Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

July 19, 2023

Dear Chief Benson,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Tuesday, August 1st, between 12:00pm-1:00pm EST** for North Caribou Lake First Nation, where there will be a second part of the presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85459380555

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 854 5938 0555**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/northcariboulake/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

WSR
WEBEQUIE
SUPPLY ROAD

January 25, 2024

Chief Cornelius Benson
North Caribou Lake First Nation
General Delivery
Weagamow, ON P0T 3B0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Benson:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Benson,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates it has been delivered to your community on February 1, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet

with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions

Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

The information provided in this document is preliminary at this time, and it has been prepared with information that is known specifically for North Caribou Lake First Nation. This is a living draft document that has yet to be reviewed and validated by the Community.

Webequie First Nation is the proponent for the Project. The Project Team led by Webequie First Nation is striving to gather as much Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree) and Métis Indigenous Knowledge as it relates to the Project and to help inform the socio-economic baseline. This document will be continuously updated when information from the North Caribou Lake First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources and capacities of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trust.

Webequie is an Anishinaabemowin Tawin (community) located in Treaty No. 9 territory, about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (the good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation, like many Indigenous Nations and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' socio-economic data because Webequie First Nation, the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2. Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	HBC officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern hub of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established the constitutional basis for future negotiations of treaties and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	The *Indian Act*: Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claims staking procedures and prospectors' licenses providing exclusive rights to stake claims and work upon Crown lands.
Ontario Registered Trapline System, 1946	Imposed sole ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP was mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada (TRC), 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR socio-economic baseline are Anishiniimowin, Anishinaabe and Mushkeego First Nations, and Métis Peoples. First Nations have traditional territories that cover the lands in the study areas. A number of First Nations in the RSA are located north of the provincial highway system, and are accessible only by air, water and winter road. Other First Nations, and the Métis community, located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850.

North Caribou Lake First Nation is located 530 km north of Thunder Bay and 265 km northwest of Webequie First Nation. It is situated on the northern shore of Weagamow or Round Lake and is accessible year around by the all-season Northern Resource Trail from Pickle Lake.

North Caribou Lake First Nation falls within the census District of Kenora.

The community is formally affiliated with Windigo First Nations Management (MFNM), a registered not-for-profit Tribal Council (Windigo First Nations Council, 2023), and the Nishnawbe Aski Nation provincial territorial organization.

North Caribou Lake First Nation has a Chief, Head Councillor and six Councillors, with a custom electoral system. The most recent election was held on February 23, 2024 (CIRNAC, 2023r).

2.2 Community History

North Caribou Lake First Nation, also known as Weagamow Lake First Nation, or Round Lake, historically moved around to exploit seasonal resources (Gordon, 1983). The community has used a series of “home base camps” along the shores of Meagamow Lake and North Caribou Lake to the east, as well as temporary “satellite camps” (Gordon, 1983). In 1910, an Anglican church was built at the location where North Caribou Lake First Nation would meet every summer – Atikup Point (Gordon, 1983). Atikup is the Cree word for “caribou lake.” There is evidence that there was an early Northwest Company settlement at North Caribou Lake around 1809 (Gordon, 1983). When Treaty No. 9 was signed, the people of North Caribou Lake, Weagomow Lake and Windigo Lake were joined together as the Caribou Lake Band (Gordon, 1983). In the late 1930’s, a Hudson’s Bay Company outpost was built on North Caribou Lake. As the railway was built, the role of the Albany River as a major supply route was eliminated (Gordon, 1983). By the late 1930’s, ‘camp trade’ was carried on at North Caribou Lake with goods supplied by air from another post.

2.3 Community Values and Aspirations

In 2015, North Caribou Lake First Nation entered into a Memorandum of Understanding (MoU) with Romios Gold Resources Inc. (Burega, 2015). In 2017, an all-season road and bridge was built, connecting North Caribou Lake First Nation to the provincial highway system at Pickle Lake. The development of this reliable and safe infrastructure ended the community’s reliance on air services and the unreliable winter road network.

North Caribou Lake First Nation is also part of a formal agreement with Newmont Musselwhite Mine that includes revenue sharing, employment, training and business development opportunities (Thunder Bay Community Economic Development Commission, N.D).

DRAFT

In September 2023, North Caribou Lake First Nation and Wataynikaneyap Power celebrated the connection of the community to the provincial electricity system as part of the Wataynikaneyap Power project. Since the community was connected to the grid, it has connected a new school, police unit and several housing units to electricity and ended reliance on diesel generated power (Wataynikaneyap Power, 2023).

DRAFT

SOCIAL ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools used to assess socio-economic conditions in communities, as these data can also be used to identify vulnerable groups such as women, disabled persons, Elders and youth. These are segments of the population that could either benefit or be negatively impacted (directly or indirectly) by the Project, and often experience barriers to participation as under-represented groups. Population and demographics are described in this section using the following indicators using Census data:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into existing socio-economic conditions where the Project is being considered. The information is to be used in the assessment of potential effects of the Project and to develop strategies to mitigate any negative effects.

The following section provides an overview of population and demographics at a district level.

3.1.1 Population Overview

The Kenora District population is projected to experience slight growth over the projection period (2021 to 2043), increasing from 66,000 in 2021 to 68,095 by 2043. Nearly half of the Kenora District population identifies as either First Nation, Métis, or Inuk. English is spoken in nearly all homes and there is a small percentage of in-migration to the District.

Table 3-1 presents the forecasted population in the Kenora District over the projection period broken down by self-identified gender. Population trends by self-identified gender in Kenora District are summarized as follows:

- Over the projection period both female population and accompanying male population are forecast to increase
- Between 2016 and 2043 the male population is forecast to increase from 32,895 to 35,716, an 8.6% increase.
- Between 2016 and 2043 the female population is forecast to decrease from 32,640 to 32,425, a 0.7% decrease.
- Between 2016 and 2043, the distribution of the male population is forecast to increase from 50.2% to 52.5% and the female population is forecast to decrease from 49.8% to 47.6%.

Table 3-1: Kenora District – Population Forecast by Self-Identified Gender (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	32,895	50.2%	32,640	49.8%
2021	66,000	100%	33,400	50.6%	32,600	49.4%
2028	66,657	100%	34,120	51.2%	32,544	48.8%
2033	67,130	100%	34,644	51.6%	32,504	48.4%
2043	68,086	100%	35,716	52.5%	32,425	47.6%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-2 presents the forecasted population in the Kenora District over the projection period by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in the Kenora District are summarized as follows:

- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 14,440 to 12,527, a 13.2% decrease;
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 41,820 to 38,152, an 8.8% decrease; and
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 9,275 to 21,313, a 129.8% increase.

Table 3-2: Kenora District – Population Forecast by Age Group (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	14,440	22%	41,820	64%	9,275	14%
2021	66,000	100%	14,065	21%	41,115	62%	10,820	16%
2028	67,129	100%	13,556	20%	40,148	60%	13,425	20%
2033	68,336	100%	13,204	19%	39,471	58%	15,661	23%
2043	71,992	100%	12,527	17%	38,152	53%	21,313	30%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 3-3 presents the population of the Kenora District by Indigenous identity for 2021. Indigenous identity of the population in the Kenora District population is summarized as follows:

- 50.6% of the population identifies as non-Indigenous.
- The majority of the population that identifies as Indigenous identifies as First Nations at 43.1% of the population, followed by Métis (6.3%). No respondents identified themselves as Inuit.

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Kenora District (2021)

Indigenous Identity	Count	Distribution
First Nations	27,815	43.1%
Métis	4,070	6.3%
Inuit	30	0.1%
Non-Indigenous	32,680	50.6%
Total	**64,595**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.1.3 Languages

Table 3-4 presents the languages spoken most often in the home within the Kenora District in 2021. Languages spoken by the population in Kenora District population in 2021 are summarized as follows:

- The majority of homes in the Kenora District speak English while at home at approximately 94%;
- Indigenous languages are the second most spoken within the home at 5.5%, this category includes 39 Indigenous languages; and
- French and other non-official languages make up the remaining 1.1% of homes at 0.7% and 0.4%, respectively.

Table 3-4: Language Used Most Often at Home, Kenora District (2021)

Language	Count	Distribution
English	59,670	93.5%
Indigenous Languages	3,510	5.5%
Other Non-Official Languages	430	0.7%
French	225	0.4%
Total	**63,835**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of Kenora District residents in 2020. Mobility status refers to the status of a person's place of residence on Census Day in relation to their place of residence on the same date one or five years earlier (Statistics Canada, 2022a).

Residents are categorized as "non-movers" or "movers". Persons who, on Census Day, lived in the same residence as they did on the same date one year or five years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did one year, or five years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Kenora District is summarized as follows:

- 90.6% of residents were identified as "non-movers", 50.6% (29,440) of which were male and 49.4% (28,705) female; and
- "Movers" accounted for 9.4% of the population, 48.9% (2,950) of which were male and 51.2 % (3,090) female.

Table 3-5: Mobility Status of Residents, Kenora District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	58,140	90.6%	29,440	90.9%	28,705	90.3%
Movers	6,035	9.4%	2,950	9.1%	3,090	9.7%
Total	**64,175**	**100%**	**32,390**	**100%**	**31,795**	**100%**

3.2 Housing and Accommodations

Housing and accommodations are an important issue in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

The following section provides an overview of population and demographics at a district level.

The Kenora District has 32,914 dwellings, 75% of which are occupied by usual residents. The Kenora District has the highest number of dwellings occupied by non-usual residents in the RSA. This is likely due to the high number of cottagers within the region. The majority of the dwellings in the district are owned however the Kenora District has the largest percentage of government or band housing with just over 20% of occupied dwellings falling within this category. Over 60% of dwellings are occupied by 1 to 2 persons. Most of the dwellings in the Kenora District were constructed over 20 years ago, 50% of which were built prior to 1980. Most occupied dwellings are considered suitable for the household size and less than 20% require major repairs.

3.2.1 Housing Characteristics

Figure 3-1 below presents the total private dwellings and private dwellings occupied by usual residents in the Kenora District. Private dwellings occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 32,914 total private dwellings in the Kenora District as of 2021.
- Of the 32,914 private dwellings, 24,818 (75.4%) are occupied by usual residents

DRAFT

Table 3-7 below presents the total number of occupied dwellings for the Kenora District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of dwellings are classified as single-detached home at 81%;
- Apartments make up 10.1% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.3%.

Table 3-7: Kenora District – Occupied Private Dwellings by Structure Type, 2021

Structural Type	Count	Distribution
Single-detached house	20,100	81%
Semi-detached house	1,745	7%
Row house	915	3.7%
Apartment or flat in duplex	700	2.8%
Apartment in a building that has fewer than five storeys	550	2.2%
Apartment in a building that has five or more storeys	535	2.2%
Other single-attached house	200	0.8%
Moveable dwelling	75	0.3%
Total	**24,820**	**100%**

DRAFT

Table 3- below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Kenora District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings in the Kenora District are owned at 59.8%; and
- Occupied private dwellings which are rented or considered to be provided by the local government or band housing are nearly equal at 19.5% and 20.7% respectively.

Table 3-8: Private Dwellings by Tenure in Kenora District (2021)

Tenure	Count	Distribution
Owner	14,835	59.8%
Renter	4,840	19.5%
Dwelling provided by the local government, First Nation or Indian band	5,140	20.7%
Total	**24,815**	**100%**

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Kenora District. Table 3- below presents the total number of households by household size (i.e., the number of people per household) in Kenora District in 2021:

- The majority of households are occupied by two persons at 34%.
- The least number of households are occupied by four persons at 12%.

Table 3-9: Number of Households by Household Size in Kenora District (2021)

Household Size	Count	Distribution
1 person	6,835	28%
2 persons	8,385	34%
3 persons	3,470	14%
4 persons	3,005	12%
5 persons or more	3.130	13%
Total	**24,825**	**100%**

3.2.3 Housing Conditions

The following subsections describe housing conditions including the number of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and condition of dwellings for Kenora District.

Table 3- below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Kenora District:

- Dwellings constructed during the period from 1961 to 1980 is the largest group with 29% of private dwellings being built during this period;
- Dwellings constructed during the period from 2011 to 2015 is the smallest group with 4.3% of private dwellings being built during this period;
- 80.8% of the occupied private dwellings in the Kenora District were constructed during or prior to 2000.
- Over the last two decades, 4,760 dwellings were constructed which comprises less than 20% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Kenora District (2021)

Construction Period	Count	Distribution
1960 or before	5,300	21.4%
1961 to 1980	7,200	29.0%
1981 to 1990	3,770	15.2%
1991 to 2000	3,790	15.3%
2001 to 2005	1,290	5.2%
2006 to 2010	1,170	4.7%
2011 to 2015	1,055	4.3%
2016 to 2021	1,245	5.0%
Total	**24,820**	**100%**

DRAFT

Table 3- below presents the suitability of occupied private dwellings in Kenora District in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- In 2021, 9.2% of the occupied private dwellings in the Kenora District were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Kenora District (2021)

Suitability	Count	Distribution
Suitable	22,540	90.8%
Not suitable	2,285	9.2%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3- below presents the conditions of the private dwellings in Kenora District in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 17.3% of the occupied private dwellings in the Kenora District were categorized as requiring major repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Kenora District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	20,535	82.7%
Major repairs needed	4,290	17.3%
Total	**24,825**	**100%**

DRAFT

3.3 Community Services

Community services in North Caribou Lake First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care).

Community Services information for North Caribou Lake First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal which provides information on social, community, health and government services in northern Ontario.

3.3.1 Family Services

3.3.1.1 Family Services

Tikinagan is a social services organization that provides child and family services for North Caribou Lake First Nation. It is the largest provider of residential services in Ontario, with a service area that is approximately one third of the province of Ontario, servicing 30 First Nations communities (Tikinagan Child & Family Services, 2023a). In January 2020, Tikinagan was designated by the Ministry of Community and Social Services and the Band Council to provide child protection services to the families from our communities who reside in the District of Kenora (Tikinagan Child & Family Services, 2023a).

Tikinagan was created to provide culturally specific child and family services, that emphasize Indigenous culture as part of its child welfare support work. This recognizes that previously support services for children and families were generally provided from outside First Nations communities. There were reports of harms inflicted from this approach (Tikinagan Child & Family Services, 2023b).

Services are culturally responsive and supportive of traditional values and customs. The model of “Mamow Obiki-ahwahsoowin” mandates that in all aspects of service delivery, workers are expected to consult with Elders of the community for wisdom, guidance and teachings, and to receive direction on service delivery (Tikinagan Child & Family Services, 2023c). This specifically includes the requirement to consult with First Nations leadership on case management decisions.

An overall goal of the support work by Tikinagan is to keep children at home, and in their home communities. When necessary, foster homes for children in need are located in the child’s community or a nearby community, in order to reduce the distance from home and familiarity.

The Mamow Obiki-ahwahsoowin model mandates that authority rests the Chief and Council to declare that children be placed in Tikinagan care (Tikinagan Child & Family Services, 2023c).

3.3.1.2 Family Well-Being Program

The Family Well-Being Program is a Nishnawbe Aski Nation initiative that provides support to each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improving the overall health of communities. Its activities and programs include revitalizing Native languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counselling and child/youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events. The program works towards eliminating family violence, reducing the number of youths involved in the justice system, and decreasing the number of children in care (211 Ontario North, North Caribou Lake First Nation, 2023b).

3.3.2 Child Care and Youth Programs

3.3.2.1 Early Childhood Development

The Early Childhood Development program focuses on improving the health and social development of preschool children and their families in North Caribou Lake First Nation. It is designed to meet the emotional, social, health, nutritional and psychological needs of the child. It offers programs that culturally connect and spiritually root children in the traditional language and history of family, community and Nation. This involves parents, Elders and community members as much as possible.

The program offers a variety of school readiness programs such as learning shapes and numbers, building vocabulary and reading. Additionally, there is supervised indoor and outdoor playtime and gym activities and nutritious snacks ae provided (211 Ontario North, North Caribou Lake First Nation, 2023a).

DRAFT

3.3.2.2 Healthy Babies Healthy Children

The Healthy Babies Healthy Children program supports parenting and promote healthy child development for North Caribou Lake First Nation families with children under 6 years old, as well as Indigenous children at risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care, organizes prenatal classes, and operates a children's library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre- and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child's early years to offer development guidance and referrals to other programs and services (211 Ontario North, North Caribou Lake First Nation, 2023c).

3.3.3 Elder Care

Indigenous Services Canada, through the First Nations and Inuit Home and Community Care (FNIHCC) program, provides funding and guidance for Elder care. This program aims to establish home and community care services for Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services.

The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services (Indigenous Services Canada, 2023).

3.3.4 Health Services

3.3.4.1 Home and Community Care

The Home and Community Care program offers healthcare services to ill, injured, or Elder members of the North Caribou Lake First Nation community who require assistance to stay in their home. This program is available to members of North Caribou Lake First Nation between 30 to 60 years of age and requiring assistance at home due to illness or injury and individuals 60 years of age and over requiring assistance at home. The team assesses the health history of individuals and develops a personalized care plan. The services offered include home care nursing, personal care assistance with tasks such as dressing and bathing, basic or advanced practice foot care, teaching individuals to care for themselves, home support with light housekeeping, laundry, and meal preparation, respite for family members and caregivers, and help with light outdoor/yard work (211 Ontario North, North Caribou Lake First Nation, 2023d).

3.3.4.2 Falls Prevention and Community Elder Exercise Program

Falls prevention classes are provided for older adults and people with mobility issues or chronic conditions. This program aims to improve strength and balance to prevent injury and falls. These classes are taught by a physiotherapist or other regulated health care provider (211 Ontario North, North Caribou Lake First Nation, 2023e).

3.3.4.3 Diabetes Program

The Diabetes Program provides education, prevention, management and treatment services for North Caribou Lake First Nation community members living with diabetes or at risk of developing diabetes. It provides case management and screening services, basic foot care services and referrals to other health care professionals. It works to reduce the number of avoidable complications that can arise from uncontrolled diabetes and helps patients develop and implement an approach to care and management of diabetes. It further assists individuals in finding appropriate services and referrals to other health care professionals (211 Ontario North, North Caribou Lake First Nation, 2023f).

DRAFT

3.3.4.4 Health Services

The North Caribou Lake First Nation Nursing Station focuses on promoting physical and mental health for community members. It coordinates health care services through Nursing staff, two Community Health Representatives and visiting community Physician. It provides health awareness and counselling, education, and prevention workshops especially in the areas of diabetes and alcohol/ drug abuse by coordinating clinics/ workshops in areas that may include Diabetes, Immunization, Sexual Health and Communicable Diseases. It also offers a palliative care program when required.

It takes care of individual health care needs though advocacy on behalf of individual with other health professionals, coordination of one-on-one pre-natal care with the community health nurse and home visits to the sick, Elders, new mothers and persons with health care needs. Further, it offers assistance with coordinating local and long-distance travel arrangements for medical appointments (211 Ontario North, North Caribou Lake First Nation, 2023g).

3.3.4.5 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program provides assistance and support to individuals and families in North Caribou Lake First Nation who are struggling with addiction issues. This program offers Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides transportation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counseling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to band services, social services, detoxification and treatment centres and medical assistance (211 Ontario North, North Caribou Lake First Nation, 2023h).

3.3.4.6 Extended Health Benefits

The Extended Health Benefits program provides a range of health benefits to individuals and families who experience high health costs. Eligibility for the program is determined based on need and is open to members of North Caribou Lake First Nation aged 16 to 65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, North Caribou Lake First Nation, 2023i).

3.3.4.7 Immunization clinic

The North Caribou Lake First Nation immunization clinic provides inoculations or other measures to prevent North Caribou Lake First Nation community members from contracting specific controllable communicable diseases (211 Ontario North, North Caribou Lake First Nation, 2023j).

3.3.4.8 Suboxone Treatment Program

The Suboxone Treatment Program provides a detoxification program for members of North Caribou Lake First Nation who are struggling with prescription drug abuse and addiction. Operating as a day program, the initiative offers suboxone as a substitute for methadone to minimize the effects of withdrawal. The program includes intake, withdrawal treatment, counselling, and aftercare services. Additionally, the program provides mental health and addiction counselling, as well as referrals to other treatment centres and programs as required (211 Ontario North, North Caribou Lake First Nation, 2023k).

DRAFT

3.3.4.9 Travel Clerk

The Travel Clerk service is responsible for processing Non-Insured Health Service claims for community and Band members. This service submits medical appointment travel, mileage, meal and accommodation requests on behalf of individual. It also assists patients with making travel arrangements and maintains client documentation, receipts and related information (211 Ontario North, North Caribou Lake First Nation, 2023l).

3.3.4.10 Maternal Child Health Program

The Maternal Child Health Program provides services and programs to enhance the lives of pregnant women and families with infants and young children in the community. It offers education and information on topics like fetal alcohol spectrum disorders (FASD) awareness, child nutrition issues, healthy cooking and shopping for families and prenatal nutrition (211 Ontario North, North Caribou Lake First Nation, 2023m).

3.3.4.11 Mental Health Program

The Mental Health Program promotes good mental health and provides services for individuals with mental health and addictions issues in the North Caribou Lake First Nation community. It provides information, services and activities in areas such as addictions, depression, family violence, health promotion and stress management. It provides counselling services, cultural activities, feasts and ceremonies, group workshops, educational sessions that promote wellness and fitness activities. It also undertakes coordination and referrals to psychologist, psychiatrist, other counselling services and treatment centres and aftercare services (211 Ontario North, North Caribou Lake First Nation, 2023n).

3.3.5 Communications Services

3.3.5.1 Ontario Telemedicine Network (OTN)

The OTN offers access to specialized medical care through videoconferencing and tele-diagnostic equipment. It allows remote specialists to examine and prescribe treatments for patients in their home communities. With this service, patients can receive care without having to travel, reducing the need for transportation and potentially improving access to care (211 Ontario North, North Caribou Lake First Nation, 2023g).

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation rates were higher among non-Indigenous youths in Canada compared to Indigenous youth (Statistics Canada, 2023). However, when comparing First Nation youth living on reserves to First Nation youth living off reserves, those that live off reserves are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities for the North Caribou Lake First Nation using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

DRAFT

North Caribou First Nation has one school on-reserve – Native Sena School which offers schooling from junior kindergarten to Grade 8 (211 Ontario North, North Caribou Lake First Nation, 2023p). The school provides cultural activities and traditional Oji-Cree language as part of the school curriculum (211 Ontario North, North Caribou Lake First Nation, 2023p). Native Sena School has approximately 145 students. Wahsa Distance Education provides classroom instruction from Sioux Lookout for students who remain on reserve (211 Ontario North, North Caribou Lake First Nation, 2023p). A new school is currently under construction and will be able to host up to 500 students (Government of Canada, 2020).

3.5 Emergency and Protective Services

The socio-economic Baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

Police services in most Indigenous communities in the Nishnawbe Aski territory are provided by Nishnawbe Aski Police Services (NAPS), the Anishinabek Police Service (APS), municipal police services, or the Ontario Provincial Police (OPP). Fire services typically include both volunteer, and community and municipal fire services and departments.

Police services in North Caribou Lake First Nation are administered by the OPP. Emergency medical services in fly-in First Nation communities are limited in nature and tend to be supported by regional service centres. If emergency care is required within the Indigenous communities, patients are typically transported by air ambulance to the larger regional service centres.

Where information is available, community input indicates a general need for additional emergency and protective services to address socio-economic challenges experienced in the Indigenous communities.

3.6 Community Infrastructure

The socio-economic baseline includes a description of the following Community Infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in North Caribou Lake First Nation is described in Table 3-.

Indigenous Services Canada indicates that the water treatment plant is complete, and the long-term drinking water advisory will be lifted in June 2024 (Indigenous Services Canada, 2023).

DRAFT

Table 3-14: Description of Community Infrastructure in North Caribou Lake First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 3 Water Treatment System. ▪ Water Quality: fails health and aesthetic guidelines. ▪ Boil water advisory in place since March 2020.	▪ Level 1 Wastewater System. ▪ Constructed in 1997. ▪ Facultative Lagoon. ▪ Effluent Quality does not meet federal guidelines.	▪ Wataynikaneyap Power project connected the community to the electrical grid in September 2023.	▪ Landfill site on reserve.

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2024; Wataynikaneyap Power, 2023; Government of Ontario, 2021; 211 Ontario North, 2021.

3.7 Transportation

The socio-economic baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the socio-economic baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure available in the region, including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd, 2016).

Many First Nations communities in the Project study areas are remote and reachable only by air, water or winter roads. Other communities, typically those further south, have access to the provincial highway network.

North Caribou Lake First Nation is accessible via Pickle Lake/ North Caribou Winter Road Corridor. The Northern Ontario Resource Trail (NORT)/ Highway 808 is an all-season road that runs north from Pickle Lake. The North Caribou Winter Road Corridor is one of three winter road systems connecting communities from the NORT. The North Caribou Winter Road Corridor connects with five First Nation communities (MNDM, 2020).

3.7.1 Winter Road Traffic Volumes

North Caribou Lake First Nation does not rely on a winter road for access. The Wa-Pik-Che-Wanoog Bridge opened in 2017 and provides the community with year-round road access to NORT (CBC News, 2017). Air Transportation Network in North Caribou Lake First Nation

Air transport in and out of North Caribou Lake First Nation is provided via North Star Air (North Star Air, 2023).

DRAFT

3.7.2 Waterways in North Caribou Lake First Nation Traditional Territory

Waterways are an integral part of community life. Waterways have been and continue to be an important socio-cultural and economic part of daily life of Indigenous communities. They connect families and friends and provide an important part of the transportation network.

North Caribou Lake First Nation traditional territories are within the secondary watersheds and headwaters of Severn River (Government of Ontario, 2023). Today, the community is situated on the Meagamow Lake, connecting upstream to Windigo Lake, and down stream via the North Caribou River to the Eyapamakama Lake, and North Caribou Lake. Further west is the headwaters of the Winisk River; to the south is Cat Lake and the headwaters of the Albany River (Gordon, 1983). The people of North Caribou Lake First Nation have a long history in the area, as evidenced by archaeology and shared community history of Meagamow Lake and North Caribou Lake (Gordon, 1983).

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The socio-economic baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key socio-economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four socio-economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that “well-being” means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people’s overall “well-being.”

The four socio economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

CWB index scores in North Caribou Lake First Nation is described in Table 3-15.

DRAFT

Table 3-15: CWB Index Scores for North Caribou Lake First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	58	40	69	54	71
First Nations in Ontario	59	38	72	53	70
North Caribou Lake First Nation	54	26	76	53	61

Source: Indigenous Services Canada, 2019b.

North Caribou Lake First Nation has a low CWB score for education (26), in comparison to First Nations in Canada (40) and First Nations in Ontario (38).

North Caribou Lake First Nation's income score is 53, which is on par with First Nations in Canada (54) and First Nations in Ontario (53).

With a score of 76, the North Caribou Lake First Nation score for labour is comparable to but above those of First Nations in Canada (69) and First Nations in Ontario (72).

North Caribou Lake First Nation has a housing score of 61, which is comparable to but below those of First Nations in Ontario (70) and First Nations in Canada (71).

North Caribou Lake First Nation with a score of 54, for overall community's well-being and safety comparable to but slightly below that of First Nations in Ontario (59) and First Nations in Canada (58).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments responsible for serving Indigenous communities in Canada (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3- provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the OPP. The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (Ontario Provincial Police (OPP), 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-16: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total Crime, Rate, 2021*	Total Violent Crime Rate, 2021*	Total Sexual Assault, Rate, Level 1, 2021*	Total Drug Violations, Rate, 2021*
Nishnawbe-Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224
James Bay, OPP, rural	10,911	3,948	202	348

Note: *Data are reported as rates of 100,000 people.

ECONOMIC ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

4. Economic Environment

4.1 Labour Force and Employment

Indigenous people are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of the labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live.

The traditional economy is an important cultural and economic aspect of community life. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for North Caribou Lake First Nation.

The following section provides an overview of population and demographics at a district level.

The working age population in the Kenora District is projected to decline over the projection period from 41,115 in 2021 to 38,152 by 2043 (Statistics Canada, 2017; 2022a). The unemployment rate within the District is lower than Ontario at just under 9%, however, the participation rate is 57% in comparison to 63% for Ontario (Statistics Canada, 2022a).

The Kenora District population has the lowest percentage of population with postsecondary certificate, diploma or degree in the RSA at 40% (Statistics Canada, 2022a).

Over half of the population who pursued postsecondary education studied either architecture, engineering, and related trades, health and related field, or business, management, and public administration (Statistics Canada, 2022a).

4.1.1 Labour Force Characteristics

Table 4-1 present the forecasted working age population in Kenora District over the projection period: 2016, 2021, 2028, 2033, and 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada, 2017, 2022a). The values for 2028, 2023, and 2043 were forecasted based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64. Projected trends of working age population in Kenora District are summarized as follows:

- The working age population is decreasing over the projection period; and
- Based on current growth trends, the working age population is forecasted to decrease by 3,668 between 2016 and 2043, a decline of approximately 8.8%.

DRAFT

Table 4-1: Projected Working Age Population in Kenora District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution

DRAFT

Table 4-4 presents the number of jobs by 1-digit NOC[1] code for 2018 and 2022 in the Kenora District.

- Sales and service occupations is the leading job category in the Kenora District with 6,884 jobs in 2022 which accounts for 21.6% of the total jobs;
- The Kenora District has seen an increase in 7 occupational categories between 2018 and 2022 with an overall increase in jobs of 6% over the 4 years; and
- The occupational category with the largest percentage increase over the period was natural resources, agriculture, and related production occupations with a 15% increase.

Table 4-4: Kenora District – Occupations by Category (2018 – 2022)

Occupation Categories	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Business, finance and administration occupations	4,861	5,301	440	9%

DRAFT

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and knowledge Keepers. These teachings take place in community and out on the Land.

The Knowledge passed on from the ancestors sustain North Caribou Lake identity and way of life.

Table 4-5 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Kenora District for 2021.

- The majority of the population has a postsecondary certificate, diploma, or degree at 40.1%, within this group females are more likely to have a degree in comparison to males; and
- 30.9% of the population was no certificate, diploma, or degree at 30.9%. Males account for 52.9% of this group and females 47.1%.

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

Table 4-5: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Kenora District (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution

DRAFT

4.1.3 Labour Income

Table 4-7 present the total individual income by group for the population aged 15 and over for 2020 in Kenora District by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999;
- The smallest individual income group for both male and female is $150,000 and over with 3% and 1.1%, respectively;
- In 2020, there were 95 more females than males with individual incomes; and
- In 2020, 74% of females were making under $60,000 while only 65% of males were within this group.

Table 4-7: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Kenora District (2020)

Income Group	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Under $10,000 (including loss)	5,285	11.0%	2,885	12.1%	2,400	10.0%

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in Kenora District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from MNRF (Ministry of Natural Resources and Forestry), Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Kenora District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 4-9 presents the GDP for the Kenora District for 2006 and 2016 (Northern Policy Institute, 2019a).

- Between 2006 and 2016 there was a decline in GDP of just over 10%;
- These trends reflect changes in the size and occupational distribution of employment in the district; and
- The Kenora District represents 0.2% of Ontario's GDP in 2016.

Table 4-9: GDP for Kenora District (2006 – 2016) (Expressed in millions of dollars)

Year	2006	2016	2006 – 2016 Growth	2006 – 2016 % Change
GDP	2,309	2,077	-232	-10.1%

Source: Northern Policy Institute, 2019b.

4.2.2 Cost of Living

The largest census subdivision within the Kenora District is the City of Kenora, which accounts for approximately 23% of the population. Table 4-10 presents a comparison of shelter affordability between the City of Kenora and Ontario. Both shelter costs and the cost of purchasing a house in Kenora are significantly less than the provincial averages (Choose Kenora, 2023).

Table 4-10: Shelter Costs and Dwelling Values, City of Kenora vs Ontario, 2016

	Owned – Kenora	Rented Kenora	Owned – Ontario	Rented – Ontario
Median shelter cost	$1,002	$882	$1,299	$1,045
Average shelter cost	$1,155	$873	$1,463	$1,109
Median dwelling value	$225,210	-	$400,496	-
Average dwelling value	$260,789	-	$506,409	-

Source: Choose Kenora, 2023.

Table 4-11 present the number of households spending 30% or more of income on shelter costs for Kenora District in 2021. According to the Canada Mortgage and Housing Corporation (CMHC) housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

Of the nearly 19,000 owner or tenant occupied dwellings in the Kenora District, 13% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

Table 4-11: Distribution of Households Spending 30% or More of Income on Shelter Costs for Kenora District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	16,490	87%
Spending 30% or more of income on shelter costs	2,455	13%
Total Owner and Tenant Households	**18,945**	**100%**

Services and may end up having to stay in urban centres longer than planned (Nishnawbe Aski Nation, 2022).

DRAFT

4.2.3 Economic Development

The Kenora District is a census division in Northwestern Ontario. It is comprised of 57 census subdivisions, 47 of which are First Nation communities. Combined, the City of Kenora, the City of Dryden, and the Municipality of Sioux Lookout make up 43% of the District's population.

Kenora District's economy is supported by several key sectors, including manufacturing, health care, public administration, forestry, mining services, culture and recreation, construction, and tourism.

The City of Kenora 5-year Tourism and Economic Development Strategy sets out three goals: tourism development, economic development, and tourism and economic foundations, with nine accompanying objectives. Of the nine objectives listed in the Strategy, two pertain to economic development (City of Kenora, 2021):

- Activate development on Kenora's vacant and underutilized lands:
  - Improve the development readiness of publicly owned residential, commercial, and industrial lands.
  - Improve awareness of development opportunities, incentives, and partnerships available for vacant and underutilized lands through marketing efforts.
- Support the growth and retention of local businesses and emerging sections:
  - Establish a centralized business hub and resource centre to support local businesses.
  - Position Kenora to take advantage of specific strategic sector opportunities.
  - Provide supports and information to new and existing businesses through community partner and City led initiatives.
  - Prioritize support of COVID-19 response and relief efforts to assist the local business community.

The Municipality of Sioux Lookout 2020-2025 Strategic Plan states the following goals for community innovation and development (Municipality of Sioux Lookout, 2020):

- Provide infrastructure and housing to meet the needs of our community, now and as it grows:
  - Confirm that our assets are sustainable and that they will meet our long-term needs.
  - Use municipal best practices to identify innovative approaches to managing our infrastructure.
  - Verify that our transportation infrastructure allows people to get around safely and efficiently.
  - Encourage an increase in the housing available in Sioux Lookout to meet our current and future needs.
- Collaborate with community partners to foster growth and economic development:
  - Work proactively with local and regional economic development groups to advance our community's best interests;
  - Support local efforts to improve Sioux Lookout as a place to do business.
  - Work with local partners to promote and encourage tourism.
  - Support public transportation to make it available and useful to as many of our residents as possible.
- Enable community growth through innovative, proactive planning:
  - Confirm that the Municipality's planning policies and practices are appropriate to address current needs and accommodate future growth.
  - Work to secure sufficient commercial property to attract businesses to Sioux Lookout.
  - Minimize regulatory obstacles to development while ensuring appropriate processes are followed.
  - Develop programs and policies that encourage new businesses to move to Sioux Lookout and existing ones to stay here.

