve populations, providing a culturally safe and competent service that bridges the gap in chronic health services access for remote First Nations communities. It has also demonstrated how health services can be delivered effectively across large and culturally diverse territories, building and strengthening communities' capacities while supporting health workers in their roles (KO Telemedicine, 2023).

3.3.7.2 Ontario Telemedicine Network (OTN)

The OTN offers specialized medical care through videoconferencing and other tele-diagnostic equipment, enabling specialists to remotely examine and prescribe treatments to patients in their home communities. This reduces the need for patients to travel to receive care, providing greater convenience and accessibility for those living in remote or underserved areas (211 Ontario North, Eabametoong First Nation, 2023k).

3.4 Education and Training Services and Facilities

Education and training services and facilities are limited in many fly-in First Nation communities. In the 2015/2016 school year, high-school completion and post-secondary participation were higher among non-Indigenous youths in Canada compared to Indigenous youths (Statistics Canada, 2023). However, when comparing First Nation youth living on reserves to First Nation youth living off reserves, those that live off reserves are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of Education and Training Services and Facilities using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

John C. Yesno Education Centre is located on the Eabametoong First Nation reserve and is operated/managed by the Eabametoong First Nation Education Authority. The school currently provides education for Junior Kindergarten to Grade 10 students with a school population of 340 students in 2017 (Teach for Canada, 2023). The school includes the main building, full gym, library and kitchen. The school has expanded with four additional portables to support its growth. The school offers an Outdoor Education program where students are given biweekly opportunities in outdoor activities such as hunting, canoeing, camping and ice fishing (Teach for Canada, Eabametoong, 2017). The school also provides teacherages which are fully furnished for teachers to stay and are within a five to 10-minute walk of the school. The school supports online secondary school education through Wahsa programs (211 Ontario North, Eabametoong First Nation, 2023q). Wahsa Distance Education enables students to complete high-school within their own communities. If Eabametoong First Nation members want to attend secondary and post-secondary schools in person, they can go to Thunder Bay, Sioux Lookout and Sault Ste. Marie to receive their Ontario Secondary School Diploma.

DRAFT

Eabametoong First Nation members can also take part in training and certification courses offered by Kiikenomaga Kikenjigewen Employment & Training Services (KKETS) (Kiikenomaga Kikenjigewen Employment & Training Services, 2023). There is an in-community employment coordinator who is available for members on-reserve (Kiikenomaga Kikenjigewen Employment & Training Services, 2023).

Eabametoong First Nation students have the opportunity to take part in Matawa's Education and Care Centre's Outdoor Education Program and Matawa Education and Care Centre's Elders Program (Matawa Education, 2019a). The Outdoor Education program is made up of six Land-based and Outdoor Learning credits and allows students to connect with the land and water. Activities include (but not limited to) trapping, outdoor skills, camping, canoeing, and fishing (Matawa Education, 2019). Students travel from one Matawa First Nation to another during this program. The Elder's program supports Elder's going into the community to provide support to students with traditional activities such as smudging, big drum making, hand drum making, drumming, feasts beading, traditional teachings, storytelling, workshops, traditional medicines, hide tanning, hunting and trapping (Matawa Education, 2019b).

3.5 Emergency and Protective Services

Many fly-in First Nation communities have limited access to Emergency and Protection Services. These services are often not available within the community which must then rely on services such as emergency medical care provided off the reserve. This section describes the existing conditions of emergency and protective services using the following indicators:

- Demand for community emergency and protective services; and
- Supply and capacity of community emergency and protective services.

These indicators were selected to determine emergency and protective services that are available within the Eabametoong First Nation, and those services that are either not available to the community or are only available outside the community. Emergency and protective services include police services, fire services, and emergency medical services (EMS). Information was primarily collected through the 211 Ontario North website and municipal/ community websites.

The Socio-Economic Baseline includes a description of the following emergency and protective services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

Police: The Eabametoong First Nation opened a new police detachment service building in 2015 which is serviced by Nishnawbe Aski Police Services (NAPS) – Central Region. It is designed as a 5-person detachment and includes holding cells, interview rooms and meeting rooms (Murray, 2015).

Fire: Eabametoong has an on-reserve fire department with a fire hall (211 Ontario North, Eabametoong First Nation, 2023r). Eabametoong has one fire pumper truck and street fire hydrants that are maintained by Eabametoong First Nation (First Nations Info – Eabametoong, 2023). There is a volunteer fire department that focuses on fire prevention and administration of the Ontario Fire Code. The volunteer fire department also issues applicable burn permits and provides education, emergency planning, fire investigation, fire suppression and home safety information (211 Ontario North, Eabametoong First Nation, 2023r).

EMS: Eabametoong currently has no EMS on-reserve. The on-reserve Kevin S. C. Sagutcheway Nursing Station provides emergency services (Northwest Health Line, Eabametoong First Nation, 2023b). If medical transportation is required, the Medical Transportation Program will assist with arranging air transportation (NorthWest Healthline, Medical Transportation Program – Eabametoong, 2023).

DRAFT

3.6 Community Infrastructure

This section describes community infrastructure, including community roads, electrical power systems, drinking water management systems, wastewater management systems, solid waste management systems, telecommunications systems, and other infrastructure using the following indicators:

- Demand for community services and/or infrastructure; and
- Supply and capacity of community services and/or infrastructure.

These indicators were selected to define community infrastructure that is available in the Eabametoong First Nation, community infrastructure that is needed, and the condition of the infrastructure (i.e., if infrastructure requires upgrading and/or repair). Information was collected from various websites, including municipal/community websites, service provider websites (e.g., Hydro One), and federal and provincial sources (i.e., Government of Canada, and Government of Ontario).

Eabametoong First Nation has been experiencing a boil water advisory since 2001, and work is being carried out to upgrade the community's water treatment plant (ISC, 2021); however, there are concerns regarding the outdated wastewater treatment plant and the potential for the new plant to create sewage overflow (Bensadoun, 2019).

3.7 Transportation

Transportation and access to goods and services outside of communities is a key consideration for communities in Ontario's Far North. The only paved road in the Far North is Highway 599 (IBI Group & Hemson Consulting Ltd, 2016). For communities without all-season road access, remote airports running year-round connect communities to regional hubs to the south and other communities for services, and for the delivery of goods.

In addition, during the coldest weeks of winter with deep freeze conditions, communities use winter roads to connect them to all-season road networks and rail connections. The winter road season tends to be from mid-January to Spring thaw (Ontario Ministry of Northern Development, 2023). Hauling heavy bulk supplies is more cost-effective and critical for the communities to maintain supplies of fuel, water, housing materials, food and other goods (IBI Group & Hemson Consulting Ltd, 2016). Living in First Nation communities with no all-season roads has many implications including limited access and the high cost associated with travelling and shipping. the shortening of winter road seasons has been a matter of concern for Indigenous communities in Northern Ontario in recent years. More snow than usual and warm spells in the winter months disrupt transportation of goods and services over winter roads. Higher average temperatures expected to be the result of climate change have been observed to impact the viability of winter roads and have shortened the winter road season (CBC, 2023a, 2023b). With climate change, the duration of safe lake ice is also projected to decrease. A study has shown that a 1.5ºC (degree Celsius) increase in average temperatures due to climate change can lead to 90 % of current ice roads no longer being sustainable (Woolway et al, 2022).

For generations, Indigenous communities have relied on waterways in various ways including for travel to support community life. Waterways are recognized to be vital to the sustainability of communities.

This section describes the transportation options available using the following indicators:

- Road transportation;
- Air transportation; and
- Waterways.

DRAFT

Eabametoong First Nation uses NORT/Highway 808 which is an all-season road that runs north from Pickle Lake. The Webequie Winter Road Corridor is one of three winter road systems connecting communities from the NORT. The Webequie Winter Road Corridor connects four First Nation communities (Webequie First Nation, Nibinamik First Nation, Neskantaga First Nation and Eabametoong First Nation) (IBI Group & Hemson Consulting Ltd, 2016).

Eabametoong First Nation has flight access via Wasaya Airways Limited Partnership (LP) (Wasaya Airways Limited Partnership, 2023), which services 15 Indigenous communities.

3.7.1 Winter Road Traffic Volumes in the Local Study Area

Information is not currently available/section not complete.

3.7.2 Waterways in Eabametoong First Nation

Eabametoong First Nation traditional territories are within the secondary watersheds of Lower Albany River Watershed, Upper Albany River Watershed and Attawapiskat River (Government of Ontario, 2023). The Albany River runs throughout the Lower Albany River Watershed and the Upper Albany River Watershed and has a 135,000 km^2 drainage basin, which is used by Anishinaabemowin, Anishnaabe and Mushkegowuk communities for hunting and fishing (Kudelik, 2015).

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being to First Nation communities over the last 35 years, the Socio-Economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The Socio-Economic Baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key Socio-Economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four Socio-Economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that “well-being” means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people’s overall “well-being.”

DRAFT

The four Socio-Economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high-school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

Table 3-14: CWB Index Scores for Eabametoong First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	**58**	**40**	**69**	**54**	**71**
First Nations in Ontario	**59**	**38**	**72**	**53**	**70**
Eabametoong First Nation	44	15	69	42	52

Source: Indigenous Services Canada, 2019b.

Eabametoong First Nation CWB scores in education, income and housing average scores are lower compared to the average scores of both First Nations in Ontario and First Nations in Canada.

However, labour average score for Eabametoong First Nation (69) is on par with the average score for First Nations in Canada (69) and close to First Nations in Ontario (72).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments in Canada responsible for serving Indigenous communities (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-15 provides a generalized summary of the regional crime rates based on available information and as reported by the noted police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the Ontario Provincial Police (OPP). The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (OPP, 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within Northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-15: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total Crime, Rate, 2021*	Total Violent Crime Rate, 2021*	Total Sexual Assault, Rate, 2021*	Total Drug Violations, Rate, 2021*
Nishnawbe Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224

ECONOMIC ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

4. Economic Environment

4.1 Labour Force and Employment

First Nations people are under-represented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural piece in Indigenous communities who are very connected to the lands on which they live. This means there are specific guidelines for where economic activity can occur and how lands are used.

The traditional economy is another important cultural aspect within the communities. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities.

4.1.1 Labour Force Characteristics

Table 4-1 present the forecasted working age population in Eabametoong First Nation (Fort Hope 64) over the projection period: 2016, 2021, 2028, 2033, and 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada, 2017, 2022a). The values for 2028, 2023, and 2043 were forecasted based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64. Projected trends of working age population in Eabametoong First Nation are summarized as follows:

- The total working age population is decreasing over the projection period;
- The male working age population decreases by 93 between 2016 and 2043, a decline of approximately 32%;
- The female working age population decreases by 26 between 2016 and 2043 which is a growth of approximately 9%; and
- Based off current growth trends, the total working age population is forecasted to decrease by 123 between 2016 and 2043, a growth of approximately 21%.

Table 4-1: Projected Working Age Population in Eabametoong First Nation (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	585	100%	295	50.4%	290	49.6%
2021	560	100%	275	49.1%	285	50.9%
2028	527	100%	249	47.3%	278	52.8%
2033	504	100%	232	46.1%	273	54.2%
2043	462	100%	202	43.7%	264	57.1%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 4-2 present the breakdown of the population in the labour force and those not in the labour force for Eabametoong First Nation (Fort Hope 64) in 2021.

- The population participation in labour is equal at 50% within the labour force, and 50% not participating in the labour force;
- Within the individuals within the labour force, male and female participation rates are almost equal, with male participation rate at 50.8% with 150 individuals and female participation rate at 50% with 155 individuals; and
- Within the population not in the labour force, female participants is higher with 155 individuals (50%) than male participants with 145 individuals (49.2%).

Table 4-2: Labour Force Participation in in Eabametoong First Nation (2021)

Labour Force Participation	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
In the labour force	305	50.0%	150	50.8%	155	50.0%
Not in the labour force	305	50.0%	145	49.2%	155	50.0%

DRAFT

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the Land. The Knowledge passed on from the ancestors sustain Eabametoong Oji-Cree identity and way of life.

Table 4-4 present the highest level of western educational attainment for the population aged 15 years and over in private household in Eabametoong First Nation (Fort Hope 64) for 2021.

- The majority of the population aged 15 and over has no certificate, diploma, or degree at 76.9%;
- 65 residents in the community have obtained a post-secondary certificate, diploma, or degree which accounts for 10.7% of the population aged 15 and over. The female population has a higher rate of post-secondary qualification attainment at 12.7%, compared to 8.6% of the male population; and
- The second highest distribution of population are those is with a secondary school diploma or equivalent qualification at 12.4%, 40 of which are male (13.8%) and 35 are female (11.1%).

Table 4-4: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Eabametoong First Nation (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
No certificate, diploma or degree	465	76.9%	225	77.6%	240	76.2%
High (secondary) school diploma or equivalency certificate	75	12.4%	40	13.8%	35	11.1%
Post-secondary certificate, diploma or degree	65	10.7%	25	8.6%	40	12.7%
Total	**605**	**100%**	**290**	**100%**	**315**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 4-5 present the major fields of study for Eabametoong First Nation (Fort Hope 64)'s population aged 15 and over who had obtained a post-secondary education as of 2021.

- The most popular field of study pursued in Eabametoong First Nation is education and business, management and public administration with 15 graduates for each field of study. This accounts for 50% of certificates, degrees, or diplomas obtained, of which approximately 66.6% were female;
- The fields least studied include Humanities, Social and behavioural sciences and law, Physical and life sciences and technologies, Mathematics, computer and information sciences, Agriculture, natural resources and conservation, Visual and performing arts, and communications technologies and Other, with no graduates;
- The only fields of study pursued by females were Education, Health and related fields and Business, management and public administration, each with 10 completed certificates, diplomas, and degrees; and
- The only field of study pursued by males was Architecture, Engineering, and related trades with 100% of male graduates pursuing this field.

Table 4-5: Major Field of Study for the Population Aged 15 Years and Over in Private Households in Eabametoong First Nation (2021)

DRAFT

4.1.3 Labour Income

Table 4-6 present the total individual income by group for the population aged 15 and over for 2020 in Eabametoong by self-identified gender.

- The largest individual income group for males is under $10,000 (including loss) with a total of 90 individuals across Eabametoong in this category. This accounts for 23.7% of income earning males within Eabametoong;
- The largest individual income group for females is $10,000 to $19,999 with 85 individuals in this category. This accounts for 23.3% of income earning females within Eabametoong;
- In 2020, there were 15 more males than females with individual incomes;
- In 2020, 5.5% of females were making between $100,000 to $149,000, this is the highest reported income bracket; and;
- In 2020, 2.6% of males were making between $100,000 to $149,000, this is the highest reported income bracket.

Table 4-6: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Eabametoong (2020)

Income Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution

Table 4-7 present the total household income for private households in 2020 in Eabametoong.

- Four income level categories have the highest ratios; $35,000 to $39,999, $40,000 to $44,999; $50,000 to $59,999 and $80,000 to $89,999, with 20, 20, 25 and 20 households respectively (8.2%, 8.2%, 10.2% and 8.2%), which makes up 34.8% of the total households;
- Around 16.3% of the households have an income of $100,000 or over; and;
- Approximately 59.3% of households bring in under $60,000 while the remainder bring in over $60,000 (40.7%).

DRAFT

DRAFT

4.2 Overall Economy

4.2.1 Cost of Living

Fly-in communities such as Eabametoong First Nation generally experience lower economic productivity and higher cost of living due in part due to there not being an all-season road connection to the provincial highway system and ease of interacting with wider markets. There are projects and initiatives in the community that support economic development, although historically one factor that has challenged economic development is the road connectivity limitations. All-season road connection is therefore thought to potentially lead to better economic productivity and jobs overall, and lower food and gas prices and better accessibility (SNC-Lavalin, 2023).