DRAFT

- Strengthen and enhance Sioux Lookout's status as "Hub of the North":
  - Assure that YXL remains the #1 airport in our area.
  - Collaborate with the hospital to maintain a strong working relationship.
  - Consider the implications for Indigenous people of any Municipal policies.
  - Recognize that addressing our social issues enhances Sioux Lookout's status as "Hub of the North".

4.3 Business Environment

4.3.1 Local Economy

North Caribou First Nation has two main stores within the community – Northern Store and Onadamakay for general goods.

Table 4-12 presents a breakdown of all 21 industries based on 2-digit North American Industry Classification System (NAICS[2]) codes and their presence within the geographical boarders of the Kenora District in 2018 and 2022. Trends of industry presence in Kenora District between 2018 and 2022 are summarized as follows:

- The industries with the highest growth between 2018 and 2022 include professional, scientific, and technical services (24%) and wholesale trade (19%); and
- 9 of the 21 industries reported saw a decline in jobs between 2018 and 2022.

Table 4-12: All Industry Presence in Kenora District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change

[2] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

DRAFT

Table 4-13 presents the industry supply chain, the purchases an industry makes from all other industries, in the Kenora District in 2020. This table displays the value and percentage of in-region purchases and imported purchases for 2020 that are summarized as follows:

- One fifth of supply chain purchases are made within the Kenora District;
- The industry with the highest percentage of in-region purchases is agriculture, forestry, fishing, and hunting at 71%;
- The industry with the lowest percentage of in-region purchases is management of companies and enterprises at 0%; and
- Total supply chain purchases amounted to approximately $2.7 billion in 2020.

Table 4-13: Industry Supply Chain in Kenora District (2020)

Industry	In-region Purchases	% In-region Purchases	Imported Purchases	% Imported Purchases	Total Purchases
Agriculture, forestry, fishing and hunting	$82,131,318	71%	$34,088,922	29%	$116,220,240
Mining, quarrying, and oil and gas extraction	$35,424,541	32%	$76,226,128	68%	$111,650,669

DRAFT

Table 4-14 presents the regional requirements, the value of goods and services demanded of the Kenora District by industry in 2020. Regional Requirements show the value of goods/services purchased from an industry (either in or outside the area) in order to meet the needs of the area. The table presents the level of demand for each industry met in-region and the demand met by imports that are summarized as follows:

- The majority of demand for goods and services is met by imports (82.8%);
- The industry meeting the most demand in-region is agriculture, forestry, fishing, and hunting with 52.6% of demand met in-region;
- Seven industries meet less than 10% of demand within region; and
- The total demand in 2020 was approximately $7.26 billion.

Table 4-14: Regional Requirements to Meet Demand by Industry in Kenora District (2020)

Industry	Demand met In-region	% Demand met In-region	Demand met by Imports	% Demand met by Imports	Total Demand
Agriculture, forestry, fishing and hunting	$84,483,367	52.6%	$76,021,015	47.4%	$160,504,382
Mining, quarrying, and oil and gas extraction	$39,675,550	4.8%	$781,595,917	95.2%	$821,271,467

DRAFT

4.3.2 Mining, Aggregate and Forestry Activities

Table 4-15 presents industry data for the following 2-digit NAICS[3] industries in Kenora District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction;
- Agriculture, forestry, fishing, and hunting;
- Each industry includes a variety of occupations which include but are not limited to:
- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above 1 indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry grew by 222 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry exceeds the national average by more than 6 times in 2022;
- The agriculture, forestry, fishing, and hunting industry declined by 68 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is slightly higher than the national average with 1.37 in 2018 and 1.17 in 2022.

Table 4-15: Mining, Quarrying, and Oil and Gas Extraction Industry in Kenora District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	2,136	2,358	222	10%	5.9	6.5
Agriculture, forestry, fishing and hunting	493	425	-68	(14%)	1.4	1.2

Source: Lightcast, 2023b.

[3] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to traditional practices which include lakes and rivers for fishing and trapping corridors and trails for hunting and trapping. Many Indigenous communities rely on traditional practices, such as fishing and hunting as a source of food and income. As such, it is important to identify areas where traditional practices are used, to determine potential effects of the Project on Indigenous communities and their traditional use of lands and resources.

North Caribou Lake First Nation has settled on the Meagamow Lake to North Caribou Lake area for generations, and habitation in the area dates back millennia (Gordon, 1983).

North Caribou Lake First Nation identified the following species that are harvested: snowshoe hare, moose, beaver, marten, sturgeon, pike, bass and walleye (Golder, 2018). Historically there is evidence of consumption of beaver, muskrat, woodland caribou, moose, loon and trout (Gordon, 1983).

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas including travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

North Caribou Lake First Nation would historically gather every summer at the home of their leader, Gici David, located at Atikup Point. When Gici David died in 1907, the Anglican Church built a church at this location (Gordon, 1983). Atikup Point continues to be an important gathering area for North Caribou Lake First Nation.

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the Project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinaabe/ Mushkeego and Métis Peoples. “The Anishiniimowin/Anishinaabe/Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinaabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022). The Métis homelands are also present within the James Bay Treaty area. The Anishiniimowin/ Anishinaabe/ Mushkeego and Métis Peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define ongoing rights and obligations on all sides. These agreements set out continuing Treaty Rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations;
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two--thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013).*

Treaty No. 9 was signed between the Anishiniimowin/Anishinaabe/Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

In April 2023, leaders from 10 Treaty No. 9 First Nations announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development. North Caribou Lake First Nation is not part of the lawsuit but is within land covered by Treaty 9.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

At this time, North Caribou Lake First Nation does not have a Land Code under the *First Nations Land Management Act* and land use is governed under the *Indian Act*.

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the Public Lands Act (Section 6.6.2)

As described in Section 5, traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to community based land use plans (CBLUPs) initiated by Indigenous communities.

6.5 Road/Transportation Studies

No Road/Transportation Studies were available for review for North Caribou Lake First Nation at this time.

DRAFT

6.6 Provincial Plans and Policies

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations communities and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with Indigenous communities and groups, among other land uses in First Nations areas, traditional and customary use, as well as the potential for permissible use of lands for forestry, tourism, recreation, mineral exploration and mining, renewable energy, access and infrastructure, fire management, and climate change management.

6.6.2 Public Lands Act

The Ontario *Public Lands Act* provides MNRF the authority to manage Crown land. Crown land occupies approximately 87% of all land and water in Ontario with 95% of northern Ontario considered Crown Land (MNRF, 2023). The *Public Lands Act* outlines the use, management, sale and disposition of public lands and forests (Ontario, 2022). The Act guides Ontario's public land use planning and development, regulating public and private roads on public lands.

6.6.3 The Planning Act

The Ontario *Planning Act* is provincial legislation that sets out the ground rules for land use planning. The *Planning Act* outlines how land may be used and controlled and the purpose of this Act is to make sure that planning processes are fair, open, accessible, timely, efficient and promote the best economic and environmental interest within the provincial policy framework. The *Planning Act* allows the province to integrate matters of provincial interest into municipal and regional planning decisions by requiring that all decisions that are made are in conformance with provincial plans.

6.6.4 Fisheries Management Plan

Fisheries Management Planning as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and rivers and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake and river system in a holistic manner and includes a range of management options to secure a healthy lake environment that conserves the diversity of the fish community and provide opportunities to contribute to the social and economic well-being of the surrounding area. Ontario is divided into Fisheries Management Zones (FMZ). Each specific FMZ outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h). North Caribou Lake First Nation lies within FMZ 2.

DRAFT

6.7 Land Use Plans and Policies

Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the socio-economic Baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses on the land. Traditional land and resource use is described in Section 5.

Limited information is publicly available about this community's documented plans for land use (if any exist); however, as information becomes available through dialogue with the community, with permission from the community, information will be considered as part of the Environmental Assessment (EA)/Impact Assessment (IA).

6.8 Industrial Land Use

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, this is done online through the Mining Lands Administrative System (MLAS).

Under Section 50 of the *Mining Act*, a Mining Claim provides exclusive rights for the claim holder to explore for minerals and rights to enter, use and occupy surface rights as necessary for exploration and development. A mining claim does not provide mining rights for the land to the holder of the claim. Someone that holds a prospector license may stake out a mining claim on land that is open for staking and prospect for minerals on any Crown land, including land traditionally used by Indigenous Peoples and communities (Natural Resources Canada, 2013).

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

DRAFT

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council.

To enhance Indigenous community participation, the Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act*. Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to North Caribou Lake First Nation available at this time.

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities'. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for a millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is also important because it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

North Caribou First Nation has two main stores within the community – Northern Store and Onadamakay for general goods. North Caribou First Nation is serviced by flights with Weagamow Air and Wasaya Airways at Round Lake airport located 1.9 km west of the community and Weagamow Air Base (Northwest Health Line, 2023d).

DRAFT

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and North Caribou Lake First Nation Reserve.

In the region, provincial parks include:

- Winisk River Provincial Park

In 1966, the growing demand for tourism led to provincial government setting aside the "Winisk Wild River Indian Guide Territory" and established the Winisk River Provincial Park over Winisk Lake and Winisk River in 1968 (Ministry of the Environment Conservation and Parks, 2021a). This move, however, intersected with Indigenous Nations exercise of their inherent rights to traditional lands, water usage, and the pursuit of economic and community development goals. The Winisk River Provincial Park is located to the north of the Webequie First Nation Reserve, approximately 2.17 km from WSR. The parkland is approximately 141,000 ha in size and boasts unique landforms including a large moraine and drumlin fields. The only access to the park is by canoe, air or by float plane park (Ministry of Natural Resources, 1991). This park does not feature facilities for visitors but activities such as white-water paddling, canoe and kayaking, back country camping, fishing, hunting and snowmobiling are supported within the park (Ontario Parks, 2022). Five outpost camps are located along the Winisk River System to support fishing and hunting tourism. The Winisk River Provincial Park Interim Management Plan, 1991 provides direction for the management of the park (Ministry of Natural Resources, 1991). Additional tourism development will only be permitted once the management plan is complete (Ministry of Natural Resources, 1991)."

- Albany River Provincial Park

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/Anishinaabe/Mushkegowuk communities. First Nation members have cabins and camps which they use for harvesting and hunting within their traditional territory.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or North Caribou Lake First Nation Reserve.

Conservation Reserve

There are no conservation reserves which intersect with the Project Footprint or North Caribou Lake First Nation Reserve.

In the region, conservation reserves include:

- Severn River Conservation Reserve

The Severn River Conservation Reserve is located within the Severn River watershed and contains several important core natural heritage areas that are inventoried and protected by the Ministry of Natural Resources as Areas of Natural and Scientific Interest (ANSI) (Government of Ontario, 2021). The Severn River watershed also holds cultural importance for First Nation communities, such as the Kitchenuhmaykoosib Inninuwug First Nation who use the historic canoe routes within the watershed and the lakes and rivers for fishing (Wildlands League, 2013).

SUPPLY ROAD

March 11, 2024

Chief Cornelius Benson
North Caribou Lake First Nation
General Delivery
Weagamow, ON
P0T 3B0

Re: Preliminary draft North Caribou Lake First Nation Community Existing Conditions Summary
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Benson,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the North Caribou Lake First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;

- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;
- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the North Caribou Lake First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead

P0T 3B0

Dear Chief Sakchekapo,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 14, 2024, the package status indicates it was delivered to your community on February 1, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Aquatic Habitat Preliminary Findings.**

The livestreaming event is scheduled for **April 1st, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Sakchekapo,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Surface Water Preliminary Findings**

The livestreaming event is scheduled for **April 8th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Geology, Terrains, and Soils Preliminary Findings.**

The livestreaming event is scheduled for **April 22nd, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-722-4300 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the

	EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

May 29, 2024

Dear Chief Sakchekapo,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, June 10th from 11:00-11:45am EST** for North Caribou Lake First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:https://us06web.zoom.us/j/85871907772?pwd=z5qmxTdmwlyUj6mbUnyvPsoD5UAd9f.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 858 7190 7772 **Passcode:** 086746

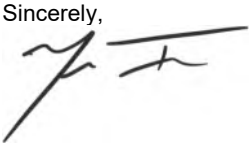
In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sakchekapo,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sakchekapo:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Chief Leo Sachekapo
North Caribou Lake First Nation
General Delivery
Weagamow, ON
P0T 3B0

Dear Chief Sakchekapo,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package has been delayed and is currently in transit to your community. We are aware of the Canada Post strike which began on November 15, 2024, that has caused a further delay to the delivery of the report. Because of the strike, our team will be sending the files for Consultation Progress Report Round 3 via WeTransfer in a separate email.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board

	meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.

3

January 9, 2025

Dear Chief Sakchekapo,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, January 13th from 11:00-11:45 AM EST for North Caribou Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session can be found at the following link: https://us06web.zoom.us/j/87208215988

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

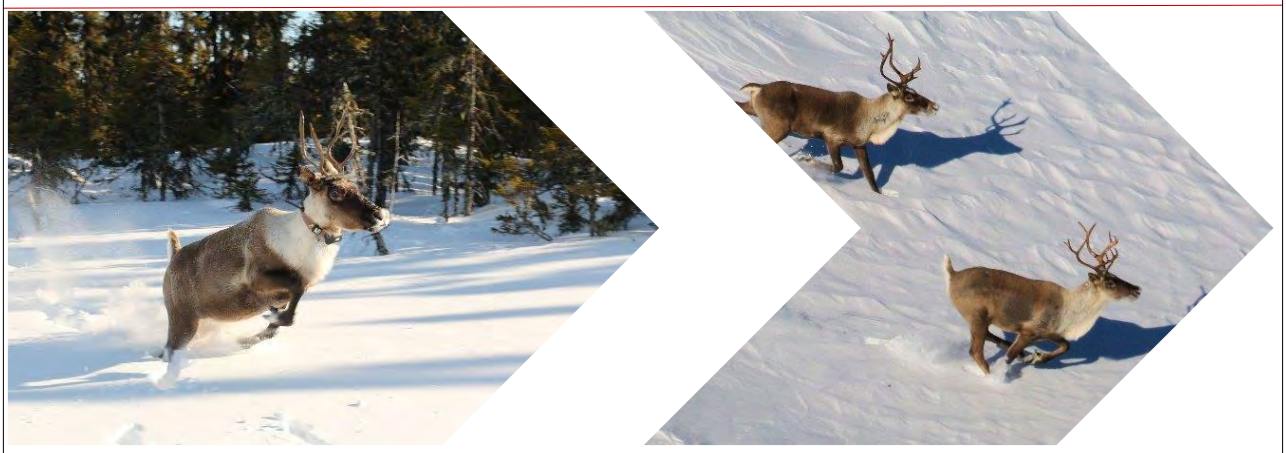
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

SUPPLY ROAD

February 13, 2025

Dear Chief and Council,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, February 24th from 11:00-11:45 AM EST for North Caribou Lake First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/85681137757?pwd=x1rjAAb8H6kBLsTCtAGxaBRjHaBMRw.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Chief Leo Sakchekapo
North Caribou Lake First Nation
General Delivery
Weagamow, ON P0T 3B0

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sakchekapo,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

APPENDIX P2.I.23

Correspondence with Indigenous Communities and Groups – Shibogama Council

Webequie Supply Road Project Consultation Log

Records Found: 1

Shibogama First Nation Council — Aboriginal Businesses

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Aug 18, 2022 15:33 Method: E-mail
Topics to be Discussed: Notice of Public Information Centre
Brianna Patrick and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email blast to all Indigenous communities and organizations with a Notice of Public Information Centre being held on August 25, 2022 at 2:00pm to 5:00pm and at 6:00pm to 9:00pm at the Valhalla Hotel inn, Thunder Bay to provide interested parties an opportunity to learn about the ongoing Environmental Assessment/Impact Assessment (EA/IA) study for the WSR Project and provide feedback. The Notice provided information on the Project purpose, details of the EA/IA, and the contact information of Project Leads. The Notice also included a map of the Project area and two alternative road locations.
Attached File: WSR-Notice of Public Information Centre #1-2022-08-05.pdf

Contact Date: Aug 23, 2022 12:57 Method: E-mail
Topics to be Discussed: Notice of Public Information Centre
Brianna Patrick and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email blast to all Indigenous communities and organizations as a reminder about the Public Information Centre being held on August 25, 2022 at 2:00pm to 5:00pm and at 6:00pm to 9:00pm at the Valhalla Hotel inn, Thunder Bay to provide interested parties an opportunity to learn about the ongoing Environmental Assessment/Impact Assessment (EA/IA) study for the WSR Project and provide feedback. The email included a Notice of Public Information Centre which provided information on the Project purpose, details of the EA/IA, and the contact information of Project Leads. The Notice also included a map of the Project area and two alternative road locations.
Attached File: WSR-Notice of Public Information Centre #1-2022-08-05.pdf

Contact Date: Sep 22, 2023 18:41 Method: E-mail
Topics to be Discussed: Notice of Public Information Centre #2 for EA
Don Parkinson, Consultation Lead of AtkinsRéalis, emailed the Notice of Public Information Centre #2 (PIC #2) for the Environmental Assessment Phase of the Webequie Supply Road Project to public and private stakeholders, land tenure and claim holders, federal and provincial agencies, and other interested parties. Don reminded that a Public Information Centre (PIC) is being held to provide interested parties an opportunity to learn and provide feedback on the Environmental Assessment / Impact Assessment (EA/IA) for the Webequie Supply Road. The email also informed that the PIC #2 will consist of a presentation at 2:00pm and 6:00pm followed by an informal drop-in session with display information about the project. The PIC has been scheduled to be on Monday, October 2, 2023 and Tuesday, October 3, 2023 from 2:00pm to 4:00pm and 6:00pm to 8:00pm at the Victoria Inn Hotel & Convention Centre in Thunder Bay, Ontario and Thursday, October 12, 2023 from 6:00pm to 8:00pm at the Cedar Meadows Resort & Spa in Timmins, Ontario. The Notice provided information on the Project purpose, details of the EA/IA, and the contact information of the Project Leads. The Notice also included a map of the Project area and two alternative road locations.
Attached File: WSR-Notice of Public Information Centre #2-2023-09-25.pdf

Contact Date: Aug 29, 2024 15:26 Method: E-mail
Topics to be Discussed: Notice of Public Information Center #3
Don Parkinson, Consultation Lead of AtkinsRéalis, emailed the Notice of Public Information Centre #3 (PIC #3) for the Environmental Assessment Phase of the Webequie Supply Road Project to public and private stakeholders, land tenure and claim holders, federal and provincial agencies, and other interested parties. Don reminded that a Public Information Centre (PIC) is being held to provide interested parties an opportunity to learn and provide feedback on the Environmental Assessment / Impact Assessment (EA/IA) for the Webequie Supply Road. The email also informed that the PIC #3 will consist of a presentation followed by an informal drop-in session with display information about the project. The PIC #3 has been scheduled to be on Tuesday, September 10, 2024 from 2:00pm to 4:00pm and 6:00pm to 8:00pm at the Best Wetsern Premier Northwood Hotel in Timmins, Ontario, and Thursday, September 12, 2024 from 2:00pm to 4:00pm and 6:00pm to 8:00pm at the Superior Inn Hotel in Thunder Bay, Ontario. The Notice provided information on the Project purpose, details of the EA/IA, and the contact information of the Project Leads.

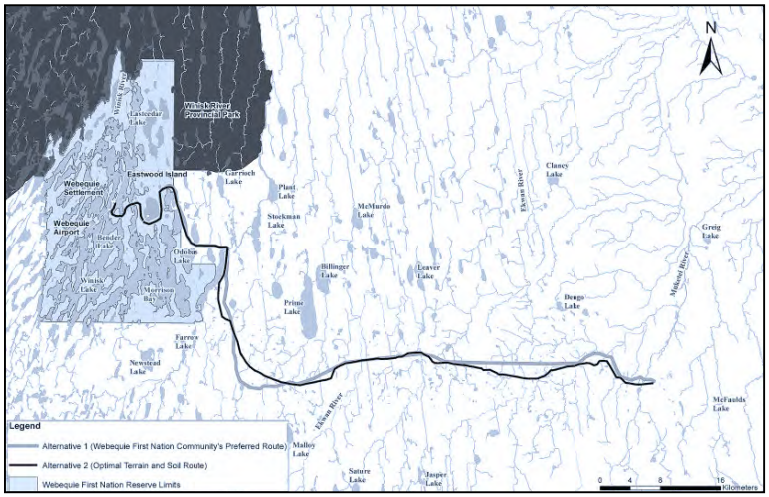
NOTICE OF COMMENCEMENT OF ENVIRONMENTAL ASSESSMENT

Webequie Supply Road Project
Webequie First Nation

Webequie First Nation (WFN) is beginning an Environmental Assessment (EA) for the Webequie Supply Road Project ("the Project") under the *Environmental Assessment Act.*

The proposed Webequie Supply Road will be an all-season road corridor approximately 107 km in length from Webequie First Nation to the mineral deposit area near McFaulds Lake. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from Webequie First Nation to a 56 km segment running east, before terminating near McFaulds Lake. A total of 17 km of the corridor is located within Webequie First Nation Reserve lands. The preliminary supply road route alternatives that are to be examined and evaluated in the EA are shown in the accompanying Key Plan.



PROJECT PURPOSE

The purpose of the Project is to create an all-season corridor that will facilitate the movement of materials, supplies and people from the Webequie Airport to the proposed mine development and mineral exploration activities in the McFaulds Lake area of Northwestern Ontario. The Project is intended to provide the WFN with a means to better service their community and be a contributor to the local economy by providing employment and economic development opportunities.

THE PLANNING PROCESS

On October 8th, 2021 the Minister of the Environment, Conservation and Parks (MECP) approved the Terms of Reference (ToR) with amendments for the Webequie Supply Road EA Study. A copy of the approved ToR and MECP Notice of Approval can be accessed on the project website at www.supplyroad.ca.

The Webequie Supple Road EA Study will be carried out according to the approved ToR, the amendments contained in the Notice of Approval, and the requirements of the *Environmental Assessment Act.* In addition, an impact assessment is required for the Project under the federal *Impact Assessment Act.* For the Webequie Supply Road Project, the two levels of government have indicated a willingness to follow a coordinated assessment process, and for the proponent to produce one body of documentation with the results of the study in an Environmental Assessment Report/Impact Statement (EAR/IS). A draft EAR/IS will be made available for review and comment. The EAR/IS will then be updated as required and submitted to the MECP and Impact Assessment Agency of Canada for review. At that time, the public, Indigenous communities and other interested persons will be informed when and where the EAR/IS can be reviewed.

CONSULTATION

Members of the public, Indigenous communities, agencies, and other interested parties are encouraged to actively participate in the planning of the Project by attending consultation opportunities or contacting Webequie Project Team staff directly with information, comments or questions. Consultation opportunities are planned throughout the planning process and the purpose, timing and nature of these activities will be advertised on the project website, local newspapers and direct email/mail out.

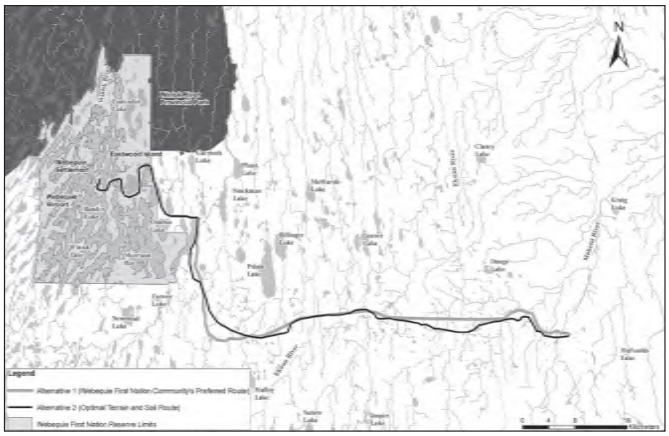
Webequie Supply Road Project
Environmental Assessment / Impact Assessment



Webequie First Nation (WFN) is undertaking a provincial Environmental Assessment (EA) and federal Impact Assessment (EA/IA) for the Webequie Supply Road Project ("the Project").

The proposed Webequie Supply Road will be an all-season road corridor approximately 107 km in length from Webequie First Nation to the mineral deposit area near McFaulds Lake. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from Webequie First Nation to a 56 km segment running east, before terminating near McFaulds Lake. A total of 17 km of the corridor is located within Webequie First Nation Reserve lands. The preliminary supply road route alternatives that are to be examined and evaluated in the EA/IA are shown in the accompanying Key Plan.

PROJECT PURPOSE

The purpose of the Project is to create an all-season corridor that will facilitate the movement of materials, supplies and people from the Webequie Airport to the proposed mine development and mineral exploration activities in the McFaulds Lake area of northwestern Ontario. The Project is intended to provide WFN with a means to better service their community and be a contributor to the local economy by providing employment and economic development opportunities.

THE PLANNING PROCESS

On October 8, 2021, the Minister of the Environment, Conservation and Parks approved the Terms of Reference (ToR) with amendments for the Webequie Supply Road EA Study. The Webequie Supply Road EA Study is being carried out according to the approved ToR and the requirements of the *Environmental Assessment Act*. In addition, on February 24, 2020, the Impact Assessment Agency of Canada published a Notice of Commencement of the Impact Assessment (IA) and provided WFN with Tailored Impact Statement Guidelines for meeting the requirements under federal *Impact Assessment Act*. The Project is now in the Impact Statement (IS) phase. For the Project, the two levels of government have indicated a willingness to follow a coordinated assessment process, and for the proponent to produce one body of documentation with the results of the study in an Environmental Assessment Report/Impact Statement (EAR/IS). A draft EA/IS will be made available for review and comment, and at that time, the public, Indigenous communities and other interested persons will be informed when and where the EAR/IS can be reviewed.

PUBLIC INFORMATION CENTRE #1

Public Information Centre (PIC) #1 is being held to provide interested parties an opportunity to learn about the ongoing EA/IA study for the Project and provide feedback. The PIC will consist of a presentation at 2:00 p.m. and at 6:00 p.m. followed by an informal drop-in centre with display information about the Project. Project Team representatives will share information on the EA/IA process, studies being conducted, approach for evaluation of alternatives, Indigenous Knowledge program, feedback we have heard to-date, and future consultation and engagement opportunities. You are invited to attend the PIC, which has been scheduled as follows:

Thursday August 25, 2022
2:00 p.m. to 5:00 p.m. and 6:00 p.m. to 9:00 p.m.
Valhalla Hotel and Conference Centre
Viking Room
1 Valhalla Inn Rd, Thunder Bay

The Public Information Centre (PIC) venue is wheelchair accessible. The PIC livestream will be available on the project website: www.supplyroad.ca. You can also find information on the study progress and updates on the website.

NOTICE OF PUBLIC INFORMATION CENTRE #2
Webequie Supply Road Project Environmental Assessment / Impact Assessment

Webequie First Nation (WFN) is undertaking a provincial Environmental Assessment (EA) and federal Impact Assessment (EA/IA) for the Webequie Supply Road Project ("the Project").

The proposed Webequie Supply Road is an all-season road of approximately 107 km in length from Webequie First Nation to the mineral deposit area near McFaulds Lake. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from Webequie First Nation to a 56 km segment running east, before terminating near McFaulds Lake. A total of 17 km of the corridor is located within Webequie First Nation Reserve lands. The alternative routes for the supply road within the preliminary corridor that will be examined and evaluated in the EA/IA are shown in the accompanying Key Plan.

PROJECT PURPOSE

The purpose of the Project is to create an all-season corridor that will facilitate the movement of materials, supplies and people from the Webequie Airport to the proposed mine development and mineral exploration activities in the McFaulds Lake area of Northwestern Ontario. The Project is a means for WFN to better service their community and contribute to the local economy by providing employment and economic development opportunities.

THE PLANNING PROCESS

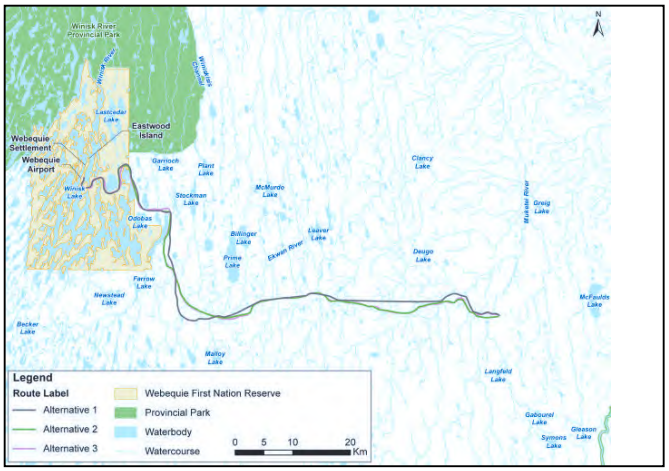
On October 8, 2021, the Minister of the Environment, Conservation and Parks approved the Terms of Reference (ToR) with amendments for the Webequie Supply Road EA Study. The Webequie Supply Road EA Study is being carried out according to the approved ToR and the requirements of the Environmental Assessment Act. In addition, on February 24, 2020, the Impact Assessment Agency Canada published a Notice of Commencement of the Impact Assessment (IA) and provided WFN with Tailored Impact Statement Guidelines for meeting the requirements under federal Impact Assessment Act. The Project is now in the Impact Statement (IS) phase. For the Project, the two levels of government have indicated a willingness to follow a coordinated assessment process, and for the proponent to produce one body of documentation with the results of the study in an Environmental Assessment Report/ Impact Statement (EAR/IS). A draft EA/IS will be made available for review and comment, and at that time, the public, Indigenous communities, and other interested persons will be informed when and where the EAR/IS can be reviewed.

PUBLIC INFORMATION CENTRE #2

Public Information Centres (PIC) are being held to provide interested parties an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC will consist of a presentation at 2 p.m. followed by an informal drop-in centre with display information about the project. Project Team representatives will share information on EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps) including results from the assessment, feedback we have heard to-date, and future consultation and engagement opportunities. You are invited to attend the PIC, which have been scheduled as follows:

October 3 & October 4, 2023
2 p.m. to 4 p.m. & 6 p.m. to 8 p.m.
Victoria Inn Hotel and Convention Centre, 555 Arthur St W, Thunder Bay

October 12, 2023
6 p.m. to 8 p.m
Cedar Meadows Resort & Spa, 1000 Norman St, Timmins



Key Plan – Location of Webequie Supply Road Route Alternatives

If you cannot attend the in-person sessions, you can also find the information on the study progress and updates on our website: https://www.supplyroad.ca/. The Public Information Centre venues are wheelchair accessible and there will be a kid's corner with colouring books at the venues. The PIC livestream will be available on the project website: www.supplyroad.ca.

APPENDIX P2.I.24

Correspondence with Indigenous Communities and Groups – Wapekeka First Nation

Webequie Supply Road Project Consultation Log

Records Found: 1

Wapekeka First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if WAFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether WAFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked WAFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if WAFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited WAFN to participate in the WSR socio-economic primary data collection program. The letter asked WAFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if WAFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Chief Brennan Sainnawap of Wapekeka First Nation (WAFN), which including a letter, map and fact sheet regarding the WSR Socio-Economic Primary Data Collection Program. The email was a follow up to the letter originally sent on December 21, 2021. Marian indicated that the WSR Project Team has not received a response from WAFN regarding their interest in participating in the program and requested WAFN let the team know if they are interested. Marian provided her email and cell phone contact information if WAFN has any questions and a link to the WSR webpage regarding the socio-economic program for more information.

Topics to be Discussed: Virtual Information Session
Don Parkinson and Laura Drumbrell of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Wapekeka First Nation (WAFN) on August 8, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment/Impact Assessment (EA/IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Laura noted that no comments have been received from WAFN at this time, and that the Project Team would be happy to visit the community to discuss the Project further. Laura provided further information regarding the Indigenous Knowledge/Indigenous Land Use Program, potential jobs and employment which will be explored through the baseline socio-economic study, and the Cumulative Effects Analysis for the Project. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community representatives in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: ATRI Forum Invitation Follow Up
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Brennan Sainnawap of Wapekeka First Nation (WAFN) to follow up on the invitation for the Aboriginal and Treaty Rights and Interests (ATRI) Forum hosted by the Province of Ontario in Thunder Bay on February 8 & 9, 2023. The email explained that it is not too late to RSVP for the event. Attached to the email was the poster which explained that the 2-day forum will focus on discussing potential impacts to Northern Indigenous Communities ATRI as they relate to the WSR, Northern Road Link (NRL), and Marten Falls First Nation Community Access Road (MFCAR) Projects. The poster provided more information on how community representatives can attend, the purpose of the forum, who should attend from each community, and an email address for the community to RSVP. A preliminary agenda was also included on the poster. The Province of Ontario, Michael Fox of WSR, Andrea Nokleby of MFCAR, and Mishal Naseer of NRL provided their emails on the poster for further information if WAFN has any questions or comments.

Topics to be Discussed: WSR Newsletter 17 and 18
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap which included 50 copies of the English WSR Newsletter – Issue 17 and 50 copies of the English WSR Newsletter - Issue 18. Newsletter 17 provided information about the Surface Water baseline study findings and Cumulative Effects. Newsletter 18 provided information about Consultation Round 2 topics as well as fish and fish habitat baseline study findings. Both of the newsletters provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their e-mail address and phone number if WAFN has any questions or comments.

Topics to be Discussed: Radio, Livestreams, Engagement Options
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Wapekeka First Nation (WAFN)'s Chief Brennan Sainnawap which included a letter and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on March 14, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on an overview of the Alternatives Assessment Process, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team will begin Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Wapekeka First Nation (WAFN)'s Chief Brennan Sainnawap, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of WAFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Wapekeka First Nation (WAFN) on April 24, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, the Project Team played a voiceover presentation which included a testimony by the Webequie First Nation Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don discussed several concerns that had been previously raised by WAFN. Don mentioned that the concerns are regarding ownership of the road, public access to the road leading to overharvesting, impact on family traditional use and traplines. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

Topics to be Discussed: WSR Newsletter - Issue 21
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap which included 50 copies of the English WSR Newsletter – Issue 21. The newsletter provided information about the Human Health Study, Country Foods Assessment, and the livestream and radio schedule for April 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if WAFN has any questions or comments.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Wapekeka First Nation (WAFN)'s Chief Brennan Sainnawap which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on May 9, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Analysis of Alternatives and Multiple Accounts Analysis, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Brennan Sainnawap of Wapekeka First Nation (WAFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding WAFN’s participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted that the Project team has also phoned the band office on January 17, 2022, February 24, 2022, April 13, 2022, and sent an email on January 20, 2022 and February 24, 2022 to follow up and advise that the IKLRU Program has started and to confirm if the community is interested in participating. The letter provided an overview of the IKLRU Program as part of the Environmental Assessment / Impact Assessment and indicated that the community is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. The Project team encouraged the community to contact Ontario to determine how to proceed with submission of an application to receive funding for the community and offered support throughout the process. The letter requested an indication of the community’s interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Wapekeka First Nation (WAFN)'s Chief Brennan Sainnwap which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on July 5, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on construction camps, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Wapekeka First Nation (WAFN) on July 10, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 2 of Consultation Round 2 will discuss the Project team’s work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from WAFN were in attendance. Don reiterated that the Project Team would like to hear from WAFN community members in-person and that a recording of the session would be available through YouTube and the WSR Website.