Existing conditions of the overall economy in Eabametoong First Nation (Fort Hope 64) are described in this section using the following indicators:

- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends; and
- Traditional economy.

Data on Gross Domestic Product (GDP) for the Eabametoong First Nation is unavailable.

Due to the remoteness of Eabametoong First Nation and supply chain challenges (i.e., transporting goods into the community), the cost of living can be substantially higher in comparison to urban areas. In general, the community is far from urban centres, which creates transportation challenges for both goods and services coming into the community as well as residents leaving the community for goods and services.

Practicing traditional culture is an important element of life in Indigenous communities, with members being very connected to the lands on which they live.

The traditional economy is another important cultural aspect within the community. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the community.

A significant portion of the economic development activities occurring are focused on business development, access to services, advisory services, and employment counselling.

Table 4-8 presents the number of people considered to be low-income living in Eabametoong First Nation in 2021. Individuals are considered low-income based on the low-income measures (LIM). The LIM is a relative measure of low-income and considers individuals to be low-income if their income is less than 50% of the median income level.

- The largest age group living in low-income according to the LIM across Eabametoong are people aged 0 to 17 years (50.5%) followed closely by people aged 18 to 64 years (46.2%);
- Approximately 3.2% of the population in low-income are 65 years and over; and
- Approximately even distribution is observed between the male and female low-income populations aged 0 to 17 years and aged 18 to 64 years.

Table 4-8: Population in Low-Income Based on the LIM After Tax for Eabametoong First Nation (2021)

Age Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
0 to 17 years	235	50.5%	135	55.1%	100	46.5%
18 to 64 years	215	46.2%	105	42.9%	105	48.8%
65 years and over	15	3.2%	5	2.0%	10	4.7%
Total	**465**	**100%**	**245**	**100%**	**215**	**100%**

Source: Statistics Canada, 2022a.

In the Nishnawbe Aski Nation 2020-2021 Annual Report it is stated that many families in remote, semi-remote and isolated First Nations face acute hardship due to the extremely high cost of living, including: food, housing, fuel, and basic expenses (Nishnawbe Aski Nation, 2022). Nishnawbe Aski Nation community members often need to travel to larger urban centres to access medical and mental health care services and other specialist services and may end up having to stay in urban centres longer than planned (Nishnawbe Aski Nation, 2022).

4.2.2 Economic Development

4.2.2.1 Nishnawbe Aski Nation

The Nishnawbe Aski Nation is the governing body of all Indigenous communities with the exception of Fort Albany First Nation, Kashechewan First Nation and Kitchenuhmaykoosib Inninuwug First Nation. Resource development (i.e., mining and forestry), small business, and employment and training all fall under the economic development portfolio at Nishnawbe Aski Nation.

DRAFT

Due to the COVID-19 pandemic, the primary focus of the Nishnawbe Aski Nation during the 2020-2021 fiscal year was to verify that public health was at the forefront of any work or advances undertaken at the community level. The economic development portfolio also included food security/food self-determination. As the COVID 19 pandemic progressed, monitoring food security throughout Nishnawbe Aski Nation territory became critical, as did intervening and assisting communities directly when issues arose.

Resources and services offered by Nishnawbe Aski Nation include the Nishnawbe Aski Development Fund which operates as a Client Services office which provides business and economic development services to First Nations communities and majority-owned Aboriginal businesses in northern Ontario. The following services are offered (211 Ontario, 2021a):

- Appraisal Services;
- Bookkeeping Training;
- Business Support Services;
- Community Planning;
- Due Diligence Services;
- Financing (Loans and Grants); and
- Workshops.

4.2.2.2 Matawa First Nations Management

The Matawa First Nations Management offers economic development services to member First Nations within Matawa Territory. Included within the Matawa Territory is Eabametoong First Nation, Marten Falls First Nation, Neskantaga First Nation, Nibinamik First Nation, and Webequie First Nation.

The services provided include (211 Ontario North, 2023a):

- Provides technical and professional advisory services and training to enhance the overall economic opportunities and management skills of the Matawa Area First Nations;
- Promotes and supports sustainable development that will build each community's economic strength;
- Assists in identifying and securing funding opportunities and other resources for community economic development;
- Advises and assists in the creation of employment opportunities for community members;
- Works to develop factors such as diversified employment, skilled workforce, competitiveness, investment and industry; and
- Works to improve the relationship between Indigenous and non-Indigenous businesspeople.

4.2.3 Traditional Economy

A traditional economy is a system that relies on customs, history, and time-honored believes. Tradition guides economic decisions such as production and distribution. Communities with traditional economies depend on agriculture, fishing, hunting, gathering, or some combination of them (Amadeo, 2022). This section outlines the traditional economy within Eabametoong First Nation to identify community concerns with the Project, specifically how they view the Project will affect the traditional economy.

The traditional economy is an important cultural aspect within the community. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within.

Traditional economic activity is typically not captured by commonly used data sources, so it is difficult to provide a complete picture of the traditional economy labour market in Eabametoong First Nation.

Note: The Project Team is working with communities that are providing information, including the traditional economy of their community. This information will be incorporated as it becomes available.

DRAFT

4.3 Business Environment

4.3.1 Local Economy

A high-level description of the local economy of other Local Study Area (LSA) Indigenous communities is presented below, based on data available that describes occupations and industry spending using an industry database for statistical information, Lightcast.[1]

The industries with the largest job presence within the other LSA Indigenous communities in 2022 include - public administration, health care and social assistance and educational services The industries with the highest growth in jobs between 2018 and 2022 include retail trade (32%), public administration (28%), and health care and social assistance (25%).

Out of approximately $101 million in spending across all industries in the other LSA Indigenous communities in 2020, the percentage of in-region purchases across all industries is low. This amounted to under $4 million of purchases which represents 3.9% of total purchases in 2020. The majority of demand for goods and services within the LSA Indigenous communities is met by imports (92.3%).

4.3.2 Mining, Aggregate and Forestry Activities

Eabametoong First Nation is one of 10 northern First Nations who launched a lawsuit against the Ontario and federal government in April 2023 (McIntosh, 2023). They have requested that the Canadian government be barred from making any decisions about how land could be used in the Ring of Fire for mining and other purposes without Indigenous consent. The lawsuit centres on Treaty No. 9 and the contrast between the verbal and written promises of Treaty No. 9 as recorded (McIntosh, 2023).

DRAFT

[1] Lightcast products provide detailed information about occupations, skills in demand, and career pathways, providing labor market insight to employers, educational institutions, and government agencies.

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to achieving Mino Bimaadziwin (The Good Life). Mino Bimaadziwin is a cultural value that includes spiritual, physical, mental and emotional well-being which may be tied to a reciprocal relationship with Aki (the Land).

The Anishinaabe way of life includes fishing, trapping, hunting, harvesting and stewardship of Aki while keeping in mind the respectful value of sustainability. The types of practices are well known generally; however, specific sites and areas of use require in-depth information from communities participating in the information gathering.

Eabametoong First Nation, previously known as Fort Hope First Nation, is located on the shores of Eabamet Lake along the Albany River System. The Albany River acts as an east-west highway that allows Eabametoong First Nation members to travel and carry on their traditional customs and harvesting by hunting, fishing and trapping and gathering (Teach for Canada, 2017b).

The Eabametoong First Nation have outlined that water and fishing are important to their traditional way of life, food security and cultural continuity (The Firelight Group, 2017). Moose are an important species that the Eabametoong First Nation use for food and cultural purposes. Other animals that they hunt, and trap include beavers, marten, mink, grouse duck, wolves, bear and partridge (Stantec, 2017). The Eabametoong First Nation traditionally process moose and other game to use in clothing, crafts, and tanning. Eabametoong First Nation within the region and identified Kenogamisis Lake as an important fishing location (Stantec, 2017). Fish species harvested by Eabametoong First Nation include Northern Pikeminnow, pickerel/walleye and whitefish (Stantec, 2017).

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas in their Community-Based Land Use Plans (CBLUPs), which outline the locations and history of these areas, and the cultural and spiritual importance to their community. Although some of these areas may not currently be used for traditional practices, the sites may still hold cultural and historic importance.

Eabamet Lake has been occupied by Eabametoong First Nation people for generations, predating colonial contact and the fur trade. The lake is an important cultural and historical site to the Eabametoong First Nation (The Firelight Group, 2017).

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinabe/Mushkeego Peoples. “The Anishiniimowin/Anishinabe/Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022). The Anishiniimowin/Anishinabe/Mushkeego Peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define ongoing rights and obligations on all sides. These agreements set out continuing Treaty Rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations;
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013).*

Treaty No. 9 was signed between the Anishiniimowin/Anishinabe/Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the Public Lands Act.

Traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to CBLUPs initiated by Indigenous communities.

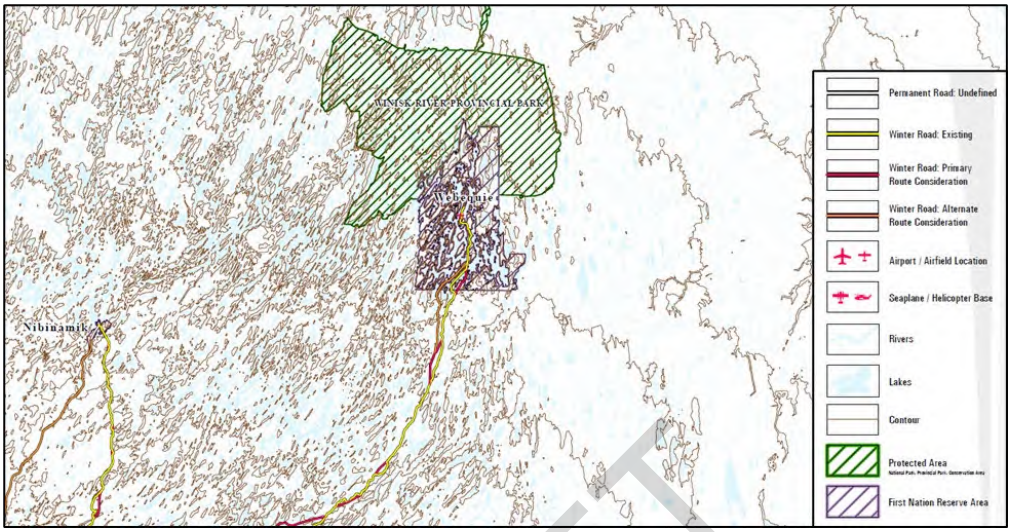
6.5 Road/Transportation Studies

6.5.1 Winter Road Re-Alignment Study (2008)

On behalf of five First Nations (Marten Falls, Eabametoong, Neskantaga, Nibinamik and Webequie), the Matawa First Nations Tribal Council conducted a study in 2008 to examine the realignment of selected sections of winter roads (Neegan Burside, 2008) as shown in Figure 6-1. The study included extensive consultation with the First Nations, regulatory agencies and stakeholders (e.g., forestry companies and outfitters). It identified several alternative re-alignments and design alterations (e.g., improvement to road design and construction standards) to address deficiencies in the winter road system.

DRAFT

Figure 6-1: Matawa Winter Road Re-Alignment Study



Source: Neegan Burnside Ltd., 2008

6.5.2 All-Season Community Road Study (2016)

Eabametoong First Nation, Webequie First Nation, Neskantaga First Nation, Nibinamik First Nation, completed the All-Season Community Road Study (ASCRS) in June 2016 (Webequie Supply Road, 2020) in partnership. The purpose of this study was to examine options for interconnecting these Indigenous communities to the provincial highway system, with the goal of providing community social and economic benefits. Many alternatives were examined, including those previously preferred by Noront Resources, Cliffs and KWG Resources (Webequie Supply Road, 2020).

From the community engagement and assessment completed, a preferred corridor was identified with a general east-west orientation that connected the four communities to the provincial highway system at Pickle Lake as shown on Figure 6-2. The preferred corridor/road from the 2016 ASCRS did not connect to the McFaulds Lake area due to unresolved issues and concerns expressed by some participating First Nations about mining development in the Ring of Fire area (Webequie Supply Road, 2020).

DRAFT

Figure 6-2: All-Season Community Road Study - Preferred Alternative

6.6 Provincial Plans and Polices

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations communities and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

Section 1 of the *Far North Act* outlines:

The purpose of this Act is to provide for community-based land use planning in the Far North that:

a. Sets out a joint planning process between the First Nations and Ontario[2];

b. Supports the environmental, social and economic objectives for land use planning for the peoples of Ontario that are set out in Section 5; and

c. Is done in a manner that is consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult. 2010, c. 18, s. 1.

The Far North is defined in the Act as:

a. The portion of Ontario that lies north of the land consisting of:

   i. Woodland Caribou Provincial Park;

   ii. The following management units designated under Section 7 of the *Crown Forest Sustainability Act, 1994* as of May 1, 2009: Red Lake Forest, Trout Lake Forest, Lac Seul Forest and Caribou Forest;

   iii. Wabakimi Provincial Park; and

   iv. The following management units designated under Section 7 of the *Crown Forest Sustainability Act*, 1994 as of May 1, 2009: Ogoki Forest, Kenogami Forest, Hearst Forest, Gordon Cosens Forest and Cochrane-Moose River; or

b. The area, if any, that is set out in the regulations made under this Act and that describes the area described in clause (a) more specifically; (“Grand Nord”).

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario’s *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The province must approve CBLUPs.

[2] Community-based land use plans require provincial approval.

DRAFT

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with Indigenous communities and groups, among other land uses, the potential for permissible use of lands for forestry in First Nation's areas of interest. ToRs for CBLUPs Terms of Reference have noted in the objectives that plans would include consideration of the following (Eabametoong and Mishkeegogamang First Nations, 2013):

- Traditional and Customary Use;
- Conservation and Protection;
- Forest Management (commercial forestry);
- Forest Management (non-timber forest products);
- Tourism (and Eco-Tourism);
- Geoscience and the Mineral Sector (exploration and mining);
- Recreation;
- Water Conservation and Protection;
- Renewable Energy;
- Access and Infrastructure;
- Climate Change; and
- Fire Management.

6.6.2 Northern Ontario Transportation Plan

The draft Northern Ontario Transportation Plan, 2020 was developed to serve as a guide to help build a modern and sustainable transportation system for people in Northern Ontario. It contains actions that will connect communities, provide safer and more reliable travel and unlock economic potential in the region. Goal 6 of this Plan outlines reliable travel options for remote and Far North communities. This plan is a living document and will be updated with actions to reflect the evolving needs of the region.

The Project is aligned with the objectives of this Plan and will support the goal of achieving sustainable development for Northern Ontario.

6.6.3 Fisheries Management Plan

The Fisheries Management Plan as administered by Ministry of Natural Resources and Forestry (MNRF) is designed to highlight and protect the value of the diversity of lakes and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake in a holistic manner and includes a range of management options to secure a healthy lake environment that conserves the diversity of the fish community and provide opportunities to contribute to the social and economic well-being of the surrounding area. Each specific zone outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h).

6.7 Land Use Plans and Policies

A number of remote fly-in and winter road access First Nation communities, have been (or are currently) undertaking community land use planning, which considers the remote nature of these communities. Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the Socio-Economic Baseline for the Project.

DRAFT

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses on the land.