Topics to be Discussed: Engagement Options, PIC 2, ATRI Forum
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent a fax to Wapekeka First Nation (WAFN)'s Chief Brennan Sainnawap which included a letter that provided various community engagement options to help create awareness. The letter also provided information on the Public Information Center #2 that took place on October 3rd & 4th in Thunder Bay and October 12th in Timmins, with a link provided to the website to access the formal notice, livestream, and update. The letter also provided information about the Aboriginal and/or Treaty Rights and Interests Forum happening on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and/or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Road Projects. The letter provided links to the Project Team's social media channels and Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter provided the status of delivery as of March 14, 2024. An overview of the Consultation Progress Report for Round 2 was provided and the letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on March 18, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on the Floating Road, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if WAFN has any questions or comments.

Topics to be Discussed: Draft Preliminary Existing Conditions Document and Consultation Progress Report Round 2
McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team phoned the Wapekeka First Nation band office to follow up with Chief Brennan Sainnawap about the Draft Preliminary Socio-Economic Existing Conditions Document that was sent to the Chief via email on March 11, 2024 and the Consultation Progress Report for Consultation Round 2 that was mailed to the community on January 29, 2024. The purpose of the call was to see if the community had any feedback or questions on the report. McKenna spoke with the receptionist who indicated the Chief was not in office. McKenna left a message with her name, number, and purpose of the call.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Wapakeka First Nation (WAFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 1 presentation that began with a review of the project to date, followed by a discussion of preliminary results for two valued components: surface water and fish and fish habitat. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from WAFN were in attendance.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Brennan Sainnawap of Wapekeka First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for WAFN on July 22, 2024, from 11:00-11:45am EST with registration links for the session. The information session will include the second part of the presentation on WSR's Environmental Assessment / Impact Assessment (EA/IA) activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if WAFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 3 Part 2
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Wapekeka First Nation (WAFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 2 presentation that began with a review of the project to date, followed by a discussion of preliminary results for the vegetation, wildlife, social environment, aboriginal and Treaty rights valued components. The presentation concluded with discussion on the cumulative effects assessment and the assessment of other aspects and effects. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from WAFN were in attendance.

Topics to be Discussed: Field Notice Fall Geo-Technical Drilling Program
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap regarding a Field Notice for the Fall geo-technical drilling program. The email indicated that AtkinsRéalis is providing a notification to complete a drilling program for the WSR project to further engineering design and support the coordinated provincial Environmental Assessment and Federal Impact Assessment. The letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). The email indicated that all works will be conducted in accordance with the permit conditions issued by MNR. Attached to the email was the Field Notice explaining what is happening, the schedule and what to expect. For further questions, the contact information for Hayden Yip of AtkinsRéalis was provided.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for WAFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Wapekeka First Nation. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from WAFN were in attendance.

Topics to be Discussed: Consultation Progress Report Round 3 File Transfer
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) sent an email to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap with a letter attached regarding follow up for the Consultation Progress Report for Round 3. The letter indicated that on November 5, 2024, the Project team mailed a package via Canada Post to the community containing the Consultation Progress Report for Round 3. The letter also indicated that due to the Canada Post strike which began on November 15, 2024, there has been a delay to the delivery of the report and the team will be sending the files via WeTransfer in a separate email.

The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. A list of key milestones and topics covered in the round of consultation was provided. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3 File Transfer
McKenna Baxter of Indigenous and Community Engagement (ICE) sent a Wetransfer email to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap, containing a letter, the Consultation Progress Report for Round 3, and the supporting documents. The letter indicated that on November 5, 2024, the Project team mailed a package via Canada Post to the community containing the Consultation Progress Report for Round 3, but due to the Canada Post strike which began on November 15, 2024, there has been a delay to the delivery of the report and the team will be sending the files via WeTransfer. The other attachments included the Consultation Progress Report for Round 3 as well as the Appendices. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. A list of key milestones and topics covered in the round of consultation was provided. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. Michael's email and cell phone contact information was provided if WAFN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Ian Frederickson and Michael Fox of Indigenous and Community Engagement (ICE) and the?Webequie?Supply Road (WSR) Project team sent an email to Chief Brennan Sainnawap of Wapekeka First Nation with links to?invitations for the Three Road Project Gathering & Expo hosted by Webequie?First Nation (WFN) and Marten Falls First Nation (MFFN) with support from the Province of Ontario. The email noted that the gathering will provide an engaging and interactive consultation space to discuss the WSR draft EAR/IS, Marten Falls Community Access Road draft EAR/IS, and Northern Road Link Projects. The invitation provided the dates and locations for the events in Thunder Bay and Timmins: February 19-20, 2025, at the Valhalla Inn Hotel in Thunder Bay, and February 25-26, 2025, at the Cedar Meadows & Spa in Timmins. A general summary of event highlights was provided along with information about funding and attendance. The invitation asked the community to RSVP by January 31, 2025, to the Province of Ontario's email address provided?to reserve accommodations. The invitation noted that the event aims to?foster an understanding of the three road projects and their potential impacts while creating a collaborative space for consultation. For further questions regarding funding inquiries or additional details, the Province of Ontario's email address was provided.?

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Wapekeka First Nation's (WAFN) Chief Brennan Sainnawap, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for Round 4 Part 2 for WAFN on February 3, 2024, from 2:00-2:45pm EST with registration links for the session. The information session will include the second presentation on WSR's Cumulative Effects Assessment. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. The letter also attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if WAFN has any questions or comments.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Brennan Sainnawap of Wapekeka First Nation (WAFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road
michael.fox@supplyroad.ca

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Web-Preliminary Study Areas for Indigenous Land Use and Interests-2021-12-13

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Wapekeka First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Wapekeka First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Wapekeka First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Wapekeka First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Wapekeka First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Wapekeka First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Wapekeka First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Brennan Sainnawap,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the “assessments” and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Wapekeka First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Wapekeka First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Wapekeka First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Brennan Sainnawap,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Wapekeka First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

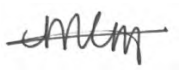
Next Steps

In order to confirm that Wapekeka First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

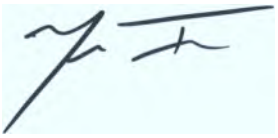
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
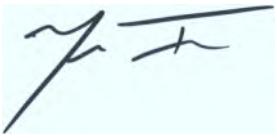
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

March 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 3.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the third part in the series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **March 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

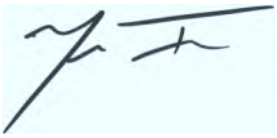
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

April 1, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Socio-Economics. This upcoming week's session is: **WSR Presents: Socio-Economics.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 6th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to brianna.patrick@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.

WEBEQUIE SUPPLY ROAD (WSR) PROJECT

Socio-Economic Study Plan
Fact Sheet

What is the primary purpose of the Socio-Economic Study Plan?

To characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) as a result of the construction and operation/maintenance of the WSR. Provide recommendations for minimizing negative socio-economic effects and enhancing beneficial effects of the Project.

What are socio-economics?

Studying socio-economics provides information about current jobs, income, education and housing conditions in a community.

What kind of information is going to be gathered?

- Community values;
- Community demographics (age, gender, marital status, education, labor force activity, health, etc.);
- The type of access each community has to education, jobs, or transportation; and
- Well being and safety.

Who is the information being gathered from?

- The 22 Indigenous communities that have been identified as the ones whose established or asserted Aboriginal and Treaty rights may be adversely affected by the Project and/or may have interests in the project.

WSR240-WEB-PR-FS-0016 Web-Socio Economic Fact Sheet-English-website-2022-04-26

*The Project Team will respect protocols and work with each community to understand how the information will be transferred, stored, and applied, and will be protected and kept confidential.

How is the information on community socio-economics being collected?

Primary information will be collected from Indigenous communities:

- A socio-economic survey using Survey Monkey, which will be sent by e-mail/letter;
- Key informant interviews with Chief and Councils, band administration staff, social service providers, healthcare providers, and knowledge keepers; and
- Collection of Indigenous knowledge through engagement activities.

Secondary information will be collected and reviewed:

- Published data from government websites, Indigenous community websites, municipal websites, and other open-source data. This information will be used to identify community demographics, community infrastructure, community social services, etc.

WSR240-WEB-PR-FS-0016

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Brennan Sainnawap,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Wapekeka First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

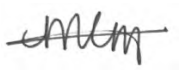
Next Steps

In order to confirm that Wapekeka First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road

Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

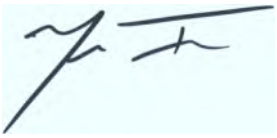
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

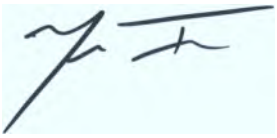
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:
https://www.youtube.com/channel/UCh_heAjQoY2hPBPMr68MCzw

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

July 25, 2022

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, August 8 between 12pm and 1:30pm** for Wapekeka First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZYrdu6spzoiHNYEtrT6Xm3er-dLe64bXR61.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 826 1749 1862 & Passcode: 631616.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/wapekeka/.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead

July 26, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project also has a YouTube channel where we post informational videos, past livestreams and radio shows, and communication materials. Please visit:
https://www.youtube.com/channel/UCh_heAjQoY2hPBPMr68MCzw

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Craig Wallace, Project Manager, SNC-Lavalin Inc.

October 07, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations - Caribou.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **October 11th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Dear Chief Sainnawap:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. On November 2, 2022, a notice card was left indicating when and where to pick up the package. As of today, December 14, 2022, the package has not been picked up by your community.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

WSR WEBEQUIE SUPPLY ROAD

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

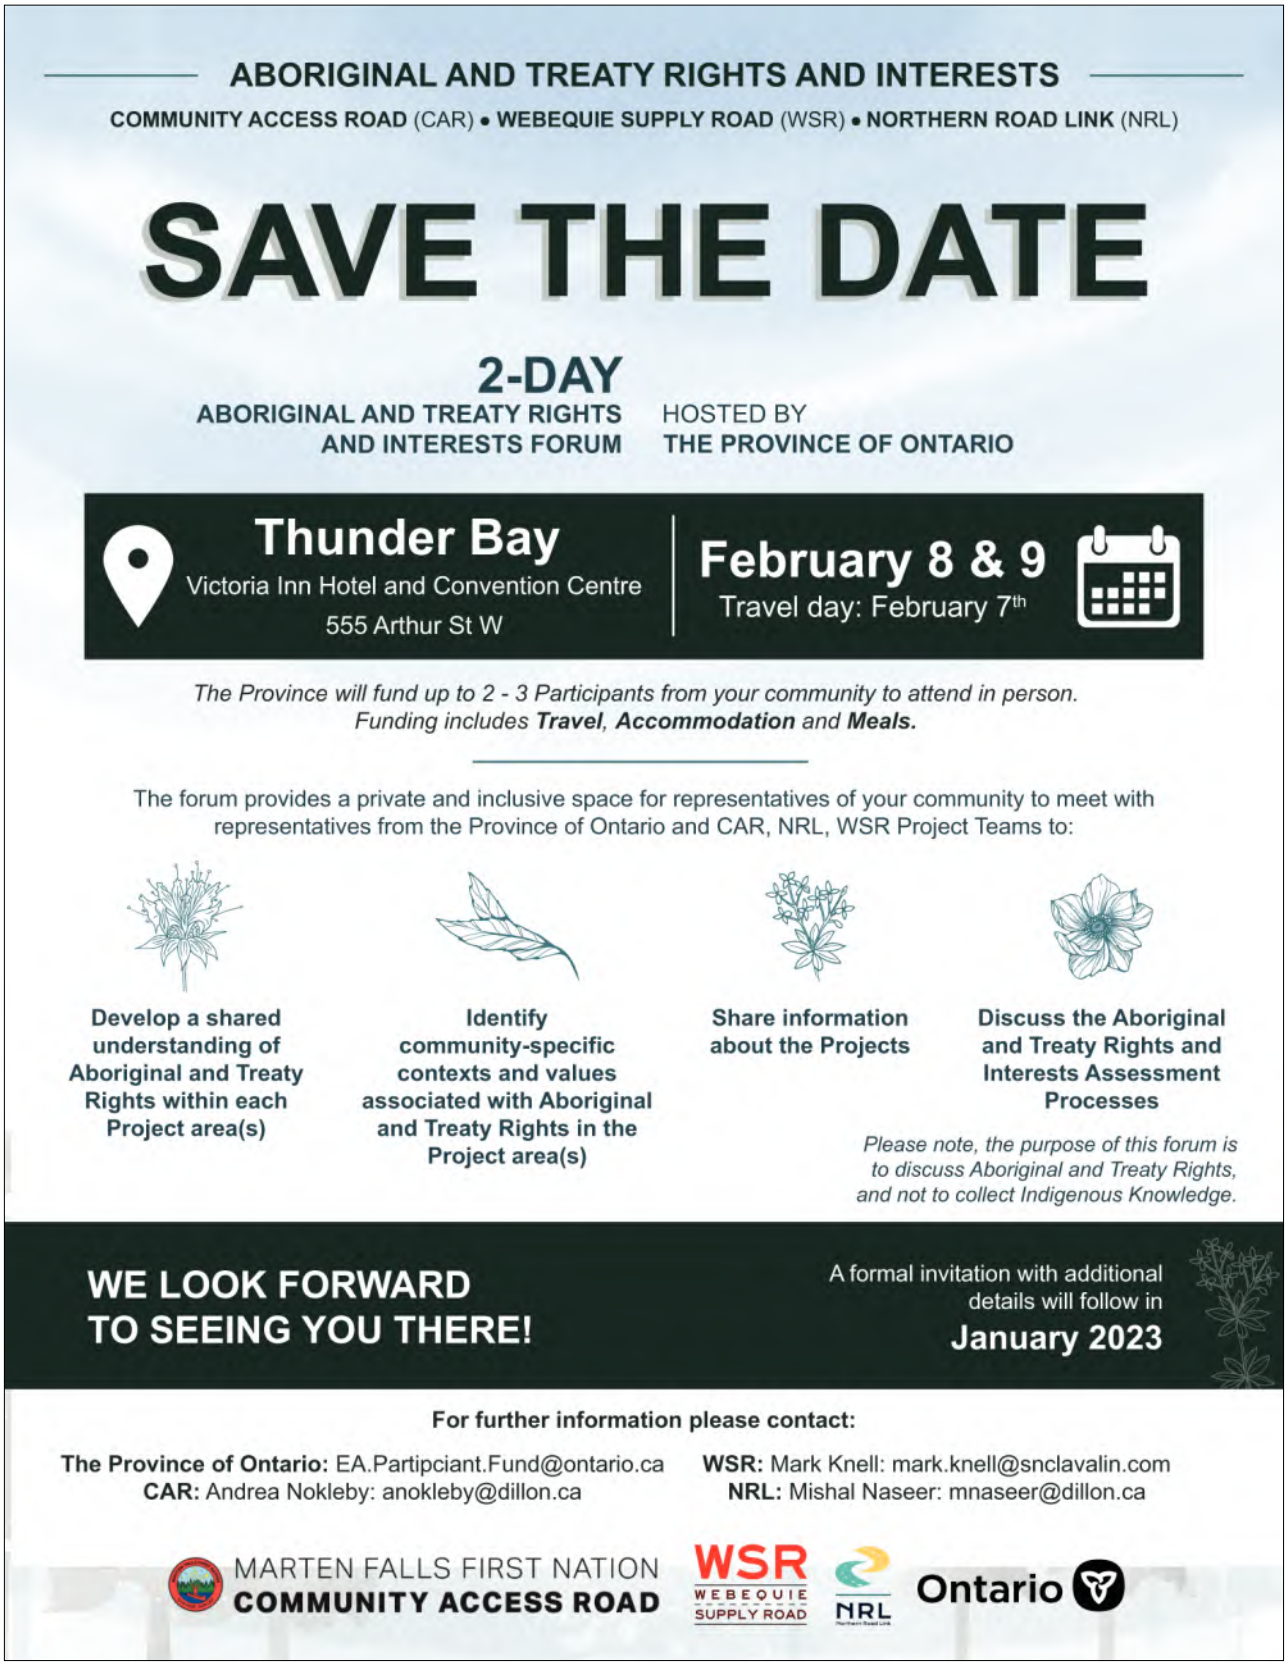
Activity Date: Dec 20, 2022 16:02
File Name: Save the Date - 2 Day Aboriginal and Treaty Rights and Interests Forum - Thunder Bay February 2023.pdf
Activity Method: E-mail
Date Published: Dec 20, 2022



ABORIGINAL AND/OR TREATY RIGHTS AND INTERESTS
WEBEQUIE SUPPLY ROAD (WSR) • MARTEN FALLS FIRST NATION COMMUNITY ACCESS ROAD (MFFN CAR) • NORTHERN ROAD LINK (NRL)
YOU ARE INVITED!
2-DAY ABORIGINAL AND/OR TREATY RIGHTS AND INTERESTS FORUM
HOSTED BY THE PROVINCE OF ONTARIO
Thunder Bay
Victoria Inn Hotel and Convention Centre
555 Arthur Street West
February, 8 & 9 2023
Webequie First Nation and Marten Falls First Nation encourage you to participate in a 2-day forum focused on discussing potential impacts to northern Indigenous communities' Aboriginal and/or Treaty Rights and Interests as they relate to the following Projects:
Webequie Supply Road (WSR) • Northern Road Link (NRL)
Marten Falls First Nation Community Access Road (MFFN CAR)
Participant Funding
The Province of Ontario will fund up to 3 representatives from your community to attend, including travel, accommodation and meals. All questions about funding or the coordination of funding should be directed to the Province of Ontario at ea.participant.fund@ontario.ca.
Additional community representatives are welcome to attend.
Purpose
The Purpose of this Forum is to create a respectful, culturally-sensitive, and collaborative space to develop an understanding of Aboriginal and/or Treaty Rights and Interests in any of the Project areas (WSR, MFFN CAR, and NRL) as your Aboriginal and/or Treaty Rights and Interests and Interests may be impacted by these Projects. Please note the purpose of this event is to discuss Aboriginal and/or Treaty Rights and Interests and not to collect Indigenous Knowledge.
Who Should Attend from your Community
Representatives who are knowledgeable about and comfortable speaking to the Rights and Interests of your community in any of the Project areas are encouraged to attend.
RSVP to ea.participant.fund@ontario.ca by January 27th
(note that you can still attend without an RSVP)

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Chief Brennan Sainnawap
Wapekeka First Nation
P.O. Box 2
Angling Lake, ON
P0V 1B0

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

2

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 11, 2023

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, April 24th from 2:00pm-3:00pm EST** for Wapekeka First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/81722219740

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 817 2221 9740**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/wapekekafn/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

April 19, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Road Corridor Alternatives.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, April 25th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 6, 2023

Dear Chief Sainnawap,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to you on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022, February 24, 2022, April 13, 2022, and sent an email on January 20, 2022 and February 24, 2022 to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating. To date, we have not received any further response.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Wapekeka First Nation is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. We encourage you to contact Ontario to determine how to proceed with submission of an application to receive funding for your community. Please let us know if there is any way we can offer our support throughout this process.

We want to learn more about your community from your perspective on a range of topics, including:

- Community history

- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests, and ensuring they are protected.

We have a timeframe for the EA/IA process, to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you, to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

June 28, 2023

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 10th between 2:00pm-3:00pm EST** for Wapekeka First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/81566071842

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 815 6607 1842**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/wapekekafn/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

August 9, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter

November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

January 25, 2024

Chief Brennan Sainnawap
Wapekeka First Nation
P.O. Box 2
Angling Lake, ON P0V 1B0

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

WSR
WEBEQUIE
SUPPLY ROAD

February 15, 2024

Chief Brennan Sainnawap
Wapekeka First Nation
P.O. Box 2
Angling Lake, ON
P0V 1B0

Dear Chief Sainnawap,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates that a notice has been left at the mailing address on February 6, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to

	explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Dear Chief Sainnawap,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 22, 2024, the package status indicates that a notice has been left at the mailing address on February 6, 2024, pending pickup.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Bridges and Water Crossings.**

The livestreaming event is scheduled for **February 26th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

The information provided in this document is preliminary at this time, and it has been prepared with information that is known specifically for Wapekeka First Nation. This is a living draft document that has yet to be reviewed and validated by the Community.

Webequie First Nation is the proponent of the Project. The Project Team led by Webequie First Nation is striving to gather as much Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree) and Métis Indigenous Knowledge as it relates to the Project and to help inform the socio-economic baseline. This document will be continuously updated when information from the Wapekeka First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources and capacities of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trust.

Webequie is an Anishinaabemowin Tawin (community) located in Treaty No. 9 territory, about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (the good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation like many Indigenous Nations, and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' Socio-Economic data because Webequie First Nation, the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2. Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC, officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern hub of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established the constitutional basis for future treaty negotiations and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	The *Indian Act*: Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claims staking procedures and prospectors' licenses providing exclusive rights to stake claims and work upon Crown lands.
Ontario Registered Trapline System, 1946	The Registered Trapline System imposed exclusive ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP was Mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada (TRC), 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR socio-economic baseline are Anishiniimowin, Anishinaabe and Mushkeego First Nations, and Métis Peoples. First Nations have traditional territories that cover the lands in the study area. A number of First Nations in the RSA are located north of the provincial highway system, and accessible only by air, water and winter road. Other First Nations, and the Métis community, located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850.

Wapekeka First Nation is located 610 km north of the City of Thunder Bay and 193 km northwest of Webequie First Nation in northern Ontario. The community is situated on the shores of Angling Lake.

The community is formally affiliated with Shibogama First Nations Management, a registered not-for-profit Tribal Council (Windigo First Nations Council, 2023), and the Nishnawbe Aski Nation provincial territorial organization.

Wapakeka First Nation is located in the census District of Kenora.

Wapekeka First Nation has a Chief, Deputy Chief, and four Councillors, with a custom electoral system. The most recent election was held on November 15, 2023 (CIRNAC, 2023s).

2.2 Community History

Wapekeka First Nation was once considered part of the Kitchenuhmaykoosib Inninuwug Band but received its own Band status in 1976 (Randazzo and Robidoux, 2018). The history of the Wapekeka First Nation includes a community that has close kinship ties with Kitchenuhmaykoosib Inninuwug First Nation (Kayahna Tribal Area Council, 1985). The southern tributaries of the Severn and Fawn Rivers was historically utilized as the main homeland area for Wapekeka First Nation (Kayahna Tribal Area Council, 1985). There was a heavy dependence on rivers as a resource, especially Big Trout Lake, Long Lake, Wapekeka Lake and tributaries of the Severn and Fawn Rivers (Kayahna Tribal Area Council, 1985).

The Wapekeka First Nation traditionally used two main summer travel routes – one along Wapekeka Lake and the other along the Fawn River. The Wapekeka Lake summer travel route was historically used for three primary reasons: as employees of HBC, for members in search of work in Fort Severn or Churchill and for social and family visits. The Fawn River route was historically used as an important HBC supply route to the coastal communities, but after World War II, supplies were flown in by air to these communities.

2.3 Community Values and Aspirations

In 2005, Wapekeka First Nation joined with Kitchenuhmaykoosib Inninuwug (Big Trout Lake), Muskrat Dam and Wawakapewin to declare a moratorium on mining exploration and forestry on their traditional lands (Mining Watch, 2005). They outlined they that they have the right to own, control and use the lands and territories as they have traditionally owned and occupied them (Mining Watch, 2005). Wapekeka First Nation is currently part of an alliance with Grassy Narrows, Kitchenuhmaykoosib Inninuwug and Neskantaga to defend their lands and waters against mining prospectors (Alhmidi, 2023).

DRAFT

Wapakeka First Nation is a partner in the Thawikayhigan Limited Partnership (TKG Group), established in 2018, and which is owned equally by Kingfisher Lake, Kasabonika Lake, Kitchenuhmaykoosib Inninuwug, Wapekeka, Wawakapewin and Wunnumin Lake First Nations. The Group, based in Thunder Bay, works to generate new economic opportunities for its communities. “This is our first business acquisition that will directly service our First Nations,” said Jonathon Mamakwa, President of the TKG Group. “This is key in our overall plan in contributing to the development of healthy First Nation communities with vibrant economies that support future generations,” he adds (Dryden Now, 2023).

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools used to assess socio-economic conditions in communities, as these data can also be used to identify vulnerable groups such as women, disabled persons, Elders and youth. These are segments of the population that could either benefit or be negatively impacted (directly or indirectly) by the Project, and often experience barriers to participation as under-represented groups. Population and demographics are described in this section using the following indicators using Census data:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into existing socio-economic conditions where the Project is being considered. The information is to be used in the assessment of potential effects of the Project and to develop strategies to mitigate any negative effects.

The following section provides an overview of population and demographics at the District level.

3.1.1 Population Overview

The Kenora District population is projected to experience slight growth over the projection period from 2021 to 2043, increasing from 66,000 in 2021 to 68,095 by 2043. Nearly half of the Kenora District population identifies as either First Nation, Métis, or Inuit. English is spoken in nearly all homes and there is a small percentage of in-migration to the District.

Table 3-1 presents the forecasted population in the Kenora District for the period 2021 to 2043, broken down by self-identified gender. Population trends by self-identified gender in Kenora District are summarized as follows:

- Over the projection period of 2016 to 2043 the female population is forecast to decrease and the male population is forecast to increase
- Between 2016 and 2043 the male population is forecast to increase from 32,895 to 35,716, an 8.6% increase.
- Between 2016 and 2043 the female population is forecast to decrease from 32,640 to 32,425, a 0.7% decrease.
- Between 2016 and 2043, the distribution of the male population is forecasted to increase from 50.2% to 52.5% and the female population is forecast to decrease from 49.8% to 47.6%.

Table 3-1: Kenora District – Population Forecast by Self-Identified Gender (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	32,895	50.2%	32,640	49.8%
2021	66,000	100%	33,400	50.6%	32,600	49.4%
2028	66,657	100%	34,120	51.2%	32,544	48.8%
2033	67,130	100%	34,644	51.6%	32,504	48.4%
2043	68,086	100%	35,716	52.5%	32,425	47.6%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-2 presents the forecasted population for the Kenora District over the projection period of 2021 to 2043, by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in Kenora District are summarized as follows:

- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 14,440 to 12,527, a 13.2% decrease;
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 41,820 to 38,152, an 8.8% decrease; and
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 9,275 to 21,313, a 129.8% increase.

Table 3-2: Kenora District – Population Forecast by Age Group (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	14,440	22%	41,820	64%	9,275	14%
2021	66,000	100%	14,065	21%	41,115	62%	10,820	16%
2028	67,129	100%	13,556	20%	40,148	60%	13,425	20%
2033	68,336	100%	13,204	19%	39,471	58%	15,661	23%
2043	71,992	100%	12,527	17%	38,152	53%	21,313	30%

Source: Statistics Canada, 2017a; 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.2 Indigenous Identity

Table 3-3 presents the population of the Kenora District by Indigenous identity for 2021. Indigenous identity of the population in the Kenora District population is summarized as follows:

- 50.6% of the population identifies as non-Indigenous.
- The majority of the population that identifies as Indigenous identifies as First Nations at 43.1% of the population, followed by Métis (6.3%). No respondents identified themselves as Inuk .

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Kenora District (2021)

Indigenous Identity	Count	Distribution
First Nations	27,815	43.1%
Métis	4,070	6.3%
Inuk	30	0.1%
Non-Indigenous	32,680	50.6%
Total	**64,595**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.1.3 Languages

Table 3-4 presents the languages spoken most often in the home within the Kenora District in 2021. Languages spoken by the population in Kenora District in 2021 are summarized as follows:

- The majority of homes in the Kenora District speak English while at home at approximately 94%;
- Indigenous languages are the second most spoken within the home at 5.5%; this category includes 39 Indigenous languages; and
- French and other non-official languages make up the remaining 1.1% of homes at 0.7% and 0.4%, respectively.

Table 3-4: Language Used Most Often at Home, Kenora District (2021)

Language	Count	Distribution
English	59,670	93.5%
Indigenous Languages	3,510	5.5%
Other Non-Official Languages	430	0.7%
French	225	0.4%
Total	**63,835**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of Kenora District residents in 2020. Mobility status refers to the status of a person's place of residence on Census Day in relation to their place of residence on the same date 1 or 5 years earlier (Statistics Canada, 2022a).

Residents are categorized as "non-movers" or "movers". Persons who, on Census Day, lived in the same residence as they did on the same date 1 year or 5 years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did 1 year, or 5 years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Kenora District is summarized as follows:

- 90.6% of residents were identified as "non-movers", 50.6% (29,440) of which were male and 49.4% (28,705) female; and
- "Movers" accounted for 9.4% of the population, 48.9% (2,950) of which were male and 51.2 % (3,090) female.

Table 3-5: Mobility Status of Residents, Kenora District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	58,140	90.6%	29,440	90.9%	28,705	90.3%
Movers	6,035	9.4%	2,950	9.1%	3,090	9.7%
Total	**64,175**	**100%**	**32,390**	**100%**	**31,795**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-6 presents the immigration status of Kenora District residents for 2021.

- 4% of the population were classified as immigrants; and
- The distribution of immigrants between genders was equivalent in 2021.

Table 3-6: Immigration Status of Population in Kenora District (2021)

Immigration Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-immigrants	62,160	96%	31,465	96%	30,700	96%
Immigrants	2,490	4%	1,185	4%	1,305	4%
Total	**64,650**	**100%**	**32,650**	**100%**	**32,005**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2 Housing and Accommodations

Housing and accommodations are an important issue in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generations of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

The following section provides an overview of population and demographics at the District level.

In general, the Kenora District has 32,914 dwellings, 75% of which are occupied by usual residents. The Kenora District has the highest number of dwellings occupied by non-usual residents in the RSA. This is likely due to the high number of cottagers within the region. The majority of the dwellings in the district are owned however the Kenora District has the largest percentage of government or band housing with just over 20% of occupied dwellings falling within this category. Over 60% of dwellings are occupied by 1 to 2 persons. Most of the dwellings in the Kenora District were constructed over 20 years ago, 50% of which were built prior to 1980. Most occupied dwellings are considered suitable for the household size and less than 20% require major repairs.

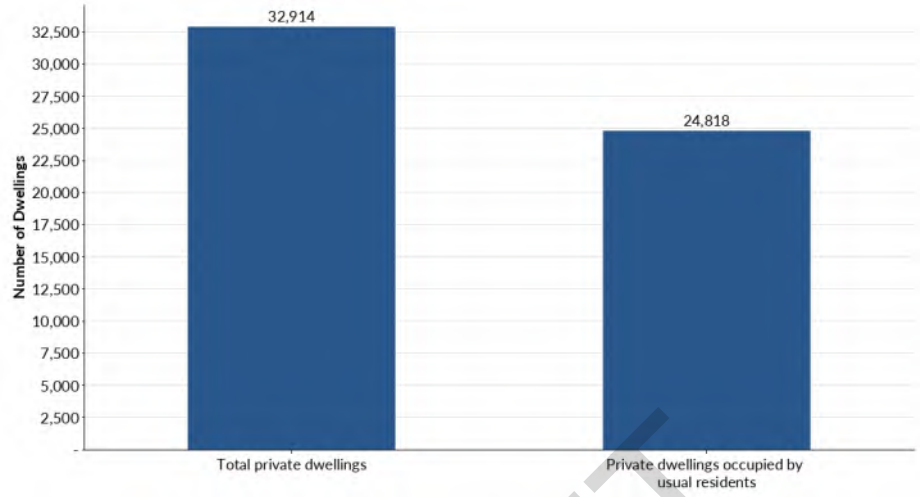
3.2.1 Housing Characteristics

Figure 3-1 below presents the total private dwellings and private dwellings occupied by usual residents in the Kenora District. Private dwellings occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 32,914 total private dwellings in the Kenora District as of 2021; and
- Of the 32,914 private dwellings, 24,818 (75.4%) are occupied by usual residents.

DRAFT

Figure 3-1: Total Private Dwellings and Occupied Private Dwellings in Kenora District, 2021



Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-7 below presents the total number of occupied dwellings for the Kenora District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of dwellings are classified as single-detached home at 81%;
- Apartments make up 10.1% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.3%.

Table 3-7: Kenora District – Occupied Private Dwellings by Structure Type, 2021

Structural Type	Count	Distribution
Single-detached house	20,100	81%
Semi-detached house	1,745	7%
Row house	915	3.7%
Apartment or flat in duplex	700	2.8%
Apartment in a building that has fewer than five storeys	550	2.2%
Apartment in a building that has five or more storeys	535	2.2%
Other single-attached house	200	0.8%
Moveable dwelling	75	0.3%
Total	**24,820**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/ band housing) for Kenora District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings in the Kenora District are owned at 59.8%; and
- Occupied private dwellings which are rented or considered to be provided by the local government or band housing are nearly equal at 19.5% and 20.7% respectively.

Table 3-8: Private Dwellings by Tenure in Kenora District (2021)

Tenure	Count	Distribution
Owner	14,835	59.8%
Renter	4,840	19.5%
Dwelling provided by the local government, First Nation or Indian band	5,140	20.7%
Total	**24,815**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Kenora District. Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Kenora District in 2021:

- The majority of households are occupied by two persons at 34%.
- The least number of households are occupied by four persons at 12%.

Table 3-9: Number of Households by Household Size in Kenora District (2021)

Household Size	Count	Distribution
1 person	6,835	28%
2 persons	8,385	34%
3 persons	3,470	14%
4 persons	3,005	12%
5 persons or more	3.130	13%
Total	**24,825**	**100%**

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-10 below presents the number of rooms per household in Kenora District in 2021:

- The majority of households in the Kenora District consist of 1 to 4 rooms at 25% followed by 8 or more rooms at 22.6%; and
- The least number of households are comprised of 7 rooms at 14.1%.

DRAFT

Table 3-10: Number of Households by Number of Rooms per Household in Kenora District (2021)

Household Size	Count	Distribution
1 to 4 rooms	6,210	25.0%
5 rooms	5,155	20.8%
6 rooms	4,350	17.5%
7 rooms	3,500	14.1%
8 or more rooms	5,605	22.6%
Total	**24,820**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

3.2.3 Housing Conditions

The following subsections describe housing conditions including the numbers of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and conditions of dwellings for Kenora District.

Table 3-11 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Kenora District:

- Dwellings constructed during the period from 1961 to 1980 is the largest group with 29% of private dwellings being built during this period;
- Dwellings constructed during the period from 2011 to 2015 is the smallest group with 4.3% of private dwellings being built during this period;
- 80.8% of the occupied private dwellings in the Kenora District were constructed during or prior to 2000.
- Over the last two decades, 4,760 dwellings were constructed which comprises less than 20% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Kenora District (2021)

Construction Period	Count	Distribution
1960 or before	5,300	21.4%
1961 to 1980	7,200	29.0%
1981 to 1990	3,770	15.2%
1991 to 2000	3,790	15.3%
2001 to 2005	1,290	5.2%
2006 to 2010	1,170	4.7%
2011 to 2015	1,055	4.3%
2016 to 2021	1,245	5.0%
Total	**24,820**	**100%**

DRAFT

Table 3-12 below presents the suitability of occupied private dwellings in Kenora District in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- In 2021, 9.2% of the occupied private dwellings in the Kenora District were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Kenora District (2021)

Suitability	Count	Distribution
Suitable	22,540	90.8%
Not suitable	2,285	9.2%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-13 below presents the conditions of the private dwellings in Kenora District in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 17.3% of the occupied private dwellings in the Kenora District were categorized as requiring major repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Kenora District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	20,535	82.7%
Major repairs needed	4,290	17.3%
Total	**24,825**	**100%**

DRAFT

3.3 Community Services

Ccommunity services in Wapekeka First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care).