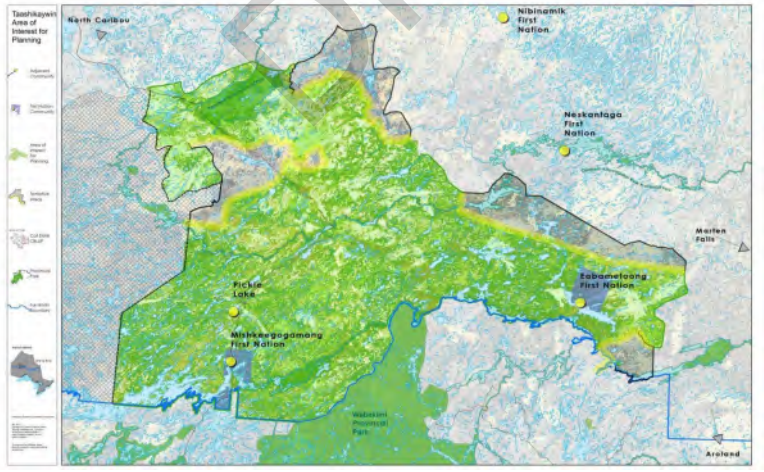
The following section provides information on the Eabametoong First Nation CBLUP. The Terms of Reference (ToR) for the Eabametoong and Mishkeegogamang First Nations' CBLUP was signed in July 2013 (Eabametoong and Mishkeegogamang First Nations, 2013). The ToR is intended to guide the CBLUP which outline the community's values and objectives for land use planning. Eabametoong and Mishkeegogamang have identified an Area of Interest for Planning [AIP]) that encompasses an area of 2,487,752 ha, as shown on Figure below. This AIP is defined by Eabametoong First Nation and Mishkeegogamang First Nation. This is the traditional land use area that is bordered primarily by the Albany River on the south and approximately along the height of land of the Attawapiskat watershed on the north. This area is southwest of the project footprint for WSR. Traditional harvest areas have been used to help define the boundaries of the planning area, with respect for neighbouring First Nations.

The ToR outlines that the CBLUP will address the following land uses:

- Traditional and customary land use;
- Conservation and protection of land;
- Forest management;
- Tourism;
- Mineral sector;
- Recreation;
- Water conservation;
- Renewable energy;
- Access and infrastructure;
- Climate change; and
- Fire management.

Eabametoong First Nation and Mishkeegogamang First Nation describe their traditional use territory as Tassshikaywin, which means "our places on the Earth and in nature's realm" (Eabametoong and Mishkeegogamang First Nations, 2013), and was used in the CBLUP planning initiative.

Figure 6-3: Eabametoong First Nation and Mishkeegogamang First Nation Taashikaywin AIP



Source: Eabametoong and Mishkeegogamang First Nations, 2013.

6.8 Industrial Land Use

The economy of Northern Ontario relies heavily on resource extraction, with the mining, aggregate and forestry industries significant factors in land use planning in the region. The Ring of Fire, a significant mineral development region has long term potential to contribute to the Ontario economy (Ministry of Mines, 2022). These contributions include creating more jobs, generating revenue, building infrastructure, and bringing prosperity to communities to the north, including First Nation communities. Minerals found in the Ring of Fire to-date include chromite, copper, zinc, gold, diamond, nickel and platinum group elements (Ministry of Mines, 2022).

In April 2023, leaders from 10 Treaty No. 9 First Nations from announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including, trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino-Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, this is done online through the Mining Lands Administrative System (MLAS). Applicants are required to create a MLAS user account, which allows them to view active unpatented mining claims, register new mining claims, manage user mining claims, and buy or renew a prospector's license. Non-registered users are only able to use the MLAS map viewer to view active unpatented mining claims.

DRAFT

Under Section 50 of the *Mining Act*, a Mining Claim provides exclusive rights for the claim holder to explore for minerals and rights to enter, use and occupy surface rights as necessary for exploration and development. A mining claim does not provide mining rights for the land to the holder of the claim. Someone that holds a prospector license may stake out a mining claim on land that is open for staking and prospect for minerals on any Crown land, including land traditionally used by Indigenous Peoples and communities (Natural Resources Canada, 2013).

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous Peoples and communities and provide Socio-Economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council. Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the Aggregate Resources Act. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Eabametoong First Nation.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities'. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for a millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct Gross Domestic Product (GDP), among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is an important aspect as it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

DRAFT

Recreational activities in the Indigenous communities involve community-based sports and activities organized by the community administration or other groups such as schools. Recreation facilities typically include baseball diamonds, gym/community centres, hockey arenas, playgrounds, playing fields and other facilities. Youth and community events are hosted by communities.

Eabametoong First Nation includes the Joseph Jacob Mate Memorial Arena for sport and community events. Eabametoong First Nation is participating in the Community Aboriginal Recreation Activator Program which includes funding to hire an activator to create a recreation plan to meet the needs in their community and enhance community participation in sport and recreation (Ministry of Tourism Culture and Sport, 2022). Also Eabametoong Inn and Restaurant offers accommodation for tourists.

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Eabametoong First Nation (Fort Hope) Reserve.

Southwest of the Webequie Reserve, approximately 24 km from WSR, is the Otoskwin/Attawapiskat River Provincial Park. The park is approximately 82,529 ha in size, most of the area is water. The park is located within the traditional territories of Neskantaga, Marten Falls, Eabametoong, Mishkeegogamang and Attawapiskat First Nations. The area features several historical sites with significance to Indigenous communities dating back to 3,000 BC. The Otoskwin-Attawapiskat River Provincial Park Management Plan specifics the objectives to provide opportunities for recreational uses that are compatible with the area's remote nature (Ontario Parks, 2002). A preliminary survey of the archaeological resources of the Attawapiskat Lake area has identified over 30 sites and First Nations have placed a high priority on the protection of cultural sites (Ontario Parks, 2002). This park does not feature facilities for visitors but activities such as white-water paddling, canoe and kayaking, back country camping, fishing, hunting and snowmobiling are supported within the park (Ontario Parks, 2023b).

- Albany River Provincial Park

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Eabametoong First Nation members and other communities. Eabametoong First Nation members have cabins and camps which they use for harvesting and hunting within their traditional territory.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Eabametoong First Nation (Fort Hope) Reserve.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or Eabametoong First Nation (Fort Hope) Reserve.

Re: Preliminary draft Eabametoong First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for Eabametoong First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;
- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;

- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for Eabametoong First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

Chief Soloman Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON
P0T 1L0

Dear Chief Atlookan,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status is delayed and is currently in transit to your community.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet

with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions

Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead

Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

P.O. Box 298
Eabamet Lake, ON
P0T 1L0

Dear Chief Atlookan,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 28, 2024, the package status indicates it has been delayed and is currently in transit to your community.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: How We Use Your IK in the EA.**

The livestreaming event is scheduled for **March 4th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.

Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

March 27, 2024

Chief Soloman Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON
P0T 1L0

Dear Chief Atlookan,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 27, 2024, the package status indicates it has been delayed and is currently in transit to your community.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Aquatic Habitat Preliminary Findings.**

The livestreaming event is scheduled for **April 1st, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

1

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

April 30, 2024

Dear Chief Atlookan,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 13th from 11:00-11:45am EST** for Eabametoong First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/86053998412?pwd=KcOyFAiM5fl5RPcDS6gbgcaQBBrDJA.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 860 5399 8412 **Passcode**: 393612

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

June 11, 2024

Dear Chief Atlookan,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 24th from 11:00-11:45am EST** for Eabametoong First Nation, where there will be a second presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/83073075880?pwd=30OHaVeUbgBbuUYPlrdrMAXM1J4VwO.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 830 7307 5880 **Passcode:** 534326

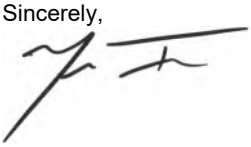
In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

Sasha McLeod and Dorothy Moszynski, Special Project Officers, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

December 16, 2024

Chief Solomon Atlookan
Eabametoong First Nation
P.O. Box 298
Eabamet Lake, ON
P0T 1L0

Dear Chief Atlookan,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package was delivered to the above mailing address on November 18, 2024.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3 or would like to request the digital files via file transfer service, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or

	any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Webequie Supply Road

c.c. Heather Swan, Deputy Project Manager, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Inc (formerly SNC-Lavalin Inc)

January 10, 2025

Dear Chief Atlookan,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, January 20th from 11:00-11:45 AM EST for Eabametoong First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87260745751

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

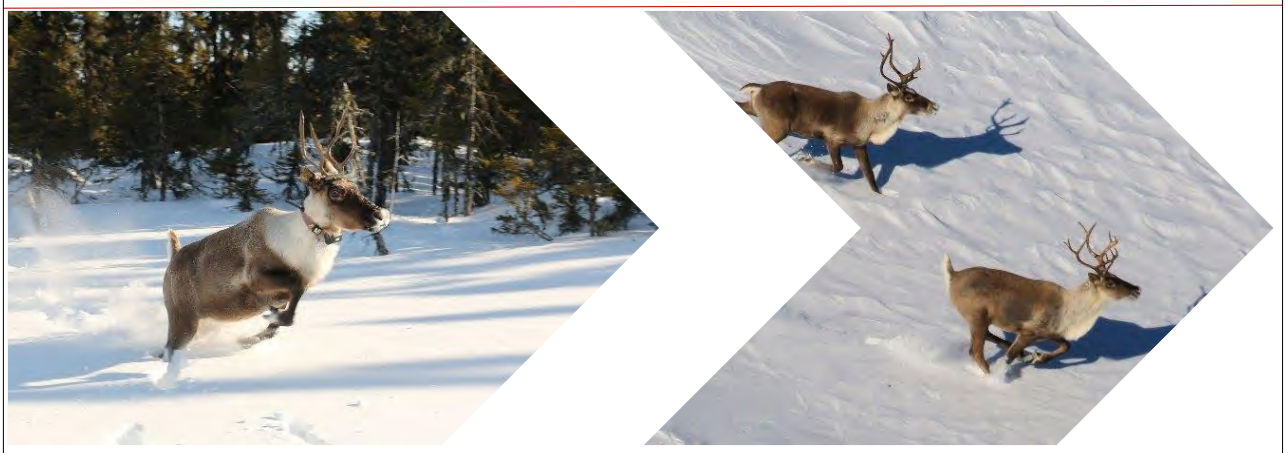
Craig Wallace, Project Manager, AtkinsRéalis

FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

Comments and Feedback Received during Second Aboriginal and/or Treaty Rights and Interest Forum 2023: Eabametoong First Nation

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
1	Eabametoong First Nation indicated that they were not included in engagement for Webequie First Nation's community-based land use planning process. Webequie only engaged with communities closer to Webequie First Nation (Marten Falls First Nation, Kasabonika First Nation, Nibinamik First Nation and Neskantaga First Nation).	The proponent acknowledged this comment and added that Eabametoong First Nation is included in the local study area for the Aboriginal and Treaty Rights and Interests (ATRI) assessment for the Webequie Supply Road project.	Thank you for sharing this information. The proponent acknowledges that Eabametoong First Nation is included in the ATRI assessment for the Webequie Supply Road Project.
2	Eabametoong First Nation indicated that there is a traditional route to Marten Falls First Nation from Eabametoong First Nation along the Wabasso River.	The comment was acknowledged.	Thank you for sharing this information. This information will be considered as part of the baseline studies.
3	Eabametoong First Nation indicated that before COVID, there were discussions with Marten Falls First Nation about land use planning. The goal was to set up a group with the 5 remote Matawa First Nations to focus on jurisdiction issues, well-being and a regional assessment. The First Nation communities were unable to come together and disagreements over issues like traplines occurred. There has been no long-range planning for Eabametoong First Nation.	The comment was acknowledged. The Webequie First Nation representative outlined that the Regional Framework Agreement did present some challenges amongst the First Nations.	Thank you for sharing this information. The proponent acknowledges the relationships exist between Eabametoong First Nation, Webequie First Nation and Marten Falls First Nation and will work collaboratively with the identified Indigenous communities.
4	The proponent asked Eabametoong First Nation if a collaborative approach between the five First	Eabametoong First Nation noted that First Nation communities are interconnected with similar issues.	Thank you for sharing this information.

1

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	Nations would lead to greater well-being for the communities?		
5	Eabametoong First Nation has had issues with addiction and job postings that lack applicants. The overall well-being of the Eabametoong First Nation community is not being met.	The comment was acknowledged.	Thank you for sharing this information. The Environmental Assessment/ Impact Assessment (EA/IA) aims to capture the existing conditions of communities including observations about the health and well-being of communities.
6	Eabametoong First Nation stated that everyone was united at one time	The comment was acknowledged.	Thank you for sharing this information.
7	Eabametoong First Nation asked when the estimated start of construction is for Northern Road Link (NRL), Webequie Supply Road and Marten Falls Community Access Road (MFCAR).	The proponent responded that construction of the Webequie Supply Road would begin in approximately 4 years; in 3 years for MFCAR; and in 6 years for NRL. These are approximate timelines that could change as the EA/IA and design processes progress.	The proponent will continue to share information regarding the Webequie Supply Road with the community and the timeline as designs are finalized.
8	Eabametoong First Nation outlined that two Elder group sessions were held in Eabametoong First Nation. The Webequie Supply Road was discussed. There are Eabametoong First Nation Elders who are in favour of the road, and others who are concerned about the potential for negative impacts (e.g. drugs coming into the community (this is already happening), disturbance of traditional medicinal plants and the protection of child safety).	The comment was acknowledged.	Thank you for this information.
9	Eabametoong First Nation indicated that community members may not know where to hunt outside of their territory, but as long as respect is	The comment was acknowledged.	Thank you for sharing this information.

#	Comment/ Issue by Indigenous Community or Proponent	Project Response at Meeting	Post Forum Response
	shown to the family whose territory they are on, this is what was taught.		
10	Eabametoong First Nation noted that they used to have an advisor, who worked with the Chief and Council - Andy Yesno. Andy had all the local knowledge of the river system, but he passed away around 1.5 years ago.	The comment was acknowledged.	Thank you for sharing this information.
11	Eabametoong First Nation noted that they would be willing to broadcast radio programming provided by the proponent on community radio.	The comment was acknowledged.	Thank you for this information. The proponent will follow up on engagement options to share project information.
12	Eabametoong First Nation members have been experiencing the loss of Elders and community members lately, and there is a lot of grief within the community.	The comment was acknowledged.	Thank you for sharing this information.

Re: Summary of Aboriginal and/or Treaty Rights and Interest Forum, November 2023
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan,

We hope that this finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the draft Environmental Assessment / Impact Statement Report for early circulation with communities.

As a part of the Project's consultation and engagement, the Aboriginal and/or Treaty Rights and Interest forum took place on November 21 to 23 2023 at the Valhalla Inn in Thunder Bay and was a joint event between the Webequie Supply Road, Marten Falls Community Access Road and Northern Road Links projects. The Forum was an important opportunity to meet face to face, connect on how we can work together, better understand the roles we all play in assessing potential impacts on Aboriginal and/or Treaty Rights and Interests.

For your review and comment, please find attached a summary of comments your community provided in the individual Project-specific Breakout Sessions. The input provided by your community is being integrated into EA/IA process, and the Project Team will seek further feedback from your community at future EA/IA milestones.

The Project Team values your feedback and is always open to collaborating with you.