Community Services information for Wapekeka First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal which provides information on social, community, health and government services in northern Ontario.

3.3.1 Family Services

3.3.1.1 Family Services

Tikinagan is a social services organization that provides child and family services for Wapekeka First Nation. It is the largest provider of residential services in Ontario, with a service area that is approximately one third of the province of Ontario, servicing 30 First Nations communities (Tikinagan Child & Family Services, 2023a). In January 2020, Tikinagan was designated by the Ministry of Community and Social Services and the Wapekeka Council to provide child protection services to the families who reside in the District of Kenora (Tikinagan Child & Family Services, 2023a).

Tikinagan was created to provide culturally specific child and family services, that emphasize Indigenous culture as part of its child welfare support work. Prior to Tikinagan support services for children and families were generally provided from outside First Nations communities. There were reports of harms inflicted from this approach (Tikinagan Child & Family Services, 2023b).

Services are culturally responsive and supportive of traditional values and customs. The model of “Mamow Obiki-ahwahsoowin” mandates that in all aspects of service delivery, workers are expected to consult with Elders of the community for wisdom, guidance and teachings, and to receive direction on service delivery (Tikinagan Child & Family Services, 2023c). This specifically includes the requirement to consult with First Nations leadership on case management decisions.

An overall goal of the support work by Tikinagan is to keep children at home, and in their home communities. When necessary, foster homes for children in need are located in the child’s community or a nearby community, in order to reduce the distance from home and family.

The Mamow Obiki-ahwahsoowin model mandates that authority rests the Chief and Council to declare that children be placed in Tikinagan care (Tikinagan Child & Family Services, 2023c).

3.3.1.2 Family Well-Being Program

The Family Well-Being Program is a Nishnawbe Aski Nation initiative that provides support each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improve the overall health of communities. Its activities and programs include revitalizing Native languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counselling, and child/ youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events. The program works towards eliminating family violence, reducing the number of youths involved in the justice system, and decreasing the number of children in care (211 Ontario North, Wapekeka First Nation, 2023a).

3.3.2 Child Care and Youth Programs

3.3.2.1 Healthy Babies Healthy Children

The Healthy Babies Healthy Children program supports parenting and promote healthy child development for Wapekeka First Nation families with children under 6 years old, as well as Indigenous children at risk. The program provides group information and educational sessions on topics related to healthy pregnancy, birth, and taking care of babies at home. It also offers a handbook on pregnancy and baby care, organizes prenatal classes, and operates a children’s library to encourage child literacy. Program participants receive follow-up via telephone within 48 hours of discharge from the hospital and home visits pre- and post-birth to offer support to new mothers and prepare the family for the new arrival. The program also provides home visits during the child’s early years to offer development guidance and referrals to other programs and services (211 Ontario North, Wapekeka First Nation, 2023c).

DRAFT

3.3.3 Elder Care

Indigenous Services Canada, through the First Nations and Inuit Home and Community Care (FNIHCC) program, provides funding and guidance for Elder care. This program aims to establish home and community care services for Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services.

The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services. (Indigenous Services Canada, 2023).

3.3.4 Health Services

3.3.4.1 Home and Community Care

The Home and Community Care Program offers healthcare services to ill, injured, or Elder members (65 years of age and over) of the Wapekeka First Nation community who require assistance to stay in their home. The Team assesses the health history of individuals and develops a personalized care plan. The services offered include home care nursing, personal care assistance with tasks such as dressing and bathing, basic or advanced practice foot care, teaching individuals to care for themselves, home support with light housekeeping, laundry, and meal preparation, respite for family members and caregivers, and help with light outdoor/ yard work (211 Ontario North, Wapekeka First Nation, 2023d).

3.3.4.2 Nursing Station

The Wapakeka First Nation Nursing Station is dedicated to promoting the physical and mental well-being of the Wapekeka First Nation community. It coordinates health care services through visiting community health nurses, visiting Physicians and Home Care workers. It provides health awareness and counselling, education and prevention workshops in areas that may include Child Care, Diabetes, Elders & Chronic Disease Immunization, Sexual Health and Communicable Diseases. Further, it coordinates services of a visiting dentist and provides a dental assistant.

They address individual health care needs by providing treatment of on-going health problems, emergency services, advocacy on behalf of individual with other health professionals, coordinating one-on-one pre-natal care with the community health nurse, home visits to the sick, Elders, new mothers and persons with health care needs. They also provide assistance with coordinating local and long-distance travel arrangements for medical appointments (211 Ontario North, Wapekeka First Nation, 2023e).

3.3.4.3 National Native Alcohol and Drug Abuse Program

The National Native Alcohol and Drug Abuse Program aims to provide assistance and support to individuals and families in Wapekeka Nation struggling with addiction issues. This program offers Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) meetings and provides transportation to all meetings and workshops upon request. To prevent addiction, the program also holds public seminars and meetings, educational sessions in schools, and coordinates cultural and spiritual events. The intervention program facilitates recreational activities, provides individual and group discussions, and offers cultural and spiritual gatherings. Aftercare is also provided through counseling, sharing circles, and support groups, as well as regular phone calls and home visits, and referrals to other services such as detoxification and medical assistance (211 Ontario North, Wapekeka First Nation, 2023f).

DRAFT

3.3.4.4 Extended Health Benefits

The Extended Health Benefits program provides a range of health benefits to individuals and families who have high health costs. Eligibility for the program is determined based on need and is open to members of Wapekeka First Nation aged 16 to 65 years. Benefits provided may include basic dental care, diabetic supplies, eyeglasses, hearing aids, prescription drugs, surgical supplies and dressings, as well as transportation for medical appointments. To be eligible, individuals and families must have been eligible for Ontario Works in the previous months or received a payment for loss of income under the 1986-1990 Hepatitis C Settlement Agreement and are no longer eligible for Ontario Works (211 Ontario North, Wapekeka First Nation, 2023g).

3.3.4.5 Home and Community Care - Physiotherapy Services

The Home and Community Care Physiotherapy Services program provides rehabilitative care to help people preserve or regain independence in-home or at nursing station depending on client. These services may include physiotherapy, occupational therapy, speech-language pathology and case management (211 Ontario North, Wapekeka First Nation, 2023h).

3.3.4.6 Community Mental Wellness Team

The Shibogama First Nations Council Community Mental Wellness Team provides mental health supports and services to its community members including counselling, crisis support, clinical consultation, case management and workshops to support mental wellness. It aims to improve access to needed specialized services where gaps exist and coordinate training for community frontline workers (Shibogama First Nations Council, 2023a).

3.3.4.7 Crisis Response Team

The Shibogama First Nations Council Crisis Response Team promotes the safety of each community through the emergency response plans coordinated by the area resource teams. It facilitates intervention, counselling and support group services for community members who are experiencing some form of crisis. It offers service coordination service to mobilize local resources and support communities in the preparing of resources for the COVID-19 pandemic (Shibogama First Nations Council, 2023b).

3.3.4.8 Youth Well-Being Team

The Youth Well-Being Team is a mental wellness program that provides support to Shibogama youth while they are away from their home communities attending Sioux North and Pelican Falls First Nation high schools, as well as youth receiving specialized services/ treatment while in Sioux Lookout. Some of the services offered include counselling, expressive arts therapy, land-based and cultural activities and referrals for specialized services. This program also offers a variety of youth activities at the "Shib Crib" on Front Street in Sioux Lookout as a comfortable and safe environment where youth can claim the space as their own to socialize with their friends, while participating in positive lifestyle programming (Shibogama First Nations Council, 2023c).

3.3.4.9 Medical Transportation Program

The Medical Transportation Program provides medical transportation services and assistance in making medical appointment arrangements to members of the Wapekeka First Nation community. It provides transportation within the community for individuals accessing the Nursing station or Health office while also providing assistance with completing prior approval applications for long distance medical appointments. It also offers assistance with arrangements for accommodation and travel details for individuals attending medical appointments out of community including Sioux Lookout Meno Ya Win Health Centre or Red Lake Margaret Cochenour Memorial Hospital (211 Ontario North, Wapekeka First Nation, 2023i).

DRAFT

3.3.4.10 Non-Insured Health Benefits (NHIB)

The Non-Insured Health Benefits Program provides services to community members for processing Non-Insured Health Service claims. This program also submits medical appointment travel, mileage, meal and accommodation requests on behalf of individual. It assists with making travel arrangements and maintains client documentation, receipts and related information (211 Ontario North, Wapekeka First Nation, 2023j).

3.3.5 Communications Services

3.3.5.1 Ontario Telemedicine Network (OTN)

The OTN offers specialized medical care through videoconferencing and other tele-diagnostic equipment, enabling specialists to remotely examine and prescribe treatments to patients in their home communities. This reduces the need for patients to travel to receive care, providing greater convenience and accessibility for those living in remote or underserved areas (211 Ontario North, Wapekeka First Nation, 2023e).

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation were higher among non-Indigenous youths in Canada compared to Indigenous youths (Statistics Canada, 2023). However, when comparing First Nation youth living on reserves to First Nation youth living off reserves, those that live off reserves are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities for the Wapekeka First Nation using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

Wapekeka First Nation has one school on reserve – Reverend Eleazear Memorial School which offers schooling from junior kindergarten to Grade 8 (211 Ontario North, Wapekeka First Nation, 2023k). The school provides cultural activities and has a Anishiniimowin Immersion program (Languages Together) which promotes learning entirely in Oji-Cree during Kindergarten and evolving into a mostly English curriculum by the time students enter Grade 8 (211 Ontario North, Wapekeka First Nation, 2023k). A new school is currently under construction that will accommodate students from junior kindergarten to Grade 10 (211 Ontario North, Wapekeka First Nation, 2023k). The new school will include a native language and culture room. Secondary education is available through Northern Nishnawbe Education Council through Wahsa Distance Education Centre. Students can also attend high school off the reserve in Sioux Lookout and Thunder Bay (211 Ontario, Wapekeka First Nation, 2023l).

3.5 Emergency and Protective Services

The socio-economic baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

DRAFT

Police services in most Indigenous communities in the Nishnawbe Aski territory are provided by Nishnawbe Aski Police Services (NAPS), the Anishinabek Police Service (APS), municipal police services, or the Ontario Provincial Police (OPP).

Police services in Wapekeka are provided by Ontario First Nations Policing through arrangements with Kitchenuhmaykoosib Inninuwug. Services are administered by the OPP (Northwest Healthline, 2024).

Fire services are provided by a community fire department in Wapekeka (Northwest Healthline, 2024).

Emergency medical services in fly-in First Nation communities are limited in nature and tend to be supported by regional service centres. If emergency care is required within the Indigenous communities, patients are typically transported by air ambulance to the larger regional service centres. The larger regional centres have Emergency Medical Services (EMS) teams available, and they are well connected with road access.

Where information is available, community input indicates a general need for additional emergency and protective services to address socio-economic challenges experienced in the Indigenous communities.

3.6 Community Infrastructure

The socio-economic baseline includes a description of the following Community Infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in Wapekeka First Nation is described in Table 3-14.

Table 3-14 - Description of Community Infrastructure in Wapekeka First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Level 2 Water Treatment System built in 2000. ▪ Water Quality: Currently the community has no drinking water advisories. The community previously had a drinking water advisory from July 2002 to October 2007.	▪ Level 1 Wastewater System. ▪ Constructed in 1990. ▪ Facultative Lagoon. ▪ Effluent Quality Unknown.	▪ Diesel. Served by Hydro One Remotes. ▪ Part of Watay Power Project. Pending, projected to be connected to the grid in December 2023.	No formal garbage collection; waste disposal at local dump site.

Sources: Water and Wastewater Information, 2011; Drinking Water Advisories, 2021; Government of Canada, 2019; Hydro One, 2021; Hydro One 2018; Five Nations Energy Ince., 2021; Wataynikaneyap Power, 2021; 211 Ontario North, 2021.

DRAFT

3.7 Transportation

The socio-economic baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the socio-economic baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure available in the region, including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd, 2016).

The majority of First Nations communities are reachable by remote airports or by winter roads. While some other communities have access to the provincial highway network.

Wapekeka First Nation is accessible via the Pickle Lake/ Kingfisher Winter Road Corridor. The NORT / Highway 808 is an all-season road that runs north from Pickle Lake to North Caribou Lake First Nation. The Pickle Lake/Kingfisher corridor is one of three winter road systems connecting communities to the NORT. The Kingfisher Winter Road Corridor connects six First Nation communities (MNDM, 2020).

3.7.1 Winter Road Traffic Volumes

Information is not currently available.

3.7.2 Air Transportation Network in Wapekeka First Nation

Air transportion to/from Wapekeka First Nation is provided by Wasaya Airways Limited Partnership (LP) (Wasaya Airways Limited Partnership, 2023), Bearskin Airlines, and North Star Air (North Star Air, 2023) at Wapekeka Airport (211 Ontario North, 2023g).

3.7.3 Waterways in Wapekeka First Nation Traditional Territory

Waterways are an integral part of community life. Waterways have been and continue to be an important socio-cultural and economic part of daily life of Indigenous communities. They connect families and friends and provide an important part of the transportation network.

Wapekeka First Nation traditional territories are within the secondary watersheds of Severn River and Winisk River – Coast (Government of Ontario, 2023). As noted in Section 2.2, there was historically a heavy dependence on rivers for travel, especially Big Trout Lake, Long Lake, Wapekeka Lake and tributaries of the Severn and Fawn Rivers (Kayahna Tribal Area Council, 1985).

DRAFT

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The socio-economic baseline provides information that will enable the assessment of effects on community well-being and safety.

This section describes the existing conditions of community well-being and safety using the following indicators:

- Social cohesion and culture;
- Participation in social and/or cultural events;
- Safety; and
- Nuisance.

One comparative measure of community well-being is the Community Well-Being (CWB) Index. The CWB uses four key socio-economic factors (education, income, labour and housing) to measure the well-being of communities across Canada and throughout time. For each community, a score is calculated for each of the four socio-economic factors, as well as an overall well-being score based on a combination of all these factors, which is used to compare well-being among Indigenous communities, and between Indigenous communities and non-Indigenous communities. The data presented in this section are provided by the 2016 Census of Population data (most recent dataset) (Statistics Canada, 2017a). It is important to note that “well-being” means different things to different people and the scores from the CWB are only one aspect in determining the well-being of a community. The four factors used to score the CWB are used as they are important topics that are part of people’s overall “well-being.”

The four socio economic factors used in the scoring of the CWB:

- Education - based on how many community members have at least a high school education and how many have acquired a university degree;
- Labour Force Activity - measures how many community members participate in the labour force and how many labour force participants have jobs;
- Income - calculated based on a community's total income per capita; and
- Housing - based on the number of community members whose homes are in an adequate state of repair and are not overcrowded.

CWB Index Scores in Wapekeka First Nation is described in Table 3-15.

Table 3-15: CWB Index Scores for Wapekeka First Nation

Community	Overall	Education	Labour	Income	Housing
First Nations in Canada	58	40	69	54	71
First Nations in Ontario	59	38	72	53	70
Wapekeka First Nation	46	13	73	46	53

Source: Indigenous Services Canada, 2019b.

DRAFT

Wapekeka First Nation has a significantly low CWB score for education (13), in comparison to First Nations in Canada (40) and First Nations in Ontario (38).

The Wapekeka First Nation score for incomeis 46, which is below but comparable to First Nations in Canada (54) and First Nations in Ontario (53).

With a score of 73, the Wapekeka First Nation score for labour is comparable to but above those of First Nations in Canada (69) and First Nations in Ontario (72).

Wapekeka First Nation has a housing score of 53, which is comparable to but below those of First Nations in Ontario (70) and First Nations in Canada (71).

The Wapekeka First Nation score of 46 for overall community well-being and safety is comparable to but below that of First Nations in Ontario (59) and First Nations in Canada (58).

3.8.2 Safety

According to the Canadian Centre for Justice and Community Safety Statistics, there were 182 police services or detachments responsible for serving Indigenous communities in Canada (i.e., communities where more than half of the residents are Indigenous) (Allen, 2020). These 182 police services had some of the highest crime rates among 1,200 police detachments in Canada, with Indigenous communities having six times higher crime rates than non-Indigenous populations. Ontario had one of the lowest crime rates reported in Indigenous communities (along with British Columbia).

Table 3-16 provides a generalized summary of regional crime rates based on available information and as reported by the police services in the Regional Study Area. The data are reported as rates of 100,000 people. Some First Nations communities are serviced by the OPP. The OPP is a division of the Ministry of Solicitor General and is the largest police service in Ontario, and second largest police service in Canada (Ontario Provincial Police (OPP), 2023). Part of the OPP's responsibilities for Indigenous communities is to provide administrative support for First Nation Policing programs. The Nishnawbe-Aski Police Service (NAPS) reported the highest rates of crime across categories. NAPS area provides police patrols within northern Ontario and serve 34 First Nation communities (Ketonen, 2023). NAPS often do not have the same resources that other police forces have with limited staff, budget and resources (Thompson, 2017). In 2017, Public Safety Canada outlined that crime rates in First Nations communities were four times higher than the average municipal rate (Thompson, 2017).

Table 3-16: Crime Statistics in Indigenous Communities and Municipalities for 2021, as Reported by the Police Service Responsible for that Area

Municipalities	Total Crime, Rate, 2021*	Total Violent Crime Rate, 2021*	Total Sexual Assault, Rate, Level 1, 2021*	Total Drug Violations, Rate, 2021*
Nishnawbe-Aski Nation, municipal	26,412	9,421	553	649
Anishinabek, municipal	14,567	4,646	193	435
Kenora District, OPP, municipal	12,018	2,838	264	301
Thunder Bay District, OPP, rural	4,358	1,395	155	224

4. Economic Environment

4.1 Labour Force and Employment

Indigenous people are underrepresented in Canada's labour market (Anderson, 2019). This section describes the existing conditions of labour force and employment using the following indicators:

- Labour force characteristics, including employment, age, population, labour force participation, unemployment, barriers to employment, time spent on unpaid domestic work;
- Education and training attainment, including highest certificate, diploma, or degree, field of study, occupations, training opportunities; and
- Labour income, including income, sources of income.

Tradition is an important cultural aspect of Indigenous communities who are very connected to the lands on which they live.

The traditional economy is an important cultural and economic aspect of community life. Unfortunately, traditional economy activities are not widely reported on and therefore it is difficult to quantify the economic impact they have within the communities. This is the case for Wapekeka First Nation.

The following section provides an overview of population and demographics at a district level.

The working age population in the Kenora District is projected to decline over the projection period from 41,115 in 2021 to 38,152 by 2043 (Statistics Canada, 2017; 2022a). The unemployment rate within the District is lower than Ontario at just under 9%, however, the participation rate is 57% in comparison to 63% for Ontario (Statistics Canada, 2022a).

The Kenora District population has the lowest percentage of population with postsecondary certificate, diploma or degree in the RSA at 40% (Statistics Canada, 2022a).

Over half of the population who pursued postsecondary education studied either architecture, engineering, and related trades, health and related field, or business, management, and public administration (Statistics Canada, 2022a).

DRAFT

4.1.1 Labour Force Characteristics

Table 4-1 presents the forecasted working age population in Kenora District over the projection period: 2016, 2021, 2028, 2033, and 2043. The values for 2016 and 2021 are published statistics from the 2016 and 2021 Statistics Canada Census of Population (Statistics Canada, 2017, 2022a). The values for 2028, 2023, and 2043 were forecast based on the 2016 and 2021 data. The working age population is defined as those aged 15 to 64. Projected trends of working age population in Kenora District are summarized as follows:

- The working age population is decreasing over the projection period; and
- Based on current growth trends, the working age population is forecasted to decrease by 3,668 between 2016 and 2043, a decline of approximately 8.8%.

Table 4-1: Projected Working Age Population in Kenora District (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	41,820	100%	21,040	50.3%	20,775	49.7%
2021	41,115	100%	20,860	50.7%	20,255	49.3%
2028	40,148	100%	20,611	51.3%	19,549	48.7%
2033	39,471	100%	20,434	51.8%	19,059	48.3%
2043	38,152	100%	20,086	52.6%	18,117	47.5%

Table 4-4 presents the number of jobs by 1-digit National Occupational Classification (NOC[1]) code for 2018 and 2022 in the Kenora District.

- Sales and service occupations is the leading job category in the Kenora District with 6,884 jobs in 2022 which accounts for 21.6% of the total jobs;
- The Kenora District has seen an increase in 7 occupational categories between 2018 and 2022 with an overall increase in jobs of 6% over the 4 years; and
- The occupational category with the largest percentage increase over the period was natural resources, agriculture, and related production occupations with a 15% increase

Table 4-4: Kenora District – Occupations by Category (2018 – 2022)

Occupation Categories	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Business, finance and administration occupations	4,861	5,301	440	9%
Natural and applied sciences and related occupations	1,448	1,615	167	12%
Health occupations	2,416	2,736	320	13%

DRAFT

4.1.2 Education and Training Attainment

There is high value placed on principles and teachings passed down by Elders and Knowledge Keepers. These teachings take place in community and out on the land.

The knowledge passed on from the ancestors sustains Wapekeka identity and way of life.

Table 4-5 presents the highest level of western educational attainment for the population aged 15 years and over in private household in the Kenora District for 2021.

- The majority of the population has a postsecondary certificate, diploma, or degree at 40.1%, within this group females are more likely to have a degree in comparison to males; and
- 30.9% of the population was no certificate, diploma, or degree at 30.9%. Males account for 52.9% of this group and females 47.1%.

[1] The National Occupational Classification (NOC) is Canada's national system to identify and categorize occupations based on the training, education, experience and responsibilities they require. The structure of NOC codes is hierarchical with five levels. The first level (1-digit) contains 10 broad occupational categories, the second level (2-digit) is made up of 45 major groups, the third level (3-digit) consists of 89 sub-major groups, the fourth level (4-digit) gathers 162 minor groups, and the last level (5-digit) comprises 516 unit groups.

Table 4-5: Highest Certificate, Diploma or Degree for the Population Aged 15 Years and Over in Private Households in Kenora District (2021)

Highest Level of Education	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution

DRAFT

4.1.3 Labour Income

Table 4-7 presents total individual income by group for the population aged 15 years and over for 2020 in Kenora District, by self-identified gender.

- The largest individual income group for both male and female is $20,000 to $29,999;
- The smallest individual income group for both male and female is $150,000 and over with 3% and 1.1%, respectively;
- In 2020, there were 95 more females than males with individual incomes; and
- In 2020, 74% of females were making under $60,000 while only 65% of males were within this group.

Table 4-7: Total Individual Income by Group for the Population Aged 15 Years and Over in Private Households in Kenora District (2020)

Income Group	Total		Male		Female

DRAFT

4.2 Overall Economy

Existing conditions of the overall economy in the Kenora District are described in this section using the following indicators:

- Gross Domestic Product (GDP);
- Cost of living;
- Economic development, including economic development initiatives, capacity, gaps, major projects, new projects, closures, equipment availability, energy profile, access to capital and trends;
- Traditional economy; and
- Access, ownership, and use of lands, including municipal zoning, land area, land-use planning documents from Ministry of Natural Resources and Forestry (MNRF), Indigenous communities and municipalities (if relevant), plans for land development, compatibility with existing and proposed land uses.

4.2.1 Gross Domestic Product (GDP)

GDP is a monetary measure of the market value of all the final goods and services produced and sold in a specific time period, typically expressed annually, within a specified geographical region. This section describes the GDP, including the annual GDP and changes in GDP for the Kenora District. The information provided in this section will help identify potential effects of the Project on GDP.

Table 4-9 presents the GDP for the Kenora District for 2006 and 2016 (Northern Policy Institute, 2019a).

- Between 2006 and 2016 there was a decline in GDP of just over 10%;
- These trends reflect changes in the size and occupational distribution of employment in the district; and
- The Kenora District represents 0.2% of Ontario's GDP in 2016.

Table 4-9: GDP for Kenora District (2006 – 2016) (Expressed in millions of dollars)

Year	2006	2016	2006 – 2016 Growth	2006 – 2016 % Change
GDP	2,309	2,077	-232	-10.1%

Source: Northern Policy Institute, 2019b.

4.2.2 Cost of Living

The largest census subdivision within the Kenora District is the City of Kenora, which accounts for approximately 23% of the population. Table 4-10 presents a comparison of shelter affordability between the City of Kenora and Ontario. Both shelter costs and the cost of purchasing a house in Kenora are significantly less than the provincial averages (Choose Kenora, 2023).

Table 4-10: Shelter Costs and Dwelling Values, City of Kenora vs Ontario, 2016

	Owned – Kenora	Rented Kenora	Owned – Ontario	Rented – Ontario
Median shelter cost	$1,002	$882	$1,299	$1,045
Average shelter cost	$1,155	$873	$1,463	$1,109
Median dwelling value	$225,210	-	$400,496	-
Average dwelling value	$260,789	-	$506,409	-

Source: Choose Kenora, 2023.

Table 4-11 presents the number of households spending 30% or more of income on shelter costs for Kenora District in 2021. According to the Canada Mortgage and Housing Corporation (CMHC) housing is considered to be affordable when a household spends less than 30% of its pre-tax income on adequate shelter. Households that spend more than 30% of their income on shelter are deemed to be in core housing need (Canada Mortgage and Housing Corporation, 2020).

Of the nearly 19,000 owner or tenant occupied dwellings in the Kenora District, 13% are spending more than 30% of their income on shelter costs (Statistics Canada, 2022a).

Table 4-11: Distribution of Households Spending 30% or More of Income on Shelter Costs for Kenora District (2021)

Household Spending on Shelter Costs	Count	Distribution
Spending less than 30% of income on shelter costs	16,490	87%
Spending 30% or more of income on shelter costs	2,455	13%
Total Owner and Tenant Households	**18,945**	**100%**

Services and may end up having to stay in urban centres longer than planned (Nishnawbe Aski Nation, 2022).

DRAFT

4.2.3 Economic Development

Kenora District is a census division in Northwestern Ontario. It is comprised of 57 census subdivisions, 47 of which are First Nation communities. Combined, the City of Kenora, the City of Dryden, and the Municipality of Sioux Lookout make up 43% of the District's population.

Kenora District's economy is supported by several key sectors, including manufacturing, health care, public administration, forestry, mining services, culture and recreation, construction, and tourism.

The City of Kenora 5-year Tourism and Economic Development Strategy sets out three goals: tourism development, economic development, and tourism and economic foundations, with nine accompanying objectives. Of the nine objectives listed in the Strategy, two pertain to economic development (City of Kenora, 2021):

- Activate development on Kenora's vacant and underutilized lands:
  - Improve the development readiness of publicly owned residential, commercial, and industrial lands.
  - Improve awareness of development opportunities, incentives, and partnerships available for vacant and underutilized lands through marketing efforts.
- Support the growth and retention of local businesses and emerging sections:
  - Establish a centralized business hub and resource centre to support local businesses.
  - Position Kenora to take advantage of specific strategic sector opportunities.
  - Provide supports and information to new and existing businesses through community partner and City led initiatives.
  - Prioritize support of COVID-19 response and relief efforts to assist the local business community.

The Municipality of Sioux Lookout 2020-2025 Strategic Plan states the following goals for community innovation and development (Municipality of Sioux Lookout, 2020):

- Provide infrastructure and housing to meet the needs of our community, now and as it grows:
  - Confirm that our assets are sustainable and that they will meet our long-term needs.
  - Use municipal best practices to identify innovative approaches to managing our infrastructure.
  - Verify that our transportation infrastructure allows people to get around safely and efficiently.
  - Encourage an increase in the housing available in Sioux Lookout to meet our current and future needs.
- Collaborate with community partners to foster growth and economic development:
  - Work proactively with local and regional economic development groups to advance our community's best interests;
  - Support local efforts to improve Sioux Lookout as a place to do business.
  - Work with local partners to promote and encourage tourism.
  - Support public transportation to make it available and useful to as many of our residents as possible.
- Enable community growth through innovative, proactive planning:
  - Confirm that the Municipality's planning policies and practices are appropriate to address current needs and accommodate future growth.
  - Work to secure sufficient commercial property to attract businesses to Sioux Lookout.
  - Minimize regulatory obstacles to development while ensuring appropriate processes are followed.
  - Develop programs and policies that encourage new businesses to move to Sioux Lookout and existing ones to stay here.

DRAFT

- Strengthen and enhance Sioux Lookout's status as "Hub of the North":
  - Assure that YXL remains the #1 airport in our area.
  - Collaborate with the hospital to maintain a strong working relationship.
  - Consider the implications for Indigenous people of any Municipal policies.
  - Recognize that addressing our social issues enhances Sioux Lookout's status as "Hub of the North".

4.3 Business Environment

4.3.1 Local Economy

TKG Group was established in 2018 and is owned equally by Kingfisher Lake, Kasabonika Lake, Kitchenuhmaykoosib Inninuwug, Wapekeka, Wawakapewin and Wunnumin Lake First Nations. In January 2023, TKG Group acquired Oshtugon Computers Inc. which includes a variety of retail stores in Sioux Lookout and Dryden (TKG Group, 2023).

Table 4-12 presents a breakdown of all 21 industries based on 2-digit North American Industry Classification System (NAICS[2]) codes and their presence within the geographical boarders of the Kenora District in 2018 and 2022. Trends of industry presence in Kenora District between 2018 and 2022 are summarized as follows:

- The industries with the highest growth between 2018 and 2022 include professional, scientific, and technical services (24%) and wholesale trade (19%); and
- 9 of the 21 industries reported saw a decline in jobs between 2018 and 2022.

Table 4-12: All Industry Presence in Kenora District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change
Agriculture, forestry, fishing and hunting	493	425	(68)	(14%)

[2] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

DRAFT

Table 4-13 presents the industry supply chain, the purchases an industry makes from all other industries, in the Kenora District in 2020. This table displays the value and percentage of in-region purchases and imported purchases for 2020 that are summarized as follows:

- One fifth of supply chain purchases are made within the Kenora District;
- The industry with the highest percentage of in-region purchases is agriculture, forestry, fishing, and hunting at 71%;
- The industry with the lowest percentage of in-region purchases is management of companies and enterprises at 0%; and
- Total supply chain purchases amounted to approximately $2.7 billion in 2020.

Table 4-13: Industry Supply Chain in Kenora District (2020)

Industry	In-region Purchases	% In-region Purchases	Imported Purchases	% Imported Purchases	Total Purchases
Agriculture, forestry, fishing and hunting	$82,131,318	71%	$34,088,922	29%	$116,220,240
Mining, quarrying, and oil and gas extraction	$35,424,541	32%	$76,226,128	68%	$111,650,669

DRAFT

Table 4-14 presents the regional requirements, the value of goods and services demanded of the Kenora District by industry in 2020. Regional Requirements show the value of goods/services purchased from an industry (either in or outside the area) in order to meet the needs of the area. The table presents the level of demand for each industry met in-region and the demand met by imports that are summarized as follows:

- The majority of demand for goods and services is met by imports (82.8%);
- The industry meeting the most demand in-region is agriculture, forestry, fishing, and hunting with 52.6% of demand met in-region;
- Seven industries meet less than 10% of demand within region; and
- The total demand in 2020 was approximately $7.26 billion.

Table 4-14: Regional Requirements to Meet Demand by Industry in Kenora District (2020)

Industry	Demand met In-region	% Demand met In-region	Demand met by Imports	% Demand met by Imports	Total Demand
Agriculture, forestry, fishing and hunting	$84,483,367	52.6%	$76,021,015	47.4%	$160,504,382
Mining, quarrying, and oil and gas extraction	$39,675,550	4.8%	$781,595,917	95.2%	$821,271,467

DRAFT

4.3.2 Mining, Aggregate and Forestry Activities

Table 4-15 presents industry data for the following 2-digit NAICS[3] industries in Kenora District between 2018 and 2022 (Lightcast, 2023b):

- Mining, quarrying, and oil and gas extraction;
- Agriculture, forestry, fishing, and hunting;
- Each industry includes a variety of occupations which include but are not limited to:
- Non-metallic mineral mining and quarrying;
- Coal mining;
- Construction, forestry, mining, and industrial machinery, equipment and supplies merchant wholesalers;
- Support activities for forestry; and
- Forest nurseries and gathering of forest product.

It should be noted that activities associated with the traditional economy such as fishing and hunting may not be captured within this data. It is likely that these industries are underreported within Indigenous communities.

Included in this data are location quotients for 2018 and 2022 for each industry. Location quotients are ratios which help to quantify how concentrated a particular industry is in a specified geographic region in comparison to the nation. Location quotients above one indicate that an industry is more concentrated than the typical region. Industries with high location quotients are often those that are exporting a lot of goods and services out of the community (Lightcast, 2020).

- The mining, quarrying, and oil and gas extraction industry grew by 222 jobs between 2018 and 2022;
- The location quotient for the mining, quarrying, and oil and gas extraction industry indicates that the concentration of jobs within the industry exceeds the national average by more than 6 times in 2022;
- The agriculture, forestry, fishing, and hunting industry declined by 68 jobs between 2018 and 2022; and
- The location quotient for the agriculture, forestry, fishing, and hunting industry indicates that the concentration of jobs within the industry is slightly higher than the national average with 1.37 in 2018 and 1.17 in 2022.

Table 4-15: Mining, Quarrying, and Oil and Gas Extraction Industry in Kenora District (2018 – 2022)

Industry	2018 Jobs	2022 Jobs	2018 – 2022 Change	2018 – 2022 % Change	2018 Location Quotient	2022 Location Quotient
Mining, Quarrying, and oil and gas extraction	2,136	2,358	222	10%	5.9	6.5
Agriculture, forestry, fishing and hunting	493	425	-68	(14%)	1.4	1.2

[3] The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data. The structure of NAICS is hierarchical with five levels, level 1 having 2-digits and level 5 having 6 digits. As the level increases the classification becomes more detailed.

TRADITIONAL INDIGENOUS LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

5. Traditional Indigenous Land and Resource Use

5.1 Sites and Areas Used for Traditional Activities

Indigenous communities customarily use the lands and the resources of their traditional territories for various purposes related to traditional practices which include lakes and rivers for fishing and trapping corridors and trails for hunting and trapping. Many Indigenous communities rely on traditional practices, such as fishing and hunting as a source of food and income. As such, it is important to identify areas where traditional practices are used, to determine potential effects of the Project on Indigenous communities and their traditional use of lands and resources.

Wapekeka First Nation heavily utilizes the land around Big Trout Lake with a strong reliance on the Fawn River system. Hunting occurs throughout the Wapekeka First Nation community with multiple community members hunting the entire year.

Moose, caribou, beaver and marten have been identified as being species that are hunted (Wataynikaneyap Project, 2018). Trapping corridors and trails are used to access hunting areas. Some community members fly to the Asheweig River to hunt (Wataynikaneyap Project, 2018). Trapping occurs mostly to the north as Kitchenuhmaykoosib Inninuwug traplines are to the south. Fishing in the Asheweig River system for walleye, sturgeon, whitefish, pike is common (Wataynikaneyap Project, 2018). Areas along Big Trout Lake, Long Dog, Fawn River and Bug River and Mishwamakan River are also important areas for fishing and trapping. During the fall caribou hunt, families would meet at the confluence of the Sachigo and Severn Rivers (Reading the maps of the Kayahna Region, 1985).

5.2 Culturally and Spiritually Important Sites and Areas

Many Indigenous communities have identified culturally and spiritually important sites and areas including travel routes, burial sites, and gathering sites. These areas are important to Indigenous communities as the sites hold historical value and allow members to spiritually connect with their ancestors through traditional ceremonies and activities. Some of these areas are only accessible by limited routes, which may also only be available during specific seasons (i.e., summer and winter roads); impacts to these travel routes may affect accessibility to culturally and spiritually important sites and areas. Identifying these areas will help determine the potential effects of the Project on culturally and spiritually important sites and areas.

Fawn-Otter River is an important location for members of Wapekeka First Nation (Reading the maps of the Kayahna Region, 1985). There are multiple summer travel routes – two of the main routes include Big Trout Lake from Wapekeka and the Fawn River (Reading the maps of the Kayahna Region, 1985). The Fawn River was an important HBC supply route to Fort Severn and Winisk (Reading the maps of the Kayahna Region, 1985). Once air transport became more popular, this route continued to be utilized by community members (Reading the maps of the Kayahna Region, 1985). Other summer routes include travel between Kasabonika and Big Trout Lake via Wapekeka Lake (Reading the maps of the Kayahna Region, 1985). Wapekeka First Nation community members use two main winter travel routes – north and east of Wapekeka Lake and Otter Lake between the Witegoo River on the west and Ghost Lake on the east, extending along Fawn River. A second commoonly used winter travel route is south of Big Trout Lake, centred on the Bug and Mishwamakan Rivers (Reading the maps of the Kayahna Region, 1985). A precontact unmarked burial site was found in 1988 when the Wapekeka First Nation airstrip was under construction (Hamilton, 2004).

DRAFT

NON-TRADITIONAL LAND AND RESOURCE USE

DRAFT

AtkinsRéalis - Confidential

6. Non-Traditional Land and Resource Use

This section summarizes a baseline of Non-Traditional Land and Resource Use. This includes land use plans and policies, community-based land use planning, industrial and commercial land use, outdoor recreation and tourism, and provincial parks and protected areas. Non-Traditional land use also includes the designating of lands through federal, provincial or municipal authorities for a specific use. Baseline information was developed through a desktop review of existing information, federal and provincial mapping databases, federal and provincial policy and regulation review and secondary data. Secondary data included a review of recreation and tourism websites, municipalities websites and news articles.

6.1 Indigenous Homelands

It is acknowledged that the Project study areas are situated within the traditional lands of the Anishiniimowin/ Anishinaabe/Mushkeego and Métis Peoples. “The Anishiniimowin/Anishinaabe/Mushkeego Peoples have called the lands of the James Bay Treaty home since time immemorial. The Mushkeego live mainly in the James Bay and Hudson Bay lowlands, while the Anishiniimowin and Anishinaabe traditionally live mainly in the interior, closer to the height of land that divides the James Bay and Hudson Bay watershed with those to the south.” (Ministry of Public and Business Service Delivery, 2022). The Métis homelands are also present within the James Bay Treaty area. The Anishiniimowin/Anishinaabe/Mushkeego and Métis Peoples are stewards of the land and hold the inherent right of self-determination that is recognized and affirmed under Section 35 of the *Constitution Act*, 1982. Canada has recently developed an Action Plan to implement the United Nations Declaration on the Rights of Indigenous Peoples (The United Nations, 2007). The five-year Action Plan (2023-2028) outlines and affirms as well as respects the inherent rights of Indigenous Peoples as they relate to lands, territories and resources, and autonomy.

6.2 Treaty Lands

Treaties are agreements made between the Government of Canada, Indigenous Nations and often provinces and territories that define ongoing rights and obligations on all sides. These agreements set out continuing Treaty Rights and benefits for each Indigenous Nation (CIRNAC, 2023).

Treaties with Indigenous Nations in Ontario include both:

- Historic (numbered) treaties with Indigenous Nations;
- Modern treaties, also called comprehensive land claim agreements with Indigenous Nations; and
- Specific claim agreements to address past grievances.

The Project is within land covered by Treaty No. 9 (CIRNAC, 2013). The Treaty No. 9 area covers approximately two-thirds of Ontario’s total landmass and includes:

> *“that portion or tract of land lying and being in the province of Ontario bounded on the south by the height of land and the northern boundary of the territory ceded by the Robinson Superior Treaty of 1850, and the Robinson Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law and on the west by a part of the eastern boundary of the territory ceded by the Northwest Angle Treaty No. 3.” (Crown-Indigenous Relations and Northern Affairs, 2013).*

Treaty No. 9 was signed between the Anishiniimowin/Anishinaabe/Mushkeego Peoples and the Crown in 1905-1906, with adhesions in 1929-1930. The Treaty contains a number of provisions including cash payments, the creation of reserves, education funds for schools and teachers, etc. With the signing of the Treaty, the Crown sought to extinguish First Nations title to the land. Treaty No. 9 also outlines traditional pursuits such as hunting, fishing and trapping that could continue, subject to federal regulations and “exceptions for settlement, mining, lumbering, trading or other purposes.” (Ministry of Public and Business Service Delivery, 2023).

DRAFT

In April 2023, leaders from 10 Treaty No. 9 First Nations announced a lawsuit against the Ontario and Canadian governments that could fundamentally change decision-making authority in the Treaty No. 9 territory (CBC News, 2023). The First Nations leading the lawsuit intend to establish co-jurisdiction in the Treaty No. 9 territory that would require consent of Indigenous Nations' way of life impacted by resource development.

The draft statement of claim mentions the objectives of Indigenous Signatories to the Treaty intended "to preserve bimaadiziwin in Ojibwe or pimaatisiium in Cree – happiness, prosperity, and protection of their traditional way of life" (APTN News, 2023). Mino-Bimaadiziwin translates to "into living a complete, healthy, and good life" which represents an Indigenous philosophy for a way of living (Thomas, 2020). Some of the key principles of Mino-Bimaadiziwin are to maintain a sacred relationship with all elements of creation including trees, fish, birds, animals, water, plants, people, and everything else provided by the Creator, and to live in harmony and coexistence. Mino Bimaadiziwin and other Indigenous laws represent Indigenous identity, outlining the roles, duties, and obligations of being a member of an Indigenous Nation (Thomas, 2020).

6.3 Reserves

The *Indian Act*, R.S.C., 1985, c.I-5, states that land on reserves is owned by the Crown (Government of Canada) but it is given to the First Nation or the Band to hold and use as a tenant. This legal structure (to be a tenant on land owned by the Crown) is shared between community members collectively which provides a beneficial interest in the land. Under the *Indian Act*, a reserve means a tract of land of which is vested with His Majesty (Government of Canada) that has been set apart by His Majesty for the use or benefit of the Band. Section 81(1) sets out the by-laws which govern the authority of the Band Council and includes by-laws related to land use, zoning, the environment, and other works. These by-laws only apply on-reserve. On many reserves, if land is legally given to a Band member, a certificate of possession or certificate of occupation is granted. The certificate grants the individual(s) rights of possession or occupation of the property for housing, business, or resource extraction. Under the *Indian Act*, this requires the approval of the Minister of Indigenous Services.

At this time, Wapekeka First Nation does not have a Land Code under the *First Nations Land Management Act* and land use is governed under the *Indian Act*.

6.4 Crown Land

The Project is proposed to be located primarily on provincial Crown land and will require access to, and the development, use and occupation of lands and resources which are currently used for traditional activities by Indigenous communities. Crown land is used to describe land owned by federal or provincial governments under the Public Lands Act.

As described in Section 5, traditional activities of Indigenous communities include hunting, fishing, trapping, and gathering, as well as cultural and spiritual activities, which may occur on Crown land.

Given the location of the Project, land designated under the *Far North Act*, *2010* may be subject to a Community Based Land Use Plan (CBLUP) initiated by Indigenous communities.

6.5 Road/Transportation Studies

No Road/Transportation Studies were available for review for Wapekeka First Nation at this time.

DRAFT

6.6 Provincial Plans and Policies

6.6.1 Far North Act, 2010

The *Far North Act, 2010* as amended in December 2021 sets out a joint planning process between First Nations communities and the province of Ontario. The *Far North Act* facilitates land use planning decisions in the Far North by governing how the Province will work with Indigenous communities to identify areas where development can occur, and areas that should be protected.

The *Far North Act, 2010* legislation was put in place to support the protection of environmental, cultural, and economic values for land use planning and to confirm that community-based land use planning is done in a manner consistent with recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act, 1982*. Ontario's *Far North Act, 2010* was represented as a significant piece of legislation for Indigenous communities in the North, fortifying the importance of community-based land use planning and the exercise of Indigenous rights of stewardship and jurisdiction over specific territories in Ontario. The Province must approve CBLUPs.

Under the *Far North Act, 2010*, the CBLUP process was developed by the province as a vehicle to explore with Indigenous communities and groups, among other land uses in First Nations areas, traditional and customary use, as well as the potential for permissible use of lands for forestry, tourism, recreation, mineral exploration and mining, renewable energy, access and infrastructure, fire management, and climate change management.

6.6.2 Fisheries Management Plan

Fisheries Management Planning as administered by MNRF is designed to highlight and protect the value of the diversity of lakes and rivers and to be flexible and adaptable to a wide range of future conditions. The planning process considers the lake and river system in a holistic manner and includes a range of management options to secure a healthy lake and river environment that conserves the diversity of the fish community and provide opportunities to contribute to the social and economic well-being of the surrounding area. Ontario is divided into Fisheries Management Zones (FMZ). Each specific FMZ outlines restrictions and guidelines for sport and conservation activities as it relates to fishing to verify sustainability of the region's aquatic life. No specific fisheries management plans have been approved for FMZ 1 – 3 (MNRF, 2023h). Wapekeka First Nation and its traditional territory lies within FMZ 2.

6.7 Land Use Plans and Policies

A number of remote fly-in and winter road access First Nation communities, have been (or are currently) undertaking community land use planning, which considers the remote nature of these communities. Where information is available, the following section describes community-based land use planning, on-reserve land use planning and other planning processes. It is noted that most communities do not publicly share their community plans, and currently, information is limited on such communities that have not provided information for the socio-economic baseline for the Project.

Many First Nation communities have developed CBLUPs, which outlines land ownership, land access, and traditional uses on the land.

Little information is publicly available about this community's documented plans for land use (if any exist); however, as information becomes available through dialogue with the community, with permission from the community, information will be considered as part of the Environmental Assessment (EA)/Impact Assessment (IA).

DRAFT

6.8 Industrial Land Use

Ontario established the Critical Minerals Strategy in 2021, which is a comprehensive five-year plan to secure the province's position as a reliable global supplier of responsibly sourced critical minerals (Ministry of Natural Resources and Forestry, 2022h). Critical minerals are those with industrial, technological or strategic applications for which there are few viable substitutions and are currently at a higher supply risk due to geopolitical considerations and market demand (Ontario Mines Association, 2022). The success of the Critical Minerals Strategy is dependent on six components, referred to as the six pillars in the strategy, which include:

1. Enhancing geoscience information and supporting critical mining exploration;
2. Growing domestic processing and creating resilient local supply chains;
3. Improving Ontario's regulatory framework;
4. Investing in innovation, research and development;
5. Building economic development opportunities with Indigenous partners; and
6. Growing labour supply and developing a skilled labour force.

Mining activity is a large driver of the regional economy (see Section 5). Mining is regulated under the provisions of the provincial *Mining Act*. The purpose of the *Mining Act* is to "encourage prospecting, online mining claim registration and exploration for the development of mineral resources, in a manner consistent with the recognition and affirmation of existing Aboriginal and Treaty Rights in Section 35 of the *Constitution Act*, *1982*, including the duty to consult, and to minimize the impact of these activities on public health and safety and the environment" (Ministry of Mines, 2023). Registering a new mining claim and managing an existing mining claim, this is done online through the Mining Lands Administrative System (MLAS).

Under Section 50 of the *Mining Act*, a Mining Claim provides exclusive rights for the claim holder to explore for minerals and rights to enter, use and occupy surface rights as necessary for exploration and development. A mining claim does not provide mining rights for the land to the holder of the claim. Someone that holds a prospector license may stake out a mining claim on land that is open for staking and prospect for minerals on any Crown land, including land traditionally used by Indigenous Peoples and communities (Natural Resources Canada, 2013).

The Government of Ontario is working directly with First Nations through bilateral agreements that support each individual First Nation community's needs and priorities (Ministry of Mines, 2022). Proposed all season road projects in the Ring of Fire area are led by First Nation communities, which include project planning through EA/IAs, and maximizing benefits and opportunities for First Nations communities.

According to Ontario, building economic development opportunities with Indigenous partners is critical to the success of the strategy as collaboration on resource development projects can help in reconciliation with Indigenous peoples and communities and provide socio-economic benefits to Indigenous communities. To demonstrate Ontario's commitment to reconciliation and support economic development opportunities to build healthy and prosperous communities across Ontario's north, a resource revenue sharing agreement with Indigenous communities was developed (Ministry of Mines, 2022). This agreement allows Indigenous communities to share in the economic benefits of forestry and mining operations near their communities. This revenue can be used for economic development, education, health, community development, and cultural development. There are currently 35 Indigenous communities involved in the revenue resource sharing agreement with Ontario, including communities represented by Grand Council Treaty #3, Mushkegowuk Council, and Wabun Tribal Council.

To enhance Indigenous community participation, the Aboriginal Participation Fund provides $4.7M annually to support communities' participating in consultation, education and relationship-building activities related to mineral exploration and development (Ontario Mining Association, 2022).

Aggregates include sand, gravel and bedrock that are typically used in construction projects. Aggregate resources are regulated under the *Aggregate Resources Act.* Aggregate extraction on Crown land requires an Aggregate Permit and on private land it requires an Aggregate License if it is within an Aggregate Designated Area (Ministry of Natural Resources and Forestry, 2022a).

There is no information on industrial land use specific to Wapekeka First Nation available at this time.

DRAFT

6.9 Commercial Use, Outdoor Recreation and Tourism

Commercial use, outdoor recreation and tourism are important economic activities for a number of Indigenous communities'. Commercial use includes any activity or business that uses the resources from the land to provide income, such as commercial fishing, hunting and trapping. As fishing, hunting, trapping, and gathering wild plants has been a way of living for Indigenous Peoples across Canada for a millennia, many Indigenous communities rely on these traditional activities as their source of income (Kumar et al., 2019). According to the Indigenous Tourism Association of Canada, recreation and outdoor activities (which includes outfitters, hunting, fishing, and wilderness guides, as well as various types of recreational and adventure camps, including recreational vehicle parks and campgrounds) are an important domain in the Indigenous tourism sector (Fiser and Hermus, 2019). In the 2018 census survey completed by the Indigenous Tourism Association of Canada, Ontario generated the second highest revenue in direct GDP, among all provinces and territories in Canada, from recreation and outdoor activities (Fiser and Hermus, 2019). Tourism is also important because it provides an opportunity for visitors to learn about the history, experience, arts, and culture of Indigenous communities.

Wapekeka First Nation has one community store – Wapekeka Community Store (211 Ontario North, 2023g).

6.10 Provincial Parks, Areas of Natural and Scientific Interest and Protected Areas

Provincial Parks

There are no federal, provincial, or regional/municipal protected parks and protected areas which overlap with the Project Footprint and Wapekeka First Nation Reserve.

In the region, provincial parks include:

- Fawn River Provincial Park

Declared in 1989, the Fawn River Provincial Park is located in close proximity to Kitchenuhmaykoosib Inninuwug First Nation and borders the Wapekeka First Nation. It has existing recreational activities such as fishing, hunting, canoeing, camping and snowmobiling, and also has three Indigenous people operated traplines. Traditional activities such as harvesting are carried out in the park (Government of Ontario, 2021a).

- Winisk River Provincial Park

In 1966, the growing demand for tourism led to provincial government setting aside the "Winisk Wild River Indian Guide Territory" and established the Winisk River Provincial Park over Winisk Lake and Winisk River in 1968 (Ministry of the Environment Conservation and Parks, 2021a). This move, however, intersected with Indigenous Nations exercise of their inherent rights to traditional lands, water usage, and the pursuit of economic and community development goals. The Winisk River Provincial Park is located to the north of the Webequie First Nation Reserve, approximately 2.17 km from WSR. The parkland is approximately 141,000 ha in size and boasts unique landforms including a large moraine and drumlin fields. The only access to the park is by canoe, air or by float plane park (Ministry of Natural Resources, 1991). This park does not feature facilities for visitors but activities such as white-water paddling, canoe and kayaking, back country camping, fishing, hunting and snowmobiling are supported within the park (Ontario Parks, 2022). Five outpost camps are located along the Winisk River System to support fishing and hunting tourism. The Winisk River Provincial Park Interim Management Plan, 1991 provides direction for the management of the park (Ministry of Natural Resources, 1991). Additional tourism development will only be permitted once the management plan is complete (Ministry of Natural Resources, 1991)."

- Albany River Provincial Park

DRAFT

The Albany River Provincial Park was established in 1989, starting at Lake St. Joseph at Highway 599 and traversing downriver, approximately 300 km to approximately 30 km west of Marten Falls. The Albany River is a key waterway for travel for Anishinaabemowin/Anishinaabe/Mushkegowuk communities. First Nation members have cabins and camps which they use for harvesting and hunting within their traditional territory.

ANSI

There are no ANSIs or Candidate ANSIs which intersect the Project Footprint or Wapekeka First Nation Reserve.

Conservation Reserve

- Severn River Conservation Reserve

The Severn River Conservation Reserve is located within the Severn River watershed and contains several important core natural heritage areas that are inventoried and protected by the Ministry of Natural Resources as Areas of Natural and Scientific Interest (ANSI) (Government of Ontario, 2021b). The Severn River watershed also holds cultural importance for First Nation communities, such as the Kitchenuhmaykoosib Inninuwug First Nation who use the historic canoe routes within the watershed and the lakes and rivers for fishing (Wildlands League, 2013).

Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. At this time the Project Team is working toward completing the preliminary draft Socio-Economic Existing Conditions Report, that will be used to draft the effects assessment of the Project, which will be captured in the EA and IA.

The Project Team led by the Webequie First Nation is striving to gather as much Anishinaabemowin/Anishinaabe/Mushkegowuk Indigenous Knowledge as it relates to the Project and to help inform the socio-economic existing conditions.

This letter is to request your review of the draft Community-Specific Existing Conditions Summary document, which is based on the data and information collected for the Socio-Economic Existing Conditions Report of the EA/IA and presents the preliminary findings specifically collected for the Wapekeka First Nation. The document summarizes information gathered through publicly available online resources and information gathered with communities, through interviews, focus groups and surveys, if the community participated in the Socio-Economic Primary Data Collection Program. The community-specific baseline information provided in the document is arranged as follows:

- **Community Setting** – including community overview, history, values and aspirations;
- **Population and Demographics** – including population, age, gender, indigenous identity, mobility and migration, etc.;

- **Housing and Accommodations** – including housing demand/ affordability/ supply/ quality and number of people living in a home;
- **Social Services and Infrastructure** – including supply and demand for education, childcare, healthcare, water, waste, energy, and communications;
- **Transportation** – including volume of, and demand for, road and air transportation;
- **Community Well-Being and Safety** – including social cohesion and culture, participation in social and/or cultural events, safety such as levels of domestic violence, assault, and nuisance such as air quality and noise concerns;
- **Regional and Local Economy** – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity;
- **Traditional Indigenous land and resource use** – including sites and areas used for traditional activities, and culturally and spiritually important sites and areas;
- **Land Use Compatibility** – including existing and proposed land uses;
- **Recreation and Tourism** – including land/waterway access and resource availability; and
- **Provincial Parks and Protected Areas** – including areas of natural and scientific interest and conservation reserves.

We want to prepare a holistic and comprehensive overview of information for the Wapekeka First Nation and would much appreciate to hear back from you on this document as our team is always open to working with you for further improvement on the content.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Michael Fox
Regional Consultation Lead

Dear Chief Sainnawap,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 6, 2024, the package status indicates that a notice has been left at the mailing address above on February 6, 2024, pending pickup.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Floating Road**

The livestreaming event is scheduled for **March 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

WSR
WEBEQUIE
SUPPLY ROAD

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

Wapekeka First Nation
P.O. Box 2
Angling Lake, ON
P0V 1B0

Dear Chief Sainnawap,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Groundwater Preliminary Findings**

The livestreaming event is scheduled for **April 15th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may ask questions on the platforms during the livestream or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions during the radio show at 1-844-424-0500 or the same email above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

WSR
WEBEQUIE
SUPPLY ROAD

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation

	based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date
You can also stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Dear Chief Sainnawap,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to the above mailing address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Community Virtual Information Sessions for Round 3 of Consultation

In the upcoming months, the WSR Project team will be conducting community virtual information sessions for all communities for Consultation Round 3. The Project Team will share information about the EA/IA activities including a project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

There will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team also has a platform to allow for real-time translation to accommodate community members during the session.

The WSR Project Team will be sending a link to your community prior to the information session, so stay tuned and watch out for your community's invitation letter. In the meantime, please visit supplyroad.ca to find information on the WSR Project.

Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Inc (formerly SNC-Lavalin Inc)

May 8, 2024

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Tuesday, May 21st from 2:00pm-2:45pm EST** for Wapekeka First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/82983992314?pwd=GIyofkZKuKdgVjOxtZfaHrr13Rzwzx.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 829 8399 2314 **Passcode:** 395582

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

July 9, 2024

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, scope of EA/IA, EA/IA methodology, preliminary results of effects assessment for select value components, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 22nd from 11:00-11:45am EST** for Wapekeka First Nation, where there will be a second presentation on the WSR Project activities for Consultation Round 3. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/88206843741?pwd=bxP7FWmPCb2XTPJBESc4i3IFbgt3vX.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID:** 882 0684 3741 **Passcode**: 734030

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Webequie Supply Road Project
Fall Geotechnical Drilling Program – Field Notice

What's happening?

AtkinsRéalis is proposing to complete drilling programs for the Webequie Supply Road (WSR) project to further engineering design and support the coordinated provincial and federal Environmental Impact Assessment. This letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). All works will be conducted in accordance with the permit conditions issued by MNR.

A borehole drilling program is planned to occur using a number of different methods of drilling depending on the terrain type and will include a multipurpose helicopter transportable drill, a Talon drill, and/or a ConeTec drill.

Helipad and drill pads will be cleared by a tree cutting team that will precede the drilling teams to ensure safe landing of the helicopters and drill equipment.

There are 50 boreholes proposed, including 37 sites intended for Talon Drilling, 18 ConeTec locations, and 13 sites completed by conventional drilling. The locations proposed for drilling are presented in the attached map.

Schedule

Work is expected to begin in late September 2024 and will continue until approximately mid-November 2024, depending on weather conditions.

What to expect

Field crews will be accessing sites across the study area by helicopter—you may see helicopters in the area carrying personnel and equipment. Crews may need to clear brush and trees from helipad sites to allow helicopter access, which could require the use of chainsaws.

Helicopters may be flying into the Webequie and Ogoki Post airports for refueling and staging purposes.

Re: Early Circulation of Draft Environmental Assessment Report / Impact Statement
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap,

We hope that this finds you and your community well.

As you know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR, or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities. We are using a coordinated approach to ensure all federal and provincial requirements are met and will formally submit/release the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that we are planning an early circulation of the draft EAR/IS to provide the opportunity for your community to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. Early circulation of the draft EAR/IS is a discretionary step in the EA/IA process which the Webequie Project Team is offering to hear your community's views and help us better understand any concerns to address when finalizing the document. At this time, we envision the early circulation of the draft EAR/IS to communities will occur in late fall or early winter of this fiscal year 2024/2025. This will provide communities an extended review period of 60-days to provide their review and comments. Following the circulation of the draft EAR/IS to Indigenous communities, the draft EAR/IS will be circulated formally to the public and stakeholders for 60-day review. This would provide an additional 60 days for Indigenous communities to review the draft EAR/IS, for a total review period of 120 days. Once a final EAR/IS is submitted to the provincial and federal governments for review and a decision, there will be an additional opportunity for Indigenous communities to provide comments during the provincial and the federal 49-day public review period.

We will follow-up with you as we move closer to the circulation of the draft EAR/IS, including how you would like to receive the document (electronic and/or hard copy).

The Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore they will be following-up with you to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Please let us know if there is any way we can offer our support throughout this process.

Should you have any questions, please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project Team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Wapekeka First Nation
P.O. Box 2
Angling Lake, ON P0V 1B0

Re: Round 3 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 3 (electronic and hard copy), which summarizes and documents Round 3 of the Engagement and Consultation Program with your community for your review and comments.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2;

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 3, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Next steps in the engagement and consultation program for the Project will involve various engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement (EAR/IS), including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. Future engagement and consultation sessions for communities are tentatively scheduled to start in Winter of fiscal year 2024/2025 and will coincide with the release of the draft EAR/IS for review and comments. The outcomes from future engagement and consultation activities planned will be used by the Project Team to help inform in the development of the Final EAR/IS that will be submitted to provincial and federal regulators and circulated to all Indigenous communities for review and comments.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

November 5, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Geology, Terrain and Soils.**

The livestreaming event is scheduled for **November 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

November 13, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Assessment on Effects on Surface Water Resources.**

The livestreaming event is scheduled for **November 18th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or you can email mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Community Virtual Information Sessions for Round 4
The WSR Project Team will be starting virtual information sessions for each community for Consultation Round 4. These are one-on-one sessions where the Project Team shares information about the cumulative effects assessment. The session consists of a presentation on the WSR approach to assessing cumulative effects, followed by a question-and-answer period. The WSR Project team also has a platform to allow for real-time translation to accommodate community members during the session.

You can visit www.supplyroad.ca/sessions/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, AtkinsRéalis
Craig Wallace, Project Manager, AtkinsRéalis

November 22, 2024

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session, via Zoom, on Monday, December 2nd from 2:00-2:45 PM EST for Wapekeka First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/87654175116?pwd=Jtq5OcwPbBpl6mAdT9QFP2miclGs3d.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

December 16, 2024

Chief Brennan Sainnawap
Wapekeka First Nation
P.O. Box 2
Angling Lake, ON
P0V 1B0

Dear Chief Sainnawap,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package has been delayed and is currently in transit to your community. We are aware of the Canada Post strike which began on November 15, 2024, that has caused a further delay to the delivery of the report. Because of the strike, our team will be sending the files for Consultation Progress Report Round 3 via WeTransfer in a separate email.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board

	meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

December 16, 2024

Chief Brennan Sainnawap
Wapekeka First Nation
P.O. Box 2
Angling Lake, ON
P0V 1B0

Dear Chief Sainnawap,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 3

On November 5, 2024, the WSR Project Team sent a package via Canada Post to the above address containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 16, 2024, the package status indicates the package has been delayed and is currently in transit to your community. We are aware of the Canada Post strike which began on November 15, 2024, that has caused a further delay to the delivery of the report. Because of the strike, our team will be sending the files for Consultation Progress Report Round 3 via WeTransfer in a separate email.

The Consultation Progress Report 3 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Reports 1 and 2 for Consultation Rounds 1 and 2 were provided to Indigenous communities and the MECP in October 2022 and January 2024, respectively. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 3 provides an overview of engagement activities in Consultation Round 3, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 3 of the Engagement and Consultation Program occurred from April 2024 to September 2024. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 2

- Summary of preliminary effects assessment for select valued components, including cumulative effects;
- Incorporation of IKLRU information into EA/IA;
- Proposed mitigation, and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the Consultation Progress Report 3, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 4. Should your community have any questions or comments on the Consultation Progress Report 3, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board

	meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.

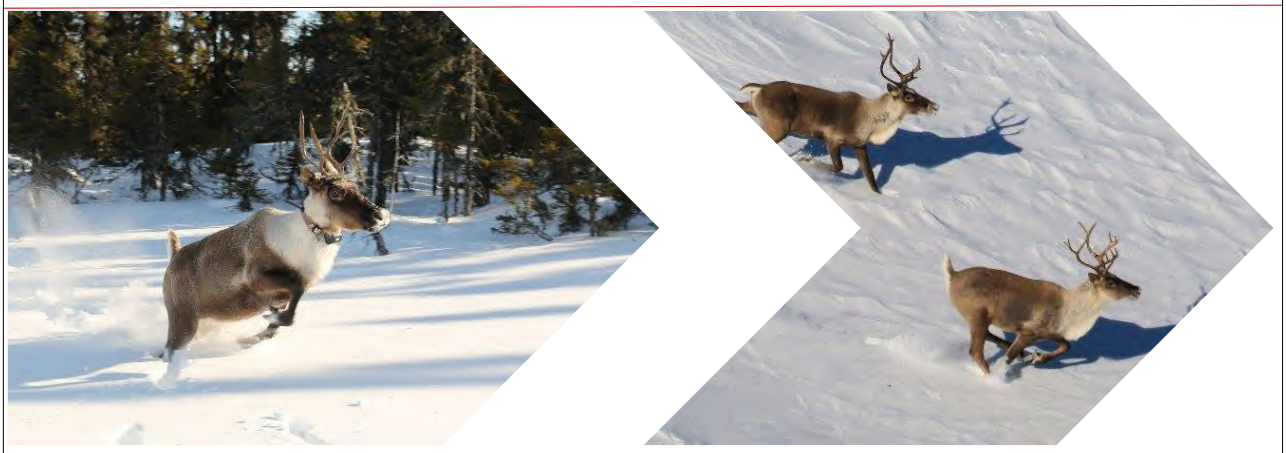
FIELD NOTICE

WEBEQUIE SUPPLY ROAD

JANUARY 2025



WHAT'S HAPPENING?

Field work will be continuing in the 2025 winter season to support the provincial Environmental Assessment (EA) and federal Impact Assessment (IA) for the Webequie Supply Road.

ATIKWAG/CARIBOU COLLAR REMOVAL

Field work has been scheduled to take place from February 19th to March 1st, 2025, to manually remove atikwag/caribou GPS radio tracking collars.

In 2021, radio tracking collars were placed on atikwag/caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, these collars were set to automatically release in February 2024, however not all collars released as intended. A specially trained team will manually remove collars without harming the animal.

WHAT TO EXPECT

Field crews will be accessing sites across the study area by helicopter so you may see helicopters in the area. An update will be provided if the above schedule changes due to weather or other conditions.

WHERE?

See the attached map of the study area. Please note that atikwag/caribou can travel very far and therefore, the field team may need to travel outside of the study area boundaries.

NOTES
DISCLAIMER

January 24, 2025

Dear Chief Sainnawap,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share information about the cumulative effects assessment (CEA).

We will be offering a community information session for Round 4 Part 2, via Zoom, on Monday, February 3rd from 2:00-2:45 PM EST for Wapekeka First Nation, where there will be a presentation on the on the topic of the CEA for the Project as part of the engagement activities for Consultation Round 4. We anticipate the community information session to be approximately 45 minutes in length with a presentation and question and answer period. The Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows:
https://us06web.zoom.us/j/88610838771?pwd=MUxkoba9LBexd8MAIkj0lMkC3aCqTL.1

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-722-4300. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685.

In addition, the Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/meetings/

To help create awareness, facilitate postings, and increase participation for the community information session, the Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. The Project Team is offering opportunities for engagement related to cumulative effects assessment in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the CEA. The session will be facilitated by the Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
In-Community Sessions	Community information sessions can be conducted, whereby the Project Team will discuss the CEA with a question-and-answer period at the end of the presentation.

Method	Description
Drop-In Sessions	Community members can drop-in at a safe location to discuss the CEA with the Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the Project Team will discuss the CEA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the Project Team will fax you the CEA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the Project Team can present the CEA process with a local translator that the Project team will pay for to explain the CEA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the CEA.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: https://www.supplyroad.ca.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

Re: Early Circulation of Draft Environmental Assessment Report/Impact Statement for Review
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Sainnawap,

We hope that this finds you and your community well.

As you may know, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR), or 'the Project'), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (refer to attached project location key plan).

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* are being conducted for the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and have prepared the results of the assessments in one single report called the Environmental Assessment Report / Impact Statement (EAR/IS).

Today, we are writing to advise you that an early circulation of the Draft EAR/IS is now available to your community for review. The Draft EAR/IS documents the evaluation of alternative routes considered for the WSR and presents the Preferred Route and location for supportive project infrastructure (e.g., construction camps, pits/quarries). It also documents the potential environmental, social, cultural and health impacts including cumulative effects, proposed mitigation measures, and engagement and consultation undertaken so far.

The draft EAR/IS is being circulated in two stages:

- Early Access for Indigenous Communities: 120-Day Review Period, June 9 to October 7, 2025
- Public and Stakeholders: 60-Day Review Period, August 8 to October 7, 2025

The two-stage approach to circulation of the Draft EAR/IS will provide your community with an extended review period to provide comments on the document, for a total of 120 days.

Enclosed is the Draft EAR/IS for the WSR Project for review. This package includes:

- One (1) hard copy of the main body of the Draft EAR/IS;

- Electronic copy (USB - digital memory stick) of EAR/IS Appendices that include draft technical reports; and
- One hard copy and electronic copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree and Cree.

The Draft EAR/IS and information on the review process is also available on the WSR Project Website: **https://www.supplyroad.ca/draftea**.

What is not included in Draft EAR/IS at this time is the draft Record of Consultation and Engagement with Indigenous communities, the public and stakeholders. This document will be provided to your community when the draft EAR/IS is released for public and stakeholder review (August 8, 2025). In the interim, consultation and engagement activities and feedback we received from your specific community are documented in the Consultation Progress Reports for Rounds 1, 2 and 3 previously sent to you at key milestones in the EA/IA process, and can also be found on the Project website https://www.supplyroad.ca under "**Documents**".

Members of your community are encouraged to actively participate in the review of the Draft EAR/IS. Comments and feedback can be provided via the Project Website (https://www.supplyroad.ca); Project email (wsrcomments@supplyroad.ca) or by letter mail until October 7, 2025 to the contacts below:

APPENDIX P2.I.25

Correspondence with Indigenous Communities and Groups – Wawakapewin First Nation

Webequie Supply Road Project Consultation Log

Records Found: 1

Wawakapewin First Nation — First Nation Community

Contact Date: Oct 29, 2021 16:30 Method: E-mail
Topics to be Discussed: Notice of Commencement of Environmental Assessment
Don Parkinson of SNC Lavalin Inc (SNC) emailed the Notice of Commencement of Environmental Assessment (EA) for the Webequie Supply Road (WSR) Project to all stakeholders including the public, Indigenous communities, agencies and other interested parties. The email informed the stakeholders that the Terms of Reference (ToR) with amendments for the WSR EA Study was approved by the Minister of the Environment, Conservation and Parks (MECP) on October 8th, 2021. The email also informed them that the approved ToR and Notice of Approval can be accessed on the project website. It further encouraged participation in future consultations.
Attached File: SNC-Public Notice of Commencement of EA-2021-10-21.pdf

Contact Date: Nov 03, 2021 14:00 Method: Mail
Topics to be Discussed: Community Newsletter, Terms of Reference, Environmental Assessment Process
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team mailed a letter and 50 copies of a newsletter to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy, advising that the WSR Project's Terms of Reference (ToR) had been approved with amendments by the Minister of the Environment, Conservation and Parks, and that the Environmental Assessment (EA) process would begin. The letter indicated that multiple copies of the newsletter were enclosed for distribution to the community. The newsletter provided information about the steps involved in the EA process, including the Notice of Commencement, Baseline Studies and Identification of Alternatives, Engagement and Consultation, and the Indigenous Knowledge Program. Michael provided a link to the WSR Project website along with himself and Don Parkinson of SNC-Lavalin's email address if WWFN has any questions or comments.