Sincerely,

Michael Fox
Webequie Supply Road

February 18, 2025

Dear Chief and Council,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, March 3rd from 11:00-11:45 AM EST for Eabametoong First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/85080830952?pwd=rzlJK7C1XYcRxKojz9asaoY70WkQmB.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Atlookan,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

APPENDIX P2.I.6

Correspondence with Indigenous Communities and Groups – Fort Albany First Nation

Webequie Supply Road Project Consultation Log

Records Found: 1

Fort Albany First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Fort Albany First Nation's (FAFN) Chief Robert Nakogee, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if FAFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Fort Albany First Nation's (FAFN) Chief Robert Nakogee, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether FAFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked FAFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if FAFN has any questions.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program and Socio-Economic Primary Data Collection Program
Michael Fox, Brianna Patrick, and Marian Tibor-McMahon of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team had a virtual meeting via Zoom with Sarah Beamish, lawyer for Fort Albany First Nation (FAFN) and Maxwell Hill, Sarah's associate, regarding the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and Socio-Economic Primary Data Collection Program and the corresponding letters that were sent to FAFN with information about the two programs. FAFN through Sarah wanted additional clarification about the two programs and information in the letters. Sarah's questions and concerns regarding to the socio-economic primary data collection program were related to: (1) secondary sources used, (2) funding concerns, (3) how data collection is done, (4) socio-economic survey questions, and (5) translation of surveys. Sarah's questions and concerns regarding to the IKLRU program were related to: (1) working with Firelight Group to get information to the Project Team, (2) funding concerns, (3) what kind of participation is required from First Nations, (4) providing a schedule of all planned WSR programs, (5) difference between consultation program and IKLRU program, (6) study areas for the IKLRU program, (7) IKLRU program phases, (8) draft report of the IKLRU program, (9) cohesiveness of WSR programs and meetings, (10) sending feedback on draft sharing agreement. The WSR Project Team provided answers to all of Sarah's questions, and indicated they would consider the concerns raised by Sarah and FAFN.

Topics to be Discussed: Virtual Information Session
Don Parkinson and Craig Wallace of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Fort Albany First Nation (FAFN) on May 2, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Craig and Don discussed several questions that had been previously asked by FAFN. These questions were regarding potential impacts to the James Bay lowlands, muskeg areas, water quality, and peatlands. The WSR Project Team had a platform which provided real time translation of the session in Cree to accommodate community members. There were no community members in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: FAFN Indigenous Knowledge Sharing Agreements
Sarah Beamish of Beamish Law, lawyer for Fort Albany First Nation (FAFN) sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team asking who the contact person is for the WSR and Northern Road Link (NRL) Project regarding the development of the Indigenous Knowledge Sharing Agreements (IKSA) with FAFN for the two projects. Sarah indicated that FAFN negotiated an IKSA with the Marten Falls Community Access Road team and suggested a similar draft be adapted and used as a starting point for WSR and NRL. Sarah indicated that she is also open to review any templates that the teams have used previously as well. Sarah thanked Michael in advance for connecting her with the right people to continue the discussion.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Fort Albany First Nation (FAFN)'s Chief Elizabeth Kataquapit, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of FAFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

13:41

The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of Alternatives Routing in the Preferred Corridor, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if FAFN has any questions or comments.

The email also included the English WSR Newsletter - Issue 20 which provided information about Consultation Round 2 Topics, the Socio-Economic Primary Data Collection Program, the Indigenous Knowledge and Land Resource Use Program, and the livestream and radio schedule for March 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if FAFN has any questions or comments.

16:30
Michael Fox and McKenna Baxter of ICE sent another email to the Chief with an updated letter that had the correct date.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 Part 1 for Fort Albany First Nation (FAFN) on March 27, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included a testimony by the Webequie First Nation Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don mentioned concerns that had been previously raised by FAFN. These concerns were regarding the cumulative effects of multiple project sand Aboriginal treaty rights and land use. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

Topics to be Discussed: Record of Consultation
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team responded to the email sent by Sarah Beamish of Beamish Law, lawyer for Fort Albany First Nation (FAFN) on March 6, 2023. The email contained an electronic copy of the Record of Consultation. Michael indicated that the WSR Project Team would like to meet with FAFN to discuss the Consultation Progress Report and the current Socio-Economic Survey. Michael requested available meeting times for a video call.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Fort Albany First Nation (FAFN)'s Chief Elizabeth Kataquapit as a follow up to the email sent on March 17, 2023 regarding the invitation to participate in the Socio-Economic Primary Data Collection Program as part of the Environmental Assessment / Impact Assessment. Heather asked the Chief if they had any questions regarding the original email and letter and indicated that the WSR Project team would like to hear back by April 17, 2023 as to FAFN's interest in participating in the program. The letter detailed the purpose of the socio-economic study, the type of information that the WSR Project team is seeking, the study area, how information will be collected, schedule, and next steps. Heather requested the Chief to let the WSR Project team know if they prefer a call to discuss the request in the letter.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent a fax to Fort Albany First Nation (FAFN)'s Chief Elizabeth Kataquapit which included a letter, and poster advising that the WSR Project Team would like to correct the time of the radio show and livestream event provided in the previous correspondence from May 17, 2023. The letter advised that the WSR Project Team is hosting a Wawatay radio session from 6:00pm-7:00pm EST and livestream from 7:30pm-8:00pm EST on May 24, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads), along with a question-and-answer period. The letter attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. Michael apologized on behalf of the WSR Project team for any confusion and provided his email and cell phone contact information if FAFN has any questions or comments.

Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Fort Albany First Nation (FAFN)'s Chief Elizabeth Kataquapit which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on June 6, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if FAFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Elizabeth Kataquapit of Fort Albany First Nation (FAFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding FAFN's participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted that the community has an active funding agreement with the Province of Ontario to participate in the IKLRU program for the WSR Project, and that the community has initiated a community-led IKLRU study for the WSR Project. The letter explained that the Project team is writing to confirm the planning timelines for the Environmental Assessment / Impact Assessment process, with the goal to finalize the baseline conditions report. The letter requested the community to let the Project team know what they are planning for the program by the end of June 2023 and indicated that the Project team would like to receive the IKLRU studies by the end of September 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Fort Albany First Nation (FAFN) on June 12, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 2 of Consultation Round 2 will discuss the Project team's work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from FAFN were in attendance. Don reiterated that the Project Team would like to hear from FAFN community members in-person and that a recording of the session would be available through YouTube and the WSR Website.

Topics to be Discussed: Engagement Options, Virtual Information Sessions 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Fort Albany First Nation (FAFN)'s Chief Elizabeth Kataquapit which included a letter that offered various community engagement options to help create awareness of the Project. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if FAFN has any questions or comments.

Topics to be Discussed: Request for list of baseline studies for WSR and NRL
Sarah Beamish of Beamish Law, representing Fort Albany First Nation (FAFN), sent an email to Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team and Qasim Saddique of Suslop and the Northern Road Link (NRL) Project team indicating that one of FAFN's staff has requested a master list of all the baseline studies done or planned to be done, including the study schedule, on the WSR and the NRL Projects. Sarah asked Michael to point her to where to find the lists or if the team could provide them.

12:48
Qasim responded to Sarah on behalf of the NRL Project copying an NRL project team member, Ariane Heisey of Suslop, to assist Sarah in the request. Qasim indicated that they should have the information to Sarah by the following week and that Michael would provide a separate response for the WSR Project.

Topics to be Discussed: Aboriginal and/or Treaty Rights and Interests Forum #2
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Aboriginal and/or Treaty Rights and Interests Forum held at the Valhalla Inn in Thunder Bay on November 21-23, 2023.

The purpose of the Forum was to create a respectful, culturally-sensitive, and collaborative space to develop and/or confirm understanding of the Project areas (WSR, MFCAR, and NRL) as communities Aboriginal and / or Treaty Rights and Interests (ATRI) may be impacted by these Projects. The purpose of this event was to discuss ATRI and not to collect Indigenous Knowledge. Day 3 of the Forum was set aside for a half-day discussion on Cumulative Effects as they relate to the Projects. Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the Province of Ontario.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Fort Albany First Nation’s (FAFN) Chief Elizabeth Kataquapit which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if FAFN has any questions or comments.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on April 1, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Aquatic Habitat Preliminary Findings, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if FAFN has any questions or comments.

The fax also included the English WSR Newsletter – Issue 32 which provided information about the topics for consultation round 3, road foundation design, and radio shows and livestream schedule for April 2024. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael and Don Parkinson of AtkinsRéalis provided their email address and phone number if FAFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Fort Albany First Nation (FAFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 1 presentation that began with a review of the project to date, followed by a discussion of preliminary results for two valued components: surface water and fish and fish habitat. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from FAFN were in attendance.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Elizabeth Kataquapit of Fort Albany First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Contact Date: Jun 11, 2024 09:00 Method: Open House
Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Superior Inn and Conference Centre in Thunder Bay on June 11-13, 2024.

The purpose of the Gathering was to create a respectful, and collaborative space for consultation to continue to build an understanding of the three road projects and their potential impacts by: 1) Providing a comfortable space for Elders to gather and discuss the Projects; 2) Creating opportunities to engage directly with the Project proponents and consulting teams sharing information about the Projects and; 3) Discussing the upcoming draft Environmental Assessment Report / Impact Statement (EAR/IS) Review Process for WSR and the Marten Falls Community Access Road (MFCAR) Project.

Day 1 was set aside exclusively as an Elders Gathering to gather and engage with the individual Project Teams for all three projects to share their perspectives. By design, there were no government representatives in attendance on Day 1; only Indigenous people and Indigenous consultants, to encourage a more open and comfortable discussion. This was a new and innovative approach to engaging with Indigenous communities by the creation of a sacred space that was authentic, comfortable and open.

Day 2 was open to all participants. The morning focused on a series of technical presentations on key issues identified in previous engagement and consultation opportunities (peatlands (and other terrain), building roads on peatlands, aspects of water and fish populations). The afternoon was an Expo where participants could visit a series of booths to have one-on-one conversations with Project Team members from each of the road projects, various technical aspects of the Projects, Ontario and the Impact Assessment Agency of Canada.

Day 3 was also open to all participants. This session was a half day workshop on a common approach to reviewing the upcoming circulation of draft EAR/ISs for two of the three road projects so that there would be sufficient time to review and provide feedback. Each project team wanted to share the common approach to reviewing the draft EAR/ISs with Indigenous Nations early so that there was a shared understanding of what to expect and when. This would allow Indigenous communities to prepare themselves in advance with respect to resources to assist in the review.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 44 individuals signed in for Day one of the gathering, A total of 62 individuals signed in for Day 2, and a total of 48 individuals signed in for Day 3, but please note that not all participants opted to sign in. In total 2 participants from Fort Albany First Nation (FAFN) attended the Gathering over the 3 days; Sarah Beamish, representing FAFN, and one other FAFN member.

Topics to be Discussed: Field Notice Fall Geo-Technical Drilling Program
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Fort Albany First Nation's (FAFN) Chief Elizabeth Kataquapit regarding a Field Notice for the Fall geo-technical drilling program. The email indicated that AtkinsRéalis is providing a notification to complete a drilling program for the WSR project to further engineering design and support the coordinated provincial Environmental Assessment and Federal Impact Assessment. The letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). The email indicated that all works will be conducted in accordance with the permit conditions issued by MNR. Attached to the email was the Field Notice explaining what is happening, the schedule and what to expect. For further questions, the contact information for Hayden Yip of AtkinsRéalis was provided.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Fort Albany First Nation's (FAFN) Chief Elizabeth Kataquapit with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for FAFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Fort Albany First Nation’s (FAFN) Chief Elizabeth Kataquapit which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if FAFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 4 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Fort Albany First Nation. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from FAFN were in attendance.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Elizabeth Kataquapit and Deputy Chief Terry Metatawabin of Fort Albany First Nation and Sarah Beamish of Beamish Law. The email contained links to?invitations for the Three Road Project Gathering & Expo hosted by ?Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Fort Albany First Nation's (FAFN) Chief Elizabeth Kataquapit with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Fort Albany First Nation's (FAFN) Chief Elizabeth Kataquapit with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Fort Albany First Nation's (FAFN) Chief Elizabeth Kataquapit, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for Round 4 Part 2 for FAFN on February 10, 2024, from 11:00-11:45pm EST with registration links for the session. The information session will include the second presentation on WSR's Cumulative Effects Assessment. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. The letter also attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if FAFN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Elizabeth Kataquapit and Deputy Chief Terry Metatawabin of Fort Albany First Nation and Sarah Beamish of Beamish Law. The email contained links to?invitations for the Three Road Project Gathering & Expo hosted by ?Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Chief Elizabeth Kataquapit, Deputy Chief, and Sarah Beamish of Fort Albany First Nation (FAFN) with a letter attached regarding the Indigenous Knowledge / Land and Resource Use (IKLRU) Program. The letter explained the purpose of the letter is to follow up on previous correspondence sent (December 13, 2021 and June 6, 2023) regarding the IKLRU Program for the Project and the request for confirmation of FAFN's interest to participate in the Program. The letter explained that the information generated through the Program will be used in concert with specific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including the potential impacts to your inherent Indigenous rights and interests. The letter noted that the WSR Project team understands FAFN currently has an active funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project, and that the community may have initiated a community-led IKLRU study for the WSR Project. The letter explained that the planning timelines for the EA/IA is to provide an early circulation of the draft EAR/IS in winter 2025 for review by Indigenous communities prior to its release to stakeholders and the public for formal review. The WSR Project team would like to work closely with FAFN to add community's knowledge to the EA/IA for the WSR Project. The letter requested FAFN to let the WSR Project team know if and when the team can expect to receive Indigenous Knowledge from FAFN by February 28, 2025. The letter explained that the information provided will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the purposes of the Project, without the consent of the community. To express FAFN's interest or for any questions, the letter provided contact information for Michael Fox and Marian Tibor-McMahon of the Project team.

Contact Date: Feb 10, 2025 12:05 Method: Indigenous Community Meeting
Topics to be Discussed: Virtual Information Session Round 4 Part 2
The Webequie Supply Road (WSR) consultation team conducted a virtual community meeting on the Zoom platform with Fort Albany First Nation (FAFN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 2 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment. After the effects assessment discussion, potential effects and associated mitigation measures were explained using examples from geology, terrain and soils and fish and fish habitat. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. There were no participants from FAFN in attendance.

Topics to be Discussed: Three Road Projects Gathering & Expo June 2024 Report
Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team was one of three hosts for the Three Roads Projects Gathering & Expo (Gathering) held at the Valhalla Inn in Thunder Bay on February 19-20, 2025.

The purpose of the Gathering was to provide an engaging and interactive consultation space to discuss the Webequie Supply Road (WSR) Draft Environmental Assessment Report / Impact Statement (EAR/IS), Marten Falls Community Access Road (MFCAR) Draft EAR/IS and Northern Road Link (NRL) Projects.

Day 1 of the event was set aside for Project overviews, consultation panels, individual community breakout sessions, and project expo including information to assist with review of the draft EAR/IS for MFCAR and WSR and cumulative effects assessment.

Day 2 of the event covered the Aboriginal and/or Treaty Rights and Interests (ATRI) panel discussions, breakout sessions, and project expo including information to assist with review of the draft EAR/IS and MFCAR for WSR and cumulative effects assessment.

Eligible Indigenous communities were invited to attend with 3 participants from each community being funded by the province. A total of 28 individuals signed in for Day one of the gathering, A total of 38 individuals signed in for Day 2, but please note that not all participants opted to sign in. In total 1 participant from Fort Albany First Nation (FAFN) attended the Gathering over the 2 days.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Elizabeth Kataquapit of Fort Albany First Nation (FAFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

Web-Preliminary Study Areas for Indigenous Land Use and Interests-2021-12-13

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Fort Albany First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Fort Albany First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Fort Albany First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Fort Albany First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Fort Albany First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Fort Albany First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Fort Albany First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Robert Nakogee,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Fort Albany First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Fort Albany First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Fort Albany First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Robert Nakogee,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Fort Albany First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

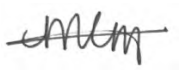
Next Steps

In order to confirm that Fort Albany First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

WSR Socio-Economic Program – Focus Group Sample Questions and Key Contacts

Key Objectives of the Focus Groups:

- To provide socio-economic information that cannot be answered through the census, community documents, or the survey;
- To supplement and provide more in-depth information than the census, community documents, or the survey;
- To provide information that can be collected in an efficient manner through a group interview approach;
- To support the GBA+ approach and analysis through group interviews with women, Elders, Youth, etc.