Contact Date: Nov 22, 2021 14:47 Method: Fax
Topics to be Discussed: Terms of Reference, Live stream: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds
Melanie Laforest and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team faxed a letter and poster, to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy, advising that the WSR Project Team is hosting a live stream show and Wawatay radio session on November 23, 2021 with a livestream from 4:00-4:30pm EST and Wawatay Radio call-in show from 2:00-3:00pm EST, with access links and the toll-free call-in phone number. The sessions will include a presentation on topics including: Caribou and Wolverine, Wildlife and Wildlife Habitat, Species at Risk and Breeding Birds Work Plans along with question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations, Michael's email and cell phone contact information if WWFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Indigenous Land and Resource Use Program
Brianna Patrick and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an e-mail to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy, with an attached package that included a letter, map, and Information Sharing Agreement. The letter advised that the WSR Project Team are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program and inquired whether WWFN would be interested in participating in the Program. The letter included information about the IKLRU Program purpose, phases and guiding principles. The letter noted the importance of the protection and confidentiality of information collected and used in the IKLRU Program and indicated that a draft Information Sharing Agreement was included in the package, which outlined how confidential and sensitive information would be utilized in the WSR Project's environmental assessment and design process. A map of the Preliminary Study Areas for Indigenous Peoples Land Use and Interests was also included in the package. The letter asked WWFN to confirm their interest in participating in the Program by January 27, 2022. Brianna and Michael provided their email and cell phone contact information if WWFN has any questions.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Marian Tibor-McMahon and Michael Fox of Indigenous Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax, to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy, which included a letter and map of the WSR Socio-Economic Study Areas. The letter stated that a key component of the EA/IA process is collecting socio-economic information within the Project study area, and as a result, the WSR Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered. It included information about what information the socio-economic program will gather, what the study area is, and detailed the components of the program. The letter invited WWFN to participate in the WSR socio-economic primary data collection program. The letter asked WWFN to confirm their interest in participating in the program by February 3, 2022. Marian provided her email and cell phone contact information if WWFN has any questions.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session for Wawakapewin First Nation (WWFN) on August 15, 2022. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, Don played a video presentation which included information on WSR's Environmental Assessment/Impact Assessment (EA/IA) activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. After the video presentation, Don discussed questions and concerns that had been previously raised by WWFN, regarding their recommendation to establish a Webequie First Nation-owned company for environmental monitoring, the number of water crossings and related studies to assess and mitigate impacts, the presence of Webequie First Nation community members at consultation meetings with WWFN, and WWFN's hesitancy to provide input on the Project since the proposed road is far from their community. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. There were no community representatives in attendance. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Wawakapewin First Nation (WWFN)'s Chief Anne Marie Beardy, with a letter inviting the community's participation in the Socio-Economic Primary Data Collection Program as part of the WSR Environmental Assessment/Impact Assessment (EA/IA). The letter was a follow-up to the letter sent on December 20, 2021, which outlined the purpose of the socio-economic study, types of information that the Project team wants to gather, and suggested primary data collection methods. The letter explained that the Project team has a timeframe for the EA/IA process to complete the studies and document the results, and the goal for the year is to complete a Draft Socio-Economic Existing Conditions Report. The letter explained that the Project team would like to collaborate with the community to discuss and collect socio-economic information and/or verify information gathered to-date based on current research to help understand existing social and economic conditions. The letter provided an overview of the preliminary Valued Components for the EA/IA to represent aspects of social and economic conditions that are important to the community which require information gathering. The letter requested an indication of WWFN's interest in participating in the Socio-Economic Primary Data Collection Program by April 17, 2023, because it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by June 16, 2023.

The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if WWFN has any questions or comments.

The fax also included the English WSR Newsletter - Issue 20 which provided information about Consultation Round 2 Topics, the Socio-Economic Primary Data Collection Program, the Indigenous Knowledge and Land Resource Use Program, and the livestream and radio schedule for March 2023. The newsletter provided a link to the WSR Project website for finding additional information about the Project. Michael, Don Parkinson of SNC-Lavalin, and Leslie Spence the WSR Local Coordinator provided their email address and phone number if WWFN has any questions or comments.

Topics to be Discussed: Socio-Economic Primary Data Collection Program
Heather Swan of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Wawakapewin First Nation (WWFN)’s Chief Anne Marie Beardy as a follow up to the email sent on March 17, 2023 regarding the invitation to participate in the Socio-Economic Primary Data Collection Program as part of the Environmental Assessment / Impact Assessment. Heather asked the Chief if they had any questions regarding the original email and letter and indicated that the WSR Project team would like to hear back by April 17, 2023 as to WWFN’s interest in participating in the program. The letter detailed the purpose of the socio-economic study, the type of information that the WSR Project team is seeking, the study area, how information will be collected, schedule, and next steps. Heather requested the Chief to let the WSR Project team know if they prefer a call to discuss the request in the letter.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Wawakapewin First Nation (WFN) on April 24, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. Next, the Project Team played a voiceover presentation which included a testimony by the Webequie First Nation Chief Wabasse and information on WSR's Environmental Assessment / Impact Assessment (EA / IA) activities including alternative assessment methodology and results, valued components, preferred alternative and consultation approach and next steps. After the video presentation, Don discussed several concerns that had been previously raised by WFN. Don mentioned that the project team visited the community three years ago and so far, has heard comments about the location of major water crossings, participation of Webequie members in field studies and availability of aggregate supply for construction and maintenance of the road. The WSR Project Team had a platform which provided real time translation of the session in Oji-Cree to accommodate community members. The Project Team informed the audience that a recording of the session is made available through YouTube and the WSR Website for viewing. The team also informed the audience of the upcoming radio and livestreaming events the following day. There were no community members in attendance.

The letter advised that the WSR Project Team is hosting a Wawatay radio session from 6:00pm-7:00pm EST and livestream from 7:30pm-8:00pm EST on May 24, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads), along with a question-and-answer period. The letter attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. Michael apologized on behalf of the WSR Project team for any confusion and provided his email and cell phone contact information if WWFN has any questions or comments.

Topics to be Discussed: Radio, Livestreams and Engagement Options
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Wawakapewin First Nation (WWFN)'s Chief Anne Marie Beardy which included a letter, and poster advising that the WSR Project Team is hosting a Wawatay radio session from 12:00pm-1:00pm EST and livestream from 2:00pm-2:30pm EST on June 6, 2023. The letter and poster provided access links and a toll-free call-in phone number and explained that the sessions will include a presentation on the Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, and other in-community locations. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if WWFN has any questions or comments.

Topics to be Discussed: Indigenous Knowledge / Land and Resource Use Program
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Anne Marie Beardy of Wawakapewin First Nation (WWFN) with an attached letter as a follow up to the correspondence sent on December 13, 2021 regarding WWFN's participation in the Indigenous Knowledge / Land Resource Use (IKLRU) Program for the WSR Project. The letter noted that the Project team has also phoned the band office on January 17, 2022, February 24, 2022, April 13, 2022, and sent an email on January 20, 2022 to follow up and advise that the IKLRU Program has started and to confirm if the community is interested in participating. The letter provided an overview of the IKLRU Program as part of the Environmental Assessment / Impact Assessment and indicated that the community is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. The Project team encouraged the community to contact Ontario to determine how to proceed with submission of an application to receive funding for the community and offered support throughout the process. The letter requested an indication of the community's interest in participating in the IKLRU Program by the end of June 2023. The letter indicated that all knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project team, without the consent of the community. The letter also indicated that as the Proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Michael provided his contact information and closed by wishing the community continued health and wellness.

Topics to be Discussed: Virtual Information Session
Don Parkinson of SNC-Lavalin (SNC) and the Webequie Supply Road (WSR) Project Team held a virtual information session as part of the Consultation Round 2 for Wawakapewin First Nation (WWFN) on July 17, 2023. The information session began with an introduction regarding the purpose of the session and an overview of the agenda. The meeting began with a video of Chief Wabasse discussing the importance of the project to the Webequie Community. Don explained that the Part 2 of Consultation Round 2 will discuss the Project team's work on the evaluation of alternatives for supportive infrastructure which includes aggregate rock sources for pits and quarry access roads and construction camps. Don presented information on how various factors were evaluated to produce preferred options based on a lower score. Don also explained the various engineering structures such as culverts, bridges, access roads etc. in detail and shared graphics illustrating what the proposed structures would look like after completion. The WSR Project Team had a platform which provided a real-time translation of the session in Oji-Cree. No participants from WWFN were in attendance. Don reiterated that the Project Team would like to hear from WWFN community members in-person and that a recording of the session would be available through YouTube and the WSR Website.

Topics to be Discussed: WSR Newsletter - Issue 24
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) of the Webequie Supply Road (WSR) Project Team sent an email to Wawakapewin First Nation (WWFN)'s Chief Anne Marie Beardy which included a letter that offered various community engagement options to help create awareness of the Project. The letter also indicated that the WSR Project team has started conducting Virtual Information Sessions for Round 2 Part 2 where the Project team will share information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The letter explained that the session will include a presentation on the WSR Project activities followed by a question-and-answer period and that the team has a platform to allow for real-time translation to accommodate community members during the session. A link to the Project website was provided to view the upcoming schedule for virtual community information sessions and the letter indicated that the Project team will send the community a link to the session and Virtual Reality (VR) Open House created for each community, in the weeks prior to each community's session. Michael's email and cell phone contact information was provided if WWFN has any questions or comments.

Topics to be Discussed: Aboriginal Treaty Rights and Interests Forum Invitation
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Anne Marie Beardy of Wawakapewin First Nation (WWFN) with an attached invitation for the Aboriginal and Treaty Rights and Interests (ATRI) Forum hosted by the Province of Ontario in Thunder Bay on November 21-23, 2023. The poster explained that Webequie First Nation and Marten Falls First Nation encourage the community to participate in the follow-up Forum to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link (NRL), and Marten Falls Community Access Road (MFCAR) Projects. The poster provided more information on how community representatives can attend, the purpose of the forum, who should attend from each community, and an email address for the community to RSVP. The Province of Ontario, Michael Fox of WSR, Andrea Nokleby of MFCAR, and Mishal Neesar of NRL provided their emails for further information if WWFN has any questions or comments.

Topics to be Discussed: WSR Consultation Progress Report Round 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 2. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 2. The letter explained that the Consultation Progress Report summarizes the documents from Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025 and provided a list of topics and milestones which are proposed to be addressed as part of the engagement and consultation activities for Round 3. Michael's email and cell phone contact information was provided if WWFN has any questions or comments.

Topics to be Discussed: Consultation Round 2 Report Follow Up, Livestream, Radio Show
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent a fax to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy, with a letter and poster attached. The letter explained that the WSR Project team mailed a package containing the Consultation Progress Report for Round 2 (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter welcomed any feedback and input from the community so that issues and concerns can be addressed in the Environmental Assessment/Impact Assessment process for the Project and during Consultation Round 3.

The letter also advised that the WSR Project Team is hosting a livestream at 12:00pm EST and a Wawatay radio session at 2:00pm EST on April 8, 2024, with access links and the toll-free call-in phone number. The letter indicated that sessions will include a presentation on Surface Water Preliminary Findings, along with a question-and-answer period. The letter provided various community engagement options to help create awareness and attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if WWFN has any questions or comments.

Topics to be Discussed: Three Road Project Gathering & Expo Invitation
Carolina Montrose and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Anne Marie Beardy of Wawakapewin First Nation with an attached invitation for the Three Road Project Gathering & Expo hosted by Webequie First Nation (WFN) and Marten Falls First Nation (MFFN), The invitation noted that the event was funded by the Province of Ontario, our Treaty Partner and that it would be held in Thunder Bay on June 11-13, 2024. The invitation also noted the need to continue the momentum of the last two gatherings which focused on Aboriginal and/or Treaty Rights and Interests. In addition, the invitation notes that the Gathering & Expo will provide participants with an engaging and interactive space for consultation to learn more about the projects, ask questions, and share feedback focusing on water, peatlands and building roads on peatlands. Day 1 will be specifically for an Elders gathering, providing a comfortable space for Elders to gather and discuss the Projects. The invitation provided funding information and an email address to access the funding.

Topics to be Discussed: Virtual Information Session Round 3 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team held a virtual session as part of Consultation Round 3 for Wawakapewin First Nation (WWFN). An Oji Cree translator provided real-time translation of all meeting content. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 3 Part 1 presentation that began with a review of the project to date, followed by a discussion of preliminary results for two valued components: surface water and fish and fish habitat. Participants were informed that the unabridged version of the presentation was available on the website and that this version reported preliminary results for several other valued components. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from WWFN were in attendance.

Topics to be Discussed: Field Notice Fall Geo-Technical Drilling Program
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy regarding a Field Notice for the Fall geo-technical drilling program. The email indicated that AtkinsRéalis is providing a notification to complete a drilling program for the WSR project to further engineering design and support the coordinated provincial Environmental Assessment and Federal Impact Assessment. The letter is intended to provide notice as required by Land Use Permits pending issuance by the Ministry of Natural Resources (MNR). The email indicated that all works will be conducted in accordance with the permit conditions issued by MNR. Attached to the email was the Field Notice explaining what is happening, the schedule and what to expect. For further questions, the contact information for Hayden Yip of AtkinsRéalis was provided.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy with a letter attached to the email regarding the planned early circulation of the draft Environmental Assessment Report / Impact Statement (EAR/IS). The letter advised that the Project team is planning an early circulation of the draft EAR/IS to provide the opportunity for WWFN to review the draft EAR/IS prior to its release to stakeholders and the public for formal review. The letter explained that the team anticipates the draft EAR/IS to occur in late fall or early winter of the fiscal year 2024/2025 which will provide communities with an extended review period of 60-days to provide their review and comments. The letter explained that the team would follow up with the community as the project moves closer to the circulation of the draft EAR/IS, including the community would like to receive the document (electronic and/or hard copy). The letter explained that the Province of Ontario continues to offer funding agreements with eligible communities to participate in the EA/IA process for the WSR Project, including the review of the draft and final EAR/IS through the Participant Funding Initiative, and therefore will be following up to discuss resources needed by the community to take part in the extended review period of the draft EAR/IS. Michael provided his contact information for any questions or comments.

Topics to be Discussed: Consultation Progress Report Round 3
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent a package via Canada Post to Wawakapewin First Nation’s (WWFN) Chief Anne Marie Beardy which included a USB, a cover letter, and a copy of the WSR Consultation Progress Report Round 3. The USB contained files supporting Record of Consultation and an electronic version of the Consultation Report for Round 3. The letter explained that the Consultation Progress Report summarizes the documents from Round 3 of the Engagement and Consultation Program with Indigenous communities on the Project. The letter explained that the report is being provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and the Ministry of the Environment, Conservation, and Parks ToR Notice of Approval which requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA. The letter further explained that next steps will involve engagement and consultation options for communities to review assessment findings in the draft Environmental Assessment Report / Impact Statement, including targeted sessions with Indigenous communities for feedback and input on the results of the cumulative effects assessment for the Project. The letter noted that the future engagement and consultation sessions for communities are tentatively scheduled to start in Winter 2024/2025. Michael's email and cell phone contact information was provided if WWFN has any questions or comments.

Topics to be Discussed: Virtual Information Session Round 4 Part 1
Don Parkinson of AtkinsRéalis and the Webequie Supply Road (WSR) Project Team conducted a virtual community meeting on the Zoom platform with Wawakapewin First Nation. The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 1 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment, then an explanation of cumulative effects and how they are determined and managed. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. No participants from WWFN were in attendance.

Topics to be Discussed: Winter 2025 Field Notice
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) sent an email to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy with a winter field notice attached. The field notice indicated that field work has been scheduled to take place from February 19-March 1st, 2025 to manually remove caribou GPS radio tracking collars. The notice indicated that the collars were placed on the caribou to gather data on their populations, migration patterns, and habitat use. Following three years of data collection, the collars were set to automatically release in February 2024, however not all collars released as intended. The notice explained that a specifically trained team will manually remove collars without harming the animal. The notice also provided information on what to expect and where the team may need to travel but noted that the field team may need to travel outside the study area boundaries. A map was provided on the second page of the notice.

Topics to be Discussed: Virtual Information Session Round 4 Part 2
McKenna Baxter and Michael Fox of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project Team sent an email to Wawakapewin First Nation's (WWFN) Chief Anne Marie Beardy, with a letter and poster advising that the WSR Project Team is hosting a virtual information session for Round 4 Part 2 for WWFN on February 18, 2024, from 2:00-2:45pm EST with registration links for the session. The information session will include the second presentation on WSR's Cumulative Effects Assessment. The letter stated that the WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. The letter also included information on the Virtual Reality (VR) Open House where community members can access further information about the project and provide comments. The letter indicated that the WSR Project Team is available for additional engagement sessions and provided a list of engagement options. The letter also attached a poster for staff to post on the community website, community Facebook page, other in-community locations. Michael's email and cell phone contact information if WWFN has any questions or comments.

Contact Date: Feb 18, 2025 11:05 Method: Indigenous Community Meeting
Topics to be Discussed: Virtual Information Session Round 4 Part 2
The Webequie Supply Road consultation team conducted a virtual community meeting on the Zoom platform with Wawakapewin First Nation (WWFN). The meeting began with a video message from Chief Cornelius Wabasse of Webequie First Nation, then was followed by a pre-recorded Consultation Round 4 Part 2 presentation that began with a review of the project to date, followed by a discussion of the process of effects assessment. After the effects assessment discussion, potential effects and associated mitigation measures were explained using examples from geology, terrain and soils and fish and fish habitat. Once the main presentation was complete, participants were asked whether they had any questions or comments on the presentation or the project in general. No comments or questions were received and the meeting then came to a close. There were no participants from WWFN in attendance.

Topics to be Discussed: Early Circulation of the Draft EAR/IS
Michael Fox and McKenna Baxter of Indigenous and Community Engagement (ICE) and the Webequie Supply Road (WSR) Project team sent an email to Chief Anne Marie Beardy of Wawakapewin First Nation (WWFN) with an attached letter regarding early circulation of the Draft Environmental Assessment Report / Impact Statement (Draft EAR/IS) for Review for the WSR Project. The letter advised the community that the Draft EAR/IS is now available for the community to review. The letter provided an overview of what is documented in the Draft EAR/IS and explained that it is being circulated in two stages to provide communities with an extended review period to provide comments on the document for a total of 120 days. The two stages of circulation are: 1) Early access for Indigenous communities from June 9 to October 7, 2025, and 2) Public and Stakeholders from August 8 to October 7, 2025. The letter explained that enclosed in the package is the Draft EAR/IS for the WSR Project for review which includes: One hard copy of the main body of the Draft EAR/IS, an electronic copy of the Draft EAR/IS and Appendices, and one hard copy of Plain Language Summaries for each section of the Draft EAR/IS in English, Oji-Cree, and Cree. The letter also provided a link to the Draft EAR/IS on the Project website. The letter also noted that the draft Record of Consultation and Engagement with Indigenous communities, public, and stakeholders is not included in the Draft EAR/IS, but will be provided to the community when the Draft EAR/IS is released for public and stakeholder review on August 8, 2025. In the interim, consultation and engagement activities received from the communities is documented in the Consultation Progress Reports for Rounds 1, 2, and 3, previously sent to the community at key milestones in the EA/IA process, and can also be found on the Project website. The letter encouraged the community to actively participate in the review of the Draft EAR/IS and provided an email and/or mailing addresses to submit comments. For any questions or to schedule a meeting with the Project Team, Michael also provided his email and phone number.

WSR
WEBEQUIE
SUPPLY ROAD

November 2, 2021

Dear Chief,

On October 8th, 2021, after extended consultations, the Minister of the Environment, Conservation and Parks approved the final Terms of Reference with amendments for the Webequie Supply Road (WSR) project. You can find these amendments on the following website: https://www.ontario.ca/page/webequie-supply-road-project We are now proceeding with the environmental assessment in accordance with the approved Terms of Reference.

As part of the WSR communication and engagement activities, the project team produces regular project newsletters, which you find enclosed a number of copies for distribution to your community members.

If you have any questions, please do not hesitate to ask or phone me at 807-472-6147. We wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road

WSR240-WEB-PR-LT-0299 Web-WSR letter to Chiefs re Newsletter and approved ToR-2021-11-01

November 22, 2021

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment studies. This upcoming week, **WSR Presents: Caribou and Wolverine/Wildlife and Wildlife Habitat/Species at Risk/Breeding Birds.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 23rd at 2:00-3:00 (EST)**. We encourage you and your community members to listen, for this will give your community membersthe opportunity to ask questions. You may call during the radio show at the **toll-free number:1-844-424-0500.**

In addition, the live streaming event is scheduled on the same day as the above radio show at **4:00pm – 4:30pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. All sessions are recorded and accessible on YouTube, you can subscribe at: Webequie Supply Road - YouTube. We have regular updates on our Facebook page that features community photos, informative videos, Frequently Asked Questions along with project information. You can follow WSR on Facebook at Supply Road | Facebook, Twitter, Instagram and http://www.linkedin.com/company/wfnsupplyroad You may also call with questions on the same toll-free number provided above during the live streams.

The WSR Project Team is offering opportunities of engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the WSR Project.

Engagement Options

Method	Description
Focus Group Sessions	With proper Covid-19 protocols in place, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment studies. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse groups(women, elders, youth, land users, etc.)
Community Sessions	With proper Covid-19 protocols in place, community information sessions can be conducted, whereby the WSR Project Team will discuss the Environmental Assessment process with a question-and-answer period at the end of the presentation.
Drop-in Sessions	With proper Covid-19 protocols in place, community members can drop-in at a safe location todiscuss the Environmental Assessment process with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the Environmental Assessment process facilitated by the WSR Project Team using Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the Environmental Assessment process to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the Environmental Assessment studies presentation and set up a conference call number to go through the presentation based on the area of interest your team wants to focus on and answer any questions.
Local Radio Call In Show	Using the local community radio, the WSR can present the Environmental Assessment studies with a local translator that the WSR will pay for and explain the Environmental Assessmentprocess. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the Environmental Assessment process.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching the WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, then we can mail these hardcopy WSR poster to your community for local distribution and all you need to do is email or call us to inform us that you need hardcopies of WSR poster.

Lastly, given the high and daily usage of social media channels by Indigenous leaders and members, you, your Council, and your staff can also follow us on Facebook, Twitter, Instagram, and LinkedIn to stay updated and repost it on your social media accounts to assist in information access, information dissemination, and information request associated with the WSR Project's environmental studies.

To obtain information on the Project, or to provide comments, please visit our website at http://www.supplyroad.ca or contact me at 807-472-6147.

Michael Fox
Regional Consultation Coordinator
Webequie Supply Road
michael.fox@supplyroad.ca

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

INDIGENOUS KNOWLEDGE / INDIGENOUS LAND AND RESOURCE USE PROGRAM FOR THE WEBEQUIE SUPPLY ROAD PROJECT

Information Sharing Agreement

Purpose

The purpose of the Indigenous Knowledge and Land and Resource Use (IKLRU) Program Sharing Agreement is to:

- Document the shared understanding of how the Wawakapewin First Nation IKLRU Study for the Webequie Supply Road Project will be completed;
- Document the anticipated activities that will be part of the IKLRU Program; and
- Document how IKLRU information will be integrated into the Environmental Assessment Report (EAR) / Impact Statement (IS).

Confidentiality and IK / TLU Sharing

- Webequie First Nation acknowledges that all IKLRU information is the property of Wawakapewin First Nation and the individual knowledge holders who contributed to the study.
- Webequie First Nation will disclose the IKLRU as required through the regulatory process only.
- Webequie First Nation will store the IKLRU information in a secure location and it will be provided to the appropriate Project staff and consultants only.
- Webequie First Nation will use the IKLRU information to contribute to the EAR / IS.
- Webequie First Nation will not include the full IKLRU report or study in the EAR / IS.
- Webequie First Nation will provide relevant IKLRU information to the appropriate disciplines for use in their EAR / IS sections.
- Webequie First Nation will use the IKLRU information to assess impacts on Wawakapewin First Nation land and resource use; thus, the IK section of the EAR / IS will summarize the IKLRU information without disclosing specific locations of use.
- Webequie First Nation will use the IKLRU information for the Project regulatory process only, including planning, design, assessment, construction, operation, maintenance and decommissioning.

IKLRU Study

Wawakapewin First Nation and Webequie First Nation agree that the type of information in the IKLRU Study Plan and scope will be included in the IKLRU Study.

The IKLRU Study will include information about the geographic location of data collected. This can be as numerical coordinates or as a location on a map with appropriate reference points.

Webequie First Nation will accept any additional land and resource use-related information within the IKLRU Study Area, as community members deem appropriate.

Wawakapewin First Nation and Webequie First Nation agree that upon completion of the IKLRU Study, Wawakapewin First Nation will approve the Report for use in the EAR / IS.

Signing this Agreement

Wawakapewin First Nation signing of this Sharing Agreement is no way represents their support for the Webequie Supply Road Project.

Re: Indigenous Knowledge / Indigenous Land and Resource Use Program for the Webequie Supply Road Project

Dear Chief Anne Marie Beardy,

We hope that this letter finds you and your community well.

Webequie First Nation (WFN) is the proponent of the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will extend from Webequie Airport to the mineral deposit area near McFaulds Lake as shown in the enclosed project map. WFN has started the provincial environmental assessment (EA) and a formal Notice of EA Commencement was issued on October 29th, 2021. The WSR Project is also subject to a federal impact assessment (IA) and the Notice of Commencement of the IA was issued on February 24th, 2020. Collectively the EA and IA are referred to as the "assessments" and will examine potential effects of the WSR Project including mitigation and monitoring, and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS). We will continue to provide you with updates as the assessment process continues, and welcome and appreciate your input throughout the planned consultation and engagement activities.

With this letter, we would like to share with you that we are commencing the Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program for the Project. The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

The purpose of the IKLRU Program is to:

- Promote sharing of IKLRU information relevant to the Project;
- Help identify potential impacts of the Project, including those on Indigenous rights and interests; and

- Collaborate and work with Indigenous communities to enhance positive impacts or to identify measures to avoid/reduce potential effects on Indigenous rights and interests.

As traditional stewards of the land, we all must make certain that development in the area appropriately addresses the rights, interests, values, traditions, concerns, and aspirations of Indigenous communities within the assessment context, during the life of the WSR Project, and beyond. It is in this spirit that we invite Wawakapewin First Nation to participate in the IKLRU program.

The IKLRU Program for the WSR Project will occur in two phases:

1. Collecting existing Indigenous Knowledge and information on Indigenous land and resource use that communities are prepared to share with WFN in order to help inform the early stages of the assessments; and
2. Completing project-specific Indigenous Knowledge and Lands & Resource Use studies, or compiling information/data in other form, that can be provided to the Project Team for integration into the assessment.

At this point, we are enquiring whether Wawakapewin First Nation is interested in participating in the IKLRU Program in either (or both) phases of the Program. We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the IKLRU Program for the WSR Project. In addition, the Project Team can help communities access this funding, where applicable.

While the IKLRU Program is distinct from the Consultation Program for the WSR Project, the two are complementary and collectively serve to solicit Indigenous perspectives, values and inputs with respect to project planning and assessment process. You may share as much or as little IKLRU information as you wish, and in whatever form you prefer. Your community will also have the opportunity to review the EAR / IS to ensure accuracy of IKLRU information, including if it has been adequately, appropriately, and respectfully represented within the assessment process.

While there are significant benefits to integrating Indigenous Knowledge from your community in the assessment, we also recognize that this knowledge belongs to your community and that confidentiality needs to be respected. Our approach to working with your community on the IKLRU Program will be guided by the following key principles:

- The people of your community are a source of knowledge on uses of the land and its resources, associated cultural practices, and community values.
- We are your partner – our goal is to work together with you to conduct the IKLRU Program in a way that contributes to your community's well-being so that Indigenous Knowledge and land and resource use information can be meaningfully integrated into the assessment process.

Protection and confidentiality of IKLRU information is of the utmost importance to the Project Team. To honour and respect this important information, we propose establishing an Indigenous Knowledge Sharing Agreement with your community prior to the collection and use of your community's information. The Sharing Agreement would outline how confidential and sensitive information would be utilized in the WSR Project's assessment and design process. It would also adhere to all community-specific protocols and OCAP (ownership, control access and possession) principles. Once you've confirmed participation in the IKLRU Program, we will work with you to prepare the Sharing Agreement. We have attached a draft Indigenous Knowledge Sharing Agreement for your review and consideration.

In order to confirm that Wawakapewin First Nation is interested in participating in the IKLRU Program, we ask that you contact us by January 27, 2022. Our Project Team will also reach out to you in a few days if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council to discuss next steps, including the methods and protocols your community will follow.

To express your community's interest or if you have any questions regarding the IKLRU Program or the WSR Project, please feel free to contact Michael Fox (807-472-6147; michael.fox@indigenousengagement.ca) or Brianna Patrick (204-223-5770; brianna.patrick@indigenousengagement.ca) of the Project Team.

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Chief Cornelius Wabasse
Webequie First Nation

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Anne Marie Beardy,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Wawakapewin First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

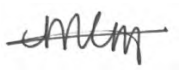
Next Steps

In order to confirm that Wawakapewin First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

February 4, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on the Environmental Assessment and Impact Assessment (EA / IA) process. This upcoming week's session is: **WSR Presents: EA / IA Process.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 9th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is exploring virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

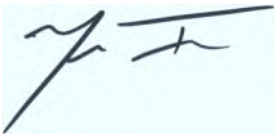
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

February 18, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Indigenous Knowledge. This upcoming week's session is: **WSR Presents: Indigenous Knowledge - Part 1.** The Project Team has planned an Indigenous Knowledge series, this upcoming week being the first part to that series.

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **February 23rd, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1- 844-424 -0500**.** You can also email your questions to brianna.patrick@indigenousknowledge.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. April 1, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on Socio-Economics. This upcoming week's session is: **WSR Presents: Socio-Economics.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 6th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to brianna.patrick@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

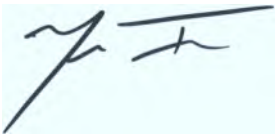
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

April 13, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on human health. This upcoming week's session is: **WSR Presents: Human Health.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **April 20th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

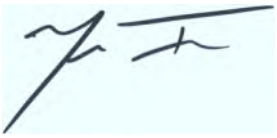
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

WEBEQUIE SUPPLY ROAD (WSR) PROJECT

Socio-Economic Study Plan
Fact Sheet

What is the primary purpose of the Socio-Economic Study Plan?

To characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) as a result of the construction and operation/maintenance of the WSR. Provide recommendations for minimizing negative socio-economic effects and enhancing beneficial effects of the Project.

What are socio-economics?

Studying socio-economics provides information about current jobs, income, education and housing conditions in a community.

What kind of information is going to be gathered?

- Community values;
- Community demographics (age, gender, marital status, education, labor force activity, health, etc.);
- The type of access each community has to education, jobs, or transportation; and
- Well being and safety.

Who is the information being gathered from?

- The 22 Indigenous communities that have been identified as the ones whose established or asserted Aboriginal and Treaty rights may be adversely affected by the Project and/or may have interests in the project.

WSR240-WEB-PR-FS-0016 Web-Socio Economic Fact Sheet-English-website-2022-04-26

*The Project Team will respect protocols and work with each community to understand how the information will be transferred, stored, and applied, and will be protected and kept confidential.

How is the information on community socio-economics being collected?

Primary information will be collected from Indigenous communities:

- A socio-economic survey using Survey Monkey, which will be sent by e-mail/letter;
- Key informant interviews with Chief and Councils, band administration staff, social service providers, healthcare providers, and knowledge keepers; and
- Collection of Indigenous knowledge through engagement activities.

Secondary information will be collected and reviewed:

- Published data from government websites, Indigenous community websites, municipal websites, and other open-source data. This information will be used to identify community demographics, community infrastructure, community social services, etc.

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Anne Marie Beardy,

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation (WFN) is conducting an Environmental Assessment (EA) study under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* for the Webequie Supply Road (WSR) Project, a proposed 107 km all-season road that will facilitate the movement of materials, supplies and people from the Webequie Airport to the mineral deposit area near McFaulds Lake (as shown in the enclosed project map). WFN has started the provincial EA and a formal Notice of EA Commencement was issued on October 29th, 2021. The Notice of Commencement of federal IA was issued on February 24th, 2020. Collectively, the EA and IA are referred to as "the assessments" and will examine potential effects of the WSR including mitigation and monitoring and the design of the Project. We are using a coordinated approach to ensure all federal and provincial requirements are met and will publish the results of the assessments in one body of the documentation called the Environmental Assessment Report / Impact Statement (EAR/IS).

Purpose of Socio-Economic Study

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socio-economic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. The study will involve the following:

- Collecting information on existing socio-economic conditions;
- Defining the study area(s) within which potential effects are considered;

- Assessing socio-economic effects, including identifying criteria and indicators to evaluate and measure the potential effects;
- Identifying appropriate mitigation measures to eliminate or reduce potential effects;
- Identifying net effects following mitigation; and
- Assessing cumulative effects.

Socio-Economic Information Required

As part of the socio-economic study, we are seeking information related to the preliminary criteria, also known as valued components (VCs), that have been identified to date. VCs are aspects of the environment that have physical, biological, social, economic, cultural, and health-related importance to Indigenous communities, public, federal and provincial authorities and interested stakeholders, and have the potential to change as a result of the Project. The preliminary socio-economic VCs reflect input received during the WSR engagement and consultation activities undertaken so far. Indigenous communities, groups and the public will have the opportunity to provide input and feedback to help further refine the criteria throughout the EA / IA process.

The preliminary VCs representing criteria for socio-economic information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;
- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

Socio-Economic Study Area

The socio-economic study consists of the following study areas to capture the potential direct and indirect effects of the Project:

Local Study Area (LSA) – the area where largely direct, and indirect effects of the Project are likely to occur, as shown in the attached Map. The LSA is divided into two (2) sub-categories which reflect the differences between the VCs for the socio-economic study:

- The LSA for **Population and Demographics, Community Services and Infrastructure and Local and Regional Economy** is defined as WFN and those communities who have asserted shared territory with WFN and/or who may experience the greatest potential effects of the Project
- The LSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined LSAs for the fish and fish habitat, surface water, vegetation, general wildlife, and air quality VCs.

Regional Study Area (RSA) – the area where potential, largely indirect and cumulative effects of the Project in the broader, regional context may occur, as shown in the attached Map. Similar to the LSA, the RSA is divided into two (2) sub-categories which reflect the differences between VCs for the socio-economic study:

- The RSA for **Population and Demographics, Community Services and Infrastructure, and Local and Regional Economy** consists of the 14 First Nations identified by the federal and provincial governments for engagement and consultation, as well as, City of Thunder Bay, Municipality of Greenstone, Township of Pickle Lake, Municipality of Sioux Lookout.
- The RSA for **Land and Resource Use** corresponds to the outermost boundaries of the combined RSAs for fish and fish habitat, surface water, vegetation, and general wildlife VCs.

Socio-Economic Information Gathering

Socio-economic information has been gathered by the Project Team from secondary sources through a desktop review of open-source data including Indigenous community and government websites, economic development plans, land use plans, and other reports and studies. We are now commencing our primary data collection program to help bolster and enhance this secondary source information. The Project Team is collecting information using the following methods to capture information regarding current social, economic and cultural conditions: 1) Surveys, 2) Focus Groups, and 3) Key Informant Interviews. **With this letter, we would like to invite Wawakapewin First Nation to participate in the WSR socio-economic primary data collection program. The program components are outlined in further detail below.**

1. Community Socio-Economic Survey
   - Your community may choose from the following list of in-person and/or online survey delivery methods:
     a) Online survey – community members can complete the survey via Survey Monkey (an online survey tool). The link can be made available on your community's website and/or social media.
     b) Intercept surveys – survey coordinators can be placed in different locations around the community to survey community members. Note that a short training program will be provided to in-person survey coordinators/administrators (option b), including compensation for their efforts.

c) Community sessions – community members can complete the survey in a collective format with the survey projected on a screen.
d) Drop-in sessions – community members can drop in (e.g., band office) to complete a survey.
e) At scheduled Open House Events – open houses as part of the engagement and consultation activities planned for Indigenous communities, and in the City of Thunder Bay on-reserve and off-reserve community members will be offered an opportunity to complete the survey.

- Questions will focus on demographics (e.g., age, gender, income, education, employment, housing, social services, health, safety).
- Each survey will include a guide with directions.

2. Focus Groups
   - The aim of the focus groups is to allow for an in-depth understanding of the experiences and insights of community members and for participants to have an opportunity to talk at length about their issues of concern and aspirations.
   - Focus groups will be comprised of 6-10 participants each with a series of open-ended questions.
   - One session will be held for each diverse population group in the community, including women, men, Elders, youth, land users/knowledge keepers, etc.
   - The sessions will be carried out either in person or virtually, and with permission can be recorded using an audio/video device with a notetaker present to ensure comments are accurately captured.
   - Topics to be explored include access to land, resources, infrastructure and services, safety, employment, education and training, and experiences with development and aspirations for.

3. Key Informant Interviews
   - Interviews will be conducted with individuals in the community who have special knowledge or information to contribute to the socio-economic study, such as social and health services (e.g., childcare, wellness counselling, youth support, nursing clinic, etc.), infrastructure, economic development and housing.
   - Key informants will be interviewed either by telephone, videoconference, or during in-person engagement and consultation activities. Interviews will be approximately 30 to 60 minutes in duration, depending on the number of questions, and with permission will be recorded electronically to assist in the preparation of transcripts.

All primary data collection activities will adhere to the community's cultural protocols and be subject to OCAP (ownership, control, access and possession) principles. Additionally, any proposed in-person activities will adhere to provincial and community COVID-19 protocols and will respect community and participants' preferences and comfort levels. Your community may wish to have a

participatory research form to outline the purpose of the study, the type of information needed and how the information will be handled.

Participant Funding

We understand that the Province of Ontario is offering participant funding for eligible Indigenous communities to participate in the EA/IA process which includes the socio-economic primary data collection program. If you do not have funding in place, the Project Team may be able to help your community access this participant funding program, where applicable.

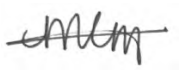
Next Steps

In order to confirm that Wawakapewin First Nation is interested in participating in the socio-economic primary data collection program, please contact us by February 3, 2022. I will also reach out to you a few days in advance if we haven't heard from you. Once you have confirmed participation, we will contact you to arrange a meeting with Chief and Council, or the delegated person(s) to assist the Project Team, to discuss next steps, including opportunities to integrate components of the socio-economic primary data collection program with other upcoming engagement and consultation activities in your community.

To express your community's interest or if you have any questions regarding the socio-economic primary data collection program or the WSR Project, please feel free to contact me at 416-668-3298 or marian@indigenousengagement.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,



Marian Tibor-McMahon, Deputy Project Manager / Socio-Economic Specialist
Webequie Supply Road

Project Map

April 29, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on air quality and noise & vibration. This upcoming week's session is: **WSR Presents: Air Quality + Noise & Vibration.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **May 4th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

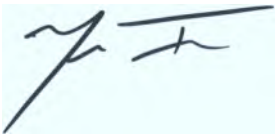
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

May 27, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on field studies related to water. This upcoming week's session is: **WSR Presents: Field Studies - Water.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 1st, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

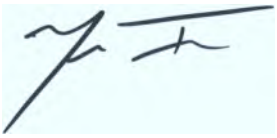
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

June 10, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on field studies related to fish and fish habitat. This upcoming week's session is: **WSR Presents: Field Studies - Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 15th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

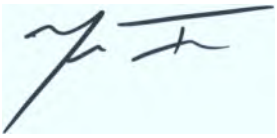
Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question and answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will payfor to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,



Michael Fox

Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 24, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team has planned a live streaming and radio call-in show focusing on cultural heritage This upcoming week's session is: **WSR Presents: Cultural Heritage.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **June 29th, 2022 at 2:30-3:30 pm (EST)**. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to carolina@indigenousengagement.ca.

In addition, a live streaming event is scheduled on the same day as the above radio show at **4:30pm – 5:00pm (EST)** which is accessible on the WSR Project website https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Lastly, as the WSR Project is currently in the EA/IA phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below, taking into consideration of COVID-19 restrictions. We understand that at this time in-person meeting and engagement should be limited given current public health restrictions. Therefore, the WSR Project Team is offering virtual methods of engagement. The WSR Project Team will continue to offer these virtual engagement methods until Indigenous communities are comfortable meeting with the WSR Project Team in-person and with proper protocols and guidelines in place. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	When COVID-19 protocols allow, open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	When COVID-19 protocols allow, community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question and answer period at the end of the presentation.
Drop-in Sessions	When COVID-19 protocols allow, community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, ortechnicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platformsthat Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings,tribal council meetings, Chiefs assemblies, online conferences, etc.

July 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

The WSR Project Team is currently hosting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

If the WSR Project Team has already hosted a virtual information session for your community, you can watch the recording of your community's session at: **supplyroad.ca/sessions/**. You can leave questions or comments at any time on your community's page and the Project Team will provide a response. If the WSR Project Team has not yet hosted a virtual information session for your community, you can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Socio-Economic Primary Data Collection Program

A key component to the EA/IA process is to collect socio-economic information within the project study area to help us understand the current social and economic conditions to create a socioeconomic baseline in order to assess and predict the changes to current conditions. The objective of the study is to characterize the manner and extent to which community socio-economic well-being could be affected (both positively and negatively) by the construction and operation/maintenance of the WSR Project. As such, the Project Team is seeking participation from Indigenous communities to discuss and collect socio-economic information or verify information gathered to date based on current research. You can find more information regarding the program on the WSR website: https://www.supplyroad.ca/ik-and-socio-economic/

We would like to invite your community to participate in the WSR socio-economic primary data collection program. To express your community's interest or if you have any questions regarding the socio-economic primary data collection program for the WSR Project, please feel free to contact Marian Tibor-McMahon at 416-668-3298 or marian@indigenousengagement.ca.

At any time, you can access additional information on the WSR website: **supplyroad.ca.** You can also stay tuned with the WSR Project by following our social media channels:

August 2, 2022

Dear Chief Beardy,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps.

We will be offering a community information session, via Zoom, on **Monday, August 15 between 12pm and 1:30pm** for Wawakapewin First Nation, where there will be a presentation on the WSR Project activities. We anticipate the community information session to be approximately 1.5 hours in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://maverickav.zoom.us/meeting/register/tZUsdOyupz4sGdYLhjjBwkwmROsgCgdq_g12.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: Meeting ID: 811 3569 5632 & Passcode: 091208.

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: https://www.supplyroad.ca/wawakapewin/.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox
Regional Consultation Lead
Webequie Supply Road

CC: Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

August 12, 2022

Dear Chief,

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of

	interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Consultation Round 2

Throughout the EA/IA phase, the Project Team conducts studies to gather information on a wide range of topics and consults with Indigenous communities, members of the public, and other stakeholders, to evaluate the Project and its potential effects. This month we are concluding our Consultation Round 1 and will be moving into Round 2, before the final Round 3.

We encourage community members to watch their information session at **supplyroad.ca/sessions/** where you can find your community-specific page.

Consultation Round 2 will focus on the following topics:

- Summary of input received from Consultation Round 1
- Identification and evaluation of alternatives
- Preliminary recommended preferred route and supportive infrastructure (aggregate/rock source areas, construction camps, access roads), including rationale for selection
- Preliminary engineering design elements of WSR (bridges/culverts)
- Next steps and schedule

Stay tuned with the WSR Project by following our social media channels:

Facebook	Instagram	Twitter
facebook.com/wfnsupplyroad	instagram.com/wfnsupplyroad/	twitter.com/wfnsupplyroad

The WSR Project website also has various informational videos, communication materials and project updates. Please visit: https://www.supplyroad.ca/

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

Re: Round 1 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Beardy:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report (electronic and hard copy), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);

1

WSR240-WEB-PR-LT-0418 Web-WSR Letter to WWFN re Consultation Round 1-2022-10-21

- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 2 for the Project from Winter 2023 to Summer 2023. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 1;
- Identification and evaluation of alternatives (routes, aggregate source areas, etc.,);
- Preliminary recommended preferred route and supportive infrastructure (aggregate/ rock source areas, construction camps, access roads), including rationale for selection;
- Preliminary engineering design elements of WSR (bridges/culverts); and,
- Next steps and schedule.

We welcome any feedback and input your community may have on the attached Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

November 2, 2022

Dear Chief,

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week featuring our special guest storyteller/comedian Ron Kanutski. The topic of the upcoming session is: **WSR Presents: Baseline Field Studies - Preliminary Observations – Fish and Fish Habitat.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **November 8th, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

You can also stay tuned with the WSR Project by following our social media channels:

November 17, 2022

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Biweekly Radio and Livestreaming Series is Back

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Building Roads in Muskeg Areas/James Bay Lowlands.**

The WSR live phone-in radio show will be broadcasted through **Wawatay News** on **Tuesday, November 22nd, 2022** at **11:00am - 12:00 pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at **1:00pm – 1:30pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.

Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Other Ways to Stay Up To Date

You can also stay tuned with the WSR Project by following our social media channels:

WSR
WEBEQUIE
SUPPLY ROAD

December 14, 2022

Chief Anne Marie Beardy
Wawakapewin First Nation
P.O. Box 477
Sioux Lookout, ON
P8T 1A8

Dear Chief Beardy:

We would like to bring up several activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Consultation Progress Report Round 1

On October 28, 2022, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 1 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, December 14, 2022, the package status indicates that it has been successfully delivered to your community on October 31, 2022.

The Consultation Progress Report is provided as per the requirements of the Terms of Reference (ToR) for the provincial Environmental Assessment (EA) process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA.

The Consultation Progress Report provides an overview of engagement activities to-date, as well as community-specific summaries of engagement and community feedback and input provided by community members. Consultation Round 1 of the Engagement and Consultation Program occurred in Spring/Summer 2022. Key milestones and topics covered in this round of consultation included:

- Overview of EA/IA process;
- Consultation to date and what we have heard (i.e. during the ToR phase);
- Study Plans for discipline studies (e.g., wildlife, fish, health, etc.);
- Criteria and indicators for evaluation and selection of a preferred route and Project effects assessment;
- Approach for evaluation of alternatives (e.g., routes, aggregate source areas);
- Overview and status of baseline studies;
- Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program; and,
- Consultation approach and next steps.

Engagement Opportunities

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

We welcome any feedback and input your community may have on the Consultation Progress Report, so that issues or concerns can be addressed in the EA/IA process for the Project. Should your community have any questions or comments on the Consultation Progress Report, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Thank you very much and we look forward to hearing from you soon.

March 9, 2023

Dear Chief,

Radio Show and Livestream

The Webequie Supply Road (WSR) Project Team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: The Alternatives Assessment Process – An Overview.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on March 14th, 2023 at 12:00pm - 1:00 pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.

Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team will begin virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project Team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the VR Open House created specifically for your community.

At any time, you can access additional information on the WSR website: **supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Chief Anne Marie Beardy
Wawakapewin First Nation
P.O. Box 477
Sioux Lookout, ON
P8T 1A8

Re: Socio-Economic Primary Data Collection Program
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Beardy,

We hope that this letter finds you and your community well.

As you know from our previous correspondence, Webequie First Nation is the proponent of the Webequie Supply Road Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

Today, we are writing to confirm whether your community has an interest in participating in the Socio-Economic Primary Data Collection Program and is follow-up to the invitation letter sent to you on December 20, 2021. In this letter, we outlined the purpose of the socio-economic study, types of information we would like to gather and suggested primary data collection methods (e.g., community surveys, focus groups, key informant interviews). Primary data is information collected first-hand directly with community members about issues and conditions of the community.

We have a timeframe for the EA/IA process to complete our studies and document the results. Our goal this year is to complete a draft Socio-Economic Existing Conditions Report, which documents the socio-economic baseline conditions of communities. We would like to collaborate with your community to discuss and collect socio-economic information and/or verify information gathered to-date based on current desktop research to help us to understand existing social and economic conditions.

The preliminary “Valued Components” for the EA/IA, which represent aspects of social and economic conditions that are important to you and the community, and require information gathering are as follows:

- Population and Demographics – including population, age, gender, etc.;

- Housing and Accommodations – including housing demand/affordability/supply/quality and number of people living in a home;
- Social Services and Infrastructure – including supply and demand for education, childcare, water, waste, energy, and communications;
- Transportation – including volume of, and demand for, road and air transportation;
- Community Well-Being and Safety – including social cohesion and culture, participation in social and/or cultural events, domestic violence, physical/sexual assault, air quality and noise;
- Land Use Compatibility – including existing and proposed land uses;
- Recreation and Tourism – including land/waterway access and resource availability;
- Provincial Parks and Protected Areas – including areas of natural and scientific interest and conservation reserves; and
- Regional and Local Economy – including economic and procurement opportunities, labour force and employment, government finances, cost of living, and mining/aggregate activity.

In order to meet the schedule for the completion of the EA/IA study, we respectfully request an indication of your community's interest in participating in the Socio-Economic Primary Data Collection Program by **April 17, 2023**, as it is the Project Team's intent to complete the socio-economic primary data collection to inform the draft baseline report by **June 16, 2023.**

We hope you and your community are safe and well and look forward to hearing from you.

Sincerely,

Heather Swan, Deputy Project Manager
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Michael Fox, Regional Consultation Coordinator, Webequie Supply Road
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, SNC-Lavalin Inc.

March 22, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Alternatives Routing in the Preferred Corridor.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, March 28th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

WSR
WEBEQUIE
SUPPLY ROAD

April 18, 2023

Dear Chief Beardy,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, May 1st from 2:00pm-3:00pm EST** for Wawakapewin First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/88287406590.

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 882 8740 6590.**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/wawakapewinfn/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols.

You can access additional information on the WSR website: **www.supplyroad.ca**

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca. On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks

May 3, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Analysis of Alternatives- Multiple Accounts Analysis - What is it?**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, May 9th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

May 17, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Wednesday, May 24th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. May 24, 2023

Dear Chief,

We would like to provide a **correction to the times** provided on our previous correspondence related to the Webequie Supply Road (WSR) project radio show and livestream happening today.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show today. The topic of the upcoming session is: **WSR Presents: Evaluation of Alternatives for Supportive Infrastructure (i.e., camps, laydown areas, aggregate/rock sources, access roads).**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Wednesday, May 24th, 2023 at 6:00pm – 7:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **7:30pm – 8:00pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we apologize for any confusion this may have caused and we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 1, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Criteria and Indicators for Evaluation of Alternatives for Supporting Infrastructure.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on **Tuesday, June 6th, 2023 at 12:00pm – 1:00pm (EST).** We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

The livestreaming event is scheduled on the same day as the above radio show at **2:00pm – 2:30pm (EST)** which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2 Part 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 6, 2023

Dear Chief Beardy,

We hope that this letter finds you and your community well.

We are following up on correspondence sent to you on December 13, 2021 regarding the Webequie Supply Road (WSR) Indigenous Knowledge / Indigenous Land and Resource Use (IKLRU) Program. The Project Team also phoned the band office on January 17, 2022, February 24, 2022, and April 13, 2022 and sent an email on January 20, 2022 to follow up and advise that the IKLRU Program has started and to confirm if your community is interested in participating. To date, we have not received a response regarding your interest in participating in the Program.

As you know from our previous correspondence, Webequie First Nation is the proponent of the WSR Project, a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake.

An Environmental Assessment (EA) under the Ontario Environmental Assessment Act and an Impact Assessment (IA) under the federal Impact Assessment Act is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic, cultural well-being, and the Aboriginal and Treaty rights and interests of communities.

The IKLRU Program is a critical component of the information base upon which the assessments will rely. The information generated through the Program will be used in concert with scientific approaches, and both knowledge systems will be given equal consideration in forming the foundation for baseline conditions, predicting potential project effects, including potential impacts to your inherent Indigenous rights and interests.

We understand that Wawakapewin First Nation is currently eligible to enter into a funding agreement with the Province of Ontario to participate in the IKLRU Program for the WSR Project. We encourage you to contact Ontario to determine how to proceed with submission of an application to receive funding for your community. Please let us know if there is any way we can offer our support throughout this process.

We want to learn more about your community from your perspective on a range of topics, including:

- Community history

- Community values, beliefs, aspirations and challenges
- Cultural and spiritual connections with the land
- Traditional land and resource use in the region
- Exercise of inherent Indigenous and treaty rights

By documenting Indigenous knowledge and land and resource use information as part of the EA/IA, it may assist your community in understanding your Aboriginal and treaty rights and interests, and ensuring they are protected.

We have a timeframe for the EA/IA process, to complete our studies and document the results. Our goal this year is to complete a draft baseline conditions report, which documents the existing conditions of communities and the environment. We want to work closely with you, to add your community's knowledge to the report.

Some communities may have documented this type of information as part of a community-based land use planning process. This information would be very useful to review with your community, either in a meeting, or to share any documentation with the Project Team, under the condition of confidentiality and non-disclosure to any other Party.

In order to make progress towards the completion of the EA/IA process, we respectively request an indication of your interest in participating in the IKLRU Program by the end of June 2023.

All knowledge that is shared will be safeguarded with a formal Confidentiality and Data Sharing Agreement, which will ensure that all input from the community will remain the ownership of the community, and that no information will be shared beyond the Project Team, without the consent of the community.

As the proponent, Webequie First Nation bears the responsibility for the Project and the assessment processes being applied to it. Like your community, we are traditional stewards of the land, and we must make certain that any development in the area is undertaken properly, and that the rights, interests, values, traditions, concerns, and aspirations of fellow communities are appropriately addressed within the assessment context, during the life of the Project, and beyond. It is in this spirit that we are reaching out to collaborate with us.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

June 14, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Bi-Weekly Radio Show and Livestream

The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Proposed Aggregate / Rock Source Areas.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, June 20th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

Upcoming Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants

	(Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

Creating Community Awareness of Upcoming Engagement

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions**/ to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

July 6, 2023

Dear Chief Beardy,

As you may know, the Terms of Reference (ToR) for the Webequie Supply Road (WSR) Project was approved on October 8, 2021. Since the ToR was approved, the WSR Project Team has been working on the Environmental Assessment / Impact Assessment (EA/IA) phase of the Project. The Project Team would like to share with you and your community the EA/IA activities including: project update, consultation and engagement to date, alternatives assessment process, and next steps.

We will be offering a community information session, via Zoom, on **Monday, July 17th between 2:00pm-3:00pm EST** for Wawakapewin First Nation, where there will be a presentation on the WSR Project activities for Consultation Round 2. We anticipate the community information session to be approximately 1 hour in length with a presentation and question and answer period. The WSR Project Team has a platform to allow for real time translation to accommodate community members during the session. Details for the information session are as follows: https://us06web.zoom.us/j/83132584382

We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the session at 1-844-424-0500. You may also call into the zoom session at 1 (204) 272-7920 or 1 (647) 374-4685. Upon calling in, you will be asked for the following information: **Meeting ID: 831 3258 4382**

In addition, the WSR Project Team has made available a Virtual Reality (VR) Open House where you and your members can access further information about the project, the studies being undertaken and provide comments. Please visit: **https://www.supplyroad.ca/wawakapewinfn/**

To help create awareness, facilitate postings, and increase participation for the community information session, the WSR Project Team is attaching a poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the poster and we can mail them to your community for local distribution.

If you want additional engagement sessions with your Council, members, advisors and staff, we would be available to meet virtually or in-person following COVID protocols. At any time, you can access additional information on the WSR website: **www.supplyroad.ca**. Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.

On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 12, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) project that will be of interest to your community.

Radio Show and Livestream
The WSR Project team will be resuming the live streaming and radio call-in show next week. The topic of the upcoming session is: **WSR Presents: Road Foundation Design.**

The WSR live phone-in radio show will be broadcasted through Wawatay News on Tuesday, July 18th, 2023 at 12:00pm – 1:00pm (EST). We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may text during the radio show at 1-844-424-0500. You can also email your questions to mckenna@indigenousengagement.ca.

In addition, a livestreaming event is scheduled on the same day as the above radio show at 2:00pm – 2:30pm (EST) which is accessible on the WSR Project Website: https://www.supplyroad.ca/stream/. You may also call with questions on the same toll-free number provided above during the live stream.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in-community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with

	a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has started conducting virtual information sessions for each community with the second part of the presentation for round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. The WSR Project team also has a platform to allow for real time translation to accommodate community members during the session.

You can visit **www.supplyroad.ca/sessions/** to view the upcoming schedule. In the weeks prior to your community's session, the Project Team will send a link to your session's registration page and to the Virtual Reality (VR) Open House created specifically for your community.

Please do not hesitate to contact me at 807-472-6147 or at michael.fox@supplyroad.ca.
On behalf of the WSR Project team, we wish you and your community continued health and wellness.

Sincerely,

Michael Fox

c.c. Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Don Parkinson, Consultation Lead, SNC-Lavalin Inc.
Craig Wallace, Project Manager, SNC-Lavalin Inc.

July 26, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.

One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Virtual Information Sessions for Round 2

The WSR Project Team has been conducting virtual information sessions for each community with the second part of the presentation for Consultation Round 2. These are one-on-one sessions where the Project Team shares information about the EA/IA activities including consultation and engagement to date, study plans, assessment approach, valued components, Indigenous knowledge, consideration and evaluation of alternatives, and consultation approach and next steps. The session consists of a presentation on the WSR Project activities followed by a question-and-answer period. November 8, 2023

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience and in any method that you and your community prefer.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time, some communities may not wish to participate in the form of in-person meetings and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person engagement methods. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Public Information Center #2

The WSR Project team held Public Information Center (PIC) #2 in Thunder Bay on October 3rd for Indigenous communities & 4th for the general public and Timmins on October 12th for the general public. The PIC's were held to provide interested parties with an opportunity to learn about the ongoing assessment of alternatives that is being conducted as part of the EA/IA study and provide feedback. The PIC consisted of a presentation and an informal drop-in center with display information about the Project. Project team representatives shared information on the EA/IA process, studies being conducted, criteria for evaluation of route alternatives and alternative locations for supportive infrastructure (e.g., aggregate source areas, construction camps), including results from the assessment, the feedback we have heard to date, and future consultation and engagement opportunities.

If you were unable to attend the PIC #2, you can find the formal notice, livestream, more information on the study and progress, and updates on our project website: https://www.supplyroad.ca/

Aboriginal and/or Treaty Rights and Interests Forum

Building on the momentum of the first Aboriginal and / or Treaty Rights and Interests Forum in February 2023, Webequie First Nation and Marten Falls First Nation encourage you to participate in a follow-up Forum on November 21-23, 2023 at the Valhalla Inn in Thunder Bay, to discuss potential impacts to northern Indigenous communities' Aboriginal and / or Treaty Rights and Interests as they relate to the WSR, Northern Road Link, and Marten Falls Community Access Roads Projects.

The Purpose of this Forum is to create a respectful, culturally sensitive, and collaborative space to develop and/or confirm our understanding of the Project areas (WSR, MFCAR, and NRL) as your Aboriginal and / or Treaty Rights and Interests may be impacts by these Projects. Please note the purpose of this event is to discuss Aboriginal and / or Treaty Rights and Interests and not to collect Indigenous Knowledge.

If you have any questions regarding the Forum or need additional information to engage your community, please do not hesitate to reach out to us at the contacts below.

Stay Up to Date

You can also stay tuned with the WSR Project by following our social media channels:

Craig Wallace, Project Manager, SNC-Lavalin Inc.

WSR
WEBEQUIE
SUPPLY ROAD

January 25, 2024

Chief Anne Marie Beardy
Wawakapewin First Nation
P.O. Box 477
Sioux Lookout, ON P8T 1A8

Re: Round 2 Consultation Progress Report
Webequie Supply Road Project
Environmental Assessment / Impact Assessment

Dear Chief Beardy:

We hope that this letter finds you and your community well.

As you are aware, Webequie First Nation is the proponent of the Webequie Supply Road Project (WSR or the Project), a proposed 107 km all-season road that will facilitate the movement of materials and people from the Webequie Airport to the mineral deposit area near McFaulds Lake. An Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* and an Impact Assessment (IA) under the federal *Impact Assessment Act* is being conducted to identify and assess how the Project may affect the natural environment as well as the health, socio-economic and cultural well-being of communities.

We are providing the attached Consultation Progress Report 2 (electronic and hard copy), which summarizes and documents Round 2 of the Engagement and Consultation Program with your community for your review and comment.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1;
- Overview of results of baseline studies to characterize existing conditions within the study area;

- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/ rock source areas, construction camps, access roads) from multifactor analysis, including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design); and
- Next steps and schedule.

Webequie First Nation is committed to ongoing engagement with your community through the EA/IA process. Our Project Team is available to discuss the contents of the Consultation Progress Report 2, and we hope this provides an additional opportunity for the community to learn about the Project and to raise any concerns or comments about potential effects to your community and the environment more broadly that should be considered in the EA/IA.

Webequie First Nation is tentatively planning to conduct Consultation Round 3 for the Project from Winter 2024 to Winter 2025. The following milestones and topics are proposed to be addressed as part of engagement and consultation activities for this round:

- Summary of input received from Consultation Round 2;
- Summary of preliminary effects assessment of the Project, including cumulative effects;
- Proposed impact management, mitigation and follow-up monitoring program; and
- Next steps in EA/IA process.

We welcome any feedback and input your community may have on the attached Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Thank you very much and we look forward to hearing from you soon.

Sincerely,

Michael Fox

Regional Consultation Lead
Webequie Supply Road

c.c. Chief Cornelius Wabasse, Webequie First Nation
Sasha McLeod, Special Project Officer, Ministry of the Environment, Conservation and Parks
Craig Wallace, Project Manager, AtkinsRéalis Canada Inc.

2

January 31, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week with changes to the order of topics that was provided on the January 2024 newsletter. See below the updated schedule of topics for February 2024:

Date	Topic
Monday, February 5, 2024	Road Access and Control Issues
Monday, February 12, 2024	Minimizing Project Impacts
Tuesday, February 20, 2024	Construction Camps and Other Opportunities
Monday, February 26, 2024	Bridges and Water Crossings

The topic of the upcoming session is: **WSR Presents: Road Access and Control Issues.**

The livestreaming event is scheduled for **February 5th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

February 08, 2024

Dear Chief,

We would like to bring up a number of activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Livestream and Radio Show Series
The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Minimizing Project Impacts.**

The livestreaming event is scheduled for **February 12th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities
As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

February 15, 2024

Chief Anne Marie Beardy
Wawakapewin First Nation
P.O. Box 477
Sioux Lookout, ON
P8T 1A8

Dear Chief Beardy,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, February 15, 2024, the package status indicates that it has been delivered to your community on February 5, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: Construction Camps and Other Project Opportunities.**

The livestreaming event is scheduled for **February 20th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet

with you and your team to discuss the WSR EA/IA process, provide project updates, and seek input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)

Dear Chief Beardy,

We would like to bring up several activities related to the Webequie Supply Road (WSR) Project that will be of interest to your community.

Consultation Progress Report Round 2

On January 29, 2024, the WSR Project Team sent a package via Canada Post to your community containing the Consultation Progress Report (hard copy and USB), which summarizes and documents Round 2 of the Engagement and Consultation Program with Indigenous communities on the Project. As of today, March 6, 2024, the package status indicates it was delivered to your community on February 5, 2024.

The Consultation Progress Report 2 is provided as per the requirements of the Terms of Reference (ToR) for the provincial EA process and specifically the Ministry of the Environment, Conservation and Parks (MECP) ToR Notice of Approval that requires the proponent to provide Consultation Progress Reports to Indigenous communities at three key milestones throughout the EA/IA process. The Consultation Progress Report 1 for Consultation Round 1 was submitted to Indigenous communities and the MECP in October 2022. In the MECP approval letter with the ToR Notice of Approval, dated October 8, 2021, the Ministry acknowledged “the concerns expressed by several Indigenous communities about the consultation process for the ToR, about their role, and input in the EA process for the proposed Project going forward, impacts on Aboriginal and Treaty Rights, and about Ontario’s obligations and efforts to meet the duty to consult.” For more information on the Minister’s approval, go to https://www.ontario.ca/page/webequie-supply-road-project.

The Consultation Progress Report 2 provides an overview of engagement activities in Consultation Round 2, as well as community-specific summaries of engagement and community feedback and input provided by community members. The Consultation Progress Report 2 also incorporated comments from MECP during the review of the Consultation Progress Report 1. Consultation Round 2 of the Engagement and Consultation Program occurred from March 2023 to November 2023. Key milestones and topics covered in this round of consultation included:

- Summary of input received from Consultation Round 1

- Overview of results of baseline studies to characterize existing conditions within the study area;
- Identification and evaluation of “alternatives to” the Project and “alternative methods” of carrying out the Project;
- Criteria and indicators used for the evaluation of alternative methods (e.g., routes, construction camps and aggregate source areas) arranged under factors (e.g., natural environment, technical considerations, Indigenous land use and interests);
- Preliminary recommended preferred route and locations for supportive infrastructure (aggregate/rock source areas, construction camps, access roads) from multifactor analysis including rationale for selection;
- Preliminary engineering design elements of WSR (bridges, culverts, road design; and
- Next steps and schedule.

We welcome any feedback and input your community may have on the Consultation Progress Report 2, so that issues or concerns can be addressed in the EA/IA process for the Project and during Consultation Round 3. Should your community have any questions or comments on the Consultation Progress Report 2, please feel free to contact me at 807-472-6147 or michael.fox@supplyroad.ca.

Livestream and Radio Show Series

The WSR Project Team will be resuming the live streaming and radio call-in shows next week. The topic of the upcoming session is: **WSR Presents: The Results of the Caribou Study.**

The livestreaming event is scheduled for **March 11th, 2024 at 12:00pm (EST)** which is accessible on the WSR Project website: https://www.supplyroad.ca/stream/. We encourage you and your community members to listen, for this will give your community members the opportunity to ask questions. You may call or text with questions during the live stream at 1-844-424-0500 or email your questions to mckenna@indigenousengagement.ca.

In addition, the WSR phone-in radio show will be broadcasted through **Wawatay News** on the same day as the above livestreaming event at **2:00pm (EST).** You may also call, text, or email questions to the same toll-free number and email provided above.

To help create awareness, facilitate postings, and increase participation for the WSR's engagement options for your community members, the WSR Project Team is attaching a WSR poster so that your staff can post it on your community website, community Facebook page, and other in- community locations where hardcopy notifications, job postings, and advertisements are typically posted. If printing is an issue, let us know if you need hardcopies of the WSR poster and we can mail them to your community for local distribution.

Engagement Opportunities

As the Webequie Supply Road (WSR) Project is currently in the Environmental Assessment/Impact Assessment (EA/IA) phase, the WSR Project Team is requesting to meet with you and your team to discuss the WSR EA/IA process, provide project updates, and seek

input and feedback to help inform the EA/IA. We are available to meet and discuss the EA/IA in detail at your convenience, and in any method that you and your community prefers.

The WSR Project Team is offering opportunities for engagement in the proposed methods below. We understand that at this time some communities may not wish to participate in the form of in-person meeting and engagement given current public health concerns. Therefore, the WSR Project Team will continue offering both virtual and in-person methods of engagement. Please identify which of the options would be appropriate to engage with you, your team, and your community, as well as suitable dates and times to engage to discuss the EA/IA process.

Engagement Options

Method	Description
Focus Group Sessions	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA. The session will be facilitated by the WSR Project Team to gain feedback from the perspective of diverse population groups (women, elders, youth, land users, etc.)
Community Sessions	Community information sessions can be conducted, whereby the WSR Project Team will discuss the EA/IA with a question-and-answer period at the end of the presentation.
Drop-In Sessions	Community members can drop-in at a safe location to discuss the EA/IA with the WSR Project Team.
Virtual Focus Groups	Open discussion with 4-6 participants (Council, staff, community members, or technicians) to discuss the EA/IA facilitated by the WSR Project Team using either Zoom, Microsoft Teams, Google Meet, GoToMeetings, Skype, Webex, or any other videoconferencing platforms that Indigenous leaders and staff are currently using to meet with government officials, health agencies, lawyers, advisors, board meetings, tribal council meetings, Chiefs assemblies, online conferences, etc.
Virtual Community Presentation	Using the above range of videoconferencing platforms, the WSR Project Team will discuss the EA/IA to community members with a question-and-answer period at the end of the presentation.
One Hour Teleconference	Using a phone and fax, the WSR Project Team will fax you the EA/ IA process presentation and set up a conference call to go through the presentation based on the area of interest your team wants to focus on and answer any questions
Local Radio Call In Show	Using the local community radio, the WSR Project Team can present the EA/IA process with a local

	translator that the WSR Project team will pay for to explain the EA/IA. We can also provide a translator on our end.
Online Surveys	Using online survey methods, community members can provide feedback on the EA/IA.

Stay Up to Date

DRAFT

1. Project Context

The proposed Webequie Supply Road (WSR, or 'the Project') is a proposed new all-season road approximately 107 kilometres (km) in length from the Webequie First Nation Reserve to the mineral deposit area near McFaulds Lake (also referred to as the Ring of Fire). The Project location is shown on Figure 1-1. The preliminary corridor for the road consists of a northwest-southeast segment running 51 km from the Webequie First Nation Reserve to a 56 km segment running east-west before terminating near McFaulds Lake. A total of 17 km of the corridor is within the Webequie First Nation Reserve.

Information on existing conditions is used to provide a baseline understanding of the valued components of the community. Potential effects of the Project on valued components will be assessed by comparing baseline conditions to those expected to result from the construction and operation and maintenance of the Project. This information is preliminary at this time and it has been prepared with information that is known specifically for Wawakapewin First Nation. This is a living draft document that has yet to be reviewed and validated by the Community.

Webequie First Nation is the proponent of the Project. The Project Team led by Webequie First Nation is striving to gather as much Anishinaabemowin (Oji-Cree), Anishinaabe (Ojibway), Mushkegowuk (Cree) and Métis Indigenous Knowledge as it relates to the Project and to help inform the socio-economic baseline. This document will be continuously updated when information from the Wawakapewin First Nation and other communities is shared with the Project Team.

The gathering of important Indigenous Knowledge takes time due to the limited resources and capacities of communities. It is also important that culturally relevant protocols are followed. This requires relationship building and consistency to establish trustWebequie is an Anishinaabemowin Tawin (community) in Treaty No. 9 territory, located about 540 km north of the City of Thunder Bay. Anishinaabemowin is a blend of Anishinaabe and Mushkegowuk.

Before the first settlers arrived, the Anishinaabe and Mushkegowuk sustainably shared the territory and lived Mino Bimaadzwin (The good life) through guidance from Anishinaabe law, which governs their Kii'manitu'meano-goonan (Creator given) responsibilities to assure a good relationship with the Land (Webequie First Nation, 2021).