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
Women	• Mothers and non-mothers • Mix of ages but primarily 25-55	Access to Land, Resources, Infrastructure and Services	• What are the main barriers to women's access to resources? • What are the main barriers to women's access to community and social services? • Do women have equal access to resources/sources as men? If not, why? • Do you have access to the services that address your needs (i.e., childcare so that you can go to work? Women's healthcare? etc.) • What services are needed to address your needs? • What infrastructure or service is important for your community's well-being? (i.e., women's clinic, etc.) • Do you think the WSR will improve cost of living in your community? (i.e., lower food prices, housing, etc.?)	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated to recruit participants
		Safety	• Do you have any safety concerns about the supply road – either during construction or operations? (i.e., gender-based violence against women, construction workers coming in) • Is there gender-based discrimination/violence in your community? (i.e., harassment, violence against women?) • What are ways to limit gender-based discrimination/violence in your community? (i.e., gender-based training, counselling, etc.)	
		Employment	• What kind of work do you normally take on? (i.e., primary caregiver at home vs working, work parttime to care for children at home, etc.) • Who takes most of the responsibility for unpaid work? (i.e., Women due to lack of childcare?) • Do you think there are employment opportunities available for women as a result of the WSR? Provide examples. • Do women have equal access to employment opportunities as men? If not, why? • Is there a wage gap between men and women?	
Men		Access to Land, Resources,	• What are the main barriers to men's access to resources?	**TBD**

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
	• Fathers and non-fathers • Mix of ages but primarily 25-55	Infrastructure and Services	• What are the main barriers to men's access to community and social services? • Do men have equal access to resources/sources as women? If not, why? • Do you have access to the services that address your needs (i.e., healthcare, etc.) • What services are needed to address your needs? • What infrastructure or service is important for your community's well-being? (i.e., social programs, counselling, etc.) • Do you think the WSR will improve cost of living in your community? (i.e., lower food prices, housing, etc.?)	Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated to recruit participants
		Safety	• Do you have any safety concerns you have as a result of the WSR? (i.e., gender-based violence against women, construction workers coming in) • Is there gender-based discrimination/violence in your community? (i.e., harassment, violence against women?) • What are ways to limit gender-based discrimination/violence in your community? (i.e., gender-based training, counselling, etc.)	
		Employment	• What kind of work do you normally take on? (i.e., primary caregiver at home vs. working, work part-time to care for children at home, etc.) • Who takes most of the responsibility for unpaid work? (i.e., Women due to lack of childcare?) • Do you think there are employment opportunities available as a result of the WSR? Provide examples. • Is there a wage gap between men and women?	

Youth	• Male and Female
	• Ages 16-25
		Enrolment	• Are you currently enrolled in high school?
			  ○ Why are you doing it in your community? (i.e., cost, courses, community recommendation, safety, stability, family, personal preference)
			  ○ Would you have left to go to high school outside of your community?
				TBD (e.g., Child & Family Services contact; Principal/ Teacher or other School Board contact) Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated

		Employment	• Do you believe the WSR will open up job opportunities? • What kind of opportunities do you think will open up? (i.e., education opportunities, employment opportunities, accessibility, etc.)	
		Access to Land, Resources, Infrastructure and Services	• What are the main barriers to youth's access to resources? • What are the main barriers to youth's access to community and social services? • What infrastructure or service is important for your community's well-being? (i.e., youth center, youth programs, etc.)	

WSR240-WEB-PR-RT-0003 Web-WSR Socio-Economic Focus Groups-2022-01-28

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
		Safety	• Do you have any safety concerns about the supply road – either during construction or operations? (i.e., outsiders coming into the community, violence, etc.)	in order to recruit participants
Land Users/ Knowledge Keepers	• Workshop style • Participants to mark a map of the Project study area and corridor as they answer questions.	Land and Resources	• How often do you hunt/trap/fish/gather plants? • Do you spend a lot of time in the Project study area? • Do you know of any major events that took place in the Project area? (i.e., historic or cultural events? Legends? Family stories?) • What animals/fish do you harvest? (Include specifics – gender, age) • Has this changed over time? • Please indicate on the map where you hunt/trap/fish/gather plants. • Please indicate on the map any areas of cultural/spiritual importance, including burial grounds. • Why are these areas sacred/important? • Please indicate on the map waterways/travel routes you often use to access important areas. • How often do you use these waterways/travel routes? • When do you use them? • Why are they important? • What are the main barriers to your access to your areas to hunt/trap/fish/gather plants? • How often do you carry out traditional land uses? • Has the amount of time you spend on the land changed over time? If so, why? • How are the youth learning their traditional skills?	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated in order to recruit participants
		Cumulative and Long-Term Effects	• Have you noticed any recent disturbances of wildlife or resources in the area? • If so, what are the disturbances and what species are affected? • How have they been affected? • Do you think the WSR will disturb the way you use the land? If so, how? • Are there ways we can limit those disturbances as a result of the WSR?	
		Climate	• Have you noticed any changes in the weather occurring over time? ○ How long have these changes been occurring? • Have you noticed any change in ice formation over time? • Have you noticed any change in how often it rains? • Have you noticed any changes in the air quality and by season? • Have you noticed any permafrost or changes to permafrost?	

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
Elders		Access to Land, Resources, Infrastructure and Services	• What are the main barriers to elders' access to resources? • What are the main barriers to elders' access to community and social services? • Do you have access to the services that address your needs (i.e., eldercare, culturally appropriate health care, etc.) ○ What services are needed to address your needs? • What infrastructure or service is important for your community's well-being? (i.e., elders' facility, etc.) • Do you think the WSR will improve cost of living in your community? (i.e., lower food prices, housing, etc.?)	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated in order to recruit participants
		Safety	• Do you have any safety concerns about the supply road – either during construction or operations? (i.e., outsiders coming into the community)	
Off-Reserve Members		General	• What are the good things about the WSR? • What are the bad things about the WSR? • Why did you leave your reserve? i.e., For education opportunities, employment activities, etc. • What kind of opportunities do you think will become available in your community as a result of the WSR? (i.e. accessibility, employment opportunities, educational opportunities) • With the WSR in place or if circumstances were different, would you move back to your community? What would make move back to your community? (i.e., available housing, better social services, better infrastructure, etc.) • What infrastructure or service is important for your community's well-being?	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated in order to recruit participants

[i] It is recommended that 6-8 people participate in each focus group, and each session should last approximately one hour.
[ii] In addition to the sample questions identified, the following general interview questions will be asked to all focus groups except Off-Reserve Members: 1) What are the good things about the WSR? 2) What are the bad things about the WSR? 3) Should people entering the Project Study Area take culturally appropriate protocols/training? Why or why not?
[iii] Key contacts will support initial identification/ recruitment of participants. Focus group facilitators should be part of the same group (e.g, land user to facilitate land user focus group, woman to facilitate women's focus group, elder to facilitate elders focus group, etc.).

Webequie Supply Road (WSR) Socio-Economic Key Informant Interviews – Sample Questions & Participants

Topic	Suggested Participant(s) *Note: as available/ applicable	Sample Questions

General – Chief and Council	Interview 2-3 based on availability:
	
	Chief Robert Nakogee
	• 705-278-1044 Ext. 209
	• chief@fafnmail.com
	
	Councillors:
	• **Pascal Spence**
	• **Xavier Inishinapay**
	• **Edmond Edwards**
	• **Joseph Sutherland**
	• **Joseph Scott**
	• **Angela Lagasse**
	• **Arthur Nakogee**
		• What do you feel are some of the main social issues that the community is currently facing? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• What are your aspirations or hopes for future social and economic development?
		• What have your experiences with other development projects been like?
		• What kinds of opportunities, including services, do you think might be needed (or more needed) with the WSR?
		  ○ Who will these opportunities or services benefit? Are any of these specific to men, women, youth, Elders, or other diverse groups?
		• What are the major revenue sources in the community?
		• Should we be aware of any studies or reports related to economic development or social services in the community that have been produced in the past 10 years?

Child and Family Services	Child Care Worker / Child Protection Worker/ Child & Family Intervention Counsellor
	• Payukotayno Family Services
	• 705-336-2229
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to child and family services or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• What child and family services are provided in the community?

		○ How often are these services used – are they frequently over-utilized or under-utilized? ○ Is there usually a wait time to access these services? • Do many women and children in the community use these services? ○ What other kinds of barriers (if any) do women and children face in accessing these services? • Are there adequate services provided within the community to meet the needs of women, children, youth, Elders, single parents, families, and other diverse groups? ○ Is there enough childcare to meet demand in the community? ○ Are there any future plans to upgrade services for women and children in the community? • Should we be aware of any studies or reports related to child and family services in the community that have been produced in the past 10 years?
Community Well-Being & Safety	Health Director: **Gisele Kataquapit** • Peetabeck Health Services • 705-278-1117 • giselekataquapit@phsmail.com Counselor or Crisis Intervention Worker • Fort Albany Women's Shelter • 705-278-8000	• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to community well-being and safety or other topics? (e.g., lack of safety, unemployment, homelessness, poverty) ○ What do you think has caused these issues? ○ Are these issues ongoing or relatively new/emerging issues? ○ What are some potential solutions to address these issues? ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups? • What services are provided in the community to support community well-being and safety? ○ How often are these services used – are they frequently over-utilized or under-utilized? ○ Is there usually a wait time to access these services? • Are there adequate services provided within the community to meet the needs of service-users, including women, children, youth, Elders, single parents, families, and other diverse groups? ○ What kinds of barriers (if any) do community members face in accessing these services? • Can you describe any changes in community well-being and safety you have seen in recent years?

		○ What do you consider to be the key measures of community well-being and safety in the community? ○ Does community well-being and safety differ for different groups in the community, such as men, women, youth, Elders, etc.? If so, how? • Do you think aspects of community well-being & safety such as crime rate, substance abuse, domestic violence, or other issues could be affected by the WSR, either negatively or positively? ○ Does this differ for different groups in the community, such as men, women, youth, elders, etc.? If so, how? • Are there any educational initiatives, events, or other programs in place to support and/or enhance community well-being and safety in the community? • Are there any future plans to upgrade services for community well-being and safety in the community? • Should we be aware of any studies or reports related to community well-being and safety in the community that have been produced in the past 10 years?
Economic Development	Economic Development Officer: **Chris Metatawabin** • 705-278-1044 Ext. 208 • chris@fafnmail.com	• What are your expectations for economic development with the WSR? • What kinds of local businesses are there in the community? • Are there any individual or band owned construction businesses in the community? If so, how many? • Are there other individual or band owned construction businesses in the community that you think may benefit from the WSR? If so, what are these businesses?
Education	Education Director – Mundo Peetabeck Education Authority • 705-278-3390 School Principal – **Vibha Badhwar** • Peetabeck Academy School • 705-278-3340	• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to education or other topics? (e.g., lack of safety, unemployment, homelessness, poverty) ○ What do you think has caused these issues? ○ Are these issues ongoing or relatively new/emerging issues? ○ What are some potential solutions to address these issues? ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups? ○ Do these issues impact your students – either directly or indirectly?

		• What levels of schooling are offered in the community?
		• How many children attend school on reserve versus off reserve?
		  ○ What are some of the main reasons a child might attend school off reserve?
		  ○ How does the quality of educational opportunities on reserve compare to off reserve?
		• What are the main barriers to students achieving higher levels of education? (i.e. location, curriculum, teachers, lack of cultural integration into programs, etc.)
		• Is there a traditional education program offered in the community?
		• What are the main educational priorities for the community?
		  ○ What educational services/programs does the community need to achieve these priorities?
		• Should we be aware of any studies or reports related to education in the community that have been produced in the past 10 years?

Employment	Peetabeck Employment and Training Officer - **Cathleen Sutherland**
	• 705-278-1044 Ext. 216
	• cathleen@fafnmail.com
	
	Ontario Works Employment Administrator – **Bernadette Gillies**
	• 705-278-1044 Ext. 214
	• bernadette@fafnmail.com
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to employment or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• What are your goals and priorities related to employment opportunities with the WSR?
		• What kind of on reserve employment opportunities are there?
		• What kinds of training and skills do community members have?
		  ○ Are there on reserve training opportunities through which members obtain these skills?
		  ○ Are there specific training programs for women, youth, or other diverse groups?
		• Do you think women in the community face greater barriers to employment than men? If so, why?
		• Do you think youth have enough on reserve employment opportunities?

		○ If not, what on reserve opportunities do you feel are priorities for youth in the community? ○ What types of supports are required to provide these on reserve opportunities? • Should we be aware of any studies or reports related to employment in the community that have been produced in the past 10 years?

Housing	Housing and Public Works Coordinator – **Garett McKinnon**
	• 705-278-1044 Ext. 201
	• garett@fafnmail.com
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to housing or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• Can you describe your role/job duties as housing manager?
		• Is housing affordable in the community? What is the average house price and average rent?
		  ○ Does housing affordability differ depending on whether homes are band-owned, rented or owned?
		• What kind of demand is there for housing?
		  ○ Are your community members experiencing overcrowding in their homes?
		  ○ Is there enough housing or is more needed?
		• Do a lot of people want to move back to the community?
		• Do you think housing supply could be a problem with the WSR? Why or why not?
		• How would you describe the quality of housing in the community?
		• Are there any plans for additional housing in the community?
		• Should we be aware of any studies or reports related to housing in the community that have been produced in the past 10 years?

Infrastructure and Public Works	Housing and Public Works Coordinator – **Garett McKinnon**
	• 705-278-1044 Ext. 201
	• garett@fafnmail.com
	
	Water Plant Operator – **Eric Sutherland/ Andrew Scott/ Joseph Kataquapit**
	• 705-278-1044 Ext. 278-1098
	• eric@fafnmail.com
	• andrew@fafnmail.com
	• jkataquapit@fafnmail.com
	
	Special Projects Officer – **Pascal Spence**
	• 705-278-1044 Ext. 215
	• pascal@fafnmail.com
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to infrastructure or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• Can you provide a brief overview of the community's power source and any issues related to power distribution in the community?
		• What is the quality of the infrastructure in the community?
		  ○ Does the infrastructure require any repairs?
		  ○ Are there any future plans for infrastructure upgrades?
		• What kind of infrastructure or community facilities do you feel are required to promote community well-being in the community? (i.e. recreational facilities such as a skating rink?)
		• Is the power reliable in the community?
		  ○ Is it costly?
		• Is the sewage system reliable?
		• Is the water clean and drinkable?
		• Have you been under many boil water advisories?
		  ○ If so, what has the government response been?
		• Is the internet fast enough and reliable?
		• Should we be aware of any studies or reports assessing the infrastructure in the community that have been produced in the past 10 years?

Lands & Resource Use	Lands Use Planning Coordinator – **Michael G. Sutherland** • 705-278-1044 Ext. 203 • jgsutherland@fafnmail.com Land Use Planning Advisor – **Joseph Sutherland**	• What are your key objectives for land and resource use in the community? Do you think the WSR will support these objectives? • What kind of projects are currently underway in the community with respect to land & resources? • Should we be aware of any studies or reports related to land & resource use in the community that have been produced in the past 10 years?