Generally, the Anishinaabe and Mushkegowuk shared a common spiritual view with Indigenous Nations across the continent, that is based on a profound respect for Shkagamik-Kwe (Mother Earth), which was also a relationship based on reciprocity (Thomas, 2020; Helin, 2008).

As the proponent for the Project, Webequie First Nation like many Indigenous Nations, and communities across Turtle Island (North America) have been living with the effects of colonial impositions since the arrival of Europeans to the continent and the formation of Canada. The impositions, spanning more than seven generations have had a reverberating impact on the Anishinaabemowin. These impacts should be understood while considering 'baseline' socio-economic data because Webequie First Nation, the proponent for the Project, has been striving for Mino Bimaadzwin and to strengthen their Nation in a holistic way while reclaiming culture which feeds into baseline data as well as Aboriginal and Treaty Rights and Interests.

NOTES
DISCLAIMER

Before settlers arrived, Indigenous Nations governed themselves through their own governance structures and Natural laws. Anishinabek and Mushkegowuk governed themselves through a clan-style system, as shown on Figure 1-2. Typically, the Anishinabek govern themselves through a clan-system which includes seven main clans with many sub-clans. Each clan has different responsibilities within the Nation at large.

Figure 1-2: Representation of the Anishinabek Dodemag (the "Clan System")

Source: Atikameksheng Anishnawbek, 2023.

Colonial impacts have been devastating in Anishinaabe and Mushkegowuk Homelands. Before the Hudson Bay Company (HBC) exploited fur-bearing animals to support trade in Europe, the people lived sustainably with the land. Fur-bearing animals were hunted to near extinction, with the beaver population having been nearly decimated, which resulted in starvation for the people living in their homelands (SNC-Lavalin, 2022). Before that time, Anishinabek had never before been subject to a commerce style economy (SNC-Lavalin, 2022).

The *Indian Act*, implemented in 1876 had an adverse impact on Indigenous Peoples across Canada. Perhaps the most harm was done while Indigenous children were forced to attend Indian Residential Schools, which were either government run, or church run institutions.

A timeline has been developed to better understand the effects of legislation, encroachment on rights as well as reconciliation efforts, as shown in Table 1-1.

DRAFT

Table 1-1: Timeline of Effects on Indigenous Peoples of Canada from Legislation, Encroachment on Rights and Reconciliation Efforts

Timeline	Effects
Hudson Bay Company, 1670	The HBC officially established itself in 1670 to set up trade for the fur industry (primarily beaver pelts). HBC set up its first official post in 1673 in Moose Factory, near the southern hub of James Bay and subsequently built a small outpost along the Albany River in 1743. The exploitation of animals for fur in the region resulted in a starvation crisis for the Anishinaabe and Mushkegowuk. It took the beaver population a considerable time to recover (SNC-Lavalin, 2022).
British North America Act, 1867	The *British North America Act* made the federal government responsible for Indigenous Peoples (Government of Canada, 2011).
Royal Proclamation, 1763	The Royal Proclamation of 1763 established the constitutional basis for future treaty negotiations and confirmed the protection of lands for the exclusive use by Indigenous Peoples (Hall, 2019).
Indian Act, 1876	The *Indian Act*: Imposed the Reserve system 1876 – ongoing. Forced attendance at Indian Residential Schools 1894 – 1996. Outlawed ceremonies: 1876 – 1951. Oppressed women's rights: 1876 – ongoing. Imposed the band council system 1876 – ongoing. 60's Scoop – Gave provinces jurisdiction to 'scoop' Indigenous children from their homes. There have been class action lawsuits to address the loss of culture and identity.
James Bay Treaty (Treaty No. 9), 1905	The James Bay Treaty (No.9) was signed with Anishinaabe, Mushkegowuk, and Anishinaabemowin. Indigenous Peoples in the territory wanted protections for lands, resources and fur-bearing animals.
The Mines Act, 1906	The *Mines Act* established claims staking procedures and prospectors' licenses providing exclusive rights to stake claims and work upon Crown lands.
Ontario Registered Trapline System, 1946	The Registered Trapline System imposed exclusive ownership of trapping areas, which did not align with cultural values (SNC-Lavalin, 2022).
Royal Commission on Aboriginal Peoples (RCAP), 1996	RCAP mandated to investigate and propose solutions to the challenges affecting the relationship between Aboriginal Peoples, the Canadian government, and Canadian Society.
Truth and Reconciliation Commission of Canada ()TRC, 2015	Final Report, Calls to Action, Indian Residential School settlement agreement (Truth and Reconciliation Commission of Canada, 2015).
National Inquiry into Missing and Murdered Indigenous Women and Girls, 2019	Reclaiming Power and Place: The Final Report of the National Inquiry into Missing and Murdered Indigenous Women and Girls (MMIWG, 2019).

It is important to tell the story of Indigenous Nations in order to understand their current socio-economic conditions and Indigenous Knowledge. Part of that story includes not only the history of the Indigenous Nations, but also that of Indigenous Peoples in Canada.

DRAFT

COMMUNITY SETTING

DRAFT

AtkinsRéalis - Confidential

2. Community Setting

2.1 Community Overview

Indigenous communities in the Local Study Area (LSA) and Regional Study Area (RSA) for the WSR socio-economic baseline are Anishiniimowin, Anishinaabe and Mushkeego First Nations, and Métis Peoples, with traditional territories that cover the lands. First Nations in the RSA are predominantly located north of the provincial highway system, and accessible only by air and by winter road. Other First Nations, and the Métis community, are located further south, are generally serviced by the provincial highway system. All First Nations communities are located within the Treaty No. 9 territory, except for Long Lake #58 First Nation, which lies within the geographic boundaries of the Robinson-Superior Treaty of 1850, and the Métis Nation of Ontario, which is not part of Treaty No. 9.

Wawakapewin First Nation is located 565 km north of Thunder Bay and 125 km west of Webequie First Nation in northern Ontario. The community is situated on the southeast shore of Long Dog Lake which is part of the Asheweig River, a tributary of the Winisk River. It is accessible only by air for most of the year, water and winter road (Tbnewswatch, 2023).

The community is formally affiliated with Shibogama First Nations Management (MFNM), a registered not-for-profit Tribal Council (Windigo First Nations Council, 2023), and the Nishnawbe Aski Nation provincial territorial organization.

Wawapakewin is located in the census District of Kenora.

Wawakapewin First Nation has a Chief and one Councillor, with a custom electoral system, with the next election scheduled for September 9, 2025 (CIRNAC, 2023t).

2.2 Community History

The community of Wawakapewin First Nation is one of the smallest in Nishnawbe-Aski Nation. “The Wawakapewin area had been very important not only to its’ people but also to people and family clans from surrounding and outlaying communities, including Kitchenuhmaykoosib Inninuwug, Wapekeka and Kasabonika Lake First Nations. This was due to the abundance of fish and game that is always present in the area caused by the convergence of four river systems into the Asheweig River which in turn flows into the Winisk River” (Wawakapewin First Nation, 2023a).

Wawakapewin First Nation have close connections with Wapekaka First Nation, Kasabonika Lake First Nation and Kitchenuhmaykoosib Inninuwug First Nation (Kayahna Tribal Area Council, 1985). There was a heavy dependence on rivers as a resource, especially Big Trout Lake, Long Dog Lake and Bug-Mishwamakan River (Kayahna Tribal Area Council, 1985). The historic record shows a population of Wawakapewin First Nation developed amongst the trading communities around trading posts over successive generations, and kinship ties and marriages between families occurring over time. Historically, Wawakapewin several households would

2.3 Community Values and Aspirations

Wawakapewin First Nation is currently exploring the feasibility of an all-season access road with Kasabonika First Nation. This could be explored as part of the Asheweig Winter Roads Corporation realignment (Wawakapewin First Nation, 2023b).

The collective vision statement of Shibogama First Nation Council, which Wawakapewin is part of, is “Payahtakenemowin” (peace of mind) for the Shibogama Communities. “We are strong, healthy people who respect and support all creation according to the teachings of our Elders.” (Shibogama First Nations Council, 2023).

DRAFT

Their Terms of Reference (ToR) for their Community Based Land Use Plan (CBLUP) identifies some key elements: the customs and practices of the Innineewuk are referred to as “Innineewuk Dodaamowin”. These are derived from “Natural Law”, the “Great Law” as given by the Creator and referred to as “ohtoonachcikawin”, the order of the Creator. The Innineewuk understand ohnacchikawin to be a conceptual framework that governs their primary relationships and responsibilities amongst themselves and every other aspect of their lives, referred to as, “nisootawaytamowin” or ‘as understood’.

The way of life, “natoopematesoowin”, sometimes referred to as “akiwpemateeswin” or earth life are the customs of the people and conforms to the nisootawayamowin, which includes the spirit life (achakacopemateesowin) contained in the ohnacchikawin (Wawakapewin First Nation, 2014).

Wawakapewin First Nation is a partner in the Thawikayhigan Limited Partnership (TKG Group), established in 2018, and which is owned equally by Kingfisher Lake, Kasabonika Lake, Kitchenuhmaykoosib Inninuwug, Wapekeka, Wawakapewin and Wunnumin Lake First Nations. The group, based in Thunder Bay, works to generate new economic opportunities for its communities. “This is our first business acquisition that will directly service our First Nations,” said Jonathon Mamakwa President of the TKG Group. “This is key in our overall plan in contributing to the development of healthy First Nation communities with vibrant economies that support future generations” (Dryden Now, 2023).

In September 2023, it was announced that the community of Wawakapewin is now connected to the provincial electricity system through the construction and operation of the Wataynikaneyap Power project (Wataynikaneyap Power, 2023). Lack of reliable power meant that limits were placed on the growth of the community, and now as a part owner of Wataynikaneyap Power, Wawakapewin First Nation is pleased to replace diesel generators as the primary source of electricity (Wataynikaneyap Power, 2023).

DRAFT

SOCIAL ENVIRONMENT

DRAFT

AtkinsRéalis - Confidential

3. Social Environment

3.1 Population and Demographics

Population and demographic data are important tools used to assess socio-economic conditions in communities, as these data can also be used to identify vulnerable groups such as women, disabled persons, Elders and youth. These are segments of the population that could either benefit or be negatively impacted (directly or indirectly) by the Project, and often experience barriers to participation as under-represented groups. Population and demographics are described in this section using the following indicators using Census data:

- Population overview, including gender and age;
- Indigenous identity (according to Census categories, First Nation, Métis, Inuit or non-Indigenous);
- Languages;
- Mobility and migration; and
- Immigration data is unavailable.

These indicators provide insights into existing the socio-economic conditions where the Project is being considered. The information is to be used in the assessment of the potential effects of the Project and develop strategies to mitigate any negative effects.

The following section provides an overview of population and demographics at the District level.

3.1.1 Population Overview

The Kenora District has a substantial population projected to have slight growth over the projection period, increasing from 66,000 in 2021 to 68,095 by 2043. Nearly half of the Kenora District population identifies as either First Nation, Métis, or Inuk. English is spoken in nearly all homes and there is a small percentage of in-migration to the District.

Table 3-1 presents the forecasted population in the Kenora District for the period (2021 to 2043), broken down by self-identified gender. Population trends by self-identified gender in Kenora District are summarized as follows:

- Over the projection period between 2016 and 2043 both the female population and the male population are forecast to increase..
- Between 2016 and 2043 the male population is forecast to increase from 32,895 to 35,716, an 8.6% increase.
- Between 2016 and 2043 the female population is forecast to decrease from 32,640 to 32,425, a 0.7% decrease.
- Between 2016 and 2043, the distribution of the male population is forecast to increase from 50.2% to 52.5% and the female population is forecast to decrease from 49.8% to 47.6%.

Table 3-1: Kenora District – Population Forecast by Self-Identified Gender (2016, 2021, 2028, 2033, 2043)

Year	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	32,895	50.2%	32,640	49.8%
2021	66,000	100%	33,400	50.6%	32,600	49.4%
2028	66,657	100%	34,120	51.2%	32,544	48.8%
2033	67,130	100%	34,644	51.6%	32,504	48.4%
2043	68,086	100%	35,716	52.5%	32,425	47.6%

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

Table 3-2 presents the forecasted population for the Kenora District over the projection period of 2016 to 2043 by age group. The age groups reported are 0 -14 years, 15 – 64 years, and 65 years and over. The 15 – 64 years age group represents the potential labour force. Population trends by age group in the Kenora District are summarized as follows:

- Between 2016 and 2043, the 0 – 14 years age group is forecast to decrease from 14,440 to 12,527, a 13.2% decrease;
- Between 2016 and 2043, the 15 – 64 years age group is forecast to decrease from 41,820 to 38,152, an 8.8% decrease; and
- Between 2016 and 2043, the 65 years and over age group is forecast to increase from 9,275 to 21,313, a 129.8% increase.

Table 3-2: Kenora District – Population Forecast by Age Group (2016, 2021, 2028, 2033, 2043)

Year	Total		0 to 14 years		15 to 64 years		65 years and over	
	Count	Distribution	Count	Distribution	Count	Distribution	Count	Distribution
2016	65,535	100%	14,440	22%	41,820	64%	9,275	14%
2021	66,000	100%	14,065	21%	41,115	62%	10,820	16%
2028	67,129	100%	13,556	20%	40,148	60%	13,425	20%
2033	68,336	100%	13,204	19%	39,471	58%	15,661	23%
2043	71,992	100%	12,527	17%	38,152	53%	21,313	30%

3.1.2 Indigenous Identity

Table 3-3 presents the population of the Kenora District by Indigenous identity for 2021. Indigenous identity of the population in the Kenora District population is summarized as follows:

- 50.6% of the population identifies as non-Indigenous.
- The majority of the population identifies as Indigenous identifies as First Nations at 43.1% of the population, followed by Métis (6.3%). No respondents identified themselves as Inuit.

Table 3-3: Population Forecast by Self-Identified Indigenous Population, Kenora District (2021)

Indigenous Identity	Count	Distribution
First Nations	27,815	43.1%
Métis	4,070	6.3%
Inuit	30	0.1%
Non-Indigenous	32,680	50.6%
Total	**64,595**	**100%**

DRAFT

3.1.3 Languages

Table 3-4 presents the languages spoken most often in the home within the Kenora District in 2021. Languages used by the population in Kenora District in 2021 are summarized as follows:

- The majority of homes in the Kenora District speak English while at home at approximately 94%;
- Indigenous languages are the second most spoken within the home at 5.5%, this category includes 39 Indigenous languages; and
- French and other non-official languages make up the remaining 1.1% of homes at 0.7% and 0.4%, respectively.

Table 3-4: Language Used Most Often at Home, Kenora District (2021)

Language	Count	Distribution
English	59,670	93.5%
Indigenous Languages	3,510	5.5%
Other Non-Official Languages	430	0.7%
French	225	0.4%
Total	**63,835**	**100%**

3.1.4 Mobility and Migration

Table 3-5 below presents the mobility status of residents of the Kenora District in 2020. Mobility status refers to the status of a person's place of residence on Census Day in relation to their place of residence on the same date one or five years earlier (Statistics Canada, 2022a).

Residents are categorized as "non-movers" or "movers". Persons who, on Census Day, lived in the same residence as they did on the same date one year or five years earlier are referred to as non-movers, and persons who, on Census Day, did not live in the same residence as they did one year, or five years earlier are referred to as movers. Movers include non-migrants, migrants, internal migrants, and external migrants. Mobility status of residents of Kenora District is summarized as follows:

- 90.6% of residents were identified as "non-movers", 50.6% (29,440) of which were male and 49.4% (28,705) female; and
- "Movers" accounted for 9.4% of the population, 48.9% (2,950) of which were male and 51.2 % (3,090) female.

Table 3-5: Mobility Status of Residents, Kenora District (2020)

Mobility Status	Total		Male		Female	
	Count	Distribution	Count	Distribution	Count	Distribution
Non-movers	58,140	90.6%	29,440	90.9%	28,705	90.3%
Movers	6,035	9.4%	2,950	9.1%	3,090	9.7%

3.2 Housing and Accommodations

Housing and accommodations is an important issue in particular for Indigenous people. In 2021, it was reported that one in five First Nations people (21.4% or 224,280 people) in Canada consider their household to be crowded (Statistics Canada, 2022a). This problem is primarily due to houses not having enough rooms for families and multiple generation of families living in the same household. Furthermore, many houses on First Nation reserves are in poor condition and require major repairs.

The following sections provide information that will enable the assessment of effects on housing and accommodations by using the following indicators:

- Housing characteristics;
- Household characteristics; and
- Housing condition.

These indicators help with understanding existing socio-economic conditions of the community and predict potential effects of the Project on the community's quality of life.

The following section provides an overview of population and demographics at the District level.

In general, the Kenora District has 32,914 dwellings, 75% of which are occupied by usual residents. The Kenora District has the highest number of dwellings occupied by non usual residents in the RSA. This is likely due to the high number of cottagers within the region. The majority of the dwellings in the district are owned however the Kenora District has the largest percentage of government or band housing with just over 20% of occupied dwellings falling within this category. Over 60% of dwellings are occupied by 1 to 2 persons. Most of the dwellings in the Kenora District were constructed over 20 years ago, 50% of which were built prior to 1980. Most occupied dwellings are considered suitable for the household size and less than 20% require major repairs.

3.2.1 Housing Characteristics

Figure 3-1 below presents the total private dwellings and private dwellings occupied by usual residents in the Kenora District. Private dwellings occupied by usual residents refers to a private dwelling in which a person or a group of persons is permanently residing (Statistics Canada, 2019). Information on private dwellings in 2021 is summarized as follows:

- There are 32,914 total private dwellings in the Kenora District as of 2021.
- Of the 32,914 private dwellings, 24,818 (75.4%) are occupied by usual residents.

Table 3-7 below presents the total number of occupied dwellings for the Kenora District by structure type in 2021. Structure type of occupied dwellings is summarized as follows:

- The majority of dwellings are classified as single-detached home at 81%;
- Apartments make up 10.1% of occupied dwellings. Apartments include the following categories: apartments in a building that has less than five storeys, apartment or flat in a duplex, and apartments in a building that has five or more storeys; and
- The smallest category of occupied dwellings is other single-attached houses with 0.3%.

Table 3-7: Kenora District – Occupied Private Dwellings by Structure Type, 2021

Structural Type	Count	Distribution
Single-detached house	20,100	81%
Semi-detached house	1,745	7%
Row house	915	3.7%
Apartment or flat in duplex	700	2.8%
Apartment in a building that has fewer than five storeys	550	2.2%
Apartment in a building that has five or more storeys	535	2.2%
Other single-attached house	200	0.8%
Moveable dwelling	75	0.3%
Total	**24,820**	**100%**

DRAFT

Table 3-8 below presents the number of private dwellings by tenure (owned, rented, or government/band housing) for Kenora District in 2021. Tenure of dwellings is summarized as follows:

- The majority of the private dwellings in the Kenora District are owned at 59.8%; and
- Occupied private dwellings which are rented or considered to be provided by the local government or band housing are nearly equal at 19.5% and 20.7% respectively.

Table 3-8: Private Dwellings by Tenure in Kenora District (2021)

Tenure	Count	Distribution
Owner	14,835	59.8%
Renter	4,840	19.5%
Dwelling provided by the local government, First Nation or Indian band	5,140	20.7%
Total	**24,815**	**100%**

3.2.2 Household Characteristics

The following subsections describe characteristics of households (i.e., occupied private dwellings) for Kenora District. Table 3-9 below presents the total number of households by household size (i.e., the number of people per household) in Kenora District in 2021:

- The majority of households are occupied by two persons at 34%.
- The least number of households are occupied by four persons at 12%.

Table 3-9: Number of Households by Household Size in Kenora District (2021)

Household Size	Count	Distribution
1 person	6,835	28%
2 persons	8,385	34%
3 persons	3,470	14%
4 persons	3,005	12%
5 persons or more	3.130	13%
Total	**24,825**	**100%**

3.2.3 Housing Conditions

The following subsections describe housing conditions including the numbers of occupied private dwellings built during various periods of construction from 1960 up to 2021, as well as the suitability and conditions of dwellings for Kenora District.

Table 3-11 below presents the total number of occupied private dwellings by period of construction from 1960 up to 2021 in Kenora District:

- Dwellings constructed during the period from 1961 to 1980 is the largest group with 29% of private dwellings being built during this period;
- Dwellings constructed during the period from 2011 to 2015 is the smallest group with 4.3% of private dwellings being built during this period;
- 80.8% of the occupied private dwellings in the Kenora District were constructed during or prior to 2000.
- Over the last two decades, 4,760 dwellings were constructed which comprises less than 20% of the occupied housing stock.

Table 3-11: Occupied Private Dwellings by Period of Construction in Kenora District (2021)

Construction Period	Count	Distribution
1960 or before	5,300	21.4%
1961 to 1980	7,200	29.0%
1981 to 1990	3,770	15.2%
1991 to 2000	3,790	15.3%
2001 to 2005	1,290	5.2%
2006 to 2010	1,170	4.7%
2011 to 2015	1,055	4.3%
2016 to 2021	1,245	5.0%
Total	**24,820**	**100%**

DRAFT

Table 3-12 below presents the suitability of occupied private dwellings in Kenora District in 2021. Dwellings are categorized as either “suitable” or “unsuitable”. Housing suitability assesses the required number of bedrooms for a household based on the age, sex, and relationships among household members according to the National Occupancy Standard (Statistics Canada, 2017b).

- In 2021, 9.2% of the occupied private dwellings in the Kenora District were categorized as unsuitable.

Table 3-12: Occupied Private Dwellings by Suitability in Kenora District (2021)

Suitability	Count	Distribution
Suitable	22,540	90.8%
Not suitable	2,285	9.2%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

Table 3-13 below presents the conditions of the private dwellings in Kenora District in 2021. Dwellings are categorized as either “only regular maintenance and minor repairs needed” or “major repairs needed”. Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desired remodelling or additions.

The 'regular maintenance needed' category includes dwellings where only regular maintenance such as painting or furnace cleaning is required. The 'minor repairs needed' category includes dwellings needing only minor repairs such as dwellings with missing or loose floor tiles, bricks or shingles; or defective steps, railing or siding. The 'major repairs needed' category includes dwellings needing major repairs such as dwellings with defective plumbing or electrical wiring; and dwellings needing structural repairs to walls, floors or ceilings (Statistics Canada, 2021).

- In 2021, 17.3% of the occupied private dwellings in the Kenora District were categorized as requiring major repairs.

Table 3-13: Occupied Private Dwellings by Dwelling Condition in Kenora District (2021)

Dwelling Condition	Count	Distribution
Only regular maintenance and minor repairs needed	20,535	82.7%
Major repairs needed	4,290	17.3%
Total	**24,825**	**100%**

Source: Statistics Canada, 2022a.

Note: All counts in census tabulations undergo random rounding, a process that transforms all raw counts into randomly rounded counts. This reduces the possibility of identifying individuals in the tabulations. This results in breakdown values not always adding up to the total count.

DRAFT

3.3 Community Services

Community services in Wawakapewin First Nation are described in this section using the following indicators:

- Demand for community services; and
- Supply and capacity of community services.

These indicators were selected to provide an understanding of the community services that currently exist and the community services essential for the community (e.g., health care).

Community Services information for Wawakapewin First Nation has been collected principally from online sources, such as 211 Ontario North (211north.ca), an information portal which provides information on social, community, health and government services in northern Ontario.

3.3.1 Family Services

3.3.1.1 Family Services

Tikinagan is a social services organization that provides child and family services for Wawakapewin First Nation. It is the largest provider of residential services in Ontario, with a service area that is approximately one third of the province of Ontario, servicing 30 First Nations communities (Tikinagan Child & Family Services, 2023a). In January 2020, Tikinagan was designated by the Ministry of Community and Social Services and the Wawakapewin Council to provide child protection services to the families who reside in the Districts of Kenora and Thunder Bay (Tikinagan Child & Family Services, 2023a).

Tikinagan was created to provide culturally specific child and family services, that emphasize Indigenous culture as part of its child welfare support work. Prior to Tikinagan support services for children and families were generally provided from outside First Nations communities. There were reports of harms inflicted from this approach (Tikinagan Child & Family Services, 2023b).

Services are culturally responsive and supportive of traditional values and customs. The model of “Mamow Obiki-ahwahsoowin” mandates that in all aspects of service delivery, workers are expected to consult with Elders of the community for wisdom, guidance and teachings, and to receive direction on service delivery (Tikinagan Child & Family Services, 2023c). This specifically includes the requirement to consult with First Nations leadership on case management decisions.

An overall goal of the support work by Tikinagan is to keep children at home, and in their home communities. When necessary, foster homes for children in need are located in the child’s community or a nearby community, in order to reduce the distance from home and family.

The Mamow Obiki-ahwahsoowin model mandates that authority rests the Chief and Council to declare that children be placed in Tikinagan care (Tikinagan Child & Family Services, 2023c).

3.3.1.2 Family Well-Being Program

The Family Well-Being Program is a Nishnawbe Aski Nation initiative that aims to support each Indigenous community in designing and delivering their own comprehensive and culturally appropriate services and programs to promote community health and family well-being. The program focuses on empowering families to build healthy relationships and improve the overall health of communities. Its activities and programs include revitalizing Native languages, preventing and intervening in alcohol and drug abuse, organizing community events such as feasts, facilitating family circles, counseling and child/youth support groups, providing referrals to other programs and services, offering school programs, and conducting traditional land-based healing events. The program works towards eliminating family violence, reducing the number of youths involved in the justice system, and decreasing the number of children in care (211 Ontario North, Wawakapewin First Nation, 2023a).

3.3.2 Elder Care

Indigenous Services Canada, through the First Nations and Inuit Home and Community Care (FNIHCC) program, provides funding and guidance for Elder care. This program aims to establish home and community care services for Indigenous individuals residing in First Nations and Inuit communities (Indigenous Services Canada, 2023). It encompasses First Nations individuals living on reserves who have been assessed as requiring one or more services.

The FNIHCC program prioritizes various services, including client needs assessment, case management, and care coordination. It also covers in-home respite care, temporary care, nursing care planning, and personal care management. Health centres like the Sioux Lookout First Nations Health Authority play a crucial role in delivering in-community healthcare services (Indigenous Services Canada, 2023).

DRAFT

3.3.3 Health Services

3.3.3.1 Nursing Station

The closest Nursing Station is located in Kasabonika Lake First Nation, 37 km NE of Wawakapewin First Nation. It coordinates health care services through visiting community health nurses, visiting Physicians and Home Care workers. It provides health awareness and counselling, education and prevention workshops in areas that may include Child Care, Diabetes, Elders & Chronic Disease, Immunization, Sexual Health and Communicable Diseases.

They address individual health care needs by providing treatment of on-going health problems, emergency services, advocacy on behalf of individual with other health professionals, coordinating one-on-one pre-natal care with the community health nurse, home visits to the sick, Elders, new mothers and persons with health care needs. They also provide assistance with coordinating local and long-distance travel arrangements for medical appointments (211 Ontario North, Kasabonika Lake First Nation, 2023al).

3.3.3.2 Community Mental Wellness Team

The Shibogama First Nations Council Community Mental Wellness Team provides mental health supports and services in its communities including counselling, crisis support, clinical consultation, case management and workshops to support mental wellness. It aims to improve access to needed specialized services where gaps exist and coordinate training for community frontline workers (Shibogama First Nations Council, 2023a).

3.3.3.3 Crisis Response Team

The Shibogama First Nations Council Crisis Response Team promotes the safety of each community through the emergency response plans coordinated by the area resource teams. It facilitates intervention, counselling and support group services for community members who are experiencing some form of crisis. It offers service coordination service to mobilize local resources and support communities in the preparing of resources for the COVID-19 pandemic (Shibogama First Nations Council, 2023b).

3.3.3.4 Youth Well-Being Team

The Youth Well-Being Team provides mental wellness support to Shibogama youth while they are away from their home communities attending Sioux North and Pelican Falls First Nation high school, as well as youth receiving specialized services/ treatment while in Sioux Lookout. Some of the services offered include counselling, expressive arts therapy, land-based and cultural activities and referrals for specialized services. This program also offers a variety of youth activities at the "Shib Crib" on Front Street in Sioux Lookout as a comfortable and safe environment where youth can claim the space as their own to socialize with their friends, while participating in positive lifestyle programming (Shibogama First Nations Council, 2023c).

3.3.4 Communications Services

3.3.4.1 Ontario Telemedicine Network (OTN)

The OTN offers specialized medical care through videoconferencing and other tele-diagnostic equipment, enabling specialists to remotely examine and prescribe treatments to patients in their home communities. This reduces the need for patients to travel to receive care, providing greater convenience and accessibility for those living in remote or underserved areas. It also provides opportunity for workshops and education sessions for staff and patients (211 Ontario North, Wawakapewin First Nation, 2023b).

DRAFT

3.4 Education and Training Services and Facilities

In the 2015/2016 school year, high-school completion and post-secondary participation rates were higher among non-Indigenous youths in Canada compared to Indigenous youths (Statistics Canada, 2023). However, when comparing First Nation youth living on reserves to First Nation youth living off reserves, those that live off reserves are more likely to receive a high-school diploma, which is most likely due to the lack of accessible high-schools for youth living in remote communities.

This section describes the existing conditions of education and training services and facilities for the Wawakapewin First Nation using the following indicators:

- Demand for community education and training services;
- Supply and capacity of community education and training services; and
- Learning of traditional knowledge, which includes culture, language, and Natural Laws.

Information on Education and Training Services and Facilities of communities was collected from Statistics Canada, municipal and provincial government websites, and First Nation research studies.

The Shibogama Education Department provides assistance tWawakapewin First Nation Wawakapewin First Nation students, but there is no school on-reserve (Shibogama First Nations Council, 2023e). It is the hope of the community leadership that the recent connection of the community to the provincial grid, a new school may enable community members to return to the community on a sustainable basis (Tbnewswatch, 2023).

3.5 Emergency and Protective Services

The socio-economic baseline includes a description of the following Emergency and Protective Services where information is available within the communities:

- Police;
- Fire; and
- Emergency Medical Services.

Police services in most Indigenous communities in the Nishnawbe Aski territory are provided by Nishnawbe Aski Police Service (NAPS), the Anishinabek Police Service (APS), municipal police services or the Ontario Provincial Police (OPP). Fire services typically include both volunteer, and community and municipal fire services and departments.

NAPS is the largest First Nations police service in Canada, serving 34 communities in the Nishnawbe Aski Nation territory which covers two-thirds of Ontario (NAPS, 2023). NAPS is headquartered in Thunder Bay and divided into three regions – Northeast, Northwest and Central Region (NAPS Detachments, 2023). They currently employ 230 uniformed officers and 40 civilians (NAPS, 2023).

It is understood that police services are not available in Wawapakewin; however, the NAPS detachment in Kasabonika Lake First Nation has a detachment of 3 constables, approximately 45 km away (NAPS, 2023).

Emergency medical services in fly-in First Nation communities are limited in nature and tend to be supported by regional service centres. If emergency care is required within the Indigenous communities, patients are typically transported by air ambulance to the larger regional service centres. In Wawakapewin, health services are available at the Kasabonika Lake nursing station, approximately 37 km away, and hospital care is available in Sioux Lookout via the Kasabonika Lake airstrip.

Where information is available, community input indicates a general need for additional emergency and protective services to address socio-economic challenges experienced in the Indigenous communities.

DRAFT

3.6 Community Infrastructure

The socio-economic baseline includes a description of the following Community Infrastructure (based on available information):

- Drinking Water;
- Wastewater Plants;
- Electricity Supply; and
- Solid Waste Management.

Existing community infrastructure is limited within the Indigenous communities and generally requires minor to significant upgrades to meet health standards. Community Infrastructure in Wawakapewin First Nation is described in Table 3-14.

Table 3-14: Description of Community Infrastructure in Wawakapewin First Nation

Drinking Water	Wastewater	Electricity Supply	Solid Waste Management
▪ Small System Water Treatment System built in 1998. Construction of new wells and water plant underway. ▪ Water Quality: There is no current drinking water advisory for the community. The long-term drinking water advisory was lifted in March 2022 following investments in new wells and package treatment plant and training.	N/A	▪ The community was connected to the provincial electricity system in September 2023 as part of the Wataynikaneyap Power project.	Wawakapewin First Nation refuse site.

3.7 Transportation

The socio-economic baseline includes a description of the following details on transportation where information is available.

- Road Transportation Network;
- Road Traffic Volumes;
- Vehicle Collisions;
- Air Transportation; and
- Waterways.

Communities described in the socio-economic baseline include both Indigenous communities that are fly-in and also those connected to the provincial highway system, as well as municipalities that have well connected transportation systems.

There is an array of multimodal transportation infrastructure available in the region, including the rail network, the provincial highway system, other all-season roads, winter roads, and airports (municipal, remote and international) (IBI Group & Hemson Consulting Ltd, 2016).

Most of the First Nations communities in the Regional Study Area are only reachable by remote airports or by winter roads, while other communities, predominantly in the south, have access to the provincial highway network.

DRAFT

Wawakapewin First Nation is accessible via the Pickle Lake/ Kingfisher – Asheweig Winter Road Corridor which connects to the Northern Ontario Resource Trail (NORT) / Highway 808, an all-season road that runs north from Pickle Lake. The Kingfisher – Asheweig Winter Road corridor is one of three winter road systems connecting communities from the NORT. The Kingfisher – Asheweig Winter Road Corridor connects six First Nation communities (MNDM, 2020).

3.7.1 Winter Road Traffic Volumes

Information is not currently available.

3.7.2 Air Transportation Network in Wawakapewin First Nation

Air transport for Wawakapewin First Nation is provided by float plane seasonally, e.g., via charter plane companies such as Bamaji Air Inc. (Bamaji Air Inc., 2023). The closest airstrip is at Kasabonika Lake First Nation, 37 km from the community.

3.7.3 Waterways in Wawakapewin First Nation Traditional Territory

Waterways are an integral part of community life. Waterways have been and continue to be an important socio-cultural and economic part of daily life of Indigenous communities. They connect families and friends and provide an important part of the transportation network. Wawakapewin First Nation traditional territories are within the secondary watersheds of Severn River and Winisk River (Government of Ontario, 2023).

Historically, summer travel routes were used by Wawakapewin community members in the early spring to travel to other communities, in particular Wapekeka First Nation on Angling Lake and Kitchenuhmaykoosib on Big Trout Lake, connecting from the Asheweig River watershed to the Otter River and Fawn River watersheds, as part of the Severn River system. Community members also travelled to Kasabonika Lake First Nation along the Asheweig River; to a lesser extent to the south as far as North Caribou Lake First Nation, Pickle Lake and Mishkeegogamang First Nation; and southeast to Neskantaga First Nation on Attawapiskat Lake, via Wunnummin First Nation and Nibinamik First Nation.

3.8 Community Well-Being and Safety

3.8.1 Community Well-Being

Community well-being and safety are critical factors in identifying the condition of First Nation communities. Despite improvements in community well-being over the last 35 years, the socio-economic gap between First Nation communities and non-Indigenous communities remains (Statistics Canada, 2019b). Safety is a principal concern among First Nation communities due to historical and intergenerational trauma persisting throughout Canada, and many First Nation members experience racism as a result (Perrault, 2022). The socio-economic baseline provides information that will enable the assessment of effects on community well-being and safety.