	• Same phone number (705-278-1044 Ext. 203) • jsutherland@fafnmail.com	

Police and Emergency Services	Fort Albany Detachment Police Officers (2)
	• Nishnawbe Aski Police Service Northeast Region
	• 705-272-5600
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to community well-being and safety or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• Is the safety of women and girls and/or Elders an issue?
		• Is domestic violence an issue in the community?
		• Can you describe any changes in community well-being and safety you have seen in the community in recent years?
		  ○ What do you consider to be the key measures of community well-being and safety in the community?
		  ○ Does community well-being and safety differ for different groups in the community, such as men, women, youth, Elders, etc.? If so, how?
		• Do you think aspects of community well-being & safety such as crime rate, substance abuse, domestic violence, or other issues could be affected by WSR, either negatively or positively?
		  ○ Does this differ for different groups in the community, such as men, women, youth, elders, etc.? If so, how?
		• Are crime rates available for the community?
		  ○ Do you feel the WSR will impact crime rates, either in a negative or positive way? How?
		  ○ Will it impact the rate of crimes against women? How?
		  ○ Will it impact the rate of crimes against other diverse groups, such as youth and Elders? How?
		• Is police services capacity sufficient?
		• Should we be aware of any studies or reports related to police and emergency services or community well-being and safety in the community that have been produced in the past 10 years?

Webequie Supply Road

Socio-Economic Community Survey Questions – For Neighbouring Indigenous Communities

SNC·LAVALIN

1. Survey Questions

Meegwetch for taking the time to complete this important survey for the Webequie Supply Road Project. Your input is very important to the Project, whether you're on-reserve or off-reserve.

The purpose of this survey is to capture the full picture of the current social and economic conditions of neighbouring Indigenous communities. Your input is extremely valuable and helpful to us as we want to ensure that the Project includes input from Indigenous Communities as part of the Socio-Economic Impact Assessment.

For the environmental assessment we will study the potential changes (positive and negative) on social and economic conditions of Webequie First Nation and neighbouring Indigenous communities due to the Webequie Supply Road.

Your answers will be kept **confidential and anonymous** and will be only be used for the purposes of the Project. This means that no one will be able to identify your individual answers as the data from all community member responses will be combined, analysed, and presented together.

Your answers will not be judged and we respect any information you can provide. You may choose which questions to answer or not to answer– you are not obligated to answer all of the questions. In addition, you can choose to withdraw your responses at any time. This survey should take approximately 25 minutes to complete.

1.1. Respondent Demographics

1. What Indigenous community are you a member of?

- ☐ Webequie First Nation
- ☐ Marten Falls First Nation
- ☐ Kasabonika First Nation
- ☐ Attawapiskat First Nation
- ☐ Nibinamik First Nation
- ☐ Neskantaga First Nation
- ☐ Weenusk (Peawanuck) First Nation
- ☐ Eabametoong First Nation
- ☐ Aroland First Nation
- ☐ Constance Lake First Nation
- ☐ Fort Albany First Nation
- ☐ Kashechewan First Nation
- ☐ Kitchenuhmaykoosib Inninuwug
- ☐ Kingfisher Lake First Nation
- ☐ Wapekeka First Nation
- ☐ Wawakapewin First Nation
- ☐ Wunnumin Lake First Nation
- ☐ Ginoogaming First Nation
- ☐ Long Lake #58 First Nation
- ☐ Mishkeegogamang First Nation
- ☐ Métis Nation of Ontario – Region 2
- ☐ North Caribou Lake First Nation
- ☐ Other: _____

SNC·LAVALIN

2. Do you live in a First Nation community all year?

- ☐ Yes, I live in a First Nation community all year (Go to Question 3)
- ☐ No, I live off-reserve in a different First Nation community (Go to Question 3)
- ☐ No, I live off-reserve in a city or town (Go to Question 4)

3. Which First Nation community do you live in? (if answered, go to Question 5)

- ☐ Webequie First Nation
- ☐ Marten Falls First Nation
- ☐ Kasabonika First Nation
- ☐ Attawapiskat First Nation
- ☐ Nibinamik First Nation
- ☐ Neskantaga First Nation
- ☐ Weenusk (Peawanuck) First Nation
- ☐ Eabametoong First Nation
- ☐ Aroland First Nation
- ☐ Constance Lake First Nation
- ☐ Fort Albany First Nation
- ☐ Kashechewan First Nation
- ☐ Kitchenuhmaykoosib Inninuwug
- ☐ Kingfisher Lake First Nation
- ☐ Wapekeka First Nation
- ☐ Wawakapewin First Nation
- ☐ Wunnumin Lake First Nation
- ☐ Ginoogaming First Nation
- ☐ Long Lake #58 First Nation
- ☐ Mishkeegogamang First Nation
- ☐ North Caribou Lake First Nation
- ☐ Other: _____

4. Which city or town do you live in?

- ☐ Thunder Bay
- ☐ Sioux Lookout
- ☐ Timmins
- ☐ Other (Please Specify): _____

5. If you live in your member community for only part of the year, for how many months do you live there?

- ☐ 1-3
- ☐ 4-6
- ☐ 7-9
- ☐ 10-12

6. Would you like to live in your member community year-round?

- ☐ Yes
- ☐ No (Go to question 8)
- ☐ Don't know/Unsure

7. If you answered 'yes' to the above, would you want to live in your member community year-round because of either the Webequie supply road and/or future mining developments in the area?

- ☐ Yes
- ☐ No
- ☐ Don't know/Unsure

SNC·LAVALIN

8. **What age range are you in (years)?**
- ☐ 15-18
- ☐ 19-30
- ☐ 31-45
- ☐ 46-65
- ☐ 66+

9. **Do you identify as…? Check all that apply.**
- ☐ Female
- ☐ Male
- ☐ Other (Please Specify): _____
- ☐ Prefer not to answer

10. **What is your marital status?**
- ☐ Single
- ☐ Married
- ☐ Living together but not married (common law)
- ☐ Separated (but still legally married)
- ☐ Divorced
- ☐ Widowed

11. **Are you the main income earner for your household?**
- ☐ Yes
- ☐ No

12. **What was your total *individual* income in 2020?**
- ☐ No income
- ☐ $1 - $5,000
- ☐ $6,000 - $15,000
- ☐ $16,000 - $30,000
- ☐ $31,000 - $45,000
- ☐ $46,000 - $70,000
- ☐ $71,000+
- ☐ Unsure/Don't Know

13. **Do you have a vehicle or have regular access to a vehicle (truck or car)?**
- ☐ Yes
- ☐ No

14. **Do you have a valid driver's license?**
- ☐ Yes (Go to Question 17)
- ☐ No (Go to Question 16)

15. **Are you planning on getting a driver's license?**
- ☐ Yes
- ☐ No

SNC·LAVALIN

16. **What language(s) do you speak? Check all that apply.**
- ☐ Anishinabemowen Ojibway
- ☐ Anishininiimowin Oji-Cree (Severn-Ojibway)
- ☐ Mushkegowuk Cree
- ☐ Buckoish/French/Francais
- ☐ Shaganashiimowin/English
- ☐ Other (Please Specify): _____

1.2. Housing

17. **Is your house …**
- ☐ Owned by you/your family
- ☐ Band-owned
- ☐ Rented by you/your family
- ☐ Don't know/Unsure

18. **Approximately how much of your household income is spent on rent or mortgage payments per month?**
- ☐ Less than 30%
- ☐ 30-50%
- ☐ More than 50%
- ☐ Don't Know/Unsure

19. **Approximately how much are your home energy (hydro bill) costs per month during the winter?**
- ☐ $100-$200
- ☐ $201-$300
- ☐ $301-$400
- ☐ $401+
- ☐ Don't know/Unsure

20. **If you use a wood stove to heat your home in the winter, about how much do you spend on wood per month?** _____

21. **Approximately how much are your home energy (hydro bill) costs per month during the summer?**
- ☐ $100-$200
- ☐ $201-$300
- ☐ $301-$400
- ☐ $401+
- ☐ Don't know/Unsure

22. **Approximately how much do you spend on groceries per month?**
- ☐ $0-250

SNC·LAVALIN

- $251-500
- $501-750
- $751-1000
- $1001-1250
- $1251-1500
- 1501-1750
- 1751-2000
- >2000

23. How many people live in your home?
- 1-2
- 3-4
- 5-6
- 7+

24. How many bedrooms does your house have?
- 1
- 2
- 3
- 4
- 5+

25. Do you feel that your home is overcrowded?
- Yes
- No
- Unsure/Don't Know

1.3. Education

26. What is the highest level of education have you completed?
- Elementary school (Go to Question 28)
- Some high school (Go to Question 28)
- Graduated from high school (Go to Question 28)
- Completed high school equivalency (e.g. GED program) (Go to Question 28)
- Completed apprenticeship or trades certification
- Completed accreditations or certifications
- Some college courses
- Graduated from college
- Some university courses
- Graduated from university

27. What did you study?
- Business Administration
- Communications
- Computer Science
- Culinary / Hospitality
- Earth Science

SNC·LAVALIN

- ☐ Education
- ☐ Engineering
- ☐ Environment
- ☐ Human Resources
- ☐ Health Sciences
- ☐ Indigenous Studies
- ☐ Law
- ☐ Social Science
- ☐ Social Services
- ☐ Trades (Heavy Equipment Operation, etc.) (Please Specify): _____
- ☐ Other (Please Specify): _____

1.4. Employment

28. What is your employment status (check all that apply)?

- ☐ I am not currently employed
- ☐ I cannot work due to disability status (Go to Question 31)
- ☐ I am semi-retired (Go to Question 31)
- ☐ I am retired (Go to Question 31)
- ☐ Employed full-time (Go to Question 32)
- ☐ Employed part-time (Go to Question 32)
- ☐ Self-employed (Go to Question 32)
- ☐ Seasonally employed (includes traditional harvesting) (Go to Question 32)
- ☐ Other (Please Specify):

29. If you are not currently employed, are you searching for work?

- ☐ Yes (Go to Question 31)
- ☐ No

30. If you are not currently searching for work, why is that?

_____
_____
_____
_____

31. Are you receiving any form of income from the following (check all that apply):

- ☐ Ontario Works (Go to Question 36)
- ☐ Ontario Disability Program (Go to Question 36)
- ☐ Old Age Pension (CPP/OAS) (Go to Question 36)
- ☐ Employment Insurance (Go to Question 36)
- ☐ Employee Disability Insurance (Go to Question 36)
- ☐ Accident and Benefit Insurance (Go to Question 36)
- ☐ Other (Please Specify):_____
- ☐ Not receiving any income (Go to Question 38)

32. Do you own, operate, or work for a registered local, Indigenous owned business?

- ☐ Yes

SNC·LAVALIN

☐ No

33. How would you classify your work industry? (check all that apply):

☐ Band administration/staff member
☐ Elected Official/Band Council
☐ Independent service provider
☐ Communications
☐ Education
☐ Childcare
☐ Public Works
☐ Social Services
☐ Health Centre / Nurse Station (offered by Health Canada)
☐ Police Services
☐ Fire Services
☐ Hotel
☐ Restaurant
☐ Northern Store
☐ Gas Station
☐ Energy Sector (Hydro One Remotes)
☐ Construction
☐ Transportation (Ministry of Transportation)
☐ Commercial harvesting
☐ Other (Please specify): _____

34. Are you employed in mining exploration, or other mining-related industry?

☐ Yes
☐ No (Go to Question 35)

SNC·LAVALIN

35. **What sort of work do you do for these mining exploration company/companies?**

Administration	○
Manager/Superintendent	○
Mine Operations	○
Security Services	○
Public and Corporate Relations	○
Environmental Monitoring/Inspection	○
Health and Safety	○
Accommodations	○
Airborne Services	○
Engineering Services	○
Food Services	○
Geological Services	○
Labourer	○
Plant Operations	○
Survey Services	○
Trades	○
Site Maintenance	○
Other (please specify): _____	○

36. **If you are not employed in mining, would you like to be in the future?**

- ☐ Yes
- ☐ No (Go to Question 38)
- ☐ Don't know/Unsure

SNC·LAVALIN

37. **If you would like to be employed in mining, what sort of work would you like to do for these mining exploration company/companies?**

Administration	○
Manager/Superintendent	○
Mine Operations	○
Security Services	○
Public and Corporate Relations	○
Environmental Monitoring/Inspection	○
Health and Safety	○
Accommodations	○
Airborne Services	○
Engineering Services	○
Food Services	○
Geological Services	○
Labourer	○
Plant Operations	○
Survey Services	○
Trades	○
Site Maintenance	○
Other (please specify): _____	○

38. **Do you think there are enough local job opportunities?**
- ☐ Yes (Go to Question 40)
- ☐ No
- ☐ Don't know/Unsure

39. **If you don't think there enough local job opportunities, why is that?**

_____
_____
_____
_____

40. **If you think the Webequie Supply Road will provide job opportunities for your community, which of the following sectors would you like to seek job opportunities in? (Check all that apply).**
- ☐ Environmental Monitoring
- ☐ Road Maintenance
- ☐ Labourer
- ☐ Heavy Equipment Operator
- ☐ Band Administration
- ☐ Education
- ☐ Economic Development
- ☐ Health

SNC·LAVALIN

- ☐ Food Services
- ☐ Tourism
- ☐ Other (Please Specify): _____

41. If you experience barriers to getting or maintaining employment, please identify what they are (check all that apply):

- ☐ Childcare commitments
- ☐ Eldercare commitments
- ☐ Domestic responsibilities e.g. household cleaning, maintenance, etc.
- ☐ Traditional hunting, fishing, gathering needs
- ☐ Lack of education or training
- ☐ No drivers license
- ☐ No transportation
- ☐ Addictions (treatment restrictions, etc.)
- ☐ Racism
- ☐ Sexism
- ☐ Age
- ☐ Remote Location
- ☐ Other (Please Specify): _____

42. How many hours per week do you spend doing domestic and care work (e.g. for dependents)?

- ☐ 0 hours
- ☐ 1 to 10 hours
- ☐ 11 to 25 hours
- ☐ 26 to 40 hours
- ☐ More than 40 hours

43. Are you the primary caregiver (childcare, eldercare, etc.) at home?

- ☐ Yes
- ☐ No
- ☐ Does not apply (not a caregiver at all)

1.5. Social Services

44. What social services do you have access to, and how often do you use them?

	No access	Have access, but do not use	Use Daily	Use Weekly	Use Monthly	Use Yearly
Childcare	○	○	○	○	○	○
Eldercare	○	○	○	○	○	○
Wellness Counselling	○	○	○	○	○	○

SNC·LAVALIN

Youth Support Services/Programs	○	○	○	○	○	○
Choose Life / Suicide Prevention Program	○	○	○	○	○	○
Jordan's Principle	○	○	○	○	○	○
Education Programs Supports for education for students with special needs (Individual Education Plans), Special Needs (Special Education)	○	○	○	○	○	○
Traditional Healing Programs	○	○	○	○	○	○
Food Distribution	○	○	○	○	○	○
Legal Aid	○	○	○	○	○	○
Other (Please Specify): _____	○	○	○	○	○	○

45. Which social services do you need/want, or want more of made available to members of your community? (Check all that apply):

- ☐ Childcare
- ☐ Eldercare
- ☐ Wellness Counselling
- ☐ Youth Support Services/Programs
- ☐ Choose Life / Suicide Prevention Program
- ☐ Jordan's Principle
- ☐ Education Programs (supports for education for students with special needs (Individual Education Plans), Special Needs (Special Ed)
- ☐ Traditional Healing Programs
- ☐ Food Distribution
- ☐ Legal Aid

1.6. Social Cohesion and Culture

For the following questions, please consider your answers *prior to* the COVID-19 pandemic:

46. How would you rate the *number* of social connections such as friends, family, and acquaintances that you have in your community? (1=Low and 5=High):

1 2 3 4 5

47. How would you rate the *quality* of social connections you have in your community? (1=Weak and 5=Strong):

1 2 3 4 5

SNC·LAVALIN

48. Do you participate in organized social and/or cultural events/activities in your community?
- ☐ Yes, always
- ☐ Yes, sometimes
- ☐ No, never

49. Do you have concerns about the loss of traditional culture in your community?
- ☐ Yes
- ☐ No (Go to Question 51)
- ☐ Unsure/Don't Know

50. If you have concerns about the loss of traditional culture in your community, what are those concerns (check all that apply)?
- ☐ Loss of traditional land use activities
- ☐ Loss of traditional teachings
- ☐ Loss of traditional language
- ☐ Loss of traditional values
- ☐ Other (please specify): _____

51. If you are concerned about the possible impact(s) of the Webequie Supply Road on traditional culture, what aspects of culture are you most concerned about being impacted? (check all that apply)
- ☐ Traditional land use in the Webequie Supply Road area
- ☐ Traditional teachings
- ☐ Traditional language
- ☐ Traditional values
- ☐ Other (please specify): _____
- ☐ I do not have concerns about the possible impact(s) of the Webequie Supply Road on traditional culture

1.7. Safety

52. Are any of the following safety issues of concern in your community? (check all that apply)
- ☐ High crime rates
- ☐ High rates of substance abuse
- ☐ High rates of domestic violence
- ☐ High rates of sexual assault
- ☐ High rates of physical assault
- ☐ Child abuse
- ☐ Child negligence
- ☐ Bullying and cyber bullying
- ☐ Other (please specify): _____
- ☐ Prefer not to say

53. Do you have safety concerns related to the Webequie Supply Road and the potential for future mining development in the area?
- ☐ Yes
- ☐ No (Go to Question 56)
- ☐ Don't Know/Unsure

SNC·LAVALIN

54. If you have safety concerns related to the Webequie Supply Road and potential future mining development in the area, what are they? (check all that apply)

- ☐ Safety of women
- ☐ Safety of youth
- ☐ Safety of Elders
- ☐ Road safety
- ☐ Other (please specify): _____

55. Please state any specific concerns you have about the safety of women, youth, or Elders related to the Webequie Supply Road and potential future mining development in the area:

_____
_____
_____
_____
_____
_____

56. If you have road safety concerns related to the Webequie Supply Road, what are they (check all that apply)?

- ☐ Pedestrian safety
- ☐ Road/street maintenance
- ☐ Lack of stop signs on road
- ☐ Not enough lighting
- ☐ Speed limits not enforced
- ☐ Animal/wildlife collisions
- ☐ Lack of street lights
- ☐ Drinking and driving
- ☐ Other (please specify): _____

1.8. Health and Access to Healthcare Services

57. On a scale of 1 to 5, how would you rate your overall physical health? (1 = Bad, 5 = Good)

1 2 3 4 5

58. Which of the following health issues do you have? Check all that apply.

- ☐ Asthma
- ☐ Diabetes
- ☐ Obesity
- ☐ Heart Issues (heart and stroke)
- ☐ Mental health issues (such as depression, anxiety, etc.)
- ☐ Chronic health conditions (chronic pain, etc.)
- ☐ Cancer
- ☐ Arthritis
- ☐ Fetal Alcohol Syndrome Disorder and associated symptoms
- ☐ Skin issues (eczema, staph infections, etc.)
- ☐ Physical disability
- ☐ Smoking/vaping
- ☐ Drug and/or substance addictions
- ☐ Other (please specify): _____

SNC·LAVALIN

☐ Prefer not to answer

59. What health care services do you have access to in your community? Check all that apply.
☐ Doctor that comes into the community
☐ Nursing care
☐ Dietician
☐ Health clinic
☐ Mental health care/counselling
☐ Traditional elder or healer in the community
☐ I don't get health care in my community; I fly out to get access to health care
☐ Other (please specify): _____

60. What health care services do you think your community is in need of? Check all that apply.
☐ Culturally appropriate healthcare (i.e., nurses and doctors that speak our native language, using our medicine to help us heal, etc.)
☐ Better integration of traditional healing methods into the community health care services
☐ Fulltime in-community doctors and nurses
☐ Palliative care
☐ Mental health care/counselling
☐ Long-term care
☐ Assisted living care
☐ Diabetes management clinic
☐ Women and child health care services
☐ Other (please specify): _____

61. On a scale of 1 to 5, how would you rate your access to healthcare (doctors, specialists, clinics, hospitals, etc.)? (1 = Bad, 5 = Good)
1 2 3 4 5

62. If applicable, which of these women and child health care services do you have access to? Check all that apply.
☐ Obstetrics and Gynaecology
☐ Antenatal care (during pregnancy)
☐ Delivery care
☐ Postnatal care
☐ Breastfeeding clinic
☐ Child immunization
☐ Child growth monitoring

63. On a scale of 1 to 5, how would you rate your overall dental health? (1 = Bad, 5 = Good)
1 2 3 4 5

64. On a scale of 1 to 5, how would you rate your access to dental care (dentists, specialists, dental clinics, etc.)? (1 = Bad, 5 = Good)
1 2 3 4 5

65. On a scale of 1 to 5, how would you rate your overall mental health? (1 = Bad, 5 = Good)
1 2 3 4 5

SNC·LAVALIN

66. Do you struggle with your mental health?
- ☐ Yes (please specify – i.e., depression, anxiety, mood disorder, etc.): _____
- ☐ No
- ☐ Prefer not to answer

67. Do you smoke and/or vape?
- ☐ Yes
- ☐ No

68. If yes, how many cigarettes per day do you smoke?
- ☐ 10 cigarettes or less
- ☐ 11 – 20 cigarettes
- ☐ 21 – 30 cigarettes
- ☐ More than 30 cigarettes

69. Have you had challenges (i.e., addiction and/or substance dependence) in the past or currently with drugs and alcohol?
- ☐ Yes, to both
- ☐ Only with drugs
- ☐ Only with alcohol
- ☐ I do not have challenges with drugs or alcohol use

70. Overall, how do you rate the health care services in your area?
- ☐ Excellent
- ☐ Above average
- ☐ Average
- ☐ Below average
- ☐ Very poor

71. Do you think the Webequie Supply Road will improve access to health and dental care?
- ☐ Yes, I hope so
- ☐ No, I don't think so
- ☐ Don't know/Not sure

72. How often do you exercise (or get physically active)?
- ☐ Every day
- ☐ A few times a week
- ☐ Once a week
- ☐ Less often than once a week
- ☐ I don't exercise/I am not physically active

73. Do you think the Webequie Supply Road will impact your overall physical and mental health?
- ☐ Yes (please specify how): _____
- ☐ No, I don't think so
- ☐ Don't know/Not sure

SNC·LAVALIN

1.9. Community Health and Well-Being

74. In the following list, what do you think are the three (3) most concerning "health problems" in your community? (Those problems which have the greatest impact on overall community health.) Check only three:

___ Aging problems (e.g., arthritis, hearing/vision loss, etc.)
___ Cancers
___ Child abuse/neglect
___ Dental problems
___ Diabetes
___ Domestic Violence
___ Firearm-related injuries
___Other_____

___ Heart disease and stroke
___ High blood pressure
___ HIV / AIDS
___ Homicide
___ Infant Death
___ Infectious Diseases (e.g., hepatitis, tuberculosis, etc.)
___ Mental health problems
___Other_____

___ Rape/sexual assault
___ Respiratory/lung disease
___ Sexually Transmitted Diseases (STDs)
___ Suicide
___ Teenage pregnancy
___ Motor vehicle crash injuries
___ Other_____

75. In the following list, what do you think are the three (3) most concerning "risky behaviours" in your community? (Those problems which have the greatest impact on overall community health.) Check only three:

___ Alcohol abuse
___ Being overweight
___ Dropping out of school
___ Drug abuse
___ Lack of exercise
___ Other_____
___ Other_____

___ Not using seat belts/child safety seats
___ Not using birth control
___ Unsafe sex
___ Poor eating habits
___ Not getting "shots" to prevent disease
___ Other_____

76. How would you rate the overall health condition of your community?

- ☐ Very unhealthy
- ☐ Unhealthy
- ☐ Somewhat unhealthy
- ☐ Healthy
- ☐ Very healthy

SNC·LAVALIN

1.10. Recreational Activities

77. What outdoor activities do you do? Check all that apply

- ☐ Walking
- ☐ Gardening
- ☐ Sports
- ☐ Jogging
- ☐ Boating/Canoeing
- ☐ Snowmobiling
- ☐ Harvesting
- ☐ Skating
- ☐ Swimming
- ☐ Fishing
- ☐ Snowshoeing
- ☐ Other (please specify): _____

78. If you don't participate in outdoor recreational activities, why not? Check all that apply.

- ☐ Lack of general equipment/infrastructure
- ☐ Lack of community interest (people to play with, coaching staff, spectators, etc.)
- ☐ Unable to physically
- ☐ No interest
- ☐ Safety concerns
- ☐ Other (please specify): _____

79. Are there indoor recreational activities that you take part in? Check all that apply

- ☐ Dance
- ☐ Swimming
- ☐ Fitness (aerobic, weights, etc.)
- ☐ Indoor sports (basketball, volleyball, etc.)
- ☐ Other (please specify): _____

1.11. General

Please provide any comments you have regarding the Webequie Supply Road:

_____
_____
_____
_____

WSR Socio-Economic Program – Focus Group Sample Questions and Key Contacts

Key Objectives of the Focus Groups:

- To provide socio-economic information that cannot be answered through the census, community documents, or the survey;
- To supplement and provide more in-depth information than the census, community documents, or the survey;
- To provide information that can be collected in an efficient manner through a group interview approach;
- To support the GBA+ approach and analysis through group interviews with women, Elders, Youth, etc.

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
Women	• Mothers and non-mothers • Mix of ages but primarily 25-55	Access to Land, Resources, Infrastructure and Services	• What are the main barriers to women's access to resources? • What are the main barriers to women's access to community and social services? • Do women have equal access to resources/sources as men? If not, why? • Do you have access to the services that address your needs (i.e., childcare so that you can go to work? Women's healthcare? etc.) • What services are needed to address your needs? • What infrastructure or service is important for your community's well-being? (i.e., women's clinic, etc.) • Do you think the WSR will improve cost of living in your community? (i.e., lower food prices, housing, etc.?)	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated to recruit participants
		Safety	• Do you have any safety concerns about the supply road – either during construction or operations? (i.e., gender-based violence against women, construction workers coming in) • Is there gender-based discrimination/violence in your community? (i.e., harassment, violence against women?) • What are ways to limit gender-based discrimination/violence in your community? (i.e., gender-based training, counselling, etc.)	
		Employment	• What kind of work do you normally take on? (i.e., primary caregiver at home vs working, work parttime to care for children at home, etc.) • Who takes most of the responsibility for unpaid work? (i.e., Women due to lack of childcare?) • Do you think there are employment opportunities available for women as a result of the WSR? Provide examples. • Do women have equal access to employment opportunities as men? If not, why? • Is there a wage gap between men and women?	
Men		Access to Land, Resources,	• What are the main barriers to men's access to resources?	**TBD**

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
	• Fathers and non-fathers • Mix of ages but primarily 25-55	Infrastructure and Services	• What are the main barriers to men's access to community and social services? • Do men have equal access to resources/sources as women? If not, why? • Do you have access to the services that address your needs (i.e., healthcare, etc.) • What services are needed to address your needs? • What infrastructure or service is important for your community's well-being? (i.e., social programs, counselling, etc.) • Do you think the WSR will improve cost of living in your community? (i.e., lower food prices, housing, etc.?)	Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated to recruit participants
		Safety	• Do you have any safety concerns you have as a result of the WSR? (i.e., gender-based violence against women, construction workers coming in) • Is there gender-based discrimination/violence in your community? (i.e., harassment, violence against women?) • What are ways to limit gender-based discrimination/violence in your community? (i.e., gender-based training, counselling, etc.)	
		Employment	• What kind of work do you normally take on? (i.e., primary caregiver at home vs. working, work part-time to care for children at home, etc.) • Who takes most of the responsibility for unpaid work? (i.e., Women due to lack of childcare?) • Do you think there are employment opportunities available as a result of the WSR? Provide examples. • Is there a wage gap between men and women?	

Youth	• Male and Female
	• Ages 16-25
		Enrolment	• Are you currently enrolled in high school?
			  ○ Why are you doing it in your community? (i.e., cost, courses, community recommendation, safety, stability, family, personal preference)
			  ○ Would you have left to go to high school outside of your community?
				TBD (e.g., Child & Family Services contact; Principal/ Teacher or other School Board contact) Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated

		Employment	• Do you believe the WSR will open up job opportunities? • What kind of opportunities do you think will open up? (i.e., education opportunities, employment opportunities, accessibility, etc.)	
		Access to Land, Resources, Infrastructure and Services	• What are the main barriers to youth's access to resources? • What are the main barriers to youth's access to community and social services? • What infrastructure or service is important for your community's well-being? (i.e., youth center, youth programs, etc.)	

WSR240-WEB-PR-RT-0003 Web-WSR Socio-Economic Focus Groups-2022-01-28

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
		Safety	• Do you have any safety concerns about the supply road – either during construction or operations? (i.e., outsiders coming into the community, violence, etc.)	in order to recruit participants
Land Users/ Knowledge Keepers	• Workshop style • Participants to mark a map of the Project study area and corridor as they answer questions.	Land and Resources	• How often do you hunt/trap/fish/gather plants? • Do you spend a lot of time in the Project study area? • Do you know of any major events that took place in the Project area? (i.e., historic or cultural events? Legends? Family stories?) • What animals/fish do you harvest? (Include specifics – gender, age) • Has this changed over time? • Please indicate on the map where you hunt/trap/fish/gather plants. • Please indicate on the map any areas of cultural/spiritual importance, including burial grounds. • Why are these areas sacred/important? • Please indicate on the map waterways/travel routes you often use to access important areas. • How often do you use these waterways/travel routes? • When do you use them? • Why are they important? • What are the main barriers to your access to your areas to hunt/trap/fish/gather plants? • How often do you carry out traditional land uses? • Has the amount of time you spend on the land changed over time? If so, why? • How are the youth learning their traditional skills?	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated in order to recruit participants
		Cumulative and Long-Term Effects	• Have you noticed any recent disturbances of wildlife or resources in the area? • If so, what are the disturbances and what species are affected? • How have they been affected? • Do you think the WSR will disturb the way you use the land? If so, how? • Are there ways we can limit those disturbances as a result of the WSR?	
		Climate	• Have you noticed any changes in the weather occurring over time? ○ How long have these changes been occurring? • Have you noticed any change in ice formation over time? • Have you noticed any change in how often it rains? • Have you noticed any changes in the air quality and by season? • Have you noticed any permafrost or changes to permafrost?	

Focus Group	Group Composition[i]	Question Topic	Sample Questions[ii]	Key Contact to Solicit Group[iii]
Elders		Access to Land, Resources, Infrastructure and Services	• What are the main barriers to elders' access to resources? • What are the main barriers to elders' access to community and social services? • Do you have access to the services that address your needs (i.e., eldercare, culturally appropriate health care, etc.) ○ What services are needed to address your needs? • What infrastructure or service is important for your community's well-being? (i.e., elders' facility, etc.) • Do you think the WSR will improve cost of living in your community? (i.e., lower food prices, housing, etc.?)	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated in order to recruit participants
		Safety	• Do you have any safety concerns about the supply road – either during construction or operations? (i.e., outsiders coming into the community)	
Off-Reserve Members		General	• What are the good things about the WSR? • What are the bad things about the WSR? • Why did you leave your reserve? i.e., For education opportunities, employment activities, etc. • What kind of opportunities do you think will become available in your community as a result of the WSR? (i.e. accessibility, employment opportunities, educational opportunities) • With the WSR in place or if circumstances were different, would you move back to your community? What would make move back to your community? (i.e., available housing, better social services, better infrastructure, etc.) • What infrastructure or service is important for your community's well-being?	**TBD** Participants may be engaged or identified during in- person/ virtual consultation events or a notice may be circulated in order to recruit participants

[i] It is recommended that 6-8 people participate in each focus group, and each session should last approximately one hour.
[ii] In addition to the sample questions identified, the following general interview questions will be asked to all focus groups except Off-Reserve Members: 1) What are the good things about the WSR? 2) What are the bad things about the WSR? 3) Should people entering the Project Study Area take culturally appropriate protocols/training? Why or why not?
[iii] Key contacts will support initial identification/ recruitment of participants. Focus group facilitators should be part of the same group (e.g, land user to facilitate land user focus group, woman to facilitate women's focus group, elder to facilitate elders focus group, etc.).

Webequie Supply Road (WSR) Socio-Economic Key Informant Interviews – Sample Questions & Participants

Topic	Suggested Participant(s) *Note: as available/ applicable	Sample Questions

General – Chief and Council	Interview 2-3 based on availability:
	
	Chief Robert Nakogee
	• 705-278-1044 Ext. 209
	• chief@fafnmail.com
	
	Councillors:
	• **Pascal Spence**
	• **Xavier Inishinapay**
	• **Edmond Edwards**
	• **Joseph Sutherland**
	• **Joseph Scott**
	• **Angela Lagasse**
	• **Arthur Nakogee**
		• What do you feel are some of the main social issues that the community is currently facing? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• What are your aspirations or hopes for future social and economic development?
		• What have your experiences with other development projects been like?
		• What kinds of opportunities, including services, do you think might be needed (or more needed) with the WSR?
		  ○ Who will these opportunities or services benefit? Are any of these specific to men, women, youth, Elders, or other diverse groups?
		• What are the major revenue sources in the community?
		• Should we be aware of any studies or reports related to economic development or social services in the community that have been produced in the past 10 years?

Child and Family Services	Child Care Worker / Child Protection Worker/ Child & Family Intervention Counsellor
	• Payukotayno Family Services
	• 705-336-2229
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to child and family services or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• What child and family services are provided in the community?

		○ How often are these services used – are they frequently over-utilized or under-utilized? ○ Is there usually a wait time to access these services? • Do many women and children in the community use these services? ○ What other kinds of barriers (if any) do women and children face in accessing these services? • Are there adequate services provided within the community to meet the needs of women, children, youth, Elders, single parents, families, and other diverse groups? ○ Is there enough childcare to meet demand in the community? ○ Are there any future plans to upgrade services for women and children in the community? • Should we be aware of any studies or reports related to child and family services in the community that have been produced in the past 10 years?
Community Well-Being & Safety	Health Director: **Gisele Kataquapit** • Peetabeck Health Services • 705-278-1117 • giselekataquapit@phsmail.com Counselor or Crisis Intervention Worker • Fort Albany Women's Shelter • 705-278-8000	• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to community well-being and safety or other topics? (e.g., lack of safety, unemployment, homelessness, poverty) ○ What do you think has caused these issues? ○ Are these issues ongoing or relatively new/emerging issues? ○ What are some potential solutions to address these issues? ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups? • What services are provided in the community to support community well-being and safety? ○ How often are these services used – are they frequently over-utilized or under-utilized? ○ Is there usually a wait time to access these services? • Are there adequate services provided within the community to meet the needs of service-users, including women, children, youth, Elders, single parents, families, and other diverse groups? ○ What kinds of barriers (if any) do community members face in accessing these services? • Can you describe any changes in community well-being and safety you have seen in recent years?

		○ What do you consider to be the key measures of community well-being and safety in the community? ○ Does community well-being and safety differ for different groups in the community, such as men, women, youth, Elders, etc.? If so, how? • Do you think aspects of community well-being & safety such as crime rate, substance abuse, domestic violence, or other issues could be affected by the WSR, either negatively or positively? ○ Does this differ for different groups in the community, such as men, women, youth, elders, etc.? If so, how? • Are there any educational initiatives, events, or other programs in place to support and/or enhance community well-being and safety in the community? • Are there any future plans to upgrade services for community well-being and safety in the community? • Should we be aware of any studies or reports related to community well-being and safety in the community that have been produced in the past 10 years?
Economic Development	Economic Development Officer: **Chris Metatawabin** • 705-278-1044 Ext. 208 • chris@fafnmail.com	• What are your expectations for economic development with the WSR? • What kinds of local businesses are there in the community? • Are there any individual or band owned construction businesses in the community? If so, how many? • Are there other individual or band owned construction businesses in the community that you think may benefit from the WSR? If so, what are these businesses?
Education	Education Director – Mundo Peetabeck Education Authority • 705-278-3390 School Principal – **Vibha Badhwar** • Peetabeck Academy School • 705-278-3340	• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to education or other topics? (e.g., lack of safety, unemployment, homelessness, poverty) ○ What do you think has caused these issues? ○ Are these issues ongoing or relatively new/emerging issues? ○ What are some potential solutions to address these issues? ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups? ○ Do these issues impact your students – either directly or indirectly?

		• What levels of schooling are offered in the community?
		• How many children attend school on reserve versus off reserve?
		  ○ What are some of the main reasons a child might attend school off reserve?
		  ○ How does the quality of educational opportunities on reserve compare to off reserve?
		• What are the main barriers to students achieving higher levels of education? (i.e. location, curriculum, teachers, lack of cultural integration into programs, etc.)
		• Is there a traditional education program offered in the community?
		• What are the main educational priorities for the community?
		  ○ What educational services/programs does the community need to achieve these priorities?
		• Should we be aware of any studies or reports related to education in the community that have been produced in the past 10 years?

Employment	Peetabeck Employment and Training Officer - **Cathleen Sutherland**
	• 705-278-1044 Ext. 216
	• cathleen@fafnmail.com
	
	Ontario Works Employment Administrator – **Bernadette Gillies**
	• 705-278-1044 Ext. 214
	• bernadette@fafnmail.com
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to employment or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• What are your goals and priorities related to employment opportunities with the WSR?
		• What kind of on reserve employment opportunities are there?
		• What kinds of training and skills do community members have?
		  ○ Are there on reserve training opportunities through which members obtain these skills?
		  ○ Are there specific training programs for women, youth, or other diverse groups?
		• Do you think women in the community face greater barriers to employment than men? If so, why?
		• Do you think youth have enough on reserve employment opportunities?

		○ If not, what on reserve opportunities do you feel are priorities for youth in the community? ○ What types of supports are required to provide these on reserve opportunities? • Should we be aware of any studies or reports related to employment in the community that have been produced in the past 10 years?

Housing	Housing and Public Works Coordinator – **Garett McKinnon**
	• 705-278-1044 Ext. 201
	• garett@fafnmail.com
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to housing or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• Can you describe your role/job duties as housing manager?
		• Is housing affordable in the community? What is the average house price and average rent?
		  ○ Does housing affordability differ depending on whether homes are band-owned, rented or owned?
		• What kind of demand is there for housing?
		  ○ Are your community members experiencing overcrowding in their homes?
		  ○ Is there enough housing or is more needed?
		• Do a lot of people want to move back to the community?
		• Do you think housing supply could be a problem with the WSR? Why or why not?
		• How would you describe the quality of housing in the community?
		• Are there any plans for additional housing in the community?
		• Should we be aware of any studies or reports related to housing in the community that have been produced in the past 10 years?

Infrastructure and Public Works	Housing and Public Works Coordinator – **Garett McKinnon**
	• 705-278-1044 Ext. 201
	• garett@fafnmail.com
	
	Water Plant Operator – **Eric Sutherland/ Andrew Scott/ Joseph Kataquapit**
	• 705-278-1044 Ext. 278-1098
	• eric@fafnmail.com
	• andrew@fafnmail.com
	• jkataquapit@fafnmail.com
	
	Special Projects Officer – **Pascal Spence**
	• 705-278-1044 Ext. 215
	• pascal@fafnmail.com
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to infrastructure or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ Are these issues ongoing or relatively new/emerging issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• Can you provide a brief overview of the community's power source and any issues related to power distribution in the community?
		• What is the quality of the infrastructure in the community?
		  ○ Does the infrastructure require any repairs?
		  ○ Are there any future plans for infrastructure upgrades?
		• What kind of infrastructure or community facilities do you feel are required to promote community well-being in the community? (i.e. recreational facilities such as a skating rink?)
		• Is the power reliable in the community?
		  ○ Is it costly?
		• Is the sewage system reliable?
		• Is the water clean and drinkable?
		• Have you been under many boil water advisories?
		  ○ If so, what has the government response been?
		• Is the internet fast enough and reliable?
		• Should we be aware of any studies or reports assessing the infrastructure in the community that have been produced in the past 10 years?

Lands & Resource Use	Lands Use Planning Coordinator – **Michael G. Sutherland** • 705-278-1044 Ext. 203 • jgsutherland@fafnmail.com Land Use Planning Advisor – **Joseph Sutherland**	• What are your key objectives for land and resource use in the community? Do you think the WSR will support these objectives? • What kind of projects are currently underway in the community with respect to land & resources? • Should we be aware of any studies or reports related to land & resource use in the community that have been produced in the past 10 years?

	• Same phone number (705-278-1044 Ext. 203) • jsutherland@fafnmail.com	

Police and Emergency Services	Fort Albany Detachment Police Officers (2)
	• Nishnawbe Aski Police Service Northeast Region
	• 705-272-5600
		• Generally, what do you feel are some of the main social issues that the community is currently facing, either related to community well-being and safety or other topics? (e.g., lack of safety, unemployment, homelessness, poverty)
		  ○ What do you think has caused these issues?
		  ○ What are some potential solutions to address these issues?
		  ○ Do any of these issues disproportionately affect men, women, youth, Elders, or other diverse groups?
		• Is the safety of women and girls and/or Elders an issue?
		• Is domestic violence an issue in the community?
		• Can you describe any changes in community well-being and safety you have seen in the community in recent years?
		  ○ What do you consider to be the key measures of community well-being and safety in the community?
		  ○ Does community well-being and safety differ for different groups in the community, such as men, women, youth, Elders, etc.? If so, how?
		• Do you think aspects of community well-being & safety such as crime rate, substance abuse, domestic violence, or other issues could be affected by WSR, either negatively or positively?
		  ○ Does this differ for different groups in the community, such as men, women, youth, elders, etc.? If so, how?
		• Are crime rates available for the community?
		  ○ Do you feel the WSR will impact crime rates, either in a negative or positive way? How?
		  ○ Will it impact the rate of crimes against women? How?
		  ○ Will it impact the rate of crimes against other diverse groups, such as youth and Elders? How?
		• Is police services capacity sufficient?
		• Should we be aware of any studies or reports related to police and emergency services or community well-being and safety in the community that have been produced in the past 10 years?

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

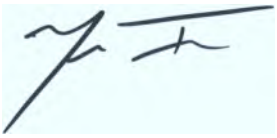
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

April 18, 2022

Dear Chief Nakogee,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 2 between 12pm and 1:30pm** for Fort Albany First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZMrduyvqzwtE9L07m8RSOauC4YqtUffxkc5.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 876 1575 7796 & Passcode: 192041

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: supplyroad.ca/vropenhouse.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

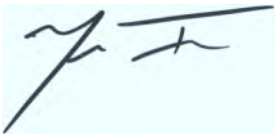
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

June 24, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on cultural heritage This upcoming week's session is: **WSR Presents: Cultural Heritage.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 29th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

July 26, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project website also has various informational videos, communication materials and project updates. Please visit: https://www.supplyroad.ca/

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

October 21, 2022

Chief Elizabeth Kataquapit
Fort Albany First Nation
P.O. Box 1
Fort Albany, ON
P0L 1H0

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Kataquapit:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

November 30, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Cumulative Effects – An Explanation and Illustration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, December 6th, 2022 at 11:00am – 12:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

December 14, 2022

Chief Elizabeth Kataquapit
Fort Albany First Nation
P.O. Box 1
Fort Albany, ON
P0L 1H0

Dear Chief Kataquapit:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status is delayed and is currently in transit to your community.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

WSR WEBEQUIE SUPPLY ROAD

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

WSR
WEBEQUIE
SUPPLY ROAD

December 13, 2021

Chief Robert Nakogee
Fort Albany First Nation
PO Box 1
Fort Albany, ON P0L 1H0

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Robert Nakogee,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

WSR
WEBEQUIE
SUPPLY ROAD

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Fort Albany First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Fort Albany First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

WSR
WEBEQUIE
SUPPLY ROAD

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Fort Albany First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Fort Albany First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Fort Albany First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Fort Albany First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Fort Albany First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

WSR
WEBEQUIE
SUPPLY ROAD

Fort Albany First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Fort Albany First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Fort Albany First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 14, 2023

Dear Chief Kataquapit,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, March 27th from 2:00pm-3:00pm EST** for Fort Albany First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85111404686.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 851 1140 4686.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/fortalbany/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Kataquapit,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Kataquapit:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

2

April 6, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternative Road Corridors.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, April 12th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to serene.spence@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

	ACTIVITY	DESCRIPTION	RATE	QUANTITY
A	Socio-economic Coordinators	Funding to support the training and honoraria for two (2) community coordinators to administer the socio-economic surveys in the community, facilitate key informant interviews and to coordinate Socio-Economic activities (i.e. identifying participants, securing band hall and catering, etc.)	$250 per day per Coordinator	up to 8 days
B	Honoraria	Funding to support honoraria for Elders who participate in key informant interviews.	$250 per Elder	up to 6 Elders
C	Incentives (Surveys)	Funding to support incentives for community members who participate in Socio-Economic surveys.	$25 per community member	Up to 50 survey respondents
D	Incentives (Focus Groups)	Funding to support incentives for community members who participate in Socio-Economic focus groups.	$50 per community member	2 Focus Groups (up to 8 per Focus Group)
E	Translators	Funding to support the employment of one (1) translator to provide translation of survey and assist with administration when required.	$250 per day	up to 5 days
F	Band Hall Rental	Funding to rent the band hall for Socio-Economic Focus Groups.	$250 per day	2
G	Refreshments	Funding for refreshments for Elders duing key informant interviews.	$100	1
H	Catering	Funding for catering for Focus Groups.	$300 per meeting	2
			TOTAL COST	$10,000

Assumptions:
- Training of Socio-economic Coordinators will be conducted virutally
- Socio-economic Coordinators and participants are based in-community (no travel is included)
- Socio-economic Coordinators will facilitate and take notes during key informant interviews. Summaries will be developed from these notes by the Coordinators and provided to WSR Project Team
- Socio-economic Coordinators will not be condcuting analysis of data

May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 6, 2023

Dear Chief Kataquapit,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

The Indigenous Knowledge / Land and Resource Use (IKLRU) Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Fort Albany First Nation currently has an active funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project, and that your community has initiated a community-led IKLRU study for the WSR Project.

Today, we are writing to confirm our planning timelines for the EA/IA process. Our goal this year is to finalize the baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you, to add your community's knowledge to the report.

Please let us know what your team is planning by the end of June 2023. We would like to receive IKLRU studies by the end of September 2023, to allow time for dialogue with your community on the information provided, and meaningful consideration of your Indigenous Knowledge in our understanding of the baseline conditions.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment

context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with you.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,
Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

June 6, 2023

Dear Chief Kataquapit,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 12th between 2:00pm-3:00pm EST** for Fort Albany First Nation, where there will be the second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/81844794389

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 818 4479 4389**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/fortalbany/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

August 9, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.
